

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

THREE LECTURES

DELIVERED IN 1864 AND 1868.

BY

JOHN RUSKIN, M.A.

I. OF KINGS' TREASURIES.

II. OF QUEENS' GARDENS.

III. OF THE MYSTERY OF LIFE.

REVISED EDITION.

NEW YORK:
JOHN B. ALDEN, PUBLISHER.
1885.

TROW'S
PRINTING AND BOOKBINDING COMPANY,
NEW YORK.

PREFACE.

BEING now fifty-one years old, and little likely to change my mind hereafter on any important subject of thought (unless through weakness of age), I wish to publish a connected series of such parts of my works as now seem to me right, and likely to be of permanent use. In doing so I shall omit much, but not attempt to mend what I think worth reprinting. A young man necessarily writes otherwise than an old one, and it would be worse than wasted time to try to recast the juvenile language: nor is it to be thought that I am ashamed even of what I cancel; for great part of my earlier work was rapidly written for temporary purposes, and is now unnecessary, though true, even to truism. What I wrote about religion, was, on the contrary, painstaking, and, I think, forcible, as compared with most religious writing; especially in its frankness and fearlessness: but it was wholly mistaken; for I had been educated in the doctrines of a narrow sect, and had read history as obliquely as sectarians necessarily must.

Mingled among these either unnecessary or erroneous statements, I find, indeed, some that might be still of value; but these, in my earlier books, disfigured by affected language, partly through the desire to be thought a fine writer, and partly, as in the second volume of "Modern Painters," in the notion of returning as far as I could to what I thought the better style of old English literature, especially to that of my then favorite, in prose, Richard Hooker.

For these reasons, though, as respects either art, policy, or morality as distinct from religion, I not only

still hold, but would even wish strongly to re-affirm the substance of what I said in my earliest books, I shall reprint scarcely anything in this series out of the first and second volumes of "Modern Painters;" and shall omit much of the "Seven Lamps" and "Stones of Venice:" but all my books written within the last fifteen years will be republished without change, as new editions of them are called for, with here and there perhaps an additional note, and having their text divided, for convenient reference, into paragraphs consecutive through each volume. I shall also throw together the shorter fragments that bear on each other, and fill in with such unprinted lectures or studies as seem to me worth preserving, so as to keep the volumes, on an average, composed of about a hundred leaves each.

The first book of which a new edition is required chances to be "Sesame and Lilies," from which I now detach the old preface, about the Alps, for use elsewhere;* and to which I add a lecture given in Ireland on a subject closely connected with that of the book itself. I am glad that it should be the first of the complete series, for many reasons; though in now looking over these two lectures, I am painfully struck by the waste of good work in them. They cost me much thought, and much strong emotion; but it was foolish to suppose that I could rouse my audiences in a little while to any sympathy with the temper into which I had brought myself by years of thinking over subjects full of pain; while, if I missed my purpose at the time, it was little to be hoped I could attain it afterwards; since phrases written for oral delivery become ineffective when quietly read. Yet I should only take away what good is in them if I tried to translate them into the language of books; nor, indeed, could I at all have done so at the time of their delivery, my thoughts then habitually and impatiently putting themselves into forms fit only for emphatic speech; and thus I am startled, in my review of them,

*The original preface is retained in this edition.—AM. PUB.

to find that, though there is much (forgive me the impertinence) which seems to me accurately and energetically said, there is scarcely anything put in a form to be generally convincing, or even easily intelligible; and I can well imagine a reader laying down the book without being at all moved by it, still less guided, to any definite course of action.

I think, however, if I now say briefly and clearly what I meant my hearers to understand, and what I wanted, and still would fain have them to do, there may afterwards be found some better service in the passionately written text.

The first Lecture says, or tries to say, that, life being very short, and the quiet hours of it few, we ought to waste none of them in reading valueless books; and that valuable books should, in a civilized country, be within the reach of every one, printed in excellent form, for a just price; but not in any vile, vulgar, or, by reason of smallness of type, physically injurious form, at a vile price. For we none of us need many books, and those which we need ought to be clearly printed, on the best paper, and strongly bound. And though we are, indeed, now, a wretched and poverty-struck nation, and hardly able to keep soul and body together, still, as no person in decent circumstances would put on his table confessedly bad wine, or bad meat, without being ashamed, so he need not have on his shelves ill-printed or loosely and wretchedly-stitched books; for, though few can be rich, yet every man who honestly exerts himself may, I think, still provide, for himself and his family, good shoes, good gloves, strong harness for his cart or carriage horses, and stout leather binding for his books. And I would urge upon every young man, as the beginning of his due and wise provision for his household, to obtain as soon as he can, by the severest economy, a restricted, serviceable, and steadily—however slowly—increasing, series of books for use through life; making his little library, of all the furniture in his room, the most studied and decorative piece; every

volume having its assigned place, like a little statue in its niche, and one of the earliest and strictest lessons to the children of the house being how to turn the pages of their own literary possessions lightly and deliberately, with no chance of tearing or dogs' ears.

That is my notion of the founding of King's Treasuries; and the first Lecture is intended to show somewhat the use and preciousness of their treasures: but the two following ones have wider scope, being written in the hope of awakening the youth of England, so far as my poor words might have any power with them, to take some thought of the purposes of the life into which they are entering, and the nature of the world they have to conquer.

These two lectures are fragmentary and ill-arranged, but not, I think, diffuse or much compressible. The entire gist and conclusion of them, however, is in the last six paragraphs of the third lecture, which I would beg the reader to look over not once nor twice (rather than any other part of the book), for they contain the best expression I have yet been able to put in words of what, so far as is within my power, I mean henceforward both to do myself, and to plead with all over whom I have any influence, to do also according to their means: the letters begun on the first day of this year, to the workmen of England, having the object of originating, if possible, this movement among them, in true alliance with whatever trustworthy element of help they can find in the higher classes. After these paragraphs, let me ask you to read, by the fiery light of recent events, the fable at p. 104, and also the four concluding paragraphs; and observe, my statement respecting the famine at Orissa is not rhetorical, but certified by official documents as within the truth. Five hundred thousand persons, *at least*, died by starvation in our British dominions, wholly in consequence of carelessness and want of forethought. Keep that well in your memory; and note it as the best possible illustration of modern political economy in true practice, and of the relations it has accom-

plished between Supply and Demand. Then begin the second lecture, and all will read clear enough, I think, to the end; only, since that second lecture was written, questions have arisen respecting the education and claims of women which have greatly troubled simple minds and excited restless ones. I am sometimes asked my thoughts on this matter, and I suppose that some girl readers of the second lecture may at the end of it desire to be told summarily what I would have them do and desire in the present state of things. This, then, is what I would say to any girl who had confidence enough in me to believe what I told her, or do what I ask her.

First, be quite sure of one thing, that, however much you may know, and whatever advantages you may possess, and however good you may be, you have not been singled out, by the God who made you, from all the other girls in the world, to be especially informed respecting His own nature and character. You have not been born in a luminous point upon the surface of the globe, where a perfect theology might be expounded to you from your youth up, and where everything you were taught would be true, and everything that was enforced upon you, right. Of all the insolent, all the foolish persuasions that by any chance could enter and hold your empty little heart, this is the proudest and foolishhest,—that you have been so much the darling of the Heavens, and favorite of the Fates, as to be born in the very nick of time, and in the punctual place, when and where pure Divine truth had been sifted from the errors of the Nations; and that your papa had been providentially disposed to buy a house in the convenient neighborhood of the steeple under which that Immaculate and final verity would be beautifully proclaimed. Do not think it, child; it is not so. This, on the contrary, is the fact,—unpleasant you may think it; pleasant, it seems to *me*,—that you, with all your pretty dresses, and dainty looks, and kindly thoughts, and saintly aspirations, are not one whit more thought of or loved by

the great Maker and Master than any poor little red, black, or blue savage, running wild in the pestilent woods, or naked on the hot sands of the earth: and that, of the two, you probably know less about God than she does; the only difference being that she thinks little of Him that is right, and you, much that is wrong.

That, then, is the first thing to make sure of;—that you are not yet perfectly well informed on the most abstruse of all possible subjects, and that, if you care to behave with modesty or propriety, you had better be silent about it.

The second thing which you may make sure of is, that however good you may be, you have faults; that however dull you may be, you can find out what some of them are; and that however slight they may be, you had better make some—not too painful, but patient—effort to get quit of them. And so far as you have confidence in me at all, trust me for this, that how many soever you may find or fancy your faults to be, there are only two that are of real consequence,—Idleness and Cruelty. Perhaps you may be proud. Well, we can get much good out of pride, if only it be not religious. Perhaps you may be vain: it is highly probable; and very pleasant for the people who like to praise you. Perhaps you are a little envious: that is really very shocking; but then—so is everybody else. Perhaps, also, you are a little malicious, which I am truly concerned to hear, but should probably only the more, if I knew you, enjoy your conversation. But whatever else you may be, you must not be useless, and you must not be cruel. If there is any one point which, in six thousand years of thinking about right and wrong, wise and good men have agreed upon, or successively by experience discovered, it is that God dislikes idle and cruel people more than any other;—that His first order is, “Work while you have light;” and His second, “Be merciful while you have mercy.”

“Work while you have light,” especially while you have the light of morning. There are few things

more wonderful to me than that old people never tell young ones how precious their youth is. They sometimes sentimentally regret their own earlier days; sometimes prudently forget them; often foolishly rebuke the young, often more foolishly indulge, often most foolishly thwart and restrain; but scarcely ever warn or watch them. Remember, then, that I, at least, have warned *you*, that the happiness of your life, and its power, and its part and rank in earth or in heaven, depend on the way you pass your days now. They are not to be sad days; far from that, the first duty of young people is to be delighted and delightful; but they are to be in the deepest sense solemn days. There is no solemnity so deep, to a rightly-thinking creature, as that of dawn. But not only in that beautiful sense, but in all their character and method, they are to be solemn days. Take your Latin dictionary, and look out "*sollennis*," and fix the sense of the word well in your mind, and remember that every day of your early life is ordaining irrevocably, for good or evil, the custom and practice of your soul; ordaining either sacred customs of dear and lovely recurrence, or trenching deeper and deeper the furrows for seed of sorrow. Now, therefore, see that no day passes in which you do not make yourself a somewhat better creature; and in order to do that, find out, first, what you are now. Do not think vaguely about it; take pen and paper, and write down as accurate a description of yourself as you can, with the date to it. If you dare not do so, find out why you dare not, and try to get strength of heart enough to look yourself fairly in the face, in mind as well as body. I do not doubt but that the mind is a less pleasant thing to look at than the face, and for that very reason it needs more looking at; so always have two mirrors on your toilet table, and see that with proper care you dress body and mind before them daily. After the dressing is once over for the day, think no more about it: as your hair will blow about your ears, so your temper and thoughts will get ruffled with the day's

work, and may need, sometimes, twice dressing; but I don't want you to carry about a mental pocketcomb; only to be smooth braided always in the morning.

Write down then, frankly, what you are, or, at least, what you think yourself, not dwelling upon those inevitable faults which I have just told you are of little consequence, and which the action of a right life will shake or smooth away; but that you may determine to the best of your intelligence what you are good for, and can be made into. You will find that the mere resolve not to be useless, and the honest desire to help other people, will, in the quickest and delicatest ways, improve yourself. Thus, from the beginning, consider all your accomplishments as means of assistance to others; read attentively, in this volume, pages 22-25, and 76-79, and you will understand what I mean, with respect to languages and music. In music especially you will soon find what personal benefit there is in being serviceable: it is probable that, however limited your powers, you have voice and ear enough to sustain a note of moderate compass in a concerted piece;—that, then, is the first thing to make sure you can do. Get your voice disciplined and clear, and think only of accuracy; never of effect or expression: if you have any soul worth expressing it will show itself in your singing; but most likely there are very few feelings in you, at present, needing any particular expression; and the one thing you have to do is to make a clear-voiced little instrument of yourself, which other people can entirely depend upon for the note wanted. So, in drawing, as soon as you can set down the right shape of anything, and thereby explain its character to another person, or make the look of it clear and interesting to a child, you will begin to enjoy the art vividly for its own sake, and all your habits of mind and powers of memory will gain precision; but if you only try to make showy drawings for praise, or pretty ones for amusement, your drawing will have little or real interest for you, and no educational power whatever.

Then, besides this more delicate work, resolve to do every day some that is useful in the vulgar sense. Learn first thoroughly the economy of the kitchen; the good and bad qualities of every common article of food, and the simplest and best modes of their preparation: when you have time, go and help in the cooking of poorer families, and show them how to make as much of everything as possible, and how to make little, nice; coaxing and tempting them into tidy and pretty ways, and pleading for well-folded table-cloths, however coarse, and for a flower or two out of the garden to strew on them. If you manage to get a clean table-cloth, bright plates on it, and a good dish in the middle, of your own cooking, you may ask leave to say a short grace; and let your religious ministries be confined to that much for the present.

Again, let a certain part of your day (as little as you choose, but not to be broken in upon) be set apart for making strong and pretty dresses for the poor. Learn the sound qualities of all useful stuffs, and make everything of the best you can get, whatever its price. I have many reasons for desiring you to do this,—too many to be told just now,—trust me, and be sure you get everything as good as can be: and if, in the villainous state of moderate trade, you cannot get it good at any price, buy its raw material, and set some of the poor women about you to spin and weave, till you have got stuff that can be trusted: and then, every day, make some little piece of useful clothing, sewn with your own fingers as strongly as it can be stitched; and embroider it or otherwise beautify it moderately with fine needlework, such as a girl may be proud of having done. And accumulate these things by you until you hear of some honest persons in need of clothing, which may often too sorrowfully be; and, even though you should be deceived, and give them to the dishonest, and hear of their being at once taken to the pawnbroker's, never mind that, for the pawnbroker must sell them to some one who has need of them. That is no business of yours; what

concerns you is only that when you see a half-naked child, you should have good and fresh clothes to give it, if its parents will let it be taught to wear them. If they will not, consider how they came to be of such a mind, which it will be wholesome for you beyond most subjects of inquiry to ascertain. And after you have gone on doing this a little while, you will begin to understand the meaning of at least one chapter of your Bible, Proverbs xxxi., without need of any labored comment, sermon, or meditation.

In these, then (and of course in all minor ways besides, that you can discover in your own household), you must be to the best of your strength usefully employed during the greater part of the day, so that you may be able at the end of it to say, as proudly as any peasant, that you have not eaten the bread of idleness. Then secondly, I said, you are not to be cruel. Perhaps you think there is no chance of your being so; and indeed I hope it is not likely that you should be deliberately unkind to any creature; but unless you are deliberately kind to every creature, you will often be cruel to many. Cruel, partly through want of imagination (a far rarer and weaker faculty in women than men), and yet more, at the present day, through the subtle encouragement of your selfishness by the religious doctrine that all which we now suppose to be evil will be brought to a good end; doctrine practically issuing, not in less earnest efforts that the immediate unpleasantness may be averted from ourselves, but in our remaining satisfied in the contemplation of its ultimate objects, when it is inflicted on others.

It is not likely that the more accurate methods of recent mental education will now long permit young people to grow up in the persuasion that, in any danger or distress, they may expect to be themselves saved by the providence of God, while those around them are lost by His Improvidence: but they may be yet long restrained from rightly kind action, and long accustomed to endure both their own pain occasionally, and the pain of others always, with an unwise

patience, by misconception of the eternal and incurable nature of real evil. Observe, therefore, carefully in this matter: there are degrees of pain, as degrees of faultfulness, which are altogether conquerable, and which seem to be merely forms of wholesome trial or discipline. Your fingers tingle when you go out on a frosty morning, and are all the warmer afterwards; your limbs are weary with wholesome work, and lie down in the pleasanter rest; you are tried for a little while by having to wait for some promised good, and it is all the sweeter when it comes. But you cannot carry the trial past a certain point. Let the cold fasten on your hand in an extreme degree, and your fingers will moulder from their sockets. Fatigue yourself, but once, to utter exhaustion, and to the end of life you shall not recover the former vigor of your frame. Let heart-sickness pass beyond a certain bitter point, and the heart loses its life forever.

Now, the very definition of evil is in this irremediableness. It means sorrow, or sin, which end in death; and assuredly, as far as we know, or can conceive, there are many conditions both of pain and sin which cannot but so end. Of course we are ignorant and blind creatures, and we cannot know what seeds of good may be in present suffering, or present crime; but with what we cannot know, we are not concerned. It is conceivable that murderers and liars may in some distant world be exalted into a higher humanity than they could have reached without homicide or falsehood; but the contingency is not one by which our actions should be guided. There is, indeed, a better hope that the beggar, who lies at our gates in misery, may, within gates of pearl be comforted; but the Master, whose words are our only authority for thinking so, never Himself inflicted disease as a blessing, nor sent away the hungry unfed, or the wounded unhealed.

Believe me, then, the only right principle of action here, is to consider good and evil as defined by our natural sense of both; and to strive to promote the

one, and to conquer the other, with as hearty endeavor as if there were, indeed, no other world than this. Above all, get quit of the absurd idea that Heaven will interfere to correct great errors, while allowing its laws to take their course in punishing small ones. If you prepare a dish of food carelessly, you do not expect Providence to make it palatable; neither, if, through years of folly, you misguide your own life, need you expect Divine interference to bring round everything at last for the best. I tell you, positively, the world is not so constituted: the consequences of great mistakes are just as sure as those of small ones, and the happiness of your whole life, and of all the lives over which you have power, depends as literally on your own common sense and discretion as the excellence and order of the feast of a day.

Think carefully and bravely over these things, and you will find them true: having found them so, think also carefully over your own position in life. I assume that you belong to the middle or upper classes, and that you would shrink from descending into a lower sphere. You may fancy you would not: nay, if you are very good, strong-hearted, and romantic, perhaps you really would not; but it is not wrong that you should. You have then, I suppose, good food, pretty rooms to live in, pretty dresses to wear, power of obtaining every rational and wholesome pleasure; you are, moreover, probably gentle and grateful, and in the habit of every day thanking God for these things. But why do you thank Him? Is it because in these matters, as well as in your religious knowledge, you think He has made a favorite of you? Is the essential meaning of your thanksgiving, "Lord, I thank thee that I am not as other girls are, not in that I fast twice in the week while they feast, but in that I feast seven times a week, while they fast," and are you quite sure this is a pleasing form of thanksgiving to your Heavenly Father? Suppose you saw one of your own true earthly sisters, Lucy or Emily, cast out of your mortal father's house, starving, helpless, heart-

broken ; and that every morning when you went into your father's room, you said to him, " How good you are, father, to give me what you don't give Lucy," are you sure that, whatever anger your parent might have just cause for, against your sister, he would be pleased by that thanksgiving, or flattered by that praise ? Nay, are you even sure that you *are* so much the favorite : suppose that, all this while, he loves poor Lucy just as well as you, and is only trying you through her pain, and perhaps not angry with her in anywise, but deeply angry with you, and all the more for your thanksgivings ? Would it not be well that you should think, and earnestly too over this standing of yours ; and all the more if you wish to believe that text, which clergymen so much dislike preaching on, " How hardly shall they that have riches enter into the Kingdom of God ? " You do not believe it now, or you would be less complacent in your state ; and you cannot believe it all, until you know that the Kingdom of God means—" not meat and drink, but justice, peace, and joy in the Holy Ghost," nor until you know also that such joy is not by any means, necessarily, in going to church, or in singing hymns ; but may be joy in a dance, or joy in a jest, or joy in anything you have deserved to possess, or that you are willing to give ; but joy in nothing that separates you, as by any strange favor, from your fellow-creatures, that exalts you through their degradation—exempts you from their toil—or indulges you in time of their distress.

Think, then, and some day, I believe, you will feel also—no morbid passion of pity such as would turn you into a black Sister of Charity, but the steady fire of perpetual kindness which will make you a bright one. I speak in no disparagement of them ; I know well how good the Sisters of Charity are, and how much we owe to them ; but all these professional pieties (except so far as distinction or association may be necessary for effectiveness of work) are in their spirit wrong, and in practice merely plaster the sores of disease that ought never have been permitted to

exist ; encouraging at the same time the herd of less excellent women in frivolity, by leading them to think that they must either be good up to the black standard, or cannot be good for anything. Wear a costume, by all means, if you like ; but let it be a cheerful and becoming one ; and be in your heart a Sister of Charity always, without either veiled or voluble declaration of it.

As I pause, before ending my preface—thinking of one or two more points that are difficult to write of—I find a letter in *The Times*, from a French lady, which says all I want so beautifully, that I will print it just as it stands :

“SIR,—It is often said that one example is worth many sermons. Shall I be judged presumptuous if I point out one, which seems to me so striking just now, that, however painful, I cannot help dwelling upon it ?

“It is the share, the sad and large share, that French society and its recent habits of luxury, of expenses, of dress, of indulgence in every kind of extravagant dissipation, has to lay to its own door in its actual crisis of ruin, misery, and humiliation. If our *ménagères* can be cited as an example to English housewives, so, alas ! can other classes of our society be set up as an example—*not* to be followed.

“Bitter must be the feelings of many a French woman whose days of luxury and expensive habits are at an end ; and whose bills of bygone splendor lie with a heavy weight on her conscience, if not on her purse !

“With us the evil has spread high and low. Everywhere have the examples given by the highest ladies in the land been followed but too successfully.

“Every year did dress become more extravagant, entertainments more costly, expenses of every kind more considerable. Lower and lower became the tone of society, its good breeding, its delicacy. More and more were *monde* and *demi-monde* associated in

newspaper accounts of fashionable doings, in scandalous gossip, on race courses, in *premières représentations*, in imitation of each other's costumes, *mobiliers* and slang.

"Living beyond one's means became habitual—almost necessary—for every one to keep up with, if not to go beyond, every one else.

"What the result of all this has been we now see in the wreck of our prosperity, in the downfall of all that seemed brightest and highest.

"Deeply and fearfully impressed by what my own country has incurred and is suffering, I cannot help feeling sorrowful when I see in England signs of our besetting sins appearing also. Paint and chignons, slang and vaudevilles, knowing 'Anonymas' by name, and reading doubtfully moral novels, are in themselves small offences, although not many years ago they would have appeared very heinous ones, yet they are quick and tempting conveyances on a very dangerous high-road.

"I would that all Englishwomen knew how they are looked up to from abroad—what a high opinion, what honor and reverence we foreigners have for their principles, their truthfulness, the fresh and pure innocence of their daughters, the healthy youthfulness of their lovely children.

"May I illustrate this by a short example which happened very near me? During the days of the *émeutes* of 1848, all the houses in Paris were being searched for firearms by the mob. The one I was living in contained none, as the master of the house repeatedly assured the furious and incredulous Republicans. They were going to lay violent hands on him, when his wife, an English lady, hearing the loud discussion, came bravely forward and assured them that no arms were concealed. 'Vous êtes anglaise, nous vous croyons; les anglaises disent toujours la vérité,' was the immediate answer, and the rioters quietly left.

"Now, Sir, shall I be accused of unjust criticism if, loving and admiring your country, as these lines will

prove, certain new features strike me as painful discrepancies in English life?

"Far be it from me to preach the contempt of all that can make life lovable and wholesomely pleasant. I love nothing better than to see a woman nice, neat, elegant, looking her best in the prettiest dress that her taste and purse can afford, or your bright, fresh young girls fearlessly and perfectly sitting their horses, or adorning their houses as pretty [*sic*; it is not quite grammar, but it is better than if it were;] as care, trouble, and refinement can make them.

"It is the degree *beyond* that which to us has proved so fatal, and that I would our example could warn you from, as a small repayment for your hospitality and friendliness to us in our days of trouble.

"May Englishwomen accept this in a kindly spirit as a new-year's wish from

"FRENCH LADY.

"*Dec. 29.*"

That, then, is the substance of what I would fain say convincingly, if it might be, to my girl friends; at all events with certainty in my own mind that I was thus far a safe guide to them.

For other and older readers it is needful I should write a few words more, respecting what opportunity I have had to judge, or right I have to speak, of such things; for, indeed, too much of what I have said about women has been said in faith only. A wise and lovely English lady told me, when "*Sesame and Lilies*" first appeared, that she was sure the *Sesame* would be useful, but that in the *Lilies* I had been writing of what I knew nothing about. Which was in a measure too true, and also that it is more partial than my writings are usually: for as Ellesmere spoke his speech on the — intervention, not indeed otherwise than he felt, but yet altogether for the sake of Gretchen, so I wrote the *Lilies* to please one girl; and were it not for what I remember of her, and of few besides, should now perhaps recast some of the sen-

tences in the *Lilies* in a very different tone: for as years have gone by, it has chanced to me, untowardly in some respects, fortunately in others (because it enables me to read history more clearly), to see the utmost evil that is in women, while I have had but to believe the utmost good. The best women are indeed necessarily the most difficult to know; they are recognized chiefly in the happiness of their husbands and the nobleness of their children; they are only to be divined, not discerned, by the stranger; and, sometimes, seem almost helpless except in their homes; yet without the help of one of them,* to whom this book is dedicated, the day would probably have come before now, when I should have written and thought no more.

On the other hand, the fashion of the time renders whatever is forward, coarse, or senseless, in feminine nature, too palpable to all men:—the weak picturesqueness of my earlier writings brought me acquainted with much of their emptiest enthusiasm; and the chances of later life gave me opportunities of watching women in states of degradation and vindictiveness which opened to me the gloomiest secrets of Greek and Syrian tragedy. I have seen them betray their household charities to lust, their pledged love to devotion; I have seen mothers dutiful to their children, as Medea; and children dutiful to their parents, as the daughter of Herodias: but my trust is still unmoved in the preciousness of the natures that are so fatal in their error, and I leave the words of the *Lilies* unchanged; believing, yet, that no man ever lived a right life who had not been chastened by a woman's love, strengthened by her courage, and guided by her discretion.

What I might myself have been, so helped, I rarely indulge in the idleness of thinking; but what I am, since I take on me the function of a teacher, it is well that the reader should know, as far as I can tell him.

* φίλη.

Not an unjust person ; not an unkind one ; not a false one ; a lover of order, labor, and peace. That, it seems to me, is enough to give me right to say all I care to say on ethical subjects : more, I could only tell definitely through details of autobiography such as none but prosperous and (in the simple sense of the word) faultless, lives could justify ;—and mine has been neither. Yet, if any one, skilled in reading the torn manuscripts of the human soul, cares for more intimate knowledge of me, he may have it by knowing with what persons in past history I have most sympathy.

I will name three.

In all that is strongest and deepest in me,—that fits me for my work, and gives light or shadow to my being, I have sympathy with Guido Guinicelli.

In my constant natural temper, and thoughts of things and of people, with Marmontel.

In my enforced and accidental temper, and thoughts of things and of people, with Dean Swift.

Any one who can understand the natures of those three men, can understand mine ; and having said so much, I am content to leave both life and work to be remembered or forgotten, as their uses may deserve.

*Denmark Hill,
1st January, 1871.*

SESAME AND LILIES.

LECTURE I.—SESAME.

OF KINGS' TREASURIES.

*ἐξ αὐτῆς ἐξελεύσεται ἄρτος, * * * καὶ χάμα χουσίον.**

I BELIEVE, ladies and gentlemen, that my first duty this evening is to ask your pardon for the ambiguity of title under which the subject of lecture has been announced; and for having endeavored, as you may ultimately think, to obtain your audience under false pretences. For indeed I am not going to talk of kings, known as regnant, nor of treasures, understood to contain wealth; but of quite another order of royalty, and material of riches, than those usually acknowledged. And I had even intended to ask your attention for a little while on trust, and (as sometimes one contrives in taking a friend to see a favorite piece of scenery) to hide what I wanted most to show, with such imperfect cunning as I might, until we had unexpectedly reached the best point of view by winding paths. But since my good plain-spoken friend, Canon Anson, has already partly anticipated my reserved “trot for the avenue” in his first advertised title of subject, “How and What to Read;”—and as also I have heard it said, by men practised in public address, that hearers are never so much fatigued as by the endeavor to follow a speaker who gives them no clue to his purpose, I will take the slight mask off at once, and tell you plainly that I want to speak to you about

* Job xxviii. 5, 6.

books; and about the way we read them, and could, or should read them. A grave subject, you will say; and a wide one! Yes: so wide that I shall make no effort to touch the compass of it. I will try only to bring before you a few simple thoughts about reading, which press themselves upon me every day more deeply, as I watch the course of the public mind with respect to our daily enlarging means of education, and the answeringly wider spreading, on the levels, of the irrigation of literature. It happens that I have practically some connection with schools for different classes of youth: and I receive many letters from parents respecting the education of their children. In the mass of these letters, I am always struck by the precedence which the idea of a "position in life" takes above all other thoughts in the parents'—more especially in the mothers'—minds. "The education befitting such and such a *station in life*"—this is the phrase, this the object, always. They never seek, as far as I can make out, an education good in itself; the conception of abstract rightness in training rarely seems reached by the writer. But an education "which shall keep a good coat on my son's back;—an education which shall enable him to ring with confidence the visitors' bell at double-belled doors;—education which shall result ultimately in establishment of a double-belled door to his own house; in a word, which shall lead to advancement in life." It never seems to occur to the parents that there may be an education which, in itself, *is* advancement in Life;—that any other than that may perhaps be advancement in Death; and that this essential education might be more easily got, or given, than they fancy, if they set about it in the right way; while it is for no price, and by no favor, to be got, if they set about it in the wrong.

Indeed, among the ideas most prevalent and effective in the mind of this busiest of countries, I suppose the first—at least that which is confessed with the greatest frankness, and put forward as the fittest

stimulus to youthful exertion—is this of “Advancement in life.” My main purpose this evening is to determine, with you, what this idea practically includes, and what it should include.

Practically, then, at present, “advancement in life” means becoming conspicuous in life;—obtaining a position which shall be acknowledged by others to be respectable or honorable. We do not understand by this advancement, in general, the mere making of money, but the being known to have made it; not the accomplishment of any great aim, but the being seen to have accomplished it. In a word, we mean the gratification of our thirst for applause. That thirst, if the last infirmity of noble minds, is also the first infirmity of weak ones; and, on the whole, the strongest impulsive influence of average humanity: the greatest efforts of the race have always been traceable to, the love of praise, as its greatest catastrophes to the love of pleasure.

I am not about to attack or defend this impulse. I want you only to feel how it lies at the root of effort; especially of all modern effort. It is the gratification of vanity which is, with us, the stimulus of toil, and balm of repose; so closely does it touch the very springs of life, that the wounding of our vanity is always spoken of (and truly) as in its measure *mortal*; we call it “mortification,” using the same expression which we should apply to a gangrenous and incurable bodily hurt. And although few of us may be physicians enough to recognize the various effect of this passion upon health and energy, I believe most honest men know, and would at once acknowledge, its leading power with them as a motive. The seaman does not commonly desire to be made captain only because he knows he can manage the ship better than any other sailor on board. He wants to be made captain that he may be *called* captain. The clergyman does not usually want to be made a bishop only because he believes that no other hand can, as firmly as his, direct the diocese through its difficulties. He wants to be

made bishop primarily that he may be called "My Lord." And a prince does not usually desire to enlarge, or a subject to gain, a kingdom because he believes that no one else can as well serve the state upon the throne; but, briefly, because he wishes to be addressed as "Your Majesty," by as many lips as may be brought to such utterance.

This, then, being the main idea of advancement in life, the force of it applies, for all of us, according to our station, particularly to that secondary result of such advancement which we call "getting into good society." We want to get into good society, not that we have it, but that we may be seen in it; and our notion of its goodness depends primarily on its conspicuousness.

Will you pardon me if I pause for a moment to put what I fear you may think an impertinent question? I never can go on with an address unless I feel, or know, that my audience are either with me or against me: (I do not much care which, in beginning;) but I must know where they are; and I would fain find out, at this instant, whether you think I am putting the motives of popular action too low. I am resolved to-night, to state them low enough to be admitted as probable; for whenever, in my writings on Political Economy, I assume that a little honesty, or generosity, —or what used to be called "virtue"—may be calculated upon as a human motive of action, people always answer me, saying, "You must not calculate on that: that is not in human nature: you must not assume anything to be common to men but acquisitiveness and jealousy; no other feeling ever has influence on them, except accidentally, and in matters out of the way of business." I begin accordingly to-night low down in the scale of motives; but I must know if you think me right in doing so. Therefore, let me ask those who admit the love of praise to be usually the strongest motive in men's minds in seeking advancement, and the honest desire of doing any kind of duty to be an entirely secondary one, to hold up their hands. (*About a dozen of hands held up—the audience partly not be-*

ing sure the lecturer is serious, and partly shy of expressing opinion.) I am quite serious—I really do want to know what you think; however, I can judge by putting the reverse question. Will those who think that duty is generally the first, and love of praise the second motive, hold up their hands? *(One hand reported to have been held up, behind the lecturer.)* Very good: I see you are with me, and that you think I have not begun too near the ground. Now, without teasing you by putting farther question, I venture to assume that you will admit duty as at least a secondary or tertiary motive. You think that the desire of doing something useful, or obtaining some real good, is indeed an existent collateral idea, though a secondary one, in most men's desire of advancement. You will grant that moderately honest men desire place and office, at least in some measure for the sake of their beneficent power; and would wish to associate rather with sensible and well-informed persons than with fools and ignorant persons, whether they are seen in the company of the sensible ones or not. And finally, without being troubled by repetition of any common truisms about the preciousness of friends, and the influence of companions, you will admit, doubtless, that according to the sincerity of our desire that our friends may be true, and our companions wise,—and in proportion to the earnestness and discretion with which we choose both, will be the general chances of our happiness and usefulness.

But, granting that we had both the will and the sense to choose our friends well, how few of us have the power! or, at least, how limited, for most, in the sphere of choice! Nearly all our associations are determined by chance or necessity; and restricted within a narrow circle. We cannot know whom we would; and those whom we know, we cannot have at our side when we most need them. All the higher circles of human intelligence are, to those beneath, only momentarily and partially open. We may, by good fortune, obtain a glimpse of a great poet, and hear the sound of his voice;

or put a question to a man of science, and be answered good-humoredly. We may intrude ten minutes' talk on a cabinet minister, answered probably with words worse than silence, being deceptive; or snatch, once or twice in our lives, the privilege of throwing a bouquet in the path of a Princess, or arresting the kind glance of a Queen. And yet these momentary chances we covet; and spend our years, and passions, and powers in pursuit of little more than these; while, meantime, there is a society continually open to us, of people who will talk to us as long as we like, whatever our rank or occupation;—talk to us in the best words they can choose, and with thanks if we listen to them. And this society, because it is so numerous and so gentle,—and can be kept waiting round us all day long, not to grant audience, but to gain it;—kings and statesmen lingering patiently in those plainly furnished and narrow anterooms, our book-case shelves,—we make no account of that company,—perhaps never listen to a word they would say, all day long!

You may tell me, perhaps, or think within yourselves, that the apathy with which we regard this company of the noble, who are praying us to listen to them, and the passion with which we pursue the company, probably of the ignoble, who despise us, or who have nothing to teach us, are grounded in this,—that we can see the faces of the living men, and it is themselves, and not their sayings, with which we desire to become familiar. But it is not so. Suppose you never were to see their faces;—suppose you could be put behind a screen in the statesman's cabinet, or the prince's chamber, would you not be glad to listen to their words, though you were forbidden to advance beyond the screen? And when the screen is only a little less, folded in two, instead of four, and you can be hidden behind the cover of the two boards that bind a book, and listen, all day long, not to the casual talk, but to the studied, determined, chosen addresses of the wisest of men;—this station of audience, and honorable privy council, you despise!

But perhaps you will say that it is because the living people talk of things that are passing, and are of immediate interest to you, that you desire to hear them. Nay; that cannot be so, for the living people will themselves tell you about passing matters, much better in their writings than in their careless talk. But I admit that this motive does influence you, so far as you prefer those rapid and ephemeral writings to slow and enduring writings—books, properly so called. For all books are divisible into two classes, the books of the hour, and the books of all time. Mark this distinction—it is not one of quality only. It is not merely the bad book that does not last, and the good one that does. It is a distinction of species. There are good books for the hour, and good ones for all time; bad books for the hour, and bad ones for all time. I must define the two kinds before I go farther.

The good book of the hour, then—I do not speak of the bad ones—is simply the useful or pleasant talk of some person whom you cannot otherwise converse with, printed for you. Very useful often, telling you what you need to know; very pleasant often, as a sensible friend's present talk would be. These bright accounts of travels; good-humored and witty discussions of question; lively or pathetic story-telling in the form of novel; firm fact-telling, by the real agents concerned in the events of passing history;—all these books of the hour, multiplying among us as education becomes more general, are a peculiar characteristic and possession of the present age: we ought to be entirely thankful for them, and entirely ashamed of ourselves if we make no good use of them. But we make the worst possible use, if we allow them to usurp the place of true books: for, strictly speaking, they are not books at all, but merely letters or newspapers in good print. Our friend's letter may be delightful, or necessary, to-day: whether worth keeping or not, is to be considered. The newspaper may be entirely proper at breakfast time, but assuredly it is not reading for all day. So, though bound up in a volume, the long let-

ter which gives you so pleasant an account of the inns, and roads, and weather last year at such a place, or which tells you that amusing story, or gives you the real circumstances of such and such events, however valuable for occasional reference, may not be, in the real sense of the word, a "book" at all, nor, in the real sense, to be "read." A book is essentially not a talked thing, but a written thing; and written, not with the view of mere communication, but of permanence. The book of talk is printed only because its author cannot speak to thousands of people at once; if he could, he would—the volume is mere *multiplication* of his voice. You cannot talk to your friend in India; if you could, you would; you write instead: that is mere *conveyance* of voice. But a book is written, not to multiply the voice merely, not to carry it merely, but to preserve it. The author has something to say which he perceives to be true and useful, or helpfully beautiful. So far as he knows, no one else has yet said it; so far as he knows, no one else can say it. He is bound to say it, clearly and melodiously if he may; clearly, at all events. In the sum of his life he finds this to be the thing, or group of things, manifest to him;—this the piece of true knowledge, or sight, which his share of sunshine and earth has permitted him to seize. He would fain set it down forever; engrave it on rock, if he could; saying, "This is the best of me; for the rest, I ate, and drank, and slept, loved, and hated, like another; my life was as the vapor, and is not; but this I saw and knew: this, if anything of mine, is worth your memory." That is his "writing;" it is, in his small human way, and with whatever degree of true inspiration is in him, his inscription, or scripture. That is a "Book."

Perhaps you think no books were ever so written?

But, again, I ask you, do you at all believe in honesty, or at all in kindness? or do you think there is never any honesty or benevolence in wise people? None of us, I hope, are so unhappy as to think that. Well, whatever bit of a wise man's work is honestly

and benevolently done, that bit is his book, or his piece of art. It is mixed always with evil fragments—ill-done, redundant, affected work. But if you read rightly, you will easily discover the true bits, and those *are* the book.

Now books of this kind have been written in all ages by their greatest men ;—by great leaders, great statesmen, and great thinkers. These are all at your choice ; and life is short. You have heard as much before ;—yet have you measured and mapped out this short life and its possibilities ? Do you know, if you read this, that you cannot read that—that what you lose to-day you cannot gain to-morrow ? Will you go and gossip with your housemaid, or your stable-boy, when you may talk with queens and kings ; or flatter yourselves that it is with any worthy consciousness of your own claims to respect that you jostle with the common crowd for *entrée* here, and audience there, when all the while this eternal court is open to you, with its society wide as the world, multitudinous as its days, the chosen, and the mighty, of every place and time ? Into that you may enter always ; in that you may take fellowship and rank according to your wish ; from that, once entered into it, you can never be outcast but by your own fault ; by your aristocracy of companionship there, your own inherent aristocracy will be assuredly tested, and the motives with which you strive to take high place in the society of the living, measured, as to all the truth and sincerity that are in them, by the place you desire to take in this company of the Dead.

“ The place you desire,” and the place you *fit yourself for*, I must also say ; because, observe, this court of the past differs from all living aristocracy in this :—it is open to labor and to merit, but to nothing else. No wealth will bribe, no name overawe, no artifice deceive, the guardian of those Elysian gates. In the deep sense, no vile or vulgar person ever enters there. At the portières of that silent Faubourg St. Germain, there is but brief question, “ Do you deserve to en-

ter?" "Pass. Do you ask to be the companion of nobles? Make yourself noble, and you shall be. Do you long for the conversation of the wise? Learn to understand it, and you shall hear it. But on other terms?—no. If you will not rise to us, we cannot stoop to you. The living lord may assume courtesy, the living philosopher explain his thought to you with considerable pain; but here we neither feign nor interpret; you must rise to the level of our thoughts if you would be gladdened by them, and share our feelings, if you would recognize our presence."

This, then, is what you have to do, and I admit that it is much. You must, in a word, love these people, if you are to be among them. No ambition is of any use. They scorn your ambition. You must love them, and show your love in these two following ways:

1. First, by a true desire to be taught by them, and to enter into their thoughts. To enter into theirs, observe; not to find your own expressed by them. If the person who wrote the book is not wiser than you, you need not read it; if he be, he will think differently from you in many respects.

Very ready we are to say of a book, "How good this is—that's exactly what I think!" But the right feeling is, "How strange that is! I never thought of that before, and yet I see it is true; or if I do not now, I hope I shall, some day." But whether thus submissively or not, at least be sure that you go to the author to get at *his* meaning, not to find yours. Judge it afterwards, if you think yourself qualified to do so; but ascertain it first. And be sure also, if the author is worth anything, that you will not get at his meaning all at once;—nay, that at his whole meaning you will not for a long time arrive in any wise. Not that he does not say what he means, and in strong words too; but he cannot say it all; and what is more strange, will not, but in a hidden way and in parables, in order that he may be sure you want it. I cannot quite see the reason of this, nor analyze that cruel reticence in the breasts of wise men which makes them always hide

their deeper thought. They do not give it you by way of help, but of reward, and will make themselves sure that you deserve it before they allow you to reach it. But it is the same with the physical type of wisdom, gold. There seems, to you and me, no reason why the electric forces of the earth should not carry whatever there is of gold within it at once to the mountain tops, so that kings and people might know that all the gold they could get was there; and without any trouble of digging, or anxiety, or chance, or waste of time, cut it away, and coin as much as they needed. But nature does not manage it so. She puts it in little fissures in the earth, nobody knows where: you may dig long and find none; you must dig painfully to find any.

And it is just the same with men's best wisdom. When you come to a good book, you must ask yourself, "Am I inclined to work as an Australian miner would? Are my pickaxes and shovels in good order, and am I in good trim myself, my sleeves well up to the elbow, and my breath good, and my temper?" And, keeping the figure a little longer, even at cost of tiresomeness, for it is a thoroughly useful one, the metal you are in search of being the author's mind or meaning, his words are as the rock which you have to crush and smelt in order to get at it. And your pickaxes are your own care, wit, and learning; your smelting-furnace is your own thoughtful soul. Do not hope to get at any good author's meaning without those tools and that fire; often you will need sharpest, finest chiselling, and patientest fusing, before you can gather one grain of the metal.

✓ And, therefore, first of all, I tell you, earnestly and authoritatively, (I *know* I am right in this,) you must get into the habit of looking intensely at words, and assuring yourself of their meaning, syllable by syllable—nay, letter by letter. For though it is only by reason of the opposition of letters in the function of signs, to sounds in function of signs, that the study of books is called "literature," and that a man versed in it is called,

by the consent of nations, a man of letters instead of a man of books, or of words, you may yet connect with that accidental nomenclature this real principle:—that you might read all the books in the British Museum (if you could live long enough), and remain an utterly “illiterate,” uneducated person; but that if you read ten pages of a good book, letter by letter,—that is to say, with real accuracy,—you are for evermore in some measure an educated person. The entire difference between education and non-education (as regards the merely intellectual part of it), consists in this accuracy. A well-educated gentleman may not know many languages,—may not be able to speak any but his own,—may have read very few books. But whatever language he knows, he knows precisely; whatever word he pronounces he pronounces rightly; above all, he is learned in the *peerage* of words; knows the words of true descent and ancient blood, at a glance, from words of modern canaille; remembers all their ancestry—their intermarriages, distantest relationships, and the extent to which they were admitted, and offices they held, among the national noblesse of words at any time, and in any country. But an uneducated person may know by memory any number of languages, and talk them all, and yet truly know not a word of any,—not a word even of his own. An ordinarily clever and sensible seaman will be able to make his way ashore at most ports; yet he has only to speak a sentence of any language to be known for an illiterate person: so also the accent, or turn of expression of a single sentence will at once mark a scholar. And this is so strongly felt, so conclusively admitted by educated persons, that a false accent or a mistaken syllable is enough, in the parliament of any civilized nation, to assign to a man a certain degree of inferior standing forever. And this is right; but it is a pity that the accuracy insisted on is not greater, and required to a serious purpose. It is right that a false Latin quantity should excite a smile in the House of Commons; but it is wrong that a false English meaning should not excite a frown there. Let

the accent of words be watched, by all means, but let their meaning be watched more closely still, and fewer will do the work. A few words well chosen and well distinguished, will do work that a thousand cannot, when every one is acting, equivocally, in the function of another. Yes; and words, if they are not watched, will do deadly work sometimes. There are masked words droning and skulking about us in Europe just now,—(there never were so many, owing to the spread of a shallow, blotching, blundering, infectious “information,” or rather deformation, everywhere, and to the reaching of catechisms and phrases at schools instead of human meanings)—there are masked words abroad, I say, which nobody understands, but which everybody uses, and most people will also fight for, live for, or even die for, fancying they mean this, or that, or the other, of things dear to them: for such words wear chamæleon cloaks—“groundlion” cloaks, of the color of the ground of any man’s fancy: on that ground they lie in wait, and rend him with a spring from it. There were never creatures of prey so mischievous, never diplomatists so cunning, never poisoners so deadly, as these masked words; they are the unjust stewards of all men’s ideas: whatever fancy or favorite instinct a man most cherishes, he gives to his favorite masked word to take care of for him; the word at last comes to have an infinite power over him,—you cannot get at him but by its ministry. And in languages so mongrel in breed as the English, there is a fatal power of equivocation put into men’s hands, almost whether they will or no, in being able to use Greek or Latin forms for a word when they want it to be respectable, and Saxon or otherwise common forms when they want to discredit it. What a singular and salutary effect, for instance, would be produced on the minds of people who are in the habit of taking the Form of the words they live by, for the Power of which those words tell them, if we always either retained, or refused, the Greek form “biblos,” or “biblion,” as the right expression for “book”—instead of employing it only in the

one instance in which we wish to give dignity to the idea, and translating it everywhere else. How wholesome it would be for the many simple persons who worship the Letter of God's Word instead of its Spirit, (just as other idolaters worship His picture instead of His presence,) if, in such places (for instance) as Acts xix. 19 we retained the Greek expression, instead of translating it, and they had to read—"Many of them also which used curious arts, brought their bibles together, and burnt them before all men; and they counted the price of them, and found it fifty thousand pieces of silver!" Or if, on the other hand, we translated instead of retaining it, and always spoke of "the Holy Book," instead of "Holy Bible," it might come into more heads than it does at present that the Word of God, by which the heavens were, of old, and by which they are now kept in store,* cannot be made a present of to anybody in morocco binding; nor sown on any wayside by help either of steam plough or steam press; but is nevertheless being offered to us daily, and by us with contumely refused; and sown in us daily, and by us as instantly as may be, choked.

So, again, consider what effect has been produced on the English vulgar mind by the use of the sonorous Latin form "damno," in translating the Greek *κατακρίνω*, when people charitably wish to make it forcible; and the substitution of the temperate "condemn" for it, when they choose to keep it gentle. And what notable sermons have been preached by illiterate clergymen on—"He that believeth not shall be damned;" though they would shrink with horror from translating Heb. xi. 7, "The saving of his house, by which he damned the world," or John viii. 12, "Woman, hath no man damned thee? She saith, No man, Lord. Jesus answered her, Neither do I damn thee; go and sin no more." And divisions in the mind of Europe, which have cost seas of blood, and in the defence of which the noblest souls of men have been cast away in frantic desolation, countless as forest leaves—though, in the

* 2 Peter iii. 5-7.

heart of them, founded on deeper causes—have nevertheless been rendered practicably possible, mainly, by the European adoption of the Greek word for a public meeting, to give peculiar respectability to such meetings, when held for religious purposes; and other collateral equivocations, such as the vulgar English one of using the word “priest” as a contraction for “presbyter.”

Now, in order to deal with words rightly, this is the habit you must form. Nearly every word in your language has been first a word of some other language—of Saxon, German, French, Latin, or Greek; (not to speak of eastern and primitive dialects.) And many words have been all these;—that is to say, have been Greek first, Latin next, French or German next, and English last: undergoing a certain change of sense and use on the lips of each nation; but retaining a deep vital meaning which all good scholars feel in employing them, even at this day. If you do not know the Greek alphabet, learn it; young or old—girl or boy—whoever you may be, if you think of reading seriously (which, of course, implies that you have some leisure at command), learn your Greek alphabet; then get good dictionaries of all these languages, and whenever you are in doubt about a word, hunt it down patiently. Read *Mix Müller's* lectures thoroughly, to begin with; and, after that, never let a word escape you that looks suspicious. It is severe work; but you will find it, even at first, interesting, and at last, endlessly amusing. And the general gain to your character, in power and precision, will be quite incalculable.

Mind, this does not imply knowing, or trying to know, Greek, or Latin, or French. It takes a whole life to learn any language perfectly. But you can easily ascertain the meanings through which the English word has passed; and those which in a good writer's work it must still bear.

And now, merely, for example's sake, I will, with your permission, read a few lines of a true book with you, carefully; and see what will come out of them.

I will take a book perfectly known to you all; no English words are more familiar to us, yet nothing perhaps has been less read with sincerity. I will take these few following lines of Lycidas.

Last came, and last did go,
The pilot of the Galilean lake;
Two massy keys he bore of metals twain,
(The golden opes, the iron shuts amain),
He shook his mitred locks, and stern bespake,
"How well could I have spar'd for thee, young swain,
Enow of such as for their bellies' sake
Creep and intrude, and climb into the fold!
Of other care they little reckoning make,
Than how to scramble at the shearers' feast,
And shove away the worthy bidden guest;
Blind mouths! that scarce themselves know how to hold
A sheep-hook, or have learn'd aught else, the least
That to the faithful herdsman's art belongs!
What recks it them? What need they? They are sped;
And when they list, their lean and flashy songs
Grate on their scrannel pipes of wretched straw;
The hungry sheep look up, and are not fed,
But swoln with wind, and the rank mist they draw,
Rot inwardly, and foul contagion spread;
Besides what the grim wolf with privy paw
Daily devours apace, and nothing said."

Let us think over this passage, and examine its words.

First, is it not singular to find Milton assigning to St. Peter, not only his full episcopal function, but the very types of it which Protestants usually refuse most passionately? His "mitred" locks! Milton was no Bishop-lover; how comes St. Peter to be "mitred"? "Two massy keys he bore." Is this, then, the power of the keys claimed by the Bishops of Rome, and is it acknowledged here by Milton only in a poetical licence, for the sake of its picturesqueness, that he may get the gleam of the golden keys to help his effect? Do not think it. Great men do not play stage tricks with doctrines of life and death: only little men do that. Milton means what he says; and means it with his might too—is going to put the whole strength of his spirit presently into the saying of it. For though not a lover of false bishops, he *was* a lover of true ones; and the Lake-pilot is here, in his thoughts, the type and head

of true episcopal power. For Milton reads that text, "I will give unto thee the keys of the kingdom of Heaven" quite honestly. Puritan though he be, he would not blot it out of the book because there have been bad bishops; nay, in order to understand him, we must understand that verse first; it will not do to eye it askance, or whisper it under our breath, as if it were a weapon of an adverse sect. It is a solemn, universal assertion, deeply to be kept in mind by all sects. But perhaps we shall be better able to reason on it if we go on a little farther, and come back to it. For clearly, this marked insistence on the power of the true episcopate is to make us feel more weightily what is to be charged against the false claimants of episcopate; or generally, against false claimants of power and rank in the body of the clergy; they who, "for their bellies' sake, creep, and intrude, and climb into the fold."

Do not think Milton uses those three words to fill up his verse, as a loose writer would. He needs all the three: specially those three, and no more than those—"creep," and "intrude," and "climb;" no other words would or could serve the turn, and no more could be added. For they exhaustively comprehend the three classes, correspondent to the three characters, of men who dishonestly seek ecclesiastical power. First, those who "*creep*" into the fold; who do not care for office, nor name, but for secret influence, and do all things occultly and cunningly, consenting to any servility of office or conduct, so only that they may intimately discern, and unawares direct, the minds of men. Then those who "intrude" (thrust, that is) themselves into the fold, who by natural insolence of heart, and stout eloquence of tongue, and fearlessly perseverant self-assertion, obtain hearing and authority with the common crowd. Lastly, those who "climb," who, by labor and learning, both stout and sound, but selfishly exerted in the cause of their own ambition, gain high dignities and authorities, and become "lords over the heritage," though not "ensamples to the flock."

Now go on: "

Of other care they little reckoning make,
 Than how to scramble at the shearers' feast.
Blind mouths—

I pause again, for this is a strange expression ; a broken metaphor one might think, careless and unscholarly.

Not so : its very audacity and pithiness are intended to make us look close at the phrase and remember it. Those two monosyllables express the precisely accurate contraries of right character, in the two great offices of the Church—those of bishop and pastor.

A Bishop means a person who sees.

A Pastor means one who feeds.

The most unbishoply character a man can have is therefore to be Blind.

The most unpastoral is, instead of feeding, to want to be fed,—to be a Mouth.

Take the two reverses together, and you have "blind mouths." We may advisably follow out this idea a little. Nearly all the evils in the Church have arisen from bishops desiring *power* more than *light*. They want authority, not outlook. Whereas their real office is not to rule ; though it may be vigorously to exhort and rebuke ; it is the king's office to rule ; the bishop's office is to *oversee* the flock ; to number it, sheep by sheep ; to be ready always to give full account of it. Now it is clear he cannot give account of the souls, if he has not so much as numbered the bodies of his flock. The first thing, therefore, that a bishop has to do is at least to put himself in a position in which, at any moment, he can obtain the history from childhood of every living soul in his diocese, and of its present state. Down in that back street, Bill, and Nancy, knocking each other's teeth out !—Does the bishop know all about it ? Has he his eye upon them ? Has he *had* his eye upon them ? Can he circumstantially explain to us how Bill got into the habit of beating Nancy about the head ? If he cannot, he is no bishop, though he had a mitre as high as Salisbury steeple ; he is no bishop,—he has sought to be at the helm in-

stead of the masthead; he has no sight of things. "Nay," you say, it is not his duty to look after Bill in the back street. What! the fat sheep that have full fleeces—you think it is only those he should look after, while (go back to your Milton) "the hungry sheep look up, and are not fed, besides what the grim wolf, with privy paw" (bishops knowing nothing about it) "daily devours apace, and nothing said?"

"But that's not our idea of a bishop." Perhaps not; but it was St. Paul's; and it was Milton's. They may be right, or we may be; but we must not think we are reading either one or the other by putting our meaning into their words.

I go on.

But, swollen with wind, and the rank mist they draw.

This is to meet the vulgar answer that "if the poor are not looked after in their bodies, they are in their souls; they have spiritual food."

And Milton says, "They have no such thing as spiritual food; they are only swollen with wind." At first you may think that is a coarse type, and an obscure one. But again, it is a quite literally accurate one. Take up your Latin and Greek dictionaries, and find out the meaning of "Spirit." It is only a contraction of the Latin word "breath," and an indistinct translation of the Greek word for "wind." The same word is used in writing, "The wind bloweth where it listeth;" and in writing, "So is every one that is born of the Spirit;" born of the *breath*, that is; for it means the breath of God, in soul and body. We have the true sense of it in our words "inspiration" and "expire." Now, there are two kinds of breath with which the flock may be filled; God's breath, and man's. The breath of God is health, and life, and peace to them, as the air of heaven is to the flocks on the hills; but man's breath—the word which *he* calls spiritual,—is disease and contagion to them, as the fog of the fen. They rot inwardly with it; they are puffed up by it, as a dead body by the vapors of its own decomposition.

This is literally true of all false religious teaching; the first, and last, and fatalest sign of it is that "puffing up." Your converted children, who teach their parents; your converted convicts, who teach honest men; your converted dunces, who, having lived in cretinous stupefaction half their lives, suddenly awaking to the fact of there being a God, fancy themselves therefore His peculiar people and messengers; your sectarians of every species, small and great, Catholic or Protestant, of high church or low, in so far as they think themselves exclusively in the right and others wrong; and pre-eminently, in every sect, those who hold that men can be saved by thinking rightly instead of doing rightly, by word instead of act, and wish instead of work:—these are the true fog children—clouds, these, without water; bodies, these, of putrescent vapor and skin, without blood or flesh: blown bag-pipes for the fiends to pipe with—corrupt, and corrupting,—“Swollen with wind, and the rank mist they draw.”

Lastly, let us return to the lines respecting the power of the keys, for now we can understand them. Note the difference between Milton and Dante in their interpretation of this power: for once, the latter is weaker in thought; he supposes *both* the keys to be of the gate of heaven; one is of gold, the other of silver: they are given by St. Peter to the sentinel angel; and it is not easy to determine the meaning either of the substances of the three steps of the gate, or of the two keys. But Milton makes one, of gold, the key of heaven; the other, of iron, the key of the prison, in which the wicked teachers are to be bound who “have taken away the key of knowledge, yet entered not in themselves.”

We have seen that the duties of bishop and pastor are to see, and feed; and, of all who do so, it is said, “He that watereth, shall be watered also himself.” But the reverse is truth also. He that watereth not, shall be *withered* himself, and he that seeth not, shall himself be shut out of sight,—shut into the perpetual prison-house. And that prison opens here, as well as

hereafter : he who is to be bound in heaven must first be bound on earth. That command to the strong angels, of which the rock-apostle is the image, "Take him, and bind him hand and foot, and cast him out," issues, in its measure, against the teacher, for every help withheld, and for every truth refused, and for every falsehood enforced ; so that he is more strictly fettered the more he fetters, and farther outcast, as he more and more misleads, till at last the bars of the iron cage close upon him, and as "the golden opes, the iron shuts amain."

We have got something out of the lines, I think, and much more is yet to be found in them ; but we have done enough by way of example of the kind of word-by-word examination of your author which is rightly called "reading ;" watching every accent and expression, and putting ourselves always in the author's place, annihilating our own personality, and seeking to enter into his, so as to be able assuredly to say, "Thus Milton thought," not "Thus I thought, in mis-reading Milton." And by this process you will gradually come to attach less weight to your own "Thus I thought" at other times. You will begin to perceive that what *you* thought was a matter of no serious importance ;—that your thoughts on any subject are not perhaps the clearest and wisest that could be arrived at thereupon : in fact, that unless you are a very singular person, you cannot be said to have any "thoughts" at all ; that you have no materials for them, in any serious matters ;—no right to "think," but only to try to learn more of the facts. Nay, most probably all your life (unless, as I said, you are a singular person) you will have no legitimate right to an "opinion" on any business, except that instantly under your hand. What must of necessity be done, you can always find out, beyond question, how to do. Have you a house to keep in order, a commodity to sell, a field to plough, a ditch to cleanse ? There need be no two opinions about these proceedings ; it is at your peril if you have not much more than an "opin-

ion" on the way to manage such matters. And also, outside of your own business, there are one or two subjects on which you are bound to have but one opinion. That roguery and lying are objectionable, and are instantly to be flogged out of the way whenever discovered;—that covetousness and love of quarrelling are dangerous dispositions even in children, and deadly dispositions in men and nations; that in the end, the God of heaven and earth loves active, modest, and kind people, and hates idle, proud, greedy, and cruel ones; on these general facts you are bound to have but one, and that a very strong, opinion. For the rest, respecting religions, governments, sciences, arts, you will find that, on the whole, you can know NOTHING,—judge nothing; that the best you can do, even though you may be a well-educated person, is to be silent, and strive to be wiser every day, and to understand a little more of the thoughts of others, which so soon as you try to do honestly, you will discover that the thoughts even of the wisest are very little more than pertinent questions. To put the difficulty into a clear shape, and exhibit to you the grounds for indecision, that is all they can generally do for you!—and well for them and for us, if indeed they are able "to mix the music with our thoughts, and sadden us with heavenly doubts." This writer, from whom I have been reading to you, is not among the first or wisest: he sees shrewdly as far as he sees, and therefore it is easy to find out his full meaning, but with the greater men, you cannot fathom their meaning; they do not even wholly measure it themselves,—it is so wide. Suppose I had asked you, for instance, to seek for Shakespeare's opinion, instead of Milton's, on this matter of Church authority?—or for Dante's? Have any of you, at this instant, the least idea what either thought about it? Have you ever balanced the scene with the bishops in Richard III. against the character of Cranmer? the description of St. Francis and St. Dominio against that of him who made Virgil wonder to gaze upon him,—"*disteso, tanto vilmente, nell'*

eterno esilio ;" or of him whom Dante stood beside, "come 'l frate che confessa lo perfido assassin ?" * Shakespeare and Alighieri knew men better than most of us, I presume ! They were both in the midst of the main struggle between the temporal and spiritual powers. They had an opinion, we may guess ? But where is it ? Bring it into court ! Put Shakespeare's or Dante's creed into articles, and send *that* up into the Ecclesiastical Courts !

You will not be able, I tell you again, for many and many a day, to come at the real purposes and teaching of these great men ; but a very little honest study of them will enable you to perceive that what you took for your own "judgment" was mere chance prejudice, and drifted, helpless, entangled weed of castaway thought : nay, you will see that most men's minds are indeed little better than rough heath wilderness, neglected and stubborn, partly barren, partly overgrown with pestilent brakes and venomous windsown herbage of evil surmise ; that the first thing you have to do for them, and yourself, is eagerly and scornfully to set fire to *this* ; burn all the jungle into wholesome ash-heaps, and then plough and sow. All the true literary work before you, for life, must begin with obedience to that order, "Break up your fallow ground, and *sow not among thorns.*"

II. Having then faithfully listened to the great teachers, that you may enter into their Thoughts, you have yet this higher advance to make ;—you have to enter into their Hearts. As you go to them first for clear sight, so you must stay with them that you may share at last their just and mighty Passion. Passion, or "sensation." I am not afraid of the word ; still less of the thing. You have heard many outcries against sensation lately ; but, I can tell you, it is not less sensation we want, but more. The ennobling difference between one man and another,—between one animal and another,—is precisely in this, that one feels more than another. If we were sponges,

* Inf. xix. 71 ; xxiii. 117.

perhaps sensation might not be easily got for us ; if we were earth-worms, liable at every instant to be cut in two by the spade, perhaps too much sensation might not be good for us. But, being human creatures, *it is* good for us ; nay, we are only human in so far as we are sensitive, and our honor is precisely in proportion to our passion.

You know I said of that great and pure society of the dead, that it would allow "no vain or vulgar person to enter there." What do you think I meant by a "vulgar" person? What do you yourselves mean by "vulgarity?" You will find it a fruitful subject of thought ; but, briefly, the essence of all vulgarity lies in want of sensation. Simple and innocent vulgarity is merely an untrained and undeveloped bluntness of body and mind ; but in true inbred vulgarity, there is a deathful callousness, which, in extremity, becomes capable of every sort of bestial habit and crime, without fear, without pleasure, without horror, and without pity. It is in the blunt hand and the dead heart, in the diseased habit, in the hardened conscience, that men become vulgar ; they are forever vulgar, precisely in proportion as they are incapable of sympathy,—of quick understanding,—of all that, in deep insistence on the common, but most accurate term, may be called the "tact" or touch-faculty of body and soul : that tact which the Mimosa has in trees, which the pure woman has above all creatures ;—finesse and fulness of sensation, beyond reason ;—the guide and sanctifier of reason itself. Reason can but determine what is true :—it is the God-given passion of humanity which alone can recognize what God has made good.

We come then to that great concourse of the Dead, not merely to know from them what is True, but chiefly to feel with them what is Righteous. Now, to feel with them, we must be like them ; and none of us can become that without pains. As the true knowledge is disciplined and tested knowledge,—not the first thought that comes,—so the true passion is

disciplined and tested passion—not the first passion that comes. The first that come are the vain, the false, the treacherous; if you yield to them they will lead you wildly and far, in vain pursuit, in hollow enthusiasm, till you have no true purpose and no true passion left. / Not that any feeling possible to humanity is in itself wrong, but only wrong when undisciplined.† Its nobility is in its force and justice; it is wrong when it is weak, and felt for paltry cause. There is a mean wonder as of a child who sees a juggler tossing golden balls, and this is base, if you will. But do you think that the wonder is ignoble, or the sensation less, with which every human soul is called to watch the golden balls of heaven tossed through the night by the Hand that made them? There is a mean curiosity, as of a child opening a forbidden door, or a servant prying into her master's business;—and a noble curiosity, questioning, in the front of danger, the source of the great river beyond the sand—the place of the great continents beyond the sea;—a nobler curiosity still, which questions of the source of the River of Life, and of the space of the Continent of Heaven,—things which “the angels desire to look into.” So the anxiety is ignoble, with which you linger over the course and catastrophe of an idle tale; but do you think the anxiety is less, or greater, with which you watch, or *ought* to watch, the dealings of fate and destiny with the life of an agonized nation? Alas! it is the narrowness, selfishness, minuteness, of your sensation that you have to deplore in England at this day;—sensation which spends itself in bouquets and speeches; in revellings and junketings; in sham fights and gay puppet shows, while you can look on and see noble nations murdered, man by man, woman by woman, child by child, without an effort, or a tear.

I said “minuteness” and “selfishness” of sensation, but in a word, I ought to have said “injustice” or “unrighteousness” of sensation. For as in nothing is a gentleman better to be discerned from a vulgar person, so in nothing is a gentle nation (such nations

have been) better to be discerned from a mob, than in this,—that their feelings are constant and just, results of due contemplation, and of equal thought. You can talk a mob into anything; its feelings may be—usually are—on the whole generous and right; but it has no foundation for them, no hold of them; you may tease or tickle it into any, at your pleasure; it thinks by infection, for the most part, catching a passion like a cold, and there is nothing so little that it will not roar itself wild about, when the fit is on;—nothing so great but it will forget in an hour, when the fit is past. But a gentleman's, or a gentle nation's passions are just, measured, and continuous. A great nation, for instance, does not spend its entire national wits for a couple of months in weighing evidence of a single ruffian's having done a single murder; and for a couple of years, see its own children murder each other by their thousands or tens of thousands a day, considering only what the effect is likely to be on the price of cotton, and caring nowise to determine which side of battle is in the wrong. Neither does a great nation send its poor little boys to jail for stealing six walnuts; and allow its bankrupts to steal their hundreds of thousands with a bow, and its bankers, rich with poor men's savings, to close their doors "under circumstances over which they have no control," with a "by your leave;" and large landed estates to be bought by men who have made their money by going with armed steamers up and down the China Seas, selling opium at the cannon's mouth, and altering, for the benefit of the foreign nation, the common highwayman's demand of "your money *or* your life," into that of "your money *and* your life." Neither does a great nation allow the lives of its innocent poor to be parched out of them by fog fever, and rotted out of them by dunghill plague, for the sake of sixpence a life extra per week to its landlords;* and then debate,

* See the evidence in the medical officer's report to the Privy Council, just published. There are suggestions in its preface which will make some stir among us, I fancy, respecting which let me note these points following :—

with drivelling tears, and diabolical sympathies, whether it ought not piously to save, and nursingly cherish,

There are two theories on the subject of land now abroad, and in contention; both false.

The first is that by Heavenly law, there have always existed, and must continue to exist, a certain number of hereditarily sacred persons, to whom the earth, air, and water of the world belong, as personal property; of which earth, air, and water these persons may, at their pleasure, permit, or forbid, the rest of the human race to eat, to breathe, or to drink. This theory is not for many years longer tenable. The adverse theory is that a division of the land of the world among the mob of the world would immediately elevate the said mob into sacred personages; that houses would then build themselves, and corn grow of itself; and that everybody would be able to live, without doing any work for his living. This theory would also be found highly untenable in practice.

It will, however, require some rough experiments, and rougher catastrophes, even in this magnesium-lighted epoch, before the generality of persons will be convinced that no law concerning anything, least of all concerning land, for either holding or dividing it, or renting it high, or renting it low, would be of the smallest ultimate use to the people, so long as the general contest for life, and for the means of life, remains one of mere brutal competition. That contest, in an unprincipled nation, will take one deadly form or another, whatever laws you make for it. For instance, it would be an entirely wholesome law for England, if it could be carried, that maximum limits should be assigned to incomes, according to classes; and that every nobleman's income should be paid to him as a fixed salary or pension by the nation; and not squeezed by him in a variable sum, at discretion, out of the tenants of his land. But if you could get such a law passed to-morrow; and if, which would be farther necessary, you could fix the value of the assigned incomes by making a given weight of pure wheat-flour legal tender for a given sum, a twelve-month would not pass before another currency would have been tacitly established, and the power of accumulative wealth would have reasserted itself in some other article, or some imaginary sign. Forbid men to buy each other's lives for sovereigns, and they will for shells or slates. There is only one cure for public distress—and that is public education, directed to make men thoughtful, merciful, and just. There are, indeed, many laws conceivable which would gradually better and strengthen the national temper; but, for the most part, they are such as the national temper must be much bettered before it would bear. A nation in its youth may be helped by laws, as a weak child by backboards, but when it is old, it cannot that way straighten its crooked spine.

And besides, the problem of land, at its worst, is a bye one; distribute the earth as you will, the principal question remains inextinguishable.—Who is to dig it? Which of us, in brief words, is to do the hard and dirty work for the rest—and for what pay? Who is to do the pleasant and clean work, and for what pay? Who is to do no work, and for what pay? And there are curious moral and religious questions connected with these. How far is it lawful to suck a portion of the soul out of a great many persons, in order to put the abstracted psychical quantities together, and make one very

the lives of its murderers. Also, a great nation having made up its mind that hanging is quite the wholesomest process for its homicides in general, can yet with mercy distinguish between the degrees of guilt in homicides; and does not yelp like a pack of frost-pinched wolf-cubs on the blood track of an unhappy crazed boy, or gray-haired clodpate Othello, "perplexed i' the extreme," at the very moment that it is sending a Minister of the Crown to make polite speeches to a man who is bayoneting young girls in their father's sight, and killing noble youths in cool blood, faster than a country butcher kills lambs in spring. And, lastly, a great nation does not mock Heaven and its Powers, by pretending belief in a revelation which asserts the love of money to be the root of *all* evil, and declaring, at the same time, that it is actuated, and intends to be actuated, in all chief national deeds and measures, by no other love.

My friends, I do not know why any of us should talk about reading. We want some sharper discipline than that of reading; but, at all events, be assured, we cannot read. No reading is possible for a people with

beautiful or ideal soul? If we had to deal with mere blood, instead of spirit, and the thing might literally be done (as it has been done with infants before now) so that it were possible, by taking a certain quantity of blood from the arms of a given number of the mob, and putting it all into one person to make a more azure-blooded gentleman of him, the thing would of course be managed; but secretly, I should conceive. But now, because it is brain and soul that we abstract, not visible blood, it can be done quite openly; and we live, we gentlemen, on delicatest prey, after the manner of weasels; that is to say, we keep a certain number of clowns digging and ditching, and generally stupefied, in order that we, being fed gratis, may have all the thinking and feeling to ourselves. Yet there is a great deal to be said for this. A highly-bred and trained English, French, Austrian, or Italian gentleman (much more a lady) is a great production; a better production than most statues; being beautifully colored as well as shaped, and plus all the brains; a glorious thing to look at, a wonderful thing to talk to; and you cannot have it, any more than a pyramid or a church, but by sacrifice of much contributed life. And it is perhaps better to build a beautiful human creature than a beautiful dome or steeple; and more delightful to look up reverently to a creature far above us, than to a wall; only the beautiful human creature will have some duties to do in return—duties of living belfry and rampart—of which presently.

its mind in this state. No sentence of any great writer is intelligible to them. It is simply and sternly impossible for the English public, at this moment, to understand any thoughtful writing,—so incapable of thought has it become in its insanity of avarice. Happily, our disease is, as yet, little worse than this incapacity of thought; it is not corruption of the inner nature; we ring true still, when anything strikes home to us; and though the idea that everything should “pay” has infected our every purpose so deeply, that even when we would play the good Samaritan, we never take out our twopence and give them to the host, without saying, “When I come again, thou shalt give me fourpence,” there is a capacity of noble passion left in our hearts’ core. We show it in our work—in our war,—even in those unjust domestic affections which make us furious at a small private wrong, while we are polite to a boundless public one: we are still industrious to the last hour of the day, though we add the gambler’s fury to the laborer’s patience; we are still brave to the death, though incapable of discerning true cause for battle, and are still true in affection to our own flesh, to the death, as the sea-monsters are, and the rock-eagles. And there is hope for a nation while this can be still said of it. As long as it holds its life in its hand, ready to give it for its honor (though a foolish honor), for its love (though a selfish love), and for its business (though a base business), there is hope for it. But hope only; for this instinctive, reckless virtue cannot last. No nation can last, which has made a mob of itself, however generous at heart. It must discipline its passions, and direct them, or they will discipline it, one day, with scorpion whips. Above all, a nation cannot last as a money-making mob: it cannot with impunity,—it cannot with existence,—go on despising literature, despising science, despising art, despising nature, despising compassion, and concentrating its soul on Pence. Do you think these are harsh or wild words? Have patience with me but a little

longer. I will prove their truth to you, clause by clause.

I. I say first we have despised literature. What do we, as a nation, care about books? How much do you think we spend altogether on our libraries, public or private, as compared with what we spend on our horses? If a man spends lavishly on his library, you call him mad—a biblio-maniac. But you never call any one a horse-maniac, though men ruin themselves every day by their horses, and you do not hear of people ruining themselves by their books. Or, to go lower still, how much do you think the contents of the bookshelves of the United Kingdom, public and private, would fetch, as compared with the contents of its wine-cellars? What position would its expenditure on literature take, as compared with its expenditure on luxurious eating? We talk of food for the mind, as of food for the body: now a good book contains such food inexhaustibly; it is a provision for life, and for the best part of us; yet how long most people would look at the best book before they would give the price of a large turbot for it! Though there have been men who have pinched their stomachs and bared their backs to buy a book, whose libraries were cheaper to them, I think, in the end, than most men's dinners are. We are few of us put to such trial, and more the pity; for, indeed, a precious thing is all the more precious to us if it has been won by work or economy; and if public libraries were half as costly as public dinners, or books cost the tenth part of what bracelets do, even foolish men and women might sometimes suspect there was good in reading, as well as in munching and sparkling; whereas the very cheapness of literature is making even wise people forget that if a book is worth reading, it is worth buying. No book is worth anything which is not worth *much*; nor is it serviceable, until it has been read, and reread, and loved, and loved again; and marked, so that you can refer to the passages you want in it, as a soldier can seize the weapon he needs in an armory, or a housewife bring the spice

she needs from her store. Bread of flour is good ; but there is bread, sweet as honey, if we would eat it, in a good book ; and the family must be poor indeed which, once in their lives, cannot, for such multipliable barley-loaves, pay their baker's bill. We call ourselves a rich nation, and we are filthy and foolish enough to thumb each other's books out of circulating libraries !

II. I say we have despised science. "What !" (you exclaim) "are we not foremost in all discovery, and is not the whole world giddy by reason, or unreason, of our inventions?" Yes ; but do you suppose that is national work ? That work is all done in spite of the nation ; by private people's zeal and money. We are glad enough, indeed, to make our profit of science ; we snap up anything in the way of a scientific bone that has meat on it, eagerly enough ; but if the scientific man comes for a bone or a crust to *us*, that is another story. What have we publicly done for science ? We are obliged to know what o'clock it is, for the safety of our ships, and therefore we pay for an observatory ; and we allow ourselves, in the person of our Parliament, to be annually tormented into doing something, in a slovenly way, for the British Museum ; sullenly apprehending that to be a place for keeping stuffed birds in, to amuse our children. If anybody will pay for their own telescope, and resolve another nebula, we cackle over the discernment as if it were our own ; if one in ten thousand of our hunting squires suddenly perceives that the earth was indeed made to be something else than a portion for foxes, and burrows in it himself, and tells us where the gold is, and where the coals, we understand that there is some use in that ; and very properly knight him : but is the accident of his having found out how to employ himself usefully any credit to *us* ? (The negation of such discovery among his brother squires may perhaps be some *dis*-credit to us, if we would consider of it.) But if you doubt these generalities, here is one fact for us all to meditate upon, illustrative of our love of science. Two years ago there was a collection of the fossils of Solen-

hofen to be sold in Bavaria ; the best in existence, containing many specimens unique for perfectness, and one, unique as an example of a species (a whole kingdom of unknown living creatures being announced by that fossil). This collection, of which the mere market worth, among private buyers, would probably have been some thousand or twelve hundred pounds, was offered to the English nation for seven hundred : but we would not give seven hundred, and the whole series would have been in the Munich museum at this moment, if Professor Owen* had not, with loss of his own time, and patient tormenting of the British public in person of its representatives, got leave to give four hundred pounds at once, and himself become answerable for the other three ! which the said public will doubtless pay him eventually, but sulkily, and caring nothing about the matter all the while ; only always ready to cackle if any credit comes of it. Consider, I beg of you, arithmetically, what this fact means. Your annual expenditure for public purposes (a third of it for military apparatus) is at least 50 millions. Now 700*l.* is to 50,000,000*l.* roughly, as seven pence to two thousand pounds. Suppose then, a gentleman of unknown income, but whose wealth was to be conjectured from the fact that he spent two thousand a year on his park-walls and footmen only, professes himself fond of science ; and that one of his servants comes eagerly to tell him that an unique collection of fossils, giving clue to a new era of creation, is to be had for the sum of seven pence sterling ; and that the gentleman, who is fond of science, and spends two thousand a year on his park, answers, after keeping his servant waiting several months, " Well ! I'll give you fourpence for them, if you will be answerable for the extra threepence yourself, till next year ! "

III. I say you have despised Art ! " What ! " you again answer, " have we not Art exhibitions, miles

* I state this fact without Professor Owen's permission, which of course he could not with propriety have granted, had I asked it ; but I consider it so important that the public should be aware of the fact, that I do what seems to me right, though rude.

long? and do we not pay thousands of pounds for single pictures? and have we not Art schools and institutions, more than ever nation had before?" Yes, truly, but all that is for the sake of the shop. You would fain sell canvas as well as coals, and crockery as well as iron; you would take every other nation's bread out of its mouth if you could; not being able to do that, your ideal of life is to stand in the thoroughfares of the world, like Ludgate apprentices, screaming to every passer-by, "What d'ye lack?" You know nothing of your own faculties or circumstances; you fancy that, among your damp, flat, fat fields of clay, you can have as quick art-fancy as the Frenchman among his bronzed vines, or the Italian under his volcanic cliffs;—that Art may be learned as book-keeping is, and when learned, will give you more books to keep. You care for pictures, absolutely, no more than you do for the bills pasted on your dead walls. There is always room on the wall for the bills to be read,—never for the pictures to be seen. You do not know what pictures you have (by repute) in the country, nor whether they are false or true, nor whether they are taken care of or not; in foreign countries, you calmly see the noblest existing pictures in the world rotting in abandoned wreck—(and, in Venice, with the Austrian guns deliberately pointed at the palaces containing them), and if you heard that all the Titians in Europe were made sand-bags to-morrow on the Austrian forts, it would not trouble you so much as the chance of a brace or two of game less in your own bags in a day's shooting. That is your national love of Art.

IV. You have despised nature; that is to say, all the deep and sacred sensations of natural scenery. The French revolutionists made stables of the cathedrals of France; you have made race-courses of the cathedrals of the earth. Your *one* conception of pleasure is to drive in railroad carriages round their aisles, and eat off their altars. You have put a railroad bridge over the fall of Schaffhausen. You have tunnelled the

cliffs of Lucerne by Tell's chapel ; you have destroyed the Clarens shore of the Lake of Geneva ; there is not a quiet valley in England that you have not filled with bellowing fire ; there is no particle left of English land which you have not trampled coal ashes into—nor any foreign city in which the spread of your presence is not marked among its fair old streets and happy gardens by a consuming white leprosy of new hotels and perfumers' shops : the Alps themselves, which your own poets used to love so reverently, you look upon as soaped poles in a bear-garden, which you set yourselves to climb, and slide down again, with " shrieks of delight." When you are past shrieking, having no human articulate voice to say you are glad with, you fill the quietude of their valleys with gunpowder blasts, and rush home, red with cutaneous eruption of conceit, and voluble with convulsive hiccough of self-satisfaction. I think nearly the two sorrowfullest spectacles I have ever seen in humanity, taking the deep inner significance of them, are the English mobs in the valley of Chamouni, amusing themselves with firing rusty howitzers ; and the Swiss vintagers of Zurich expressing their Christian thanks for the gift of the vine, by assembling in knots in the " towers of the vineyards," and slowly loading and firing horse-pistols from morning till evening. It is pitiful to have dim conceptions of duty ; more pitiful, it seems to me, to have conceptions like these, of mirth.

Lastly. You despise compassion. There is no need of words of mine for proof of this. I merely print one of the newspaper paragraphs which I am in the habit of cutting out and throwing into my store-drawer ; here is one from a *Daily Telegraph* of an early date this year ; date which, though by me carelessly left unmarked, is easily discoverable ; for on the back of the slip, there is the announcement that " yesterday the seventh of the special services of this year was performed by the Bishop of Ripon in St. Paul's ; " and there is a pretty piece of modern political economy besides, worth preserving note of, I think, so I print it in

the note below.* But my business is with the main paragraph, relating one of such facts as happen now daily, which, by chance, has taken a form in which it came before the coroner. I will print the paragraph in red.† Be sure, the facts themselves are written in that color, in a book which we shall all of us, literate or illiterate, have to read our page of, some day.

“An inquiry was held on Friday by Mr. Richards, deputy coroner, at the White Horse Tavern, Christ Church, Spitalfields, respecting the death of Michael Collins, aged 58 years. Mary Collins, a miserable-looking woman, said that she lived with the deceased and his son in a room at 2, Cobb's court, Christ Church. Deceased was a ‘translator’ of boots. Witness went out and bought old boots; deceased and his son made them into good ones, and then witness sold them for what she could get at the shops, which was very little indeed. Deceased and his son used to work night and day to try and get a little bread and tea, and pay for the room (2s. a week), so as to keep the home together. On Friday night deceased got up from his bench and began to shiver. He threw down the boots, saying, ‘Somebody else must finish them when I am gone, for I can do no more.’ There was no fire, and he said, ‘I would be better if I was warm.’ Witness therefore took two pairs of translated boots to sell at the shop, but she could only get 14d. for the two pairs, for the people at the shop said, ‘We must have our profit.’ Witness got 14lb. of coal, and a little tea and bread. Her son sat up the whole night to make the ‘translations,’ to get money, but deceased died on Saturday morning. The family never had enough to eat.—

* It is announced that an arrangement has been concluded between the Ministry of Finance and the Bank of Credit for the payment of the eleven millions which the State has to pay to the National Bank by the 14th inst. This sum will be raised as follows:—The eleven commercial members of the committee of the Bank of Credit will each borrow a million of florins for three months of this bank, which will accept their bills, which again will be discounted by the National Bank. By this arrangement *the National Bank will itself furnish funds with which it will be paid.*

† The following extract was printed in red in the English edition.

Coroner: 'It seems to me deplorable that you did not go into the workhouse.'—Witness: 'We wanted the comforts of our little home.' A juror asked what the comforts were, for he only saw a little straw in the corner of the room, the windows of which were broken. The witness began to cry, and said that they had a quilt and other little things. The deceased said he never would go into the workhouse. In summer, when the season was good, they sometimes made as much as 10s. profit in the week. They then always saved towards the next week, which was generally a bad one. In winter they made not half so much. For three years they had been getting from bad to worse.—Cornelius Collins said that he had assisted his father since 1847. They used to work so far into the night that both nearly lost their eyesight. Witness now had a film over his eyes. Five years ago deceased applied to the parish for aid. The relieving officer gave him a 4lb. loaf, and told him if he came again he should 'get the stones.*' That disgusted deceased, and he

* I do not know what this means. It is curiously coincident in verbal form with a certain passage which some of us may remember. It may perhaps be well to preserve besides this paragraph, another cutting out of my store-drawer, from the *Morning Post*, of about a parallel date, Friday, March 10, 1865;—"The *salons* of Mme. C—, who did the honors with clever imitative grace and elegance, were crowded with princes, dukes, marquises, and counts—in fact, with the same *male* company as one meets at the parties of the Princess Metternich and Madame Drouyn de Lhuys. Some English peers and members of Parliament were present, and appeared to enjoy the animated and dazzlingly improper scene. On the second floor the supper tables were loaded with every delicacy of the season. That your readers may form some idea of the dainty fare of the Parisian demimonde, I copy the menu of the supper, which was served to all the guests (about 200) seated at four o'clock. Choice Yquem, Johannisberg, Laffitte, Tokay, and Champagne of the finest vintages were served most lavishly throughout the morning. After supper dancing was resumed with increased animation, and the ball terminated with a *chaîne diabolique* and a *cancan d'enfer* at seven in the morning. (Morning-service—"Ere the fresh lawns appeared, under the opening eyelids of the Morn.—") Here is the menu:—'Consommé de volaille à la Bagration; 16 hors-d'œuvres variés. Bouchées à la Talleyrand. Saumons froids, sauce Ravigote. Filets de bœuf en Bellevue, timbales milanaïses chaudfroid de gibier. Dindes truffées. Pâtés de foies gras, buissons d'écrevisses, salades vénétienues, gelées blanches aux fruits, gateaux mancini, parisiens et parisiennes. Fromages glacés Ananas. Dessert."

would have nothing to do with them since. They got worse and worse until last Friday week, when they had not even a halfpenny to buy a candle. Deceased then lay down on the straw, and said he could not live till morning.—A juror: You are dying of starvation yourself, and you ought to go into the house until the summer. Witness: If we went in we should die. When we come out in the summer we should be like people dropped from the sky. No one would know us, and we would not have even a room. I could work now if I had food, for my sight would get better. Dr. G. P. Walker said deceased died from syncope, from exhaustion from want of food. The deceased had had no bedclothes. For four months he had nothing but bread to eat. There was not a particle of fat in the body. There was no disease, but if there had been medical attendance he might have survived the syncope or fainting. The coroner having remarked upon the painful nature of the case, the jury returned the following verdict, 'That deceased died from exhaustion from want of food and the common necessities of life; also through want of medical aid.'

"Why would witness not go into the workhouse?" you ask. Well, the poor seem to have a prejudice against the workhouse which the rich have not; for of course every one who takes a pension from Government goes into the workhouse on a grand scale: only the workhouses for the rich do not involve the idea of work, and should be called play-houses. But the poor like to die independently, it appears; perhaps if we made the play-houses for them pretty and pleasant enough, or gave them their pensions at home, and allowed them a little introductory peculation with the public money, their minds might be reconciled to it. Meantime, here are the facts: we make our relief either so insulting to them, or so painful, that they rather die than take it at our hands; or, for third alternative, we leave them so untaught and foolish that they starve like brute creatures, wild

and dumb, not knowing what to do, or what to ask. I say, you despise compassion; if you did not, such a newspaper paragraph would be as impossible in a Christian country as a deliberate assassination permitted in its public streets.* "Christian" did I say? Alas, if we were but wholesomely un-Christian, it would be impossible: it is our imaginary Christianity that helps us to commit these crimes, for we revel and luxuriate in our faith, for the lewd sensation of it; dressing *it* up, like everything else, in fiction. The dramatic Christianity of the organ and aisle, of dawn-service and twilight-revival—the Christianity which we do not fear to mix the mockery of, pictorially, with our play about the devil, in our Satanelles,—Roberts, —Fausts, chanting hymns through traceried windows for background effect, and artistically modulating the

* I am heartily glad to see such a paper as the *Pall Mall Gazette* established; for the power of the press in the hands of highly-educated men, in independent position, and of honest purpose, may indeed become all that it has been hitherto vainly vaunted to be. Its editor will therefore, I doubt not, pardon me, in that, by very reason of my respect for the journal, I do not let pass unnoticed an article in its third number, page 5, which was wrong in every word of it, with the intense wrongness which only an honest man can achieve who has taken a false turn of thought in the outset, and is following it: regardless of consequences. It contained at the end this notable passage:—

"The bread of affliction, and the water of affliction—aye, and the bedsteads and blankets of affliction, are the very utmost that the law ought to give to *outcasts merely as outcasts*." I merely put beside this expression of the gentlemanly mind of England in 1865, a part of the message which Isaiah was ordered to "lift up his voice like a trumpet" in declaring to the gentlemen of his day: "Ye fast for strife, and to smite with the fist of wickedness. Is not this the fast that I have chosen, to deal thy bread to the hungry, and that thou bring the poor *that are cast out* (margin 'afflicted') *to thy house*." The falsehood on which the writer had mentally founded himself, as previously stated by him, was this: "To confound the functions of the dispensers of the poor-rates with those of the dispensers of a charitable institution is a great and pernicious error." This sentence is so accurately and exquisitely wrong, that its substance must be thus reversed in our minds before we can deal with any existing problem of national distress. "To understand that the dispensers of the poor-rates are the almoners of the nation, and should distribute its alms with a gentleness and freedom of hand as much greater and franker than that possible to individual charity, as the collective national wisdom and power may be supposed greater than those of any single person, is the foundation of all law respecting pauperism."

"Dio" through variation of mimicked prayer : (while we distribute tracts, next day, for the benefit of uncultivated swearers, upon what we suppose to be the signification of the Third Commandment;)—the gas-lighted, and gas-inspired, Christianity, we are triumphant in and draw back the hem of our robes from the touch of the heretics who dispute it. But to do a piece of common Christian righteousness in a plain English word or deed ; to make Christian law any rule of life, and found one National act or hope thereon—we know too well what our faith comes to for that ! You might sooner get lightning out of incense smoke than true action or passion out of your modern English religion. You had better get rid of the smoke, and the organ pipes, both : leave them, and the Gothic windows, and the painted glass, to the property, man ; give up your carburetted hydrogen ghost in one healthy expiration, and look after Lazarus at the doorstep. For there is a true Church wherever one hand meets another helpfully, and that is the only holy or Mother Church which ever was, or ever shall be.

All these pleasures, then, and all these virtues, I repeat, you nationally despise. You have, indeed, men among you who do not ; by whose work, by whose strength, by whose life, by whose death, you live, and never thank them. Your wealth, your amusement, your pride, would all be alike impossible, but for those whom you scorn or forget. The policeman, who is walking up and down the black lane all night to watch the guilt you have created there, and may have his brains beaten out and be maimed for life at any moment, and never be thanked ; the sailor wrestling with the sea's rage, the quiet student poring over his book or his vial ; the common worker, without praise, and nearly without bread, fulfilling his task as your horses drag your carts, hopeless, and spurned of all : these are the men by whom England lives ; but they are not the nation ; they are only the body and nervous force of it, acting still from old habit in a convulsive perseverance, while the mind is gone. Our National

mind and purpose are to be amused ; our National religion, the performance of church ceremonies, and preaching of soporific truths (or untruths) to keep the mob quietly at work, while we amuse ourselves ; and the necessity for this amusement is fastening on us as a feverous disease of parched throat and wandering eyes—senseless, dissolute, merciless. When men are rightly occupied, their amusement grows out of their work, as the color-petals out of a fruitful flower ;—when they are faithfully helpful and compassionate, all their emotions become steady, deep, perpetual, and vivifying to the soul as the natural pulse to the body. But now, having no true business, we pour our whole masculine energy into the false business of money-making ; and having no true emotion, we must have false emotions dressed up for us to play with, not innocently, as children with dolls, but guiltily and darkly, as the idolatrous Jews with their pictures on cavern walls, which men had to dig to detect. The justice we do not execute, we mimic in the novel and on the stage ; for the beauty we destroy in nature, we substitute the metamorphosis of the pantomime, and (the human nature of us imperatively requiring awe and sorrow of *some* kind) for the noble grief we should have borne with our fellows, and the pure tears we should have wept with them, we gloat over the pathos of the police court, and gather the night-dew of the grave.

It is difficult to estimate the true significance of these things ; the facts are frightful enough ;—the measure of national fault involved in them is perhaps not as great as it would at first seem. We permit, or cause, thousands of deaths daily, but we mean no harm ; we set fire to houses, and ravage peasants' fields ; yet we should be sorry to find we had injured anybody. We are still kind at heart ; still capable of virtue, but only as children are. Chalmers, at the end of his long life, having had much power with the public, being plagued in some serious matter by a reference to "public opinion," uttered the impatient exclamation, "The public

is just a great baby!" And the reason that I have allowed all these graver subjects of thought to mix themselves up with an inquiry into methods of reading, is that, the more I see of our national faults or miseries, the more they resolve themselves into conditions of childish illiterateness, and want of education in the most ordinary habits of thought. It is, I repeat, not vice, not selfishness, not dulness of brain, which we have to lament; but an unreachable schoolboy's recklessness, only differing from the true schoolboy's in its incapacity of being helped, because it acknowledges no master. There is a curious type of us given in one of the lovely, neglected words of the last of our great painters. It is a drawing of Kirkby Lonsdale churchyard, and of its brook, and valley, and hills, and folded morning sky beyond. And unmindful alike of these, and of the dead who have left these for other valleys and for other skies, a group of schoolboys have piled their little books upon a grave, to strike them off with stones. So do we play with the words of the dead that would teach us, and strike them far from us with our bitter, reckless will, little thinking that those leaves which the wind scatters had been piled, not only upon a gravestone, but upon the seal of an enchanted vault—nay, the gate of a great city of sleeping kings, who would awake for us, and walk with us, if we knew but how to call them by their names. How often, even if we lift the marble entrance gate, do we but wander among those old kings in their repose, and finger the robes they lie in, and stir the crowns on their foreheads; and still they are silent to us, and seem but a dusty imagery; because we know not the incantation of the heart that would wake them;—which, if they once heard, they would start up to meet us in their power of long ago, narrowly to look upon us, and consider us; and, as the fallen kings of Hades meet the newly fallen, saying, "Art thou also become weak as we—art thou also become one of us?" so would these kings, with their undimmed, unshaken diadems, meet us, saying, "Art thou also become pure and

mighty of heart as we? art thou also become one of us?"

Mighty of heart, mighty of mind—"magnanimous"—to be this, is indeed to be great in life; to become this increasingly, is, indeed, to "advance in life,"—in life itself—not in the trappings of it. My friends, do you remember that old Scythian custom, when the head of a house died? How he was dressed in his finest dress, and set in his chariot, and carried about to his friends' houses; and each of them placed him at his table's head, and all feasted in his presence? Suppose it were offered to you, in plain words, as it *is* offered to you in dire facts, that you should gain this Scythian honor, gradually, while you yet thought yourself alive. Suppose the offer were this: "You shall die slowly; your blood shall daily grow cold, your flesh petrify, your heart beat at last only as a rusted group of iron valves. Your life shall fade from you, and sink through the earth into the ice of Caina; but, day by day, your body shall be dressed more gayly, and set in higher chariots, and have more orders on its breast—crowns on its head, if you will. Men shall bow before it, stare and shout round it, crowd after it up and down the streets; build palaces for it, feast with it at their tables' heads all the night long; your soul shall stay enough within it to know what they do, and feel the weight of the golden dress on its shoulders, and the furrow of the crown-edge on the skull;—no more. Would you take the offer, verbally made by the death-angel? Would the meanest among us take it, think you? Yet practically and verily we grasp at it, every one of us, in a measure; many of us grasp at it in its fulness of horror. Every man accepts it, who desires to advance in life without knowing what life is; who means only that he is to get more horses, and more footmen, and more fortune, and more public honor, and—*not* more personal soul. He only is advancing in life, whose heart is getting softer, whose blood warmer, whose brain quicker, whose

spirit is entering into Living* peace. And the men who have this life in them are the true lords or kings of the earth—they, and they only. All other kingships, so far as they are true, are only the practical issue and expression of theirs; if less than this, they are either dramatic royalties,—costly shows, with real jewels instead of tinsel—the toys of nations; or else, they are no royalties at all, but tyrannies, or the mere active and practical issue of national folly; for which reason I have said of them elsewhere, “Visible governments are the toys of some nations, the diseases of others, the harness of some, the burdens of more.”

But I have no words for the wonder with which I hear Kingdom still spoken of, even among thoughtful men, as if governed nations were a personal property, and might be bought and sold, or otherwise acquired, as sheep, of whose flesh their king was to feed, and whose fleece he was to gather; as if Achilles' indignant epithet of base kings, “people-eating,” were the constant and proper title of all monarchs; and enlargement of a king's dominion meant the same thing as the increase of a private man's estate! Kings who think so, however powerful, can no more be the true kings of the nation than gad-flies are the kings of a horse; they suck it, and may drive it wild, but do not guide it. They, and their courts, and their armies are, if one could see clearly, only a large species of marsh mosquito, with bayonet proboscis and melodious, band-mastered, trumpeting in the summer air; the twilight being, perhaps, sometimes fairer, but hardly more wholesome, for its glittering mists of midge companies. The true kings, meanwhile, rule quietly, if at all, and hate ruling; too many of them make “il gran rifiuto;” and if they do not, the mob, as soon as they are likely to become useful to it, is pretty sure to make *its* “gran rifiuto” of *them*.

Yet the visible king may also be a true one, some day, if ever day comes when he will estimate his do-

* “τὸ δὲ φρόνημα τοῦ πνεύματος ζωὴ καὶ εἰρήνη.”

minion by the *force* of it,—not the geographical boundaries. It matters very little whether Trent cuts you a cantel out here, or Rhine rounds you a castle less there. But it does matter to you, king of men, whether you can verily say to this man, “Go” and he goeth; and to another, “Come,” and he cometh. Whether you can turn your people as you can Trent—and where it is that you bid them come, and where go. It matters to you, king of men, whether your people hate you, and die by you, or love you, and live by you. You may measure your dominion by multitudes better than by miles; and count degrees of love-latitude, not from, but to, a wonderfully warm and infinite equator. Measure! nay, you cannot measure the difference between the power of those who “do and teach,” and who are greatest in the kingdoms of earth, as of heaven—and the power of those who undo, and consume—whose power, at the fullest, is only the power of the moth and the rust? Strange! to think how the Moth-kings lay up treasures for the moth, and the Rust-kings, who are to their peoples’ strength as rust to armor, lay up treasures for rust; and the Robber-kings, treasures for the robber; but how few kings have ever laid up treasures that needed no guarding—treasures of which, the more thieves there were, the better! Broidered robe, only to be rent—helm and sword, only to be dimmed; jewel and gold, only to be scattered,—there have been three kinds of kings who have gathered these. Suppose there ever should arise a Fourth order of kings, who had read, in some obscure writing of long ago, that there was a Fourth kind of treasure, which the jewel and gold could not equal, neither should it be valued with pure gold. A web more fair in the weaving, by Athena’s shuttle; an armor, forged in diviner fire by Vulcanian force—a gold only to be mined in the sun’s red heart, where he sets over the Delphian cliffs;—deep-pictured tissue, impenetrable armor, potable gold!—the three great Angels of Conduct, Toil, and Thought, still calling to us, and waiting at the posts of our doors, to lead us,

if we would, with their winged power, and guide us, with their inescapable eyes, by the path which no fowl knoweth, and which the vulture's eye has not seen! Suppose kings should ever arise, who heard and believed this word, and at last gathered and brought forth treasures of—Wisdom—for their people?

Think what an amazing business *that* would be! How inconceivable, in the state of our present national wisdom. That we should bring up our peasants to a book exercise instead of a bayonet exercise!—organize, drill, maintain with pay, and good generalship, armies of thinkers, instead of armies of stabbers!—find national amusement in reading-rooms as well as rifle-grounds; give prizes for a fair shot at a fact, as well as for a leaden splash on a target. What an absurd idea it seems, put fairly in words, that the wealth of the capitalists of civilized nations should ever come to support literature instead of war! Have yet patience with me, while I read you a single sentence out of the only book, properly to be called a book, that I have yet written myself, the one that will stand, (if anything stand.) surest and longest of all work of mine.

“It is one very awful form of the operation of wealth in Europe that it is entirely capitalists' wealth which supports unjust wars. Just wars do not need so much money to support them; for most of the men who wage such, wage them gratis; but for an unjust war, men's bodies and souls have both to be bought; and the best tools of war for them besides, which makes such war costly to the maximum; not to speak of the cost of base fear, and angry suspicion, between nations which have not grace nor honesty enough in all their multitudes to buy an hour's peace of mind with; as, at present France and England, purchasing of each other ten millions' sterling worth of consternation, annually (a remarkably light crop, half thorns and half aspen leaves, sown, reaped, and granaried by the 'science' of the modern political economist, teaching covetousness instead of truth). And, all unjust war being supportable, if not by pillage of the enemy, only by loans from capitalists, these loans are repaid by subsequent taxation of the people, who appear to have no will in the matter, the capitalists' will being the primary root of the war; but its real root is the covetousness of the whole nation, rendering it incapable of faith, frankness, or justice, and bringing about, therefore, in due time, his own separate loss and punishment to each person.”

France and England literally, observe, buy *panic* of each other; they pay, each of them, for ten thousand

thousand pounds' worth of terror, a year. Now suppose, instead of buying these ten millions' worth of panic annually, they made up their minds to be at peace with each other, and buy ten millions' worth of knowledge annually; and that each nation spent its ten thousand thousand pounds a year in founding royal libraries, royal art galleries, royal museums, royal gardens, and places of rest. Might it not be better somewhat for both French and English?

It will be long, yet, before that comes to pass. Nevertheless, I hope it will not be long before royal or national libraries will be founded in every considerable city, with a royal series of books in them; the same series in every one of them, chosen books, the best in every kind, prepared for that national series in the most perfect way possible; their text printed all on leaves of equal size, broad of margin, and divided into pleasant volumes, light in the hand, beautiful, and strong, and thorough as examples of binders' work; and that these great libraries will be accessible to all clean and orderly persons at all times of the day and evening; strict law being enforced for this cleanliness and quietness.

I could shape for you other plans, for art-galleries, and for natural history galleries, and for many precious, many, it seems to me, needful, things; but this book plan is the easiest and needfullest, and would prove a considerable tonic to what we call our British constitution, which has fallen dropsical of late, and has an evil thirst, and evil hunger, and wants healthier feeding. You have got its corn laws repealed for it; try if you cannot get corn laws established for it, dealing in a better bread;—bread made of that old enchanted Arabian grain, the Sesame, which opens doors;—doors, not of robbers', but of Kings' Treasuries.

Friends, the treasuries of true kings are the streets of their cities; and the gold they gather, which for others is as the mire of the streets, changes itself, for them and their people, into a crystalline pavement for evermore.

LECTURE II.—LILIES.

OF QUEENS' GARDENS.

“ὥς κρίνον ἐν μέσῳ ἀκανθῶν, οὕτως ἡ πλησίον μου.”*

IT will, perhaps, be well, as this Lecture is the sequel of one previously given, that I should shortly state to you my general intention in both. The questions specially proposed to you in the first, namely, *How* and *What* to Read, rose out of a far deeper one, which it was my endeavor to make you propose earnestly to yourselves, namely, *Why* to Read. I want you to feel, with me, that whatever advantages we possess in the present day in the diffusion of education and of literature, can only be rightly used by any of us when we have apprehended clearly what education is to lead to, and literature to teach. I wish you to see that both well-directed moral training and well-chosen reading lead to the possession of a power over the ill-guided and illiterate, which is, according to the measure of it, in the truest sense, *kingly*; conferring indeed the purest kingship that can exist among men: too many other kingships (however distinguished by visible insignia or material power) being either spectral, or tyrannous;—Spectral—that is to say, aspects and shadows only of royalty, hollow as death, and which only the “Likeness of a kingly crown have on;” or else tyrannous—that is to say, substituting their own will for the law of justice and love by which all true kings rule.

There is, then, I repeat—and as I want to leave this idea with you, I begin with it, and shall end with it—

* Canticles ii. 2.

only one pure kind of kingship ; an inevitable and eternal kind, crowned or not : the kingship, namely, which consists in a stronger moral state, and a truer thoughtful state, than that of others ; enabling you, therefore, to guide, or to raise them. Observe that word "State ;" we have got into a loose way of using it. It means literally the standing and stability of a thing ; and you have the full force of it in the derived word "statue" — "the immovable thing." A king's majesty or "state," then, and the right of his kingdom to be called a state, depends on the movelessness of both :—without tremor, without quiver of balance ; established and enthroned upon a foundation of eternal law which nothing can alter nor overthrow.

Believing that all literature and all education are only useful so far as they tend to confirm this calm, beneficent, and *therefore* kingly, power—first, over ourselves, and, through ourselves, over all around us, I am now going to ask you to consider with me farther, what special portion or kind of this royal authority, arising out of noble education, may rightly be possessed by women ; and how far they also are called to a true queenly power. Not in their households merely, but over all within their sphere. And in what sense, if they rightly understood and exercised this royal or gracious influence, the order and beauty induced by such benignant power would justify us in speaking of the territories over which each of them reigned, as "Queens' Gardens."

And here, in the very outset, we are met by a far deeper question, which—strange though this may seem—remains among many of us yet quite undecided, in spite of its infinite importance.

We cannot determine what the queenly power of women should be, until we are agreed what their ordinary power should be. We cannot consider how education may fit them for any widely extending duty, until we are agreed what is their true constant duty. And their never was a time when wilder words were spoken, or more vain imagination permitted, respecting

this question—quite vital to all social happiness. The relations of the womanly to the manly nature, their different capacities of intellect or of virtue, seem never to have been yet measured with entire consent. We hear of the mission and of the rights of Woman, as if these could ever be separate from the mission and the rights of Man;—as if she and her lord were creatures of independent kind and of irreconcilable claim. This, at least, is wrong. And not less wrong—perhaps even more foolishly wrong (for I will anticipate thus far what I hope to prove)—is the idea that woman is only the shadow and attendant image of her lord, owing him a thoughtless and servile obedience, and supported altogether in her weakness by the pre-eminence of his fortitude.

This, I say, is the most foolish of all errors respecting her who was made to be the helpmate of man. As if he could be helped effectively by a shadow, or worthily by a slave!

Let us try, then, whether we cannot get at some clear and harmonious idea (it must be harmonious if it is true) of what womanly mind and virtue are in power and office, with respect to man's; and how their relations, rightly accepted, aid, and increase, the vigor, and honor, and authority of both.

And now I must repeat one thing I said in the last lecture: namely, that the first use of education was to enable us to consult with the wisest and the greatest men on all points of earnest difficulty. That to use books rightly, was to go to them for help: to appeal to them, when our own knowledge and power of thought failed; to be led by them into wider sight, purer conception than our own, and receive from them the united sentence of the judges and councils of all time, against our solitary and unstable opinion.

Let us do this now. Let us see whether the greatest, the wisest, the purest-hearted of all ages are agreed in any wise on this point: let us hear the testimony they have left respecting what they held to be the true dignity of woman, and her mode of help to man.

And first let us take Shakespeare.

Note broadly in the outset, Shakespeare has no heroes;—he has only heroines. There is not one entirely heroic figure in all his plays, except the slight sketch of Henry the Fifth, exaggerated for the purposes of the stage; and the still slighter Valentine in *The Two Gentlemen of Verona*. In his labored and perfect plays you have no hero. Othello would have been one, if his simplicity had not been so great as to leave him the prey of every base practice round him; but he is the only example even approximating to the heroic type. Coriolanus—Cæsar—Antony,—stand in flawed strength, and fall by their vanities;—Hamlet is indolent, and drowsily speculative; Romeo an impatient boy; the Merchant of Venice languidly submissive to adverse fortune; Kent, in *King Lear*, is entirely noble at heart, but too rough and unpolished to be of true use at the critical time, and he sinks into the office of a servant only. Orlando, no less noble, is yet the despairing toy of chance, followed, comforted, saved, by Rosalind. Whereas there is hardly a play that has not a perfect woman in it, steadfast in grave hope, and errorless purpose; Cordelia, Desdemona, Isabella, Hermione, Imogen, Queen Katherine, Perdita, Sylvia, Viola, Rosalind, Helena, and last, and perhaps loveliest, Virgilia, are all faultless; conceived in the highest heroic type of humanity.

Then observe, secondly,

The catastrophe of every play is caused by the folly or fault of a man; the redemption, if there be any, is by the wisdom and virtue of a woman, and, failing that, there is none. The catastrophe of *King Lear* is owing to his own want of judgment, his impatient vanity, his misunderstanding of his children; the virtue of his one true daughter would have saved him from all the injuries of the others, unless he had cast her away from him; as it is, she all but saves him.

Of Othello I need not trace the tale;—nor the one weakness of his so mighty love; nor the inferiority of his perceptive intellect to that even of the second woman

character in the play, the Emilia who dies in wild testimony against his error :—" Oh, murderous coxcomb ! What should such a fool do with so good a wife ? "

In *Romeo and Juliet*, the wise and entirely brave stratagem of the wife is brought to ruinous issue by the reckless impatience of her husband. In *Winter's Tale*, and in *Cymbeline*, the happiness and existence of two princely households, lost through long years, and imperilled to the death by the folly and obstinacy of the husbands, are redeemed at last by the queenly patience and wisdom of the wives. In *Measure for Measure*, the injustice of the judges, and the corrupt cowardice of the brother, are opposed to the victorious truth and adamantine purity of a woman. In *Coriolanus*, the mother's counsel, acted upon in time, would have saved her son from all evil ; his momentary forgetfulness of it is his ruin ; her prayer, at last granted, saves him—not, indeed, from death, but from the curse of living as the destroyer of his country.

And what shall I say of *Julia*, constant against the fickleness of a lover who is a mere wicked child ?—of *Helena*, against the petulance and insult of a careless youth ?—of the patience of *Hero*, the passion of *Beatrice*, and the calmly devoted wisdom of the "unlabeled girl," who appears among the helplessness, the blindness, and the vindictive passions of men, as a gentle angel, to save merely by her presence, and defeat the worst intensities of crime by her smile ?

Observe, further, among all the principal figures in Shakespeare's plays, there is only one weak woman—*Ophelia* ; and it is because she fails *Hamlet* at the critical moment, and is not, and cannot in her nature be, a guide to him when he needs her most, that all the bitter catastrophe follows. Finally, though there are three wicked women among the principal figures, *Lady Macbeth*, *Regan*, and *Goneril*, they are felt at once to be frightful exceptions to the ordinary laws of life ; fatal in their influence also in proportion to the power for good which they have abandoned.

Such, in broad light, is Shakespeare's testimony to

the position and character of women in human life. He represents them as infallibly faithful and wise counsellors,—incorruptibly just and pure examples—strong always to sanctify, even when they cannot save.

Not as in any wise comparable in knowledge of the nature of man,—still less in his understanding of the causes and courses of fate,—but only as the writer who has given us the broadest view of the conditions and modes of ordinary thought in modern society, I ask you next to receive the witness of Walter Scott.

I put aside his merely romantic prose writings as of no value; and though the early romantic poetry is very beautiful, its testimony is of no weight, other than that of a boy's ideal. But his true works, studied from Scottish life, bear a true witness, and in the whole range of these there are but three men who reach the heroic type—Dandie Dinmont, Rob Roy, and Claverhouse: of these, one is a border farmer; another a freebooter; the third a soldier in a bad cause. And these touch the ideal of heroism only in their courage and faith, together with a strong, but uncultivated, or mistakenly applied, intellectual power; while his younger men are the gentlemanly playthings of fantastic fortune, and only by aid (or accident) of that fortune, survive, not vanquish, the trials they involuntarily sustain. Of any disciplined, or consistent character, earnest in a purpose wisely conceived, or dealing with forms of hostile evil, definitely challenged, and resolutely subdued, there is no trace in his conceptions of men. Whereas in his imaginations of women,—in the characters of Ellen Douglas, of Flora MacIvor, Rose Bradwardine, Catherine Seyton, Diana Vernon, Lillias Redgauntlet, Alice Bridgenorth, Alice Lee, and Jeanie Deans,—with endless varieties of grace, tenderness, and intellectual power, we find in all a quite infallible and inevitable sense of dignity and justice; a fearless, instant, and untiring self-sacrifice to even the appearance of duty, much more to its real claims; and, finally, a patient wisdom of deeply restrained affection, which does infinitely more than protect its objects from

a momentary error ; it gradually forms, animates, and exalts the characters of the unworthy lovers, until, at the close of the tale, we are just able, and no more, to take patience in hearing of their unmerited success.

So that in all cases, with Scott as with Shakespeare, it is the woman who watches over, teaches, and guides the youth ; it is never, by any chance, the youth who watches over or educates his mistress.

Next, take, though more briefly, graver and deeper testimony—that of the great Italians and Greeks. You know well the plan of Dante's great poem—that it is a love-poem to his dead lady, a song of praise for her watch over his soul. Stooping only to pity, never to love, she yet saves him from destruction—saves him from hell. He is going eternally astray in despair ; she comes down from heaven to his help, and throughout the ascents of Paradise is his teacher, interpreting for him the most difficult truths, divine and human ; and leading him, with rebuke upon rebuke, from *star* to star.

I do not insist upon Dante's conception ; if I began I could not cease : besides, you might think this a wild imagination on one poet's heart. So I will rather read to you a few verses of the deliberate writing of a knight of Pisa to his living lady, wholly characteristic of the feeling of all the noblest men of the thirteenth century, preserved among many other such records of knightly honor and love, which Dante Rossetti has gathered for us from among the early Italian poets.

For lo ! thy law is passed
That this my love should manifestly be
To serve and honor thee :
And so I do ; and my delight is full,
Accepted for the servant of thy rule.

Without almost, I am all rapturous,
Since thus my will was set
To serve, thou flower of joy, thine excellence :
Nor ever seems it anything could rouse
A pain or regret,
But on thee dwells mine every thought and sense :
Considering that from thee all virtues spread
As from a fountain head,—

*That in thy gift is wisdom's best avail,
And honor without fail ;
With whom each sovereign good dwells separate,
Fulfilling the perfection of thy state.*

Lady, since I conceived
Thy pleasurable aspect in my heart,
*My life has been apart
In shining brightness and the place of truth ;*
Which till that time, good sooth,
Groped among shadows in a darken'd place,
Where many hours and days
It hardly ever had remember'd good.
But now my servitude
Is thine, and I am full of joy and rest.
A man from a wild beast
Thou madest me, since for thy love I lived.

You may think, perhaps, a Greek knight would have had a lower estimate of women than this Christian lover. His own spiritual subjection to them was indeed not so absolute ; but as regards their own personal character, it was only because you could not have followed me so easily, that I did not take the Greek women instead of Shakespeare's ; and instance, for chief ideal types of human beauty and faith, the simple mother's and wife's heart of Andromache ; the divine, yet rejected wisdom of Cassandra ; the playful kindness and simple princess-life of happy Nausicaa ; the housewifely calm of that of Penelope, with its watch upon the sea ; the ever patient, fearless, hopelessly devoted piety of the sister, and daughter, in Antigone ; the bowing down of Iphigenia, lamb-like and silent ; and, finally, the expectation of the resurrection, made clear to the soul of the Greeks in the return from her grave of that Alcestis, who, to save her husband, had passed calmly through the bitterness of death.

Now I could multiply witness upon witness of this kind upon you if I had time. I would take Chaucer, and show you why he wrote a Legend of Good Women ; but no Legend of Good Men. I would take Spenser, and show you how all his fairy knights are sometimes deceived and sometimes vanquished ; but the soul of Una is never darkened, and the spear of Britomart is never broken. Nay, I could go back into

the mythical teaching of the most ancient times, and show you how the great people,—by one of whose princesses it was appointed that the Lawgiver of all the earth should be educated, rather than by his own kindred;—how that great Egyptian people, wisest then of nations, gave to their Spirit of Wisdom the form of a woman; and into her hand, for a symbol, the weaver's shuttle: and how the name and the form of that spirit, adopted, believed, and obeyed by the Greeks, became that Athena of the olive-helm, and cloudy shield, to whose faith you owe, down to this date, whatever you hold most precious in art, in literature, or in types of national virtue.

But I will not wander into this distant and mythical element; I will only ask you to give its legitimate value to the testimony of these great poets and men of the world,—consistent as you see it is on this head. I will ask you whether it can be supposed that these men, in the main work of their lives, are amusing themselves with a fictitious and idle view of the relations between man and woman;—nay, worse than fictitious or idle; for a thing may be imaginary, yet desirable, if it were possible; but this, their ideal of women, is, according to our common idea of the marriage relation, wholly undesirable. The woman, we say, is not to guide, nor even to think, for herself. The man is always to be the wiser; he is to be the thinker, the ruler, the superior in knowledge and discretion, as in power. Is it not somewhat important to make up our minds on this matter? Are all these great men mistaken, or are we? Are Shakespeare and Æschylus, Dante and Homer, merely dressing dolls for us; or, worse than dolls, unnatural visions, the realization of which, were it possible, would bring anarchy into all households and ruin into all affections? Nay, if you could suppose this, take lastly the evidence of facts, given by the human heart itself. In all Christian ages which have been remarkable for their purity or progress, there has been absolute yielding of obedient devotion by the lover to his mistress. I say

obedient—not merely enthusiastic and worshipping in imagination, but entirely subject, receiving from the beloved woman, however young, not only the encouragement, the praise, and the reward of all toil, but, so far as any choice is open, or any question difficult of decision, the *direction* of all toil. That chivalry, to the abuse and dishonor of which are attributable primarily whatever is cruel in war, unjust in peace, or corrupt and ignoble in domestic relations; and to the original purity and power of which we owe the defence alike of faith, of law, and of love;—that chivalry, I say, in its very first conception of honorable life, assumes the subjection of the young knight to the command—should it even be the command in caprice—of his lady. It assumes this, because its masters knew that the first and necessary impulse of every truly taught and knightly heart is this of blind service to its lady: that where that true faith and captivity are not, all wayward and wicked passion must be; and that in this rapturous obedience to the single love of his youth, is the sanctification of all man's strength, and the continuance of all his purposes. And this, not because such obedience would be safe, or honorable, were it ever rendered to the unworthy; but because it ought to be impossible for every noble youth—it *is* impossible for every one rightly trained—to love any one whose gentle counsel he cannot trust, or whose prayerful command he can hesitate to obey.

I do not insist by any farther argument on this, for I think it should commend itself at once to your knowledge of what has been and to your feeling of what should be. You cannot think that the buckling on of the knight's armor by his lady's hand was a mere caprice of romantic fashion. It is the type of an eternal truth—that the soul's armor is never well set to the heart unless a woman's hand has braced it; and it is only when she braces it loosely that the honor of manhood fails. Know you not those lovely lines—I would they were learned by all youthful ladies of England:—

" Ah wasteful woman ! she who may
 On her sweet self set her own price,
 Knowing he cannot choose but pay—
 How has she cheapen'd Paradise !
 How given for nought her priceless gift,
 How spoiled the bread and spill'd the wine,
 Which, spent with due, respective thrift,
 Had made brutes men, and men divine ! " *

Thus much, then, respecting the relations of lovers I believe you will accept. But what we too often doubt is the fitness of the continuance of such a relation throughout the whole of human life. We think it right in the lover and mistress, not in the husband and wife. That is to say, we think that a reverent and tender duty is due to one whose affection we still doubt, and whose character we as yet do but partially and distantly discern ; and that this reverence and duty are to be withdrawn when the affection has become wholly and limitlessly our own, and the character has been so sifted and tried that we fear not to entrust it with the happiness of our lives. Do you not see how ignoble this is, as well as how unreasonable ? Do you not feel that marriage—when it is marriage at all,—is only the seal which marks the vowed transition of temporary into untiring service, and of fitful into eternal love ?

But how, you will ask, is the idea of this guiding function of the woman reconcilable with a true wifely subjection ? Simply in that it is a *guiding*, not a determining, function. Let me try to show you briefly how these powers seem to be rightly distinguishable.

We are foolish, and without excuse foolish, in speaking of the "superiority" of one sex to the other, as if they could be compared in similar things. Each has what the other has not : each completes the other, and is completed by the other : they are in nothing alike, and the happiness and perfection of both depends on each asking and receiving from the other what the other only can give.

Now their separate characters are briefly these :

* Coventry Patmore.

The man's power is active, progressive, defensive. He is eminently the doer, the creator, the discoverer, the defender. His intellect is for speculation and invention; his energy for adventure, for war, and for conquest, wherever war is just, wherever conquest necessary. But the woman's power is for rule, not for battle,—and her intellect is not for invention or creation, but for sweet ordering, arrangement, and decision. She sees the qualities of things, their claims and their places. Her great function is Praise: she enters into no contest, but infallibly judges the crown of contest. By her office, and place, she is protected from all danger and temptation. The man, in his rough work in open world, must encounter all peril and trial:—to him, therefore, the failure, the offence, the inevitable error: often he must be wounded, or subdued, often misled, and *always* hardened. But he guards the woman from all this; within his house, as ruled by her, unless she herself has sought it, need enter no danger, no temptation, no cause of error or offence. This is the true nature of home—it is the place of Peace; the shelter, not only from all injury, but from all terror, doubt, and division. In so far as it is not this, it is not home; so far as the anxieties of the outer life penetrate into it, and the inconsistently-minded, unknown, unloved, or hostile society of the outer world is allowed by either husband or wife to cross the threshold, it ceases to be home; it is then only a part of that outer world which you have roofed over, and lighted fire in. But so far as it is a sacred place, a vestal temple, a temple of the hearth watched over by Household Gods, before whose faces none may come but those whom they can receive with love,—so far as it is this, and roof and fire are types only of a nobler shade and light,—shade as of the rock in a weary land, and light as of the Pharos in the stormy sea;—so far it vindicates the name, and fulfils the praise, of home.

And wherever a true wife comes, this home is always round her. The stars only may be over her

head ; the glow-worm in the night-cold grass may be the only fire at her foot : but home is yet wherever she is ; and for a noble woman it stretches far round her, better than ceiled with cedar, or painted with vermilion, shedding its quiet light far, for those who else were homeless.

This, then, I believe to be,—will you not admit it to be,—the woman's true place and power ? But do not you see that to fulfil this, she must—as far as one can use such terms of a human creature—be incapable of error ? So far as she rules, all must be right, or nothing is. She must be enduringly, incorruptibly good ; instinctively, infallibly wise—wise, not for self-development, but for self-renunciation : wise, not that she may set herself above her husband, but that she may never fail from his side : wise, not with the narrowness of insolent and loveless pride, but with the passionate gentleness of an infinitely variable, because infinitely applicable, modesty of service—the true changefulness of woman. In that great sense—" *La donna è mobile,*" not "*Qual pium' al vento ;*" no, nor yet "*Variable as the shade, by the light quivering aspen made ;*" but variable as the *light*, manifold in fair and serene division, that it may take the color of all that it falls upon, and exalt it.

II. I have been trying, thus far, to show what should be the place, and what the power of woman. Now, secondly, we ask, What kind of education is to fit her for these ?

And if you indeed think this a true conception of her office and dignity, it will not be difficult to trace the course of education which would fit her for the one, and raise her to the other.

The first of our duties to her—no thoughtful persons now doubt this,—is to secure for her such physical training and exercise as may confirm her health, and perfect her beauty : the highest refinement of that beauty being unattainable without splendor of activity and of delicate strength. To perfect her beauty, I say, and increase its power ; it cannot be too power-

ful, nor shed its sacred light too far : only remember that all physical freedom is vain to produce beauty without a corresponding freedom of heart. There are two passages of that poet who is distinguished, it seems to me, from all others—not by power, but by exquisite *rightness*—which point you to the source, and describe to you, in a few syllables, the completion of womanly beauty. I will read the introductory stanzas, but the last is the one I wish you specially to notice :

Three years she grew in sun and shower,
Then Nature said, a lovelier flower
On earth was never sown.
This child I to myself will take ;
She shall be mine, and I will make
A lady of my own.

Myself will to my darling be
Both law and impulse ; and with me
The girl, in rock and plain,
In earth and heaven, in glade and bower,
Shall feel an overseeing power
To kindle, or restrain.

The floating clouds their state shall lend
To her, for her the willow bend ;
Nor shall she fail to see
Even in the motions of the storm,
Grace that shall mould the maiden's form
By silent sympathy.

And *vital feelings of delight*
Shall rear her form to stately height,—
Her virgin bosom swell.
Such *thoughts* to Lucy I will give,
While she and I together live,
Here in this happy dell.

“*Vital feelings of delight*,” observe. There are deadly feelings of delight ; but the natural ones are vital, necessary to the very life.

And they must be feelings of delight, if they are to be vital. Do you think you can make a girl lovely, if you do not make her happy. There is not one restraint you put on a good girl's nature—there is not one check you give to her instincts of affection or of effort—which will not be indelibly written on her

features, with a hardness which is all the more painful because it takes away the brightness from the eyes of innocence, and the charm from the brow of virtue.

This for the means : now note the end. Take from the same poet, in two lines, a perfect description of womanly beauty—

A countenance in which did meet
Sweet records, promises as sweet.

The perfect loveliness of a woman's countenance can only consist in that majestic peace, which is founded in the memory of happy and useful years,—full of sweet records ; and from the joining of this with that yet more majestic childishness, which is still full of change and promise ;—opening always—modest at once, and bright, with hope of better things to be won, and to be bestowed. There is no old age where there is still that promise—it is eternal youth.

Thus, then, you have first to mould her physical frame, and then, as the strength she gains will permit you, to fill and temper her mind with all knowledge and thoughts which tend to confirm its natural instincts of justice, and refine its natural tact of love.

All such knowledge should be given her as may enable her to understand, and even to aid, the work of men : and yet it should be given, not as knowledge,—nor as if it were, or could be, for her an object to know ; but only to feel, and to judge. It is of no moment, as a matter of pride or perfectness in herself, whether she knows many languages or one, but it is of the utmost, that she should be able to show kindness to a stranger's tongue. It is of no moment to her own worth or dignity that she should be acquainted with this science or that ; but it is of the highest that she should be trained in habits of accurate thought ; that she should understand the meaning, the inevitableness, and the loveliness of natural laws, and follow at least some one path of scientific attainment, as far as to the threshold of that bitter

Valley of Humiliation, into which only the wisest and bravest of men can descend, owning themselves forever children, gathering pebbles on a boundless shore. It is of little consequence how many positions of cities she knows, or how many dates of events, or how many names of celebrated persons—it is not the object of education to turn a woman into a dictionary; but it is deeply necessary that she should be taught to enter with her whole personality into the history she reads; to picture the passages of it vitally in her own bright imagination; to apprehend, with her fine instincts, the pathetic circumstances and dramatic relations, which the historian too often only eclipses by his reasoning, and disconnects by his arrangement: it is for her to trace the hidden equities of divine reward, and catch sight, through the darkness, of the fateful threads of woven fire that connect error with its retribution. But, chiefly of all, she is to be taught to extend the limits of her sympathy with respect to that history which is being forever determined, as the moments pass in which she draws her peaceful breath; and to the contemporary calamity which, were it but rightly mourned by her, would recur no more hereafter. She is to exercise herself in imagining what would be the effects upon her mind and conduct, if she were daily brought into the presence of the suffering which is not the less real because shut from her sight. She is to be taught somewhat to understand the nothingness of the proportion which that little world in which she lives and loves, bears to the world in which God lives and loves;—and solemnly she is to be taught to strive that her thoughts of piety may not be feeble in proportion to the number they embrace, nor her prayer more languid than it is for the momentary relief from pain of her husband or her child, when it is uttered for the multitudes of those who have none to love them,—and is “for all who are desolate and oppressed.”

Thus far, I think, I have had your concurrence, perhaps you will not be with me in what I believe is

most needful for me to say. There *is* one dangerous science for women—one which let them indeed beware how they profanely touch—that of theology. Strange, and miserably strange, that while they are modest enough to doubt their powers, and pause at the threshold of sciences where every step is demonstrable and sure, they will plunge headlong, and without one thought of incompetency, into that science in which the greatest men have trembled, and the wisest erred. Strange, that they will complacently and pridefully bind up whatever vice or folly there is in them, whatever arrogance, petulance, or blind incomprehensiveness, into one bitter bundle of consecrated myrrh. Strange, in creatures born to be Love visible, that where they can know least they will condemn first, and think to recommend themselves to their Master by scrambling up the steps of His judgment throne, to divide it with Him. Most strange, that they should think they were led by the Spirit of the Comforter into habits of mind which have become in them the unmixed elements of home discomfort; and that they dare to turn the Household Gods of Christianity into ugly idols of their own—spiritual-dolls, for them to dress according to their caprice; and from which their husbands must turn away in grieved contempt, lest they should be shrieked at for breaking them.

I believe, then, with this exception, that a girl's education should be nearly, in its course and material of study, the same as a boy's; but quite differently directed. A woman, in any rank of life, ought to know whatever her husband is likely to know, but to know it in a different way. His command of it should be foundational and progressive, hers, general and accomplished for daily and helpful use. Not but that it would often be wiser in men to learn things in a womanly sort of way, for present use, and to seek for the discipline and training of their mental powers in such branches of study as will be afterwards fittest for social service; but, speaking broadly, a man ought to know any language or science he learns, thoroughly,

while a woman ought to know the same language, or science, only so far as may enable her to sympathize in her husband's pleasures, and in those of his best friends.

Yet, observe, with exquisite accuracy as far as she reaches. There is a wide difference between elementary knowledge and superficial knowledge—between a firm beginning, and a feeble smattering. A woman may always help her husband by what she knows, however little; by what she half-knows, or mis-knows, she will only tease him.

And, indeed, if there were to be any difference between a girl's education and a boy's, I should say that of the two the girl's should be earlier ied, as her intellect ripens faster, into deep and serious subjects; and that her range of literature should be, not more, but less frivolous, calculated to add the qualities of patience and seriousness to her natural poignancy of thought and quickness of wit; and also to keep her in a lofty and pure element of thought. I enter not now into any question of choice of books; only be sure that her books are not heaped up in her lap as they fall out of the package of the circulating library, wet with the last and lightest spray of the fountain of folly.

Or even of the fountain of wit; for with respect to that sore temptation of novel-reading, it is not the badness of a novel that we should dread, but its overwrought interest. The weakest romance is not so stupefying as the lower forms of religious exciting literature, and the worst romance is not so corrupting as false history, false philosophy, or false political essay. But the best romance becomes dangerous, if, by its excitement, it renders the ordinary course of life uninteresting, and increases the morbid thirst for useless acquaintance with scenes in which we shall never be called upon to act.

I speak therefore of good novels only; and our modern literature is particularly rich in types of such. Well read, indeed, these books have serious use, being

nothing less than treatises on moral anatomy and chemistry ; studies of human nature in the elements of it. But I attach little weight to this function : they are hardly ever read with earnestness enough to permit them to fulfil it. The utmost they usually do is to enlarge somewhat the charity of a kind reader, or the bitterness of a malicious one ; for each will gather, from the novel, food for her own disposition. Those who are naturally proud and envious will learn from Thackeray to despise humanity ; those who are naturally gentle, to pity it ; those who are naturally shallow, to laugh at it. So, also, there might be a serviceable power in novels to bring before us, in vividness, a human truth which we had before dimly conceived ; but the temptation to picturesqueness of statement is so great, that often the best writers of fiction cannot resist it ; and our views are rendered so violent and one-sided, that their vitality is rather a harm than good.

Without, however, venturing here on any attempt at decision how much novel-reading should be allowed, let me at least clearly assert this, that whether novels or poetry, or history be read, they should be chosen, not for what is *out* of them, but for what is *in* them. The chance and scattered evil that may here and there haunt, or hide itself in, a powerful book, never does any harm to a noble girl ; but the emptiness of an author oppresses her, and his amiable folly degrades her. And if she can have access to a good library of old and classical books, there need be no choosing at all. Keep the modern magazine and novel out of your girl's way : turn her loose into the old library every wet day, and let her alone. She will find what is good for her ; you cannot : for there is just this difference between the making of a girl's character and a boy's—you may chisel a boy into shape, as you would a rock, or hammer him into it, if he be of a better kind, as you would a piece of bronze. But you cannot hammer a girl into anything. She grows as a flower does,—she will wither without sun ; she will decay in her

sheath, as the narcissus does, if you do not give her air enough; she may fall, and defile her head in dust, if you leave her without help at some moments of her life; but you cannot fetter her; she must take her own fair form and way, if she take any, and in mind as in body must have always

Her household motions light and free
And steps of virgin liberty.

Let her loose in the library, I say, as you do a fawn in a field. It knows the bad weeds twenty times better than you; and the good ones too, and will eat some bitter and prickly ones, good for it, which you had not the slightest thought were good.

Then, in art, keep the finest models before her, and let her practice in all accomplishments be accurate and thorough, so as to enable her to understand more than she accomplishes. I say the finest models—that is to say, the truest, simplest, usefulest. Note those epithets; they will range through all the arts. Try them in music, there you might think them the least applicable. I say the truest, that in which the notes most closely and faithfully express the meaning of the words, or the character of intended emotion; again, the simplest, that in which the meaning and melody are attained with the fewest and most significant notes possible; and, finally, the usefulest, that music which makes the best words most beautiful, which enchants them in our memories each with its own glory of sound, and which applies them closest to the heart at the moment we need them.

And not only in the material and in the course, but yet more earnestly in the spirit of it, let a girl's education be as serious as a boy's. You bring up your girls as if they were meant for sideboard ornaments, and then complain of their frivolity. Give them the same advantages that you give their brothers—appeal to the same grand instincts of virtue in them; teach *them* also that courage and truth are the pillars of their being: do you think that they would not answer that

appeal, brave and true as they are even now, when you know that there is hardly a girl's school in this Christian kingdom where the children's courage or sincerity would be thought of half so much importance as their way of coming in at a door; and when the whole system of society, as respects the mode of establishing them in life, is one rotten plague of cowardice and imposture,—cowardice, in not daring to let them live, or love, except as their neighbors choose; and imposture, in bringing, for the purpose of our own pride, the full glow of the world's worst vanity upon a girl's eyes, at the very period when the whole happiness of her future existence depends upon her remaining undazzled?

And give them, lastly, not only noble teachings, but noble teachers. You consider somewhat, before you send your boy to school, what kind of a man the master is;—whatsoever kind of man he is, you at least give him full authority over your son, and show some respect to him yourself; if he comes to dine with you, you do not put him at a side table; you know also that, at his college, your child's immediate tutor will be under the direction of some still higher tutor, for whom you have absolute reverence. You do not treat the Dean of Christ Church or the Master of Trinity as your inferiors.

But what teachers do you give your girls, and what reverence do you show to the teachers you have chosen? Is a girl likely to think her own conduct, or her own intellect, of much importance, when you trust the entire formation of her character, moral and intellectual, to a person whom you let your servants treat with less respect than they do your housekeeper (as if the soul of your child were a less charge than jams and groceries), and whom you yourself think you confer an honor upon by letting her sometimes sit in the drawing-room in the evening?

Thus, then, of literature as her help, and thus of art. There is one more help which she cannot do without—one which, alone, has sometimes done more than all

other influences besides,—the help of wild and fair nature. Hear this of the education of Joan of Arc :

The education of this poor girl was mean according to the present standard ; was ineffably grand, according to a purer philosophic standard ; and only not good for our age, because for us it would be unattainable. * * *

Next after her spiritual advantages, she owed most to the advantages of her situation. The fountain of Domrémy was on the brink of a boundless forest ; and it was haunted to that degree by fairies, that the parish priest (*curé*) was obliged to read mass there once a year, in order to keep them in any decent bounds. * * *

But the forests of Domrémy—those were the glories of the land ; for in them abode mysterious powers and ancient secrets that towered into tragic strength. “Abbeys there were, and abbey windows,”—“like Moorish temples of the Hindoos,” that exercised even princely power both in Touraine and in the German Diets. These had their sweet bells that pierced the forests for many a league at matins or vespers, and each its own dreamy legend. Few enough, and scattered enough, were these abbeys, so as in no degree to disturb the deep solitude of the region ; yet many enough to spread a network or awning of Christian sanctity over what else might have seemed a heathen wilderness.*

Now, you cannot, indeed, have here in England, woods eighteen miles deep to the centre ; but you can, perhaps, keep a fairy or two for your children yet, if you wish to keep them. But *do* you wish it ? Suppose you had each, at the back of your houses, a garden, large enough for your children to play in, with just as much lawn as would give them room to run, —no more—and that you could not change your abode ; but that, if you choose, you could double your income, or quadruple it, by digging a coal shaft in the middle of the lawn, and turning the flower-beds into heaps of coke. Would you do it ? I think not. I can tell you, you would be wrong if you did, though it gave you income sixty-fold instead of four-fold.

Yet this is what you are doing with all England. The whole country is but a little garden, not more than enough for your children to run on the lawns of, if you would let them *all* run there. And this little garden you will turn into furnace-ground, and fill with heaps of cinders, if you can ; and those children of yours,

* “Joan of Arc : in reference to M. Michelet’s History of France.” De Quincey’s Works. Vol. iii. p. 217.

not you, will suffer for it. For the fairies will not be all banished ; there are fairies of the furnace as of the wood, and their first gifts seem to be " sharp arrows of the mighty ;" but their last gifts are " coals of juniper."

And yet I cannot—though there is no part of my subject that I feel more—press this upon you ; for we made so little use of the power of nature while we had it that we shall hardly feel what we have lost. Just on the other side of the Mersey you have your Snowdon, and your Menai Straits, and that mighty granite rock beyond the moors of Anglesea, splendid in its heathery crest, and foot planted in the deep sea, once thought of as sacred—a divine promontory, looking westward ; the Holy Head or Headland, still not without awe when its red light glares first through storm. These are the hills, and these the bays and blue inlets, which, among the Greeks, would have been always loved, always fateful in influence on the national mind. That Snowdon is your Parnassus ; but where are its Muses ? That Holyhead mountain is your Island of Ægina, but where is its temple to Minerva ?

Shall I read you what the Christian Minerva had achieved under the shadow of our Parnassus, up to the year 1848 ?—Here is a little account of a Welsh school, from page 261 of the Report on Wales, published by the Committee of Council on Education. This is a school close to a town containing 5000 persons :—

I then called up a larger class, most of whom had recently come to the school. Three girls repeatedly declared they had never heard of Christ, and two that they had never heard of God. Two out of six thought Christ was on earth now (" they might have had a worse thought, perhaps"), three knew nothing about the crucifixion. Four out of seven did not know the names of the months, nor the number of days in a year. They had no notion of addition beyond two and two, or three and three ; their minds were perfect blanks.

O ye women of England ! from the Princess of that Wales to the simplest of you, do not think your own children can be brought into their true fold of rest while these are scattered on the hills, as sheep having

no shepherd. And do not think your daughters can be trained to the truth of their own human beauty, while the pleasant places, which God made at once for their school-room and their play-ground, lie desolate and defiled. You cannot baptize them rightly in those inch-deep fonts of yours, unless you baptize them also in the sweet waters which the great Law-giver strikes forth forever from the rocks of your native land—waters which a Pagan would have worshipped in their purity, and you only worship with pollution. You cannot lead your children faithfully to those narrow axe-hewn church altars of yours, while the dark azure altars in heaven—the mountains that sustain your island throne,—mountains on which a Pagan would have seen the powers of heaven rest in every wreathed cloud—remain for you without inscription; altars built, not to, but by, an Unknown God.

III. Thus far, then, of the nature, thus far of the teaching, of woman, and thus of her household office, and queenliness. We come now to our last, our widest question,—What is her queenly office with respect to the state?

Generally, we are under an impression that a man's duties are public, and a woman's private. But this is not altogether so. A man has a personal work or duty, relating to his own home, and a public work or duty, which is the expansion of the other, relating to the state. So a woman has a personal work or duty, relating to her own home, and a public work and duty, which is also the expansion of that.

Now the man's work for his own home is, as has been said, to secure its maintenance, progress, and defence; the woman's to secure its order, comfort, and loveliness.

Expand both these functions. The man's duty as a member of a commonwealth is to assist in the maintenance, in the advance, in the defence of the state. The woman's duty, as a member of the commonwealth, is to assist in the ordering, in the comforting, and in the beautiful adornment of the state.

What the man is at his own gate, defending it, if need be, against insult and spoil, that also, not in a less, but in a more devoted measure, he is to be at the gate of his country, leaving his home, if need be, even to the spoiler, to do his more incumbent work there.

And, in like manner, what the woman is to be within her gates, as the centre of order, the balm of distress, and the mirror of beauty; that she is also to be without her gates, where order is more difficult, distress more imminent, loveliness more rare.

And as within the human heart there is always set an instinct for all its real duties,—an instinct which you cannot quench, but only warp and corrupt if you withdraw it from its true purpose;—as there is the intense instinct of love; which, rightly disciplined, maintains all the sanctities of life, and, misdirected, undermines them; and *must* do either the one or the other; so there is in the human heart an inextinguishable instinct, the love of power, which, rightly directed, maintains all the majesty of law and life, and misdirected, wrecks them.

Deep rooted in the innermost life of the heart of man, and of the heart of woman, God set it there, and God keeps it there. Vainly, as falsely, you blame or rebuke the desire of power!—For Heaven's sake, and for Man's sake, desire it all you can. But *what* power? That is all the question. Power to destroy? the lion's limb, and the dragon's breath? Not so. Power to heal, to redeem, to guide and to guard. Power of the sceptre and shield; the power of the royal hand that heals in touching,—that binds the fiend and looses the captive; the throne that is founded on the rock of Justice, and descended from only by steps of mercy. Will you not covet such power as this, and seek such throne as this, and be no more housewives, but queens?

It is now long since the women of England arrogated, universally, a title which once belonged to nobility only; and, having once been in the habit of accepting the simple title of gentlewoman, as correspondent to that of gentleman, insisted on the privilege of assuming the

title of "Lady,"* which properly corresponds only to the title of "Lord."

I do not blame them for this ; but only for their narrow motive in this. I would have them desire and claim the title of Lady, provided they claim, not merely the title, but the office and duty signified by it. Lady means "bread-giver" or "loaf-giver," and Lord means "maintainer of laws," and both titles have reference, not to the law which is maintained in the house, nor to the bread which is given to the household ; but to law maintained for the multitude, and to bread broken among the multitude. So that a Lord has legal claim only to his title in so far as he is the maintainer of the justice of the Lord of Lords ; and a Lady has legal claim to her title, only so far as she communicates that help to the poor representatives of her Master, which women once, ministering to Him of their substance, were permitted to extend to that Master Himself ; and when she is known, as He Himself once was, in breaking of bread.

And this beneficent and legal dominion, this power of the Dominus, or House Lord, and of the Domina, or House-Lady, is great and venerable, not in the number of those through whom it has lineally descended, but in the number of those whom it grasps within its sway ; it is always regarded with reverent worship wherever its dynasty is founded on its duty, and its ambition co-relative with its beneficence. Your fancy is pleased with the thought of being noble ladies, with a train of vassals. Be it so ; you cannot be too noble, and your train cannot be too great ; but see to it that your train is of vassals whom you serve and feed, not merely of slaves who serve and feed *you* ; and that the

* I wish there were a true order of chivalry instituted for our English youth of certain ranks, in which both boy and girl should receive, at a given age, their knighthood and ladyhood by true title ; attainable only by certain probation and trial both of character and accomplishment ; and to be forfeited, on conviction, by their peers, of any dishonorable act. Such an institution would be entirely, and with all noble results, possible, in a nation which loved honor. That it would not be possible among us, is not to the discredit of the scheme.

multitude which obeys you is of those whom you have comforted, not oppressed,—whom you have redeemed, not led into captivity.

And this, which is true of the lower or household dominion, is equally true of the queenly dominion ;—that highest dignity is open to you, if you will also accept that highest duty. *Rex et Regina—Roi et Reine—“Right-doers ;”* they differ but from the Lady and Lord, in that their power is supreme over the mind as over the person—that they not only feed and clothe, but direct and teach. And whether consciously or not, you must be, in many a heart, enthroned : there is no putting by that crown ; queens you must always be ; queens to your lovers ; queens to your husbands and your sons ; queens of higher mystery to the world beyond, which bows itself, and will forever bow, before the myrtle crown, and the stainless sceptre, of womanhood. But, alas ! you are too often idle and careless queens, grasping at majesty in the least things, while you abdicate it in the greatest ; and leaving misrule and violence to work their will among men, in defiance of the power, which, holding straight in gift from the Prince of all Peace, the wicked among you betray, and the good forget.

“Prince of Peace.” Note that name. When kings rule in that name, and nobles, and the judges of the earth, they also, in their narrow place, and mortal measure, receive the power of it. There are no other rulers than they : other rule than theirs is but *misrule* ; they who govern verily “*Dei gratiâ*” are all princes, yes, or princesses, of peace. There is not a war in the world, no, nor an injustice, but you women are answerable for it ; not in that you have provoked, but in that you have not hindered. Men, by their nature, are prone to fight ; they will fight for any cause, or for none. It is for you to choose their cause for them, and to forbid them when there is no cause. There is no suffering, no injustice, no misery in the earth, but the guilt of it lies lastly with you. Men can bear the sight of it, but you should not be able to bear it. Men may tread it

down without sympathy in their own struggle; but men are feeble in sympathy, and contracted in hope; it is you only who can feel the depths of pain; and conceive the way of its healing. Instead of trying to do this, you turn away from it; you shut yourselves within your park walls and garden gates; and you are content to know that there is beyond them a whole world in wilderness—a world of secrets which you dare not penetrate; and of suffering which you dare not conceive.

I tell you that this is to me quite the most amazing among the phenomena of humanity. I am surprised at no depths to which, when once warped from its honor, that humanity can be degraded. I do not wonder at the miser's death, with his hands, as they relax, dropping gold. I do not wonder at the sensualist's life, with the shroud wrapped about his feet. I do not wonder at the single-handed murder of a single victim, done by the assassin in the darkness of the railway, or reed-shadow of the marsh. I do not even wonder at the myriad-handed murder of multitudes, done boastfully in the daylight, by the frenzy of nations, and the immeasurable, unimaginable guilt, heaped up from hell to heaven, of their priests, and kings. But this is wonderful to me—oh, how wonderful!—to see the tender and delicate woman among you, with her child at her breast, and a power, if she would wield it, over it, and over its father, purer than the air of heaven, and stronger than the seas of the earth—nay, a magnitude of blessing which her husband would not part with for all that earth itself, though it were made of one entire and perfect chrysolite :—to see her abdicate this majesty to play at precedence with her next-door neighbor! This is wonderful—oh, wonderful!—to see her, with every innocent feeling fresh within her, go out in the morning into her garden to play with the fringes of its guarded flowers, and lift their heads when they are dropping, with her happy smile upon her face, and no cloud upon her brow, because there is a little wall around her place of peace: and yet she knows, in her

heart, if she would only look for its knowledge, that, outside of that little rose-covered wall, the wild grass, to the horizon, is torn up by the agony of men, and beat level by the drift of their life-blood.

Have you ever considered what a deep under meaning there lies, or at least, may be read, if we choose, in our custom of strewing flowers before those whom we think most happy? Do you suppose it is merely to deceive them into the hope that happiness is always to fall thus in showers at their feet?—that wherever they pass they will tread on herbs of sweet scent, and that the rough ground will be made smooth for them by depth of roses? So surely as they believe that, they will have, instead, to walk on bitter herbs and thorns; and the only softness to their feet will be of snow. But it is not thus intended they should believe there is a better meaning in that old custom. The path of a good woman is indeed strewn with flowers; but they rise behind her steps, not before them. "Her feet have touched the meadows, and left the daisies rosy." You think that only a lover's fancy;—false and vain! How if it could be true? You think this also, perhaps, only a poet's fancy—

Even the light harebell raised its head
Elastic from her airy tread.

But it is little to say of a woman, that she only does not destroy where she passes. She should revive; the harebells should bloom, not stoop, as she passes. You think I am going into wild hyperbole? Pardon me, not a whit—I mean what I say in calm English, spoken in resolute truth. You have heard it said—(and I believe there is more than fancy even in that saying, but let it pass for a fanciful one)—that flowers only flourish rightly in the garden of some one who loves them. I know you would like that to be true; you would think it a pleasant magic if you could flush your flowers into brighter bloom by a kind look upon them: nay, more, if your look had the power, not only to cheer, but to guard them—if you could bid the black

blight turn away, and the knotted caterpillar spare—if you could bid the dew fall upon them in the drought, and say to the south wind, in frost—"Come, thou south, and breathe upon my garden, that the spices of it may flow out." This you would think a great thing? And do you think it not a greater thing, that all this, (and how much more than this!) you *can* do, for fairer flowers than these—flowers that could bless you for having blessed them, and will love you for having loved them;—flowers that have eyes like yours, and thoughts like yours, and lives like yours; which, once saved, you save forever? Is this only a little power? Far among the moorlands and the rocks,—far in the darkness of the terrible streets,—these feeble florets are lying, with all their fresh leaves torn, and their stems broken—will you never go down to them, nor set them in order in their little fragrant beds, nor fence them in their shuddering from the fierce wind? Shall morning follow morning, for you, but not for them; and the dawn rise to watch, far away, those frantic Dances of Death;* but no dawn rise to breathe upon these living banks of wild violet, and woodbine, and rose; nor call to you, through your casement,—call, (not giving you the name of the English poet's lady, but the name of Dante's great Matilda, who, on the edge of happy Lethe, stood, wreathing flowers with flowers,) saying:—

Come into the garden, Maud,
For the black bat, night, has flown,
And the woodbine spices are wafted abroad
And the musk of the roses blown?

Will you not go down among them?—among those sweet living things, whose new courage, sprung from the earth with the deep color of heaven upon it, is starting up in strength of goodly spire; and whose purity, washed from the dust, is opening, bud by bud, into the flower of promise;—and still they turn to you, and for you, "The Larkspur listens—I hear, I hear! And the Lily whispers—I wait."

* See note, p. 46.

Did you notice that I missed two lines when I read you that first stanza; and think that I had forgotten them? Hear them now :—

Come into the garden, Maud,
For the black bat, night, has flown;
Come into the garden, Maud,
I am here at the gate, alone.

Who is it, think you, who stands at the gate of this sweeter garden, alone, waiting for you? Did you ever hear, not of a Maude, but a Madeleine, who went down to her garden in the dawn, and found One waiting at the gate, whom she supposed to be the gardener? Have you not sought Him often;—sought Him in vain, all through the night;—sought Him in vain at the gate of that old garden where the fiery sword is set? He is never there; but at the gate of *this* garden He is waiting always—waiting to take your hand—ready to go down to see the fruits of the valley, to see whether the vine has flourished, and the pomegranate budded. There you shall see with Him the little tendrils of the vines that His hand is guiding—there you shall see the pomegranate springing where His hand cast the sanguine seed;—more: you shall see the troops of the angel keepers that, with their wings, wave away the hungry birds from the pathsides where He has sown, and call to each other between the vineyard rows, “Take us the foxes, the little foxes, that spoil the vines, for our vines have tender grapes.” Oh—you queens—you queens; among the hills and happy greenwood of this land of yours, shall the foxes have holes, and the birds of the air have nests; and, in your cities, shall the stones cry out against you, that they are the only pillows where the Son of Man can lay His head?

THE FUTURE

THE FUTURE OF THE FUTURE

THE FUTURE OF THE FUTURE

THE FUTURE OF THE FUTURE

LECTURE III.

THE MYSTERY OF LIFE AND ITS ARTS.

Lecture delivered in the theatre of the Royal College of Science,
Dublin, 1868.

WHEN I accepted the privilege of addressing you to-day, I was not aware of a restriction with respect to the topics of discussion which may be brought before this society*—a restriction which, though entirely wise and right under the circumstances contemplated in its introduction, would necessarily have disabled me, thinking as I think, from preparing any lecture for you on the subject of art in a form which might be permanently useful. Pardon me, therefore, in so far as I must transgress such limitation; for indeed my infringement will be of the letter—not of the spirit—of your commands. In whatever I may say touching the religion which has been the foundation of art, or the policy which has contributed to its power, if I offend one, I shall offend all; for I shall take no note of any separations in creeds, or antagonisms in parties: neither do I fear that ultimately I shall offend any, by proving—or at least stating as capable of positive proof—the connection of all that is best in the crafts and arts of man, with the simplicity of his faith, and the sincerity of his patriotism.

But I speak to you under another disadvantage, by which I am checked in frankness of utterance, not here only, but everywhere; namely, that I am never fully aware how far my audiences are disposed to give me credit for real knowledge of my subject, or

* That no reference should be made to religious questions.

how far they grant me attention only because I have been sometimes thought an ingenious or pleasant essayist upon it. For I have had what, in many respects, I boldly call the misfortune, to set my words sometimes prettily together; not without a foolish vanity in the poor knack that I had of doing so; until I was heavily punished for this pride, by finding that many people thought of the words only, and cared nothing for their meaning. Happily, therefore, the power of using such pleasant language—if indeed it ever were mine—is passing away from me; and whatever I am now able to say at all, I find myself forced to say with great plainness. For my thoughts have changed also, as my words have; and whereas in earlier life, what little influence I obtained was due perhaps chiefly to the enthusiasm with which I was able to dwell on the beauty of the physical clouds, and of their colors in the sky; so all the influence I now desire to retain must be due to the earnestness with which I am endeavoring to trace the form and beauty of another kind of cloud than those; the bright cloud of which it is written—

“What is your life? It is even as a vapor that appeareth for a little time, and then vanisheth away.”

I suppose few people reach the middle or latter period of their age, without having, at some moment of change or disappointment, felt the truth of those bitter words, and been startled by the fading of the sunshine from the cloud of their life, into the sudden agony of the knowledge that the fabric of it was as fragile as a dream, and the endurance of it as transient as the dew. But it is not always that, even at such times of melancholy surprise, we can enter into any true perception that this human life shares, in the nature of it, not only the evanescence, but the mystery of the cloud; that its avenues are wreathed in darkness, and its forms and courses no less fantastic, than spectral and obscure; so that not only in the vanity which we cannot grasp, but in the shadow which we cannot pierce, it is true of this cloudy life of ours, that

"man walketh in a vain shadow, and disquieteth himself in vain."

And least of all, whatever may have been the eagerness of our passions, or the height of our pride, are we able to understand in its depth the third and most solemn character in which our life is like those clouds of heaven; that to it belongs not only their transience, not only their mystery, but also their power; that in the cloud of the human soul there is a fire stronger than the lightning, and a grace more precious than the rain; and that though of the good and evil it shall one day be said alike, that the place that knew them knows them no more, there is an infinite separation between those whose brief presence had there been a blessing, like the mist of Eden that went up from the earth to water the garden, and those whose place knew them only as a drifting and changeful shade, of whom the heavenly sentence is, that they are "wells without water; clouds that are carried with a tempest, to whom the mist of darkness is reserved forever?"

To those among us, however, who have lived long enough to form some just estimate of the rate of the changes which are, hour by hour in accelerating catastrophe, manifesting themselves in the laws, the arts, and the creeds of men, it seems to me, that now at least, if never at any former time, the thoughts of the true nature of our life, and of its powers and responsibilities, should present themselves with absolute sadness and sternness.

And although I know that this feeling is much deepened in my own mind by disappointment, which, by chance, has attended the greater number of my cherished purposes, I do not for that reason distrust the feeling itself, though I am on my guard against an exaggerated degree of it: nay, I rather believe that in periods of new effort and violent change, disappointment is a wholesome medicine; and that in the secret of it, as in the twilight so beloved by Titian, we may see the colors of things with deeper truth than in

the most dazzling sunshine. And because these truths about the works of men, which I want to bring to-day before you, are most of them sad ones, though at the same time helpful; and because also I believe that your kind Irish hearts will answer more gladly to the truthful expression of a personal feeling, than to the exposition of an abstract principle, I will permit myself so much unreserved speaking of my own causes of regret, as may enable you to make just allowance for what, according to your sympathies, you will call either the bitterness, or the insight, of a mind which has surrendered its best hopes, and been foiled in its favorite aims.

I spent the ten strongest years of my life, (from twenty to thirty,) in endeavoring to show the excellence of the work of the man whom I believed, and rightly believed, to be the greatest painter of the schools of England since Reynolds. I had then perfect faith in the power of every great truth or beauty to prevail ultimately, and take its right place in usefulness and honor; and I strove to bring the painter's work into this due place, while the painter was yet alive. But he knew, better than I, the uselessness of talking about what people could not see for themselves. He always discouraged me scornfully, even when he thanked me—and he died before even the superficial effect of my work was visible. I went on, however, thinking I could at least be of use to the public, if not to him, in proving his power. My books got talked about a little. The prices of modern pictures, generally, rose, and I was beginning to take some pleasure in a sense of gradual victory, when, fortunately or unfortunately, an opportunity of perfect trial undeceived me at once, and forever. The trustees of the National Gallery commissioned me to arrange the Turner drawings there, and permitted me to prepare three hundred examples of his studies from nature, for exhibition at Kensington. At Kensington they were and are, placed for exhibition; but they are

not exhibited, for the room in which they hang is always empty.

Well—this showed me at once, that those ten years of my life had been, in their chief purpose, lost. For that, I did not so much care; I had, at least, learned my own business thoroughly, and should be able, as I fondly supposed, after such a lesson, now to use my knowledge with better effect. But what I did care for, was the—to me frightful—discovery, that the most splendid genius in the arts might be permitted by Providence to labor and perish uselessly; that in the very fineness of it there might be something rendering it invisible to ordinary eyes, but, that with this strange excellence, faults might be mingled which would be as deadly as its virtues were vain; that the glory of it was perishable, as well as invisible, and the gift and grace of it might be to us, as snow in summer, and as rain in harvest.

That was the first mystery of life to me. But, while my best energy was given to the study of painting, I had put collateral effort, more prudent, if less enthusiastic, into that of architecture; and in this I could not complain of meeting with no sympathy. Among several personal reasons which caused me to desire that I might give this, my closing lecture on the subject of art here, in Ireland, one of the chief was, that in reading it, I should stand near the beautiful building,—the engineers' school of your college,—which was the first realization I had the joy to see, of the principles I had, until then, been endeavoring to teach; but which alas, is now, to me, no more than the richly canopied monument of one of the most earnest souls that ever gave itself to the arts, and one of my truest and most loving friends, Benjamin Woodward. Nor was it here in Ireland only that I received the help of Irish sympathy and genius. When, to another friend, Sir Thomas Deane, with Mr. Woodward, was entrusted the building of the museum at Oxford, the best details of the work were executed by sculptors who had been born and trained here, and the first window of the façade

of the building, in which was inaugurated the study of natural science in England, in true fellowship with literature, was carved from my design by an Irish sculptor.

You may perhaps think that no man ought to speak of disappointment, to whom, even in one branch of labor, so much success was granted. Had Mr. Woodward now been beside me, I had not so spoken; but his gentle and passionate spirit was cut off from the fulfilment of its purposes, and the work we did together is now become vain. It may not be so in future; but the architecture we endeavored to introduce is inconsistent alike with the reckless luxury, the deforming mechanism, and the squalid misery of modern cities; among the formative fashions of the day, aided, especially in England, by ecclesiastical sentiment, it indeed obtained notoriety; and sometimes behind an engine furnace, or a railroad bank, you may detect the pathetic discord of its momentary grace, and, with toil, decipher its floral carvings choked with soot. I felt answerable to the schools I loved, only for their injury. I perceived that this new portion of my strength had also been spent in vain; and from amidst streets of iron, and palaces of crystal, shrank back at last to the carving of the mountain and color of the flower.

And still I could tell of failure, and failure repeated as years went on; but I have trespassed enough on your patience to show you, in part, the causes of my discouragement. Now let me more deliberately tell you its results. You know there is a tendency in the minds of many men, when they are heavily disappointed in the main purposes of their life, to feel, and perhaps in warning, perhaps in mockery, to declare, that life itself is a vanity. Because it has disappointed them, they think its nature is of disappointment always, or at best, of pleasure that can be grasped by imagination only; that the cloud of it has no strength nor fire within; but is a painted cloud only, to be delighted in, yet despised. You know how beautifully

Pope has expressed this particular phase of thought ;—

“Meanwhile opinion gilds, with varying rays,
These painted clouds that beautify our days ;
Each want of happiness by hope supplied,
And each vacuity of sense, by pride.

Hope builds as fast as Knowledge can destroy ;
In Folly's cup, still laughs the bubble joy.
One pleasure past, another still we gain,
And not a vanity is given in vain.”

But the effect of failure upon my own mind has been just the reverse of this. The more that my life disappointed me, the more solemn and wonderful it became to me. It seemed, contrarily to Pope's saying, that the vanity of it *was* indeed given in vain ; but that there was something behind the veil of it, which was not vanity. It became to me not a painted cloud, but a terrible and impenetrable one : not a mirage, which vanished as I drew near, but a pillar of darkness, to which I was forbidden to draw near. For I saw that both my own failure, and such success in petty things as in its poor triumph seemed to me worse than failure, came from the want of sufficiently earnest effort to understand the whole law and meaning of existence, and to bring it to noble and due end ; as, on the other hand, I saw more and more clearly that all enduring success in the arts, or in any other occupation, had come from the ruling of lower purposes, not by a conviction of their nothingness, but by a solemn faith in the advancing power of human nature, or in the promise, however dimly apprehended, that the mortal part of it would one day be swallowed up in immortality ; and that, indeed, the arts themselves never had reached any vital strength or honor but in the effort to proclaim this immortality, and in the service either of great and just religion, or of some unselfish patriotism, and law of such national life as must be the foundation of religion.

Nothing that I have ever said is more true or necessary—nothing has been more misunderstood or misapplied—than my strong assertion, that the arts can

never be right themselves, unless their motive is right. It is misunderstood this way: weak painters, who have never learned their business, and cannot lay a true line, continually come to me, crying out—"Look at this picture of mine: it *must* be good, I had such a lovely motive. I have put my whole heart into it, and taken years to think over its treatment." Well, the only answer for these people is—if one had the cruelty to make it—"Sir, you cannot think over *anything* in any number of years,—you haven't the head to do it; and though you had fine motives, strong enough to make you burn yourself in a slow fire, if only first you could paint a picture, you can't paint one, nor half an inch of one; you haven't the hand to do it."

But, far more decisively we have to say to the men who *do* know their business, or may know it if they choose—"Sir, you have this gift and a mighty one; see that you serve your nation faithfully with it. It is a greater trust than ships and armies; you might cast *them* away, if you were their captain, with less treason to your people than in casting your own glorious power away, and serving the devil with it instead of men. Ships and armies you may replace if they are lost, but a great intellect, once abused, is a curse to the earth forever."

This, then, I meant by saying that the arts must have noble motive. This also I said respecting them, that they never had prospered, nor could prosper, but when they had such true purpose, and were devoted to the proclamation of divine truth or law. And yet I saw also that they had always failed in this proclamation—that poetry, and sculpture, and painting, though only great when they strove to teach us something about the gods, never had taught us anything trustworthy about the gods, but had always betrayed their trust in the crisis of it, and, with their powers at the full reach, became ministers to pride and to lust. And I felt also, with increasing amazement, the unconquerable apathy in ourselves the hearers, no less than in these the teachers; and that, while the wis-

dom and rightness of every act and art of life could only be consistent with a right understanding of the ends of life, we were all plunged as in a languid dream—our heart fat, and our eyes heavy, and our ears closed, lest the inspiration of hand or voice should reach us—lest we should see with our eyes, and understand with our hearts, and be healed.

This intense apathy in all of us is the first great mystery of life; it stands in the way of every perception, every virtue. There is no making ourselves feel enough astonishment at it. That the occupations or pastimes of life should have no motive, is understandable; but—That life itself should have no motive—that we neither care to find out what it may lead to, nor to guard against its being forever taken away from us—here is a mystery indeed. For, just suppose I were able to call at this moment to any one in this audience by name, and to tell him positively that I knew a large estate had been lately left to him on some curious conditions; but that, though I knew it was large, I did not know how large, nor even where it was—whether in the East Indies or the West, or in England, or at the Antipodes. I only knew it was a vast estate, and that there was a chance of his losing it altogether if he did not soon find out on what terms it had been left to him. Suppose I were able to say this positively to any single man in this audience, and he knew that I did not speak without warrant, do you think that he would rest content with that vague knowledge, if it were anywise possible to obtain more? Would he not give every energy to find some trace of the facts, and never rest till he had ascertained where this place was, and what it was like? And suppose he were a young man, and all he could discover by his best endeavor was, that the estate was never to be his at all, unless he persevered, during certain years of probation, in an orderly and industrious life; but that, according to the rightness of his conduct, the portion of the estate assigned to him would be greater or less, so that it literally de-

pended on his behavior from day to day whether he got ten thousand a year or thirty thousand a year, or nothing whatever—would you not think it strange if the youth never troubled himself to satisfy the conditions in any way, nor even to know what was required of him, but lived exactly as he chose, and never inquired whether his chances of the estate were increasing or passing away? Well, you know that this is actually and literally so with the greater number of the educated persons now living in Christian countries. Nearly every man and woman, in any company such as this, outwardly professes to believe—and a large number unquestionably think they believe—much more than this; not only that a quite unlimited estate is in prospect for them if they please the Holder of it, but that the infinite contrary of such a possession—an estate of perpetual misery, is in store for them if they displease this great Land-Holder, this great Heaven-Holder. And yet there is not one in a thousand of these human souls that cares to think, for ten minutes of the day, where this estate is, or how beautiful it is, or what kind of life they are to lead in it, or what kind of life they must lead to obtain it.

You fancy that you care to know this: so little do you care that, probably, at this moment many of you are displeased with me for talking of the matter! You came to hear about the Art of this world, not about the Life of the next, and you are provoked with me for talking of what you can hear any Sunday in church. But do not be afraid. I will tell you something before you go about pictures, and carvings, and pottery, and what else you would like better to hear of than the other world. Nay, perhaps you say, "We want you to talk of pictures and pottery, because we are sure that you know something of them, and you know nothing of the other world." Well—I don't. That is quite true. But the very strangeness and mystery of which I urge you to take notice is in this—that I do not;—nor you either. Can you answer a

single bold question unflinchingly about that other world—Are you sure there is a heaven? Sure there is a hell? Sure that men are dropping before your faces through the pavements of these streets into eternal fire, or sure that they are not? Sure that at your own death you are going to be delivered from all sorrow, to be endowed with all virtue, to be gifted with all felicity, and raised into perpetual companionship with a King, compared to whom the kings of the earth are as grasshoppers, and the nations as the dust of His feet? Are you sure of this? or, if not sure, do any of us so much as care to make it sure? and, if not, how can anything that we do be right—how can anything we think be wise; what honor can there be in the arts that amuse us, or what profit in the possessions that please?

Is not this a mystery of life?

But farther, you may, perhaps, think it a beneficent ordinance for the generality of men that they do not, with earnestness or anxiety, dwell on such questions of the future; because the business of the day could not be done if this kind of thought were taken by all of us for the morrow. Be it so: but at least we might anticipate that the greatest and wisest of us, who were evidently the appointed teachers of the rest, would set themselves apart to seek out whatever could be surely known of the future destinies of their race; and to teach this in no rhetorical or ambiguous manner, but in the plainest and most severely earnest words.

Now, the highest representatives of men who have thus endeavored, during the Christian era, to search out these deep things, and relate them, are Dante and Milton. There are none who for earnestness of thought, for mastery of word, can be classed with these. I am not at present, mind you, speaking of persons set apart in any priestly or pastoral office, to deliver creeds to us, or doctrines; but of men who try to discover and set forth, as far as by human intellect is possible, the facts of the other world. Divines may

perhaps teach us how to arrive there, but only these two poets have in any powerful manner striven to discover, or in any definite words professed to tell, what we shall see and become there: or how those upper and nether worlds are, and have been, inhabited.

And what have they told us? Milton's account of the most important event in his whole system of the universe, the fall of the angels, is evidently unbelievable to himself; and the more so, that it is wholly founded on, and in a great part spoiled and degraded from, Hesiod's account of the decisive war of the younger gods with the Titans. The rest of his poem is a picturesque drama, in which every artifice of invention is visibly and consciously employed, not a single fact being, for an instant conceived as tenable by any living faith. Dante's conception is far more intense, and, by himself, for the time, not to be escaped from; it is indeed a vision but a vision only, and that one of the wildest that ever entranced a soul—a dream in which every grotesque type or phantasy of heathen tradition is renewed, and adorned; and the destinies of the Christian Church, under their most sacred symbols, become literally subordinate to the praise, and are only to be understood by the aid of one dear Florentine maiden.

I tell you truly that, as I strive more with this strange lethargy and trance in myself, and awake to the meaning and power of life, it seems daily more amazing to me that men such as these should dare to play with the most precious truths (or the most deadly untruths), by which the whole human race listening to them could be informed, or deceived;—all the world their audiences forever, with pleased ear, and passionate heart;—and yet, to this submissive infinitude of souls, and evermore succeeding and succeeding multitude, hungry for bread of life, they do but play upon sweetly modulated pipes; with pompous nomenclature adorn the councils of hell; touch a troubadour's guitar to the courses of the suns; and fill the openings of eternity, before which prophets have veiled their

faces and which angels desire to look into, with idle puppets of their scholastic imagination, and melancholy lights of frantic faith in their lost mortal love.

Is not this a mystery of life ?

But more. We have to remember that these two great teachers were both of them warped in their temper, and thwarted in their search for truth. They were men of intellectual war, unable, through darkness of controversy, or stress of personal grief, to discern where their own ambition modified their utterances of the moral law; or their own agony mingled with their anger at its violation. But greater men than these have been—innocent-hearted—too great for contest. Men, like Homer and Shakespeare, of so unrecognized personality, that it disappears in future ages, and becomes ghostly, like the tradition of a lost heathen god. Men, therefore, to whose unoffended, uncondemning sight, the whole of human nature reveals itself in a pathetic weakness, with which they will not strive; or in mournful and transitory strength, which they dare not praise. And all Pagan and Christian civilization thus becomes subject to them. It does not matter how little, or how much, any of us have read, either of Homer or Shakespeare; everything round us, in substance, or in thought, has been moulded by them. All Greek gentlemen were educated under Homer. All Roman gentlemen, by Greek literature. All Italian and French, and English gentlemen, by Roman literature, and by its principles. Of the scope of Shakespeare, I will say only, that the intellectual measure of every man since born, in the domains of creative thought, may be assigned to him, according to the degree in which he has been taught by Shakespeare. Well, what do these two men, centres of moral intelligence, deliver to us of conviction respecting what it most behoves that intelligence to grasp? What is their hope; their crown of rejoicing? what manner of exhortation have they for us, or of rebuke? what lies next their own hearts, and dictates their undying words? Have they any

peace to promise to our unrest—any redemption to our misery?

Take Homer first, and think if there is any sadder image of human fate than the great Homeric story. The main features in the character of Achilles are its intense desire of justice, and its tenderness of affection. And in that bitter song of the *Iliad*, this man, though aided continually by the wisest of the gods, and burning with the desire of justice in his heart, becomes yet, through ill-governed passion, the most unjust of men: and, full of the deepest tenderness in his heart, becomes yet, through ill-governed passion, the most cruel of men. Intense alike in love and in friendship, he loses, first his mistress, and then his friend; for the sake of the one, he surrenders to death the armies of his own land; for the sake of the other, he surrenders all. Will a man lay down his life for his friend? Yea—even for his *dead* friend, this Achilles, though goddess-born, and goddess-taught, gives up his kingdom, his country, and his life—casts alike the innocent and guilty, with himself, into one gulf of slaughter, and dies at last by the hand of the basest of his adversaries. Is not this a mystery of life?

But what, then, is the message to us of our own poet, and searcher of hearts, after fifteen hundred years of Christian faith have been numbered over the graves of men? Are his words more cheerful than the heathen's—is his hope more near—his trust more sure—his reading of fate more happy? Ah, no! He differs from the Heathen poet chiefly in this—that he recognizes, for deliverance, no gods nigh at hand; and that, by petty chance—by momentary folly—by broken message—by fool's tyranny—or traitor's snare, the strongest and most righteous are brought to their ruin, and perish without word of hope. He indeed, as part of his rendering of character, ascribes the power and modesty of habitual devotion, to the gentle and the just. The death-bed of Katharine is bright with a vision of angels, and the great soldier-king, standing

by his few dead, acknowledges the presence of the hand that can save alike by many or by few. But observe that from those who with deepest spirit, meditate, and with deepest passion, mourn, there are no such words as these ; nor in their hearts are any such consolations. Instead of the perpetual sense of the helpful presence of the Deity, which, through all heathen tradition, is the source of heroic strength, in battle, in exile, and in the valley of the shadow of death, we find only in the great Christian poet, the consciousness of a moral law, through which "the gods are just, and of our pleasant vices make instruments to scourge us ;" and of the resolved arbitration of the destinies, that conclude into precision of doom what we feebly and blindly began ; and force us, when our indiscretion serves us, and our deepest plots do pall, to the confession that "there's a divinity that shapes our ends, rough hew them how we will."

Is not this a mystery of life ?

Be it so then. About this human life that is to be, or that is, the wise religious men tell us nothing that we can trust ; and the wise contemplative men, nothing that can give us peace. But there is yet a third class, to whom we may turn—the wise practical men. We have sat at the feet of the poets who sang of heaven, and they have told us their dreams. We have listened to the poets who sang of earth, and they have chanted to us dirges, and words of despair. But there is one class of men more :—men, not capable of vision, nor sensitive to sorrow, but firm of purpose—practised in business : learned in all that can be, (by handling,—) known. Men whose hearts and hopes are wholly in this present world, from whom, therefore, we may surely learn, at least, how, at present, conveniently to live in it. What will *they* say to us, or show us, by example ? These kings—these councillors—these statesmen and builders of kingdoms—these capitalists and men of business, who weigh the earth, and the dust of it, in a balance. They know the world, surely ; and what is the mystery of life to

us, is none to them. They can surely show us how to live, while we live, and to gather out of the present world what is best.

I think I can best tell you their answer, by telling you a dream I had once. For though I am no poet, I have dreams sometimes:—I dreamed I was at a child's May-day party, in which every means of entertainment had been provided for them, by a wise and kind host. It was in a stately house, with beautiful gardens attached to it; and the children had been set free in the rooms and gardens, with no care whatever but how to pass their afternoon rejoicingly. They did not, indeed, know much about what was to happen next day; and some of them, I thought, were a little frightened, because there was a chance of their being sent to a new school where there were examinations; but they kept the thoughts of that out of their heads as well as they could, and resolved to enjoy themselves. The house, I said, was in a beautiful garden, and in the garden were all kinds of flowers; sweet grassy banks for rest; and smooth lawns for play; and pleasant streams and woods; and rocky places for climbing. And the children were happy for a little while, but presently they separated themselves into parties; and then each party declared, it would have a piece of the garden for its own, and that none of the others should have anything to do with that piece. Next, they quarrelled violently which pieces they would have; and at last the boys took up the thing, as boys should do, "practically," and fought in the flower-beds till there was hardly a flower left standing; then they trampled down each other's bits of the garden out of spite; and the girls cried till they could cry no more; and so they all lay down at last breathless in the ruin, and waited for the time when they were to be taken home in the evening.*

* I have sometimes been asked what this means. I intended it to set forth the wisdom of men in war contending for kingdoms, and what follows to set forth their wisdom in peace, contending for wealth.

Meanwhile, the children in the house had been making themselves happy also in their manner. For them, there had been provided every kind of in-doors pleasure : there was music for them to dance to ; and the library was open, with all manner of amusing books ; and there was a museum, full of the most curious shells, and animals, and birds ; and there was a workshop, with laths and carpenter's tools, for the ingenious boys ; and there were pretty fantastic dresses, for the girls to dress in ; and there were microscopes, and kaleidoscopes ; and whatever toys a child could fancy ; and a table, in the dining-room, loaded with everything nice to eat.

But, in the midst of all this, it struck two or three of the more " practical " children, that they would like some of the brass-headed nails that studded the chairs ; and so they set to work to pull them out. Presently, the others, who were reading, or looking at shells, took a fancy to do the like ; and, in a little while, all the children, nearly, were spraining their fingers, in pulling out brass-headed nails. With all that they could pull out, they were not satisfied ; and then, everybody wanted some of somebody else's. And at last the really practical and sensible ones declared, that nothing was of any real consequence, that afternoon, except to get plenty of brass-headed nails ; and that the books, and the cakes, and the microscopes were of no use at all in themselves, but only, if they could be exchanged for nail-heads. And, at last, they began to fight for nail-heads, as the others fought for the bits of garden. Only here and there a despised one shrank away into a corner, and tried to get a little quiet with a book, in the midst of the noise ; but all the practical ones thought of nothing else but counting nail-heads all the afternoon—even though they knew they would not be allowed to carry so much as one brass knob away with them. But no—it was—" who has most nails ? I have a hundred, and you have fifty ; or, I have a thousand and you have two. I must have as many as you before I leave

the house, or I cannot possibly go home in peace." At last, they made so much noise that I awoke, and thought to myself, "What a false dream that is, of *children*." The child is the father of the man; and wiser. Children never do such foolish things. Only men do.

But there is yet one last class of persons to be interrogated. The wise religious men we have asked in vain; the wise contemplative men, in vain; the wise worldly men, in vain. But there is another group yet. In the midst of this vanity of empty religion — of tragic contemplation — of wrathful and wretched ambition, and dispute for dust, there is yet one great group of persons, by whom all these disputers live—the persons who have determined, or have had it by a beneficent Providence determined for them, that they will do something useful; that whatever may be prepared for them hereafter, or happen to them here, they will, at least, deserve the food that God gives them by winning it honorably; and that, however fallen from the purity, or far from the peace, of Eden, they will carry out the duty of human dominion, though they have lost its felicity; and dress and keep the wilderness, though they no more can dress or keep the garden.

These,—hewers of wood, and drawers of water—these bent under burdens, or torn of scourges—these, that dig and weave—that plant and build; workers in wood, and in marble, and in iron—by whom all food, clothing, habitation, furniture, and means of delight are produced, for themselves, and for all men beside; men, whose deeds are good, though their words may be few; men, whose lives are serviceable, be they never so short, and worthy of honor, be they never so humble;—from these, surely at least, we may receive some clear message of teaching: and pierce, for an instant, into the mystery of life, and of its arts.

Yes; from these, at last, we do receive a lesson. But I grieve to say, or rather—for that is the deeper truth of the matter—I rejoice to say—this message of

theirs can only be received by joining them—not by thinking about them.

You sent for me to talk to you of art; and I have obeyed you in coming. But the main thing I have to tell you is,—that art must not be talked about. The fact that there is talk about it at all, signifies that it is ill done, or cannot be done. No true painter ever speaks, or ever has spoken, much of his art. The greatest speak nothing. Even Reynolds is no exception, for he wrote of all that he could not himself do, and was utterly silent respecting all that he himself did.

The moment a man can really do his work, he becomes speechless about it. All words become idle to him—all theories.

Does a bird need to theorize about building its nest, or boast of it when built? All good work is essentially done that way—without hesitation, without difficulty, without boasting; and in the doors of the best, there is an inner and involuntary power which approximates literally to the instinct of an animal—nay, I am certain that in the most perfect human artists, reason does *not* supersede instinct, but is added to an instinct as much more divine than that of the lower animals as the human body is more beautiful than theirs; that a great singer sings not with less instinct than the nightingale, but with more—only more various, applicable, and governable; that a great architect does not build with less instinct than the beaver or the bee, but with more—with an innate cunning of proportion that embraces all beauty, and a divine ingenuity of skill that improvises all construction. But be that as it may—be the instinct less or more than that of inferior animals—like or unlike theirs, still the human art is dependent on that first, and then upon an amount of practice, of science,—and of imagination disciplined by thought, which the true possessor of it knows to be incommunicable, and the true critic of it, inexplicable except through long process of laborious years. That journey of life's conquest, in which hills over hills, and Alps on Alps

arose, and sank,—do you think you can make another trace it painlessly, by talking? Why, you cannot even carry us up an Alp, by talking. You can guide us up it, step by step, no otherwise—even so, best silently. You girls, who have been among the hills, know how the bad guide chatters and gesticulates, and it is “put your foot here,” and “mind how you balance yourself there;” but the good guide walks on quietly without a word, only with his eyes on you when need is, and his arm like an iron bar, if need be.

In that slow way, also, art can be taught—if you have faith in your guide, and will let his arm be to you as an iron bar when need is. But in what teacher of art have you such faith? Certainly not in me; for, as I told you at first, I know well enough it is only because you think I can talk, not because you think I know my business, that you let me speak to you at all. If I were to tell you anything that seemed to you strange, you would not believe it, and yet it would only be in telling you strange things that I could be of use to you. I could be of great use to you—infinite use, with brief saying, if you would believe it; but you would not, just because the thing that would be of real use would displease you. You are all wild, for instance, with admiration of Gustave Doré. Well, suppose I were to tell you in the strongest terms I could use, that Gustave Doré’s art was bad—bad, not in weakness,—not in failure,—but bad with dreadful power—the power of the Furies and the Harpies mingled, enraging, and polluting; that so long as you looked at it, no perception of pure or beautiful art was possible for you. Suppose I were to tell you that! What would be the use? Would you look at Gustave Doré less? Rather more I fancy. On the other hand, I could soon put you into good humor with me, if I chose. I know well enough what you like, and how to praise it to your better liking. I could talk to you about moonlight, and twilight, and spring flowers, and autumn leaves, and the Madonnas of Raphael—

how motherly ! and the Sibyls of Michael Angelo—how majestic ! and the Saints of Angelico—how pious ! and the Cherubs of Correggio—how delicious ! Old as I am, I could play you a tune on the harp yet, that you would dance to. But neither you nor I should be a bit the better or wiser ; or, if we were, our increased wisdom could be of no practical effect. For, indeed, the arts, as regards teachableness, differ from the sciences also in this, that their power is founded not merely on facts which can be communicated, but on dispositions which require to be created. Art is neither to be achieved by effort of thinking, nor explained by accuracy of speaking. It is the instinctive and necessary result of powers which can only be developed through the mind of successive generations, and which finally burst into life under social conditions as slow of growth as the faculties they regulate. Whole æras of mighty history are summed, and the passions of dead myriads are concentrated, in the existence of a noble art ; and if that noble art were among us, we should feel it and rejoice ; not caring in the least to hear lectures on it ; and since it is not among us, be assured we have to go back to the root of it, or, at least, to the place where the stock of it is yet alive, and the branches began to die.

And now, may I have your pardon for pointing out, partly with reference to matters which are at this time of greater moment than the arts—that if we undertook such recession to the vital germ of national arts that have decayed, we should find a more singular arrest of their power in Ireland than in any other European country. For in the eighth century, Ireland possessed a school of art in her manuscripts and sculpture, which, in many of its qualities—apparently in all essential qualities of decorative invention—was quite without rival ; seeming as if it might have advanced to the highest triumphs in architecture and in painting. But there was one fatal flaw in its nature, by which it was stayed, and stayed with a conspicuousness of pause to which there is no parallel : so

that, long ago, in tracing the progress of European schools from infancy to strength, I chose for the students of Kensington, in a lecture since published, two characteristic examples of early art, of equal skill; but in the one case, skill which was progressive—in the other, skill which was at pause. In the one case, it was work receptive of correction—hungry for correction—and in the other, work which inherently rejected correction. I chose for them a corrigible Eve, and an incorrigible Angel, and I grieve to say that the incorrigible Angel was also an Irish angel!*

And the fatal difference lay wholly in this. In both pieces of art there was an equal falling short of the needs of fact; but the Lombardic Eve knew she was in the wrong, and the Irish Angel thought himself all right. The eager Lombardic sculptor, though firmly insisting on his childish idea, yet showed in the irregular broken touches of the features, and the imperfect struggle for softer lines in the form, a perception of beauty and law that he could not render; there was the strain of effort, under conscious imperfection, in every line. But the Irish missal-painter had drawn his angel with no sense of failure, in happy complacency, and put red dots into the palms of each hand, and rounded the eyes into perfect circles, and, I regret to say, left the mouth out altogether, with perfect satisfaction to himself.

May I without offence ask you to consider whether this mode of arrest in ancient Irish art may not be indicative of points of character which even yet, in some measure, arrest your national power? I have seen much of Irish character, and have watched it closely, for I have also much loved it. And I think the form of failure to which it is most liable is this, that being generous-hearted, and wholly intending always to do right, it does not attend to the external laws of right, but thinks it must necessarily do right because it means to do so, and therefore does wrong without

* See "The Two Paths," p. 27.

finding it out; and then when the consequences of its wrong come upon it, or upon others connected with it, it cannot conceive that the wrong is in any-wise of its causing or of its doing, but flies into wrath, and a strange agony of desire for justice, as feeling itself wholly innocent, which leads it farther astray, until there is nothing that it is not capable of doing with a good conscience.

But mind, I do not mean to say that, in past or present relations between Ireland and England, you have been wrong, and we right. Far from that, I believe that in all great questions of principle, and in all details of administration of law, you have been usually right, and we wrong; sometimes in misunderstanding you, sometimes in resolute iniquity to you. Nevertheless, in all disputes between states, though the strongest is nearly always mainly in the wrong, the weaker is often so in a minor degree; and I think we sometimes admit the possibility of our being in error, and you never do.

And now, returning to the broader question what these arts and labors of life have to teach us of its mystery, this is the first of their lessons—that the more beautiful the art, the more it is essentially the work of people who *feel themselves wrong*:—who are striving for the fulfilment of a law, and the grasp of a loveliness, which they have not yet attained, which they feel even farther and farther from attaining, the more they strive for it. And yet, in still deeper sense, it is the work of people who know also that they are right. The very sense of inevitable error from their purpose marks the perfectness of that purpose, and the continued sense of failure arises from the continued opening of the eyes more clearly to all the sacredest laws of truth.

This is one lesson. The second is a very plain, and greatly precious one, namely:—that whenever the arts and labors of life are fulfilled in this spirit of striving against misrule, and doing whatever we have to do, honorably and perfectly, they invariably bring happi-

ness, as much as seems possible to the nature of man. In all other paths, by which that happiness is pursued, there is disappointment, or destruction; for ambition and for passion there is no rest—no fruition; the fairest pleasures of youth perish in a darkness greater than their past light; and the loftiest and purest love too often does but inflame the cloud of life with endless fire of pain. But, ascending from lowest to highest, through every scale of human industry, that industry worthily followed, gives peace. Ask the laborer in the field, at the forge, or in the mine; ask the patient, delicate-fingered artisan, or the strong-armed, fiery-hearted worker in bronze, and in marble, and with the colors of light; and none of these, who are true workmen, will ever tell you, that they have found the law of heaven an unkind one—that in the sweat of their face they should eat bread, till they return to the ground; nor that they ever found it an unrewarded obedience, if, indeed, it was rendered faithfully to the command—"Whatsoever thy hand findeth to do—do it with thy might."

These are the two great and constant lessons which our laborers teach us of the mystery of life. But there is another, and a sadder one, which they cannot teach us, which we must read on their tombstones.

"Do it with thy might." There have been myriads upon myriads of human creatures who have obeyed this law—who have put every breath and nerve of their being into its toil—who have devoted every hour, and exhausted every faculty—who have bequeathed their unaccomplished thoughts at death—who being dead, have yet spoken, by majesty of memory, and strength of example. And, at last, what has all this "Might" of humanity accomplished, in six thousand years of labor and sorrow? What has it *done*? Take the three chief occupations and arts of men, one by one, and count their achievements. Begin with the first—the lord of them all—agriculture. Six thousand years have passed since we were set to till the ground, from which we were taken. How much of it

is tilled? How much of that which is, wisely or well? In the very centre and chief garden of Europe—where the two forms of parent Christianity have had their fortresses—where the noble Catholics of the Forest Cantons, and the noble Protestants of the Vaudois valleys, have maintained, for dateless ages, their faiths and liberties—there the unchecked Alpine rivers yet run wild in devastation: and the marshes, which a few hundred men could redeem with a year's labor, still blast their helpless inhabitants into fevered idiotism. That is so, in the centre of Europe! While, on the near coast of Africa, once the Garden of the Hesperides, an Arab woman, but a few sunsets since, ate her child, for famine. And, with all the treasures of the East at our feet, we, in our own dominion, could not find a few grains of rice, for a people that asked of us no more; but stood by, and saw five hundred thousand of them perish of hunger.

Then, after agriculture, the art of kings, take the next head of human arts—weaving; the art of queens, honored of all noble women, in the person of their virgin goddess—honored of all Hebrew women, by the word of their wisest king—"She layeth her hands to the spindle, and her hands hold the distaff; she stretcheth out her hand to the poor. She is not afraid of the snow for her household, for all her household are clothed with scarlet. She maketh herself covering of tapestry, her clothing is silk and purple. She maketh fine linen, and selleth it, and delivereth girdles to the merchant." What have we done in all these thousands of years with this bright art of Greek maid and Christian matron? Six thousand years of weaving, and have we learned to weave? Might not every naked wall have been purple with tapestry, and every feeble breast fenced with sweet colors from the cold? What have we done? Our fingers are too few, it seems, to twist together some poor covering for our bodies. We set our streams to work for us, and choke the air with fire, to turn our spinning-wheels—and,—*are we yet clothed?* Are not the streets of the

capitals of Europe foul with the sale of cast clouts and rotten rags? Is not the beauty of your sweet children left in wretchedness of disgrace, while, with better honor, nature clothes the brood of the bird in its nest, and the suckling of the wolf in her den? And does not every winter's snow robe what you have not robed, and shroud what you have not shrouded; and every winter's wind bear up to heaven its wasted souls, to witness against you hereafter, by the voice of their Christ,—“I was naked, and ye clothed me not?”

Lastly—take the Art of Building—the strongest—proudest—most orderly—most enduring of the arts of man, that, of which the produce is in the surest manner accumulative, and need not perish, or be replaced; but if once well done, will stand more strongly than the unbalanced rocks—more prevalently than the crumbling hills. The art which is associated with all civic pride and sacred principle; with which men record their power—satisfy their enthusiasm—make sure their defence—define and make dear their habitation. And, in six thousand years of building, what have we done? Of the greater part of all that skill and strength, *no* vestige is left, but fallen stones, that encumber the fields and impede the streams. But, from this waste of disorder, and of time, and of rage, what *is* left to us? Constructive and progressive creatures, that we are, with ruling brains, and forming hands, capable of fellowship, and thirsting for fame, can we not contend, in comfort, with the insects of the forest, or, in achievement, with the worm of the sea. The white surf rages in vain against the ramparts built by poor atoms of scarcely nascent life; but only ridges of formless ruin mark the places where once dwelt our noblest multitudes. The ant and the moth have cells for each of their young, but our little ones lie in festering heaps, in homes that consume them like graves; and night by night, from the corners of our streets, rises up the cry of the homeless—“I was a stranger, and ye took me not in.”

Must it be always thus? Is our life forever to be without profit—without possession? Shall the strength of its generations be as barren as death; or cast away their labor, as the wild figtree casts her untimely figs? Is it all a dream then—the desire of the eyes and the pride of life—or, if it be, might we not live in nobler dream than this? The poets and prophets, the wise men and the scribes, though they have told us nothing about a life to come, have told us much about the life that is now. They have had—they also,—their dreams, and we have laughed at them. They have dreamed of mercy, and of justice; they have dreamed of peace and good-will; they have dreamed of labor undisappointed, and of rest undisturbed; they have dreamed of fulness in harvest, and overflowing in store; they have dreamed of wisdom in council, and of providence in law; of gladness of parents, and strength of children, and glory of gray hairs. And at these visions of theirs we have mocked, and held them for idle and vain, unreal and unaccomplishable. What have we accomplished with our realities? Is this what has come of our worldly wisdom, tried against their folly? this our mightiest possible, against their impotent ideal? or have we only wandered among the spectra of a baser felicity and chased phantoms of the tombs, instead of visions of the Almighty; and walked after the imaginations of our evil hearts, instead of after the counsels of Eternity, until our lives—not in the likeness of the cloud of heaven, but of the smoke of hell—have become “as a vapor, that appeareth for a little time, and then vanisheth away?”

Does it vanish then? Are you sure of that?—sure, that the nothingness of the grave will be a rest from this troubled nothingness; and that the coiling shadow, which disquiets itself in vain, cannot change into the smoke of the torment that ascends forever? Will any answer that they *are* sure of it, and that there is no fear, nor hope, nor desire, nor labor, whither they go? Be it so; will you not, then, make

as sure of the Life, that now is, as you are of the Death that is to come? Your hearts are wholly in this world—will you not give them to it wisely, as well as perfectly? And see, first of all, that you *have* hearts, and sound hearts, too, to give. Because you have no heaven to look for, is that any reason that you should remain ignorant of this wonderful and infinite earth, which is firmly and instantly given you in possession? Although your days are numbered, and the following darkness sure, is it necessary that you should share the degradation of the brute, because you are condemned to its mortality; or live the life of the moth, and of the worm, because you are to companion them in the dust? Not so; we may have but a few thousands of days to spend, perhaps hundreds only—perhaps tens; nay, the longest of our time and best, looked back on, will be but as a moment, as the twinkling of an eye; still, we are men, not insects; we are living spirits, not passing clouds. “He maketh the winds His messengers; the momentary fire, His minister;” and shall we do less than *these*? Let us do the work of men while we bear the form of them; and, as we snatch our narrow portion of time out of Eternity, snatch also our narrow inheritance of passion out of Immortality—even though our lives *be* as a vapor, that appeareth for a little time, and then vanisheth away.

But there are some of you who believe not this—who think this cloud of life has no such close—that it is to float, revealed and illumined, upon the floor of heaven, in the day when He cometh with clouds, and every eye shall see Him. Some day, you believe, within these five, or ten, or twenty years, for every one of us the judgment will be set, and the books opened. If that be true, far more than that must be true. Is there but one day of judgment? Why, for us every day is a day of judgment—every day is a Dies Iræ, and writes its irrevocable verdict in the flame of its West. Think you that judgment waits till the doors of the grave are opened? It waits

at the doors of your houses—it waits at the corners of your streets; we are in the midst of judgment—the insects that we crush are our judges—the moments we fret away are our judges—the elements that feed us, judge, as they minister—and the pleasures that deceive us, judge as they indulge. Let us, for our lives, do the work of Men while we bear the Form of them, if indeed those lives are *Not* as a vapor, and do *Not* vanish away.

“The work of men”—and what is that? Well, we may any of us know very quickly, on the condition of being wholly ready to do it. But many of us are for the most part thinking, not of what we are to do, but of what we are to get; and the best of us are sunk into the sin of Ananias, and it is a mortal one—we want to keep back part of the price; and we continually talk of taking up our cross, as if the only harm in a cross was the *weight* of it—as if it was only a thing to be carried, instead of to be—crucified upon. “They that are His have crucified the flesh, with the affections and lusts.” Does that mean, think you, that in time of national distress, of religious trial, of crisis for every interest and hope of humanity—none of us will cease jesting, none cease idling, none put themselves to any wholesome work, none take so much as a tag of lace off their footman’s coats, to save the world? Or does it rather mean, that they are ready to leave houses, lands, and kindreds—yes, and life, if need be? Life!—some of us are ready enough to throw that away, joyless as we have made it. But “*station* in Life”—how many of us are ready to quit *that*? Is it not always the great objection, where there is question of finding something useful to do—“We cannot leave our stations in Life?”

Those of us who really cannot—that is to say, who can only maintain themselves by continuing in some business or salaried office, have already something to do; and all that they have to see to, is that they do it honestly and with all their might. But with most people who use that apology, “remaining in the sta-

tion of life to which Providence has called them," means keeping all the carriages, and all the footmen and large houses they can possibly pay for; and, once for all, I say that if ever Providence *did* put them into stations of that sort—which is not at all a matter of certainty—Providence is just now very distinctly calling them out again. Levi's station in life was the receipt of custom; and Peter's, the shore of Galilee; and Paul's, the antechambers of the High Priest,—which "station in life" each had to leave, with brief notice.

And, whatever our station in life may be, at this crisis, those of us who mean to fulfil our duty ought, first, to live on as little as we can; and, secondly, to do all the wholesome work for it we can, and to spend all we can spare in doing all the sure good we can.

And sure good is first in feeding people, then in dressing people, then in lodging people, and lastly in rightly pleasing people, with arts, or sciences, or any other subject of thought.

I say first in feeding; and, once for all, do not let yourselves be deceived by any of the common talk of "indiscriminate charity." The order to us is not to feed the deserving hungry, nor the industrious hungry, nor the amiable and well-intentioned hungry, but simply to feed the hungry. It is quite true, infallibly true, that if any man will not work, neither should he eat—think of that, and everytime you sit down to your dinner, ladies and gentlemen, say solemnly, before you ask a blessing, "How much work have I done to-day for my dinner?" But the proper way to enforce that order on those below you, as well as on yourselves, is not to leave vagabonds and honest people to starve together, but very distinctly to discern and seize your vagabond; and shut your vagabond up out of honest people's way, and very sternly then see that, until he has worked, he does *not* eat. But the first thing is to be sure you have the food to give; and, therefore, to enforce the organization of vast activities in agriculture and in commerce, for the production of

the wholesomest food, and proper storing and distribution of it, so that no famine shall any more be possible among civilized beings. There is plenty of work in this business alone, and at once, for any number of people who like to engage in it.

Secondly, dressing people—that is to say, urging every one within reach of your influence to be always neat and clean, and giving them means of being so. In so far as they absolutely refuse, you must give up the effort with respect to them, only taking care that no children within your sphere of influence shall any more be brought up with such habits; and that every person who is willing to dress with propriety shall have encouragement to do so. And the first absolutely necessary step towards this is the gradual adoption of a consistent dress for different ranks of persons, so that their rank shall be known by their dress; and the restriction of the changes of fashion within certain limits. All which appears for the present quite impossible; but it is only so far as even difficult as it is difficult to conquer our vanity, frivolity, and desire to appear what we are not. And it is not, nor ever shall be, creed of mine, that these mean and shallow vices are unconquerable by Christian women.

And then, thirdly, lodging people, which you may think should have been put first, but I put it third, because we must feed and clothe people where we find them, and lodge them afterwards. And providing lodgment for them means a great deal of vigorous legislation, and cutting down of vested interests that stand in the way, and after that, or before that, so far as we can get it, thorough sanitary and remedial action in the houses that we have; and then the building of more, strongly, beautifully, and in groups of limited extent, kept in proportion to their streams, and walled round, so that there may be no festering and wretched suburb anywhere, but clean and busy street within, and the open country without, with a belt of beautiful garden and orchard round the walls, so that from any part of the city perfectly fresh air and grass, and sight

of far horizon might be reachable in a few minutes' walk. This the final aim; but in immediate action every minor and possible good to be instantly done, when, and as, we can; roofs mended that have holes in them—fences patched that have gaps in them—walls buttressed that totter—and floors propped that shake; cleanliness and order enforced with our own hands and eyes, till we are breathless every day. And all the fine arts will healthily follow. I myself have washed a flight of stone stairs all down, with bucket and broom, in a Savoy inn, where they hadn't washed their stairs since they first went up them? and I never made a better sketch than that afternoon.

These, then, are the three first needs of civilized life; and the law for every Christian man and woman is, that they shall be in direct service towards one of these three needs, as far as is consistent with their own special occupation, and if they have no special business, then wholly in one of these services. And out of such exertion in plain duty all other good will come; for in this direct contention with material evil, you will find out the real nature of all evil, you will discern by the various kinds of resistance, what is really the fault and main antagonism to good; also you will find the most unexpected helps and profound lessons given, and truths will come thus down to us which the speculation of all our lives would never have raised us up to. You will find nearly every educational problem solved, as soon as you truly want to do something; everybody will become of use in their own fittest way, and will learn what is best for them to know in that use. Competitive examination will then, and not till then, be wholesome, because it will be daily, and calm, and in practice; and on these familiar arts, and minute, but certain and serviceable knowledges, will be surely edified and sustained the greater arts and splendid theoretical sciences.

But much more than this. On such holy and simple practice will be founded, indeed, at last, an infallible religion. The greatest of all the mysteries of

life, and the most terrible, is the corruption of even the sincerest religion, which is not daily founded on rational, effective, humble, and helpful action. Helpful action, observe! for there is just one law, which obeyed, keeps all religions pure—forgotten, makes them all false. Whenever in any religious faith, dark or bright, we allow our minds to dwell upon the points in which we differ from other people, we are wrong, and in the devil's power. That is the essence of the Pharisee's thanksgiving—"Lord, I thank thee that I am not as other men are." At every moment of our lives we should be trying to find out, not in what we differ with other people, but in what we agree with them; and the moment we find we can agree as to anything that should be done, kind or good, (and who but fools couldn't?) then do it; push at it together; you can't quarrel in a side-by-side push; but the moment that even the best men stop pushing, and begin talking, they mistake their pugnacity for piety, and it's all over. I will not speak of the crimes which in past times have been committed in the name of Christ, nor of the follies which are at this hour held to be consistent with obedience to Him; but I *will* speak of the morbid corruption and waste of vital power in religious sentiment, by which the pure strength of that which should be the guiding soul of every nation, the splendor of its youthful manhood, and spotless light of its maidenhood, is averted or cast away. You may see continually girls who have never been taught to do a single useful thing thoroughly; who cannot sew, who cannot cook, who cannot cast an account, nor prepare a medicine, whose whole life has been passed either in play or in pride; you will find girls like these when they are earnest-hearted, cast all their innate passion of religious spirit, which was meant by God to support them through the irksomeness of daily toil, into grievous and vain meditation over the meaning of the great Book, of which no syllable was ever yet to be understood but through a deed; all the instinctive

wisdom and mercy of their womanhood made vain, and the glory of their pure consciences warped into fruitless agony concerning questions which the laws of common serviceable life would have either solved for them in an instant, or kept out of their way. Give such a girl any true work that will make her active in the dawn; and weary at night, with the consciousness that her fellow-creatures have indeed been the better for her day, and the powerless sorrow of her enthusiasm will transform itself into a majesty of radiant and beneficent peace.

So with our youths. We once taught them to make Latin verses, and called them educated; now we teach them to leap and to row, to hit a ball with a bat, and call them educated. Can they plough, can they sow, can they plant at the right time, or build with a steady hand? Is it the effort of their lives to be chaste, knightly, faithful, holy in thought, lovely in word and deed? Indeed it is, with some, nay with many, and the strength of England is in them, and the hope; but we have to turn their courage from the toil of war to the toil of mercy; and their intellect from dispute of words to discernment of things; and their knighthood from the errantry of adventure to the state and fidelity of a kingly power. And then, indeed, shall abide, for them, and for us an incorruptible felicity, and an infallible religion; shall abide for us Faith, no more to be assailed by temptation, no more to be defended by wrath and by fear;—shall abide with us Hope, no more to be quenched by the years that overwhelm, or made ashamed by the shadows that betray; shall abide for us, and with us, the greatest of these; the abiding will, the abiding name, of our Father. For the greatest of these, is Charity.

1. The first part of the document discusses the importance of maintaining accurate records of all transactions and activities. It emphasizes that proper record-keeping is essential for transparency and accountability, particularly in financial matters. The text suggests that organizations should implement robust systems to track every detail, from small expenses to major investments, to ensure that all data is reliable and accessible.

2. The second part of the document addresses the challenges of managing large volumes of data. It notes that as organizations grow, the amount of information they generate increases significantly, making it difficult to maintain accuracy and consistency. The text proposes several strategies to overcome these challenges, including the use of automated data entry systems and regular audits to verify the integrity of the records.

3. The third part of the document focuses on the role of technology in improving record-keeping. It highlights how modern software solutions can streamline the process of collecting, storing, and analyzing data. The text mentions that cloud-based systems offer the advantage of being accessible from anywhere, which facilitates collaboration and ensures that all team members are working with the most up-to-date information.

4. The fourth part of the document discusses the importance of training and education for staff involved in record-keeping. It states that even the most advanced technology is only as good as the people using it. Therefore, organizations should invest in training programs to ensure that all employees understand the correct procedures and the importance of maintaining accurate records.

5. The fifth part of the document concludes by summarizing the key points discussed. It reiterates that maintaining accurate records is a continuous process that requires ongoing attention and effort. The text encourages organizations to adopt a proactive approach to record-keeping, rather than reacting to problems only after they have occurred.

PREFACE.

TWENTY years ago, there was no lovelier piece of lowland scenery in South England, nor any more pathetic in the world, by its expression of sweet human character and life, than that immediately bordering on the sources of the Wandle, and including the lower moors of Addington, and the villages of Beddington and Carshalton, with all their pools and streams. No clearer or diviner waters ever sang with constant lips of the hand which 'giveth rain from heaven;' no pastures ever lightened in spring time with more passionate blossoming; no sweeter homes ever hallowed the heart of the passer-by with their pride of peaceful gladness—fain-hidden—yet full-confessed. The place remains, or, until a few months ago, remained, nearly unchanged in its larger features; but, with deliberate mind I say, that I have never seen anything so ghastly in its inner tragic meaning,—not in Pisan Maremma,—not by Campagna tomb,—not by the sand-isles of the Torcellan shore,—as the slow stealing of aspects of reckless, indolent, animal neglect, over the delicate sweetness of that English scene: nor is any blasphemy or impiety—any frantic saying or godless thought—more appalling to me, using the best power of judgment I have to discern its sense and scope, than the insolent defilings of those springs by the human herds that drink of them. Just where the welling of stainless water, trembling and pure, like a body of light, enters the pool of Carshalton, cutting itself a radiant channel down to the gravel, through warp of feathery weeds, all waving, which it traverses with its deep threads of clearness, like the chalcedony in moss-agate,

starred here and there with white grenouillette; just in the very rush and murmur of the first spreading currents, the human wretches of the place cast their street and house foulness; heaps of dust and slime, and broken shreds of old metal, and rags of putrid clothes; they having neither energy to cart it away, nor decency enough to dig it into the ground, thus shed into the stream, to diffuse what venom of it will float and melt, far away, in all places where God meant those waters to bring joy and health. And, in a little pool, behind some houses farther in the village, where another spring rises, the shattered stones of the well, and of the little fretted channel which was long ago built and traced for it by gentler hands, lie scattered, each from each, under a ragged bank of mortar, and scoria; and bricklayers' refuse, on one side, which the clean water nevertheless chastises to purity; but it cannot conquer the dead earth beyond; and there, circled and coiled under festering scum, the stagnant edge of the pool effaces itself into a slope of black slime, the accumulation of indolent years. Half-a-dozen men, with one day's work, could cleanse those pools, and trim the flowers about their banks, and make every breath of summer air above them rich with cool balm; and every glittering wave medicinal, as if it ran, troubled of angels, from the porch of Bethesda. But that day's work is never given, nor will be; nor will any joy be possible to heart of man, for evermore, about those wells of English waters.

When I last left them, I walked up slowly through the back streets of Croydon, from the old church to the hospital; and, just on the left, before coming up to the crossing of the High Street, there was a new public-house built. And the front of it was built in so wise manner, that a recess of two feet was left below its front windows, between them and the street-pavement—a recess too narrow for any possible use (for even if it had been occupied by a seat, as in old time it might have been, everybody walking along the street would have fallen over the legs of the reposing

wayfarers). But, by way of making this two feet depth of freehold land more expressive of the dignity of an establishment for the sale of spirituous liquors, it was fenced from the pavement by an imposing iron railing, having four or five spearheads to the yard of it, and six feet high; containing as much iron and iron-work, indeed, as could well be put into the space; and by this stately arrangement, the little piece of dead ground within, between wall and street, became a protective receptacle of refuse; cigar ends, and oyster shells, and the like, such as an open-handed English street-populace habitually scatters from its presence, and was thus left, unsweepable by any ordinary methods. Now the iron bars which, uselessly (or in great degree worse than uselessly), enclosed this bit of ground, and made it pestilent, represented a quantity of work which would have cleansed the Carshalton pools three times over;—of work, partly cramped and deadly, in the mine; partly fierce* and exhaustive, at the furnace, partly foolish and sedentary, of ill-taught students making bad designs: work from the beginning to the last fruits of it, and in all the branches of it, venomous, deathful, and miserable. Now, how did it come to pass that this work was done instead of the other; that the strength and life of the English operative were spent in defiling ground, instead of re-

* A fearful occurrence took place a few days since, near Wolverhampton. Thomas Snape, aged nineteen, was on duty as the "keeper" of a blast furnace at Deepfield, assisted by John Gardner, aged eighteen, and Joseph Swift, aged thirty-seven. The furnace contained four tons of molten iron, and an equal amount of cinders, and ought to have been run out at 7.30 P. M. But Snape and his mates, engaged in talking and drinking, neglected their duty, and, in the mean time, the iron rose in the furnace until it reached a pipe wherein water was contained. Just as the men had stripped, and were proceeding to tap the furnace, the water in the pipe, converted into steam, burst down its front and let loose on them the molten metal, which instantaneously consumed Gardner; Snape, terribly burnt, and mad with pain, leaped into the canal and then ran home and fell dead on the threshold; Swift survived to reach the hospital, where he died too.

In further illustration of this matter, I beg the reader to look at the article on the 'Decay of the English Race,' in the *Pall-Mall Gazette* of April 17, of this year; and at the articles on the 'Report of the Thames Commission,' in any journals of the same date.

deeming it ; and in producing an entirely (in that place) valueless piece of metal, which can neither be eaten nor breathed, instead of medicinal fresh air, and pure water ?

There is but one reason for it, and at present a conclusive one,—that the capitalist can charge percentage on the work in the one case, and cannot in the other. If, having certain funds for supporting labor at my disposal, I pay men merely to keep my ground in order, my money is, in that function, spent once for all ; but if I pay them to dig iron out of my ground, and work it, and sell it, I can charge rent for the ground, and percentage both on the manufacture and the sale, and make my capital profitable in these three by-ways. The greater part of the profitable investment of capital, in the present day, is in operations of this kind, in which the public is persuaded to buy something of no use to it, on production, or sale, of which, the capitalist may charge percentage ; the said public remaining all the while under the persuasion that the percentage thus obtained are real national gains, whereas, they are merely filchings out of partially light pockets, to swell heavy ones.

Thus, the Croydon publican buys the iron railing, to make himself more conspicuous to drunkards. The public-housekeeper on the other side of the way presently buys another railing, to out-rail him with. Both are, as to their *relative* attractiveness to customers of taste, just where they were before ; but they have lost the price of the railings ; which they must either themselves finally lose, or make their aforesaid customers of taste pay, by raising the price of their beer, or adulterating it. Either the publicans, or their customers, are thus poorer by precisely what the capitalist has gained ; and the value of the work itself, meantime, has been lost, to the nation ; the iron bars in that form and place being wholly useless. It is this mode of taxation of the poor by the rich which is referred to in the text (page 38), in comparing the modern acquisitive power of capital with that of the lance and sword ; the

only difference being that the levy of black-mail in old times was by force, and is now by cozening. The old rider and reiver frankly quartered himself on the publican for the night; the modern one merely makes his lance into an iron spike, and persuades his host to buy it. One comes as an open robber, the other as a cheating pedler; but the result, to the injured person's pocket, is absolutely the same. Of course many useful industries mingle with, and disguise the useless ones; and in the habits of energy aroused by the struggle, there is a certain direct good. It is far better to spend four thousand pounds in making a good gun, and then to blow it to pieces, than to pass life in idleness. Only do not let it be called 'political economy.' There is also a confused notion in the minds of many persons, that the gathering of the property of the poor into the hands of the rich does no ultimate harm; since, in whosoever hands it may be, it must be spent at last, and thus, they think, return to the poor again. This fallacy has been again and again exposed; but grant the plea true, and the same apology may, of course, be made for black-mail, or any other form of robbery. It might be (though practically it never is) as advantageous for the nation that the robber should have the spending of the money he extorts, as that the person robbed should have spent it. But this is no excuse for the theft. If I were to put a turnpike on the road where it passes my own gate, and endeavor to exact a shilling from every passenger, the public would soon do away with my gate, without listening to any plea on my part that 'it was as advantageous to them, in the end, that I should spend their shillings, as that they themselves should.' But if, instead of out-facing them with a turnpike, I can only persuade them to come in and buy stones, or old iron, or any other useless thing, out of my ground, I may rob them to the same extent, and be, moreover, thanked as a public benefactor, and promoter of commercial prosperity. And this main question for the poor of England—for the poor of all countries—is wholly omitted in every

common treatise on the subject of wealth. Even by the laborers themselves, the operation of capital is regarded only in its effect on their immediate interests; never in the far more terrific power of its appointment of the kind and the object of labor. It matters little, ultimately, how much a laborer is paid for making anything; but it matters fearfully what the thing is, which he is compelled to make. If his labor is so ordered as to produce food, and fresh air, and fresh water, no matter that his wages are low;—the food and fresh air and water will be at last there; and he will at last get them. But if he is paid to destroy food and fresh air, or to produce iron bars instead of them,—the food and air will finally *not* be there, and he will *not* get them, to his great and final inconvenience. So that, conclusively, in political as in household economy, the great question is, not so much what money you have in your pocket, as what you will buy with it, and do with it.

I have been long accustomed, as all men engaged in work of investigation must be, to hear my statements laughed at for years, before they are examined or believed; and I am generally content to wait the public's time. But it has not been without displeased surprise that I have found myself totally unable, as yet, by any repetition, or illustration, to force this plain thought into my readers' heads,—that the wealth of nations, as of men, consists in substance, not in ciphers; and that the real good of all work, and of all commerce, depends on the final worth of the thing you make, or get by it. This is a practical enough statement, one would think: but the English public has been so possessed by its modern school of economists with the notion that Business is always good, whether it be busy in mischief or in benefit; and that buying and selling are always salutary, whatever the intrinsic worth of what you buy or sell,—that it seems impossible to gain so much as a patient hearing for any inquiry respecting the substantial result of our eager modern labors. I have never felt more checked by the sense of this impossibility than in arranging the heads of the following

three lectures, which, though delivered at considerable intervals of time, and in different places, were not prepared without reference to each other. Their connection would, however, have been made far more distinct, if I had not been prevented, by what I feel to be another great difficulty in addressing English audiences, from enforcing, with any decision, the common, and to me the most important, part of their subjects. I chiefly desired (as I have just said) to question my hearers—operatives, merchants, and soldiers, as to the ultimate meaning of the *business* they had in hand; and to know from them what they expected or intended their manufacture to come to, their selling to come to, and their killing to come to. That appeared the first point needing determination before I could speak to them with any real utility or effect. ‘You craftsmen—salesmen—swordsmen,—do but tell me clearly what you want; then, if I can say anything to help you, I will; and if not, I will account to you as I best may for my inability.’ But in order to put this question into any terms, one had first of all to face the difficulty just spoken of—to me for the present insuperable,—the difficulty of knowing whether to address one’s audience as believing, or not believing, in any other world than this. For if you address any average modern English company as believing in an Eternal life, and endeavor to draw any conclusions, from this assumed belief, as to their present business, they will forthwith tell you that what you say is very beautiful, but it is not practical. If, on the contrary, you frankly address them as unbelievers in Eternal life, and try to draw any consequences from that unbelief,—they immediately hold you for an accursed person, and shake off the dust from their feet at you. And the more I thought over what I had got to say, the less I found I could say it, without some reference to this intangible or intractable part of the subject. It made all the difference, in asserting any principle of war, whether one assumed that a discharge of artillery would merely knead down a certain quantity of red clay into a level

line, as in a brick field ; or whether, out of every separately Christian-named portion of the ruinous heap, there went out, into the smoke and dead-fallen air of battle, some astonished condition of soul, unwillingly released. It made all the difference, in speaking of the possible range of commerce, whether one assumed that all bargains related only to visible property—or whether property, for the present invisible, but nevertheless real, was elsewhere purchasable on other terms. It made all the difference, in addressing a body of men subject to considerable hardship, and having to find some way out of it—whether one could confidently say to them, ‘My friends,—you have only to die, and all will be right ;’ or whether one had any secret misgiving that such advice was more blessed to him that gave, than to him that took it. And therefore the deliberate reader will find, throughout these lectures, a hesitation in driving points home, and a pausing short of conclusions which he will feel I would fain have come to ; hesitation which arises wholly from this uncertainty of my hearers’ temper. For I do not now speak, nor have I ever spoken, since the time of first forward youth, in any proselyting temper, as desiring to persuade any one of what, in such matters, I thought myself ; but, whomsoever I venture to address, I take for the time his creed as I find it ; and endeavor to push it into such vital fruit as it seems capable of. Thus, it is a creed with a great part of the existing English people, that they are in possession of a book which tells them, straight from the lips of God, all they ought to do, and need to know. I have read that book, with as much care as most of them, for some forty years ; and am thankful that, on those who trust it, I can press its pleadings. My endeavor has been uniformly to make them trust it more deeply than they do ; trust it, not in their own favorite verses only, but in the sum of all ; trust it not as a fetish or talisman, which they are to be saved by daily repetitions of ; but as a Captain’s order, to be heard and obeyed at their peril. I was always encouraged by

supposing my hearers to hold such belief. To these, if to any, I once had hope of addressing, with acceptance, words which insisted on the guilt of pride, and the futility of avarice ; from these, if from any, I once expected ratification of a political economy, which asserted that the life was more than the meat, and the body than raiment ; and these, it once seemed to me, I might ask, without accusation of fanaticism, not merely in doctrine of the lips, but in the bestowal of their heart's treasure, to separate themselves from the crowd of whom it is written, ' After all these things do the Gentiles seek.'

It cannot, however, be assumed, with any semblance of reason, that a general audience is now wholly, or even in majority, composed of these religious persons. A large portion must always consist of men who admit no such creed ; or who, at least, are inaccessible to appeals founded on it. And as, with the so-called Christian, I desired to plead for honest declaration and fulfilment of his belief in life,—with the so-called infidel, I desired to plead for an honest declaration and fulfilment of his belief in death. The dilemma is inevitable. Men must either hereafter live, or hereafter die ; fate may be bravely met, and conduct wisely ordered, on either expectation ; but never in hesitation between ungrasped hope, and unfronted fear. We usually believe in immortality, so far as to avoid preparation for death ; and in mortality, so far as to avoid preparation for anything after death. Whereas, a wise man will at least hold himself prepared for one or other of two events, of which one or other is inevitable ; and will have all things in order, for his sleep, or in readiness, for his awakening.

Nor have we any right to call it an ignoble judgment, if he determine to put them in order, as for sleep. A brave belief in life is indeed an enviable state of mind, but, as far as I can discern, an unusual one. I know few Christians so convinced of the splendor of the rooms in their Father's house, as to be happier when their friends are called to those mansions, than they

would have been if the Queen had sent for them to live at court : nor has the Church's most ardent 'desire to depart, and be with Christ,' ever cured it of the singular habit of putting on mourning for every person summoned to such departure. On the contrary, a brave belief in death has been assuredly held by many not ignoble persons, and it is a sign of the last depravity in the Church itself, when it assumes that such a belief is inconsistent with either purity of character, or energy of hand. The shortness of life is not, to any rational person, a conclusive reason for wasting the space of it which may be granted him ; nor does the anticipation of death to-morrow suggest, to any one but a drunkard, the expediency of drunkenness to-day. To teach that there is no device in the grave, may indeed make the deviceless person more contented in his dulness ; but it will make the deviser only more earnest in devising : nor is human conduct likely, in every case, to be purer, under the conviction that all its evil may in a moment be pardoned, and all its wrong-doing in a moment redeemed ; and that the sigh of repentance, which purges the guilt of the past, will waft the soul into a felicity which forgets its pain, —than it may be under the sterner, and to many not unwise minds, more probable, apprehension, that 'what a man soweth that shall he also reap,—or others reap,—when he, the living seed of pestilence, walketh no more in darkness, but lies down therein.

But to men whose feebleness of sight, or bitterness of soul, or the offence given by the conduct of those who claim higher hope, may have rendered this painful creed the only possible one, there is an appeal to be made, more secure in its ground than any which can be addressed to happier persons. I would fain, if I might offencelessly, have spoken to them as if none others heard ; and have said thus : Hear me, you dying men, who will soon be deaf forever. For these others, at your right hand and your left, who look forward to a state of infinite existence, in which all their errors will be overruled, and all their faults forgiven ;

for these, who, stained and blackened in the battle-smoke of mortality, have but to dip themselves for an instant in the font of death, and to rise renewed of plumage, as a dove that is covered with silver, and her feathers like gold ; for these, indeed, it may be permissible to waste their numbered moments, through faith in a future of innumerable hours ; to these, in their weakness, it may be conceded that they should tamper with sin which can only bring forth fruit of righteousness, and profit by the iniquity which, one day, will be remembered no more. In them, it may be no sign of hardness of heart to neglect the poor, over whom they know their Master is watching ; and to leave those to perish temporarily, who cannot perish eternally. But, for you, there is no such hope, and therefore no such excuse. This fate, which you ordain for the wretched, you believe to be all their inheritance ; you may crush them, before the moth, and they will never rise to rebuke you ;—their breath, which fails for lack of food, once expiring, will never be recalled to whisper against you a word of accusing ;—they and you, as you think, shall lie down together in the dust, and the worms cover you ;—and for them there shall be no consolation, and on you no vengeance,—only the question murmured above your grave : ‘ Who shall repay him what he hath done ? ’ Is it therefore easier for you in your heart to inflict the sorrow for which there is no remedy ? Will you take, wantonly, this little all of his life from your poor brother, and make his brief hours long to him with pain ? Will you be readier to the injustice which can never be redressed ; and niggardly of mercy which you *can* bestow but once, and which, refusing, you refuse forever ? I think better of you, even of the most selfish, than that you would do this, well understood. And for yourselves, it seems to me, the question becomes not less grave, in these curt limits. If your life were but a fever fit,—the madness of a night, whose follies were all to be forgotten in the dawn, it might matter little how you fretted away the sickly hours,—what toys you snatched at, or let fall,—

what visions you followed wistfully with the deceived eyes of sleepless phrenzy. Is the earth only an hospital? Play, if you care to play, on the floor of the hospital dens. Knit its straw into what crowns please you; gather the dust of it for treasure, and die rich in that, clutching at the black motes in the air with your dying hands;—and yet, it may be well with you. But if this life be no dream, and the world no hospital; if all the peace and power and joy you can ever win, must be won now; and all fruit of victory gathered here, or never;—will you still, throughout the puny totality of your life, weary yourselves in the fire for vanity? If there is no rest which remaineth for you, is there none you might presently take? was this grass of the earth made green for your shroud only, not for your bed? and can you never lie down *upon* it, but only *under* it? The heathen, to whose creed you have returned, thought not so. They knew that life brought its contest, but they expected from it also the crown of all contest: No proud one! no jewelled circlet flaming through Heaven above the height of the unmerited throne; only some few leaves of wild olive, cool to the tired brow, through a few years of peace. It should have been of gold, they thought; but Jupiter was poor; this was the best the god could give them. Seeking a greater than this, they had known it a mockery. Not in war, not in wealth, not in tyranny, was there any happiness to be found for them—only in kindly peace, fruitful and free. The wreath was to be of *wild* olive, mark you:—the tree that grows carelessly; tufting the rocks with no vivid bloom, no verdure of branch; only with soft snow of blossom, and scarcely fulfilled fruit, mixed with gray leaf and thorn-set stem; no fastening of diadem for you but with such sharp embroidery! But this, such as it is, you may win while yet you live; type of gray honor and sweet rest.* Free-heartedness, and graciousness, and undisturbed trust, and requited love, and the sight of

* μελιτόεσσα, ἀέθλων γ' ἔνεκεν.

the peace of others, and the ministry to their pain ;—these, and the blue sky above you, and the sweet waters and flowers of the earth beneath ; and mysteries and presences, innumerable, of living things,—these may yet be here your riches ; untormenting and divine : serviceable for the life that now is ; nor, it may be, without promise of that which is to come.

LECTURE I.

WORK.

(Delivered before the Working Men's Institute, at Camberwell.)

MY FRIENDS,—I have not come among you to-night to endeavor to give you an entertaining lecture ; but to tell you a few plain facts, and ask you some plain, but necessary questions. I have seen and known too much of the struggle for life among our laboring population, to feel at ease, even under any circumstances, in inviting them to dwell on the trivialities of my own studies ; but, much more, as I meet to-night, for the first time, the members of a working Institute established in the district in which I have passed the greater part of my life, I am desirous that we should at once understand each other, on graver matters. I would fain tell you, with what feelings, and with what hope, I regard this Institution, as one of many such, now happily established throughout England, as well as in other countries ;—Institutions which are preparing the way for a great change in all the circumstances of industrial life ; but of which the success must wholly depend upon our clearly understanding the circumstances and necessary *limits* of this change. No teacher can truly promote the cause of education, until he knows the conditions of the life for which that education is to prepare his pupil. And the fact that he is called upon to address you, nominally, as a 'Working Class,' must compel him, if he is in any wise earnest or thoughtful, to inquire in the outset, on what you yourselves suppose this class distinction has been founded in the past, and must be founded in the future. The manner of

the amusement, and the matter of the teaching, which any of us can offer you, must depend wholly on our first understanding from you, whether you think the distinction heretofore drawn between working men and others, is truly or falsely founded. Do you accept it as it stands? do you wish it to be modified? or do you think the object of education is to efface it, and make us forget it forever?

Let me make myself more distinctly understood. We call this—you and I—a ‘Working Men’s’ Institute, and our college in London, a ‘Working Men’s’ College. Now, how do you consider that these several institutes differ, or ought to differ, from ‘idle men’s’ institutes and ‘idle men’s’ colleges? Or by what other word than ‘idle’ shall I distinguish those whom the happiest and wisest of working men do not object to call the ‘Upper Classes?’ Are there really upper classes,—are there lower? How much should they always be elevated, how much always depressed? And, gentlemen and ladies—I pray those of you who are here to forgive me the offence there may be in what I am going to say. It is not *I* who wish to say it. Bitter voices say it: voices of battle and of famine through all the world, which must be heard some day, whoever keeps silence. Neither is it to *you* specially that I say it. I am sure that most now present know their duties of kindness, and fulfil them, better perhaps than I do mine. But I speak to you as representing your whole class, which errs, I know, chiefly by thoughtlessness, but not therefore the less terribly. Wilful error is limited by the will, but what limit is there to that of which we are unconscious?

Bear with me, therefore, while I turn to these workmen, and ask them, also as representing a great multitude, what they think the ‘upper classes’ are, and ought to be, in relation to them. Answer, you workmen who are here, as you would among yourselves, frankly; and tell me how you would have me call those classes. Am I to call them—would *you* think me right in calling them—the idle classes? I think

you would feel somewhat uneasy, and as if I were not treating my subject honestly, or speaking from my heart, if I went on under the supposition that all rich people were idle. You would be both unjust and unwise if you allowed me to say that;—not less unjust than the rich people who say that all the poor are idle, and will never work if they can help it, or more than they can help.

For indeed the fact is, that there are idle poor and idle rich; and there are busy poor and busy rich. Many a beggar is as lazy as if he had ten thousand a year; and many a man of large fortune is busier than his errand-boy, and never would think of stopping in the street to play marbles. So that, in a large view, the distinction between workers and idlers, as between knaves and honest men, runs through the very heart and innermost economies of men of all ranks and in all positions. There is a working class—strong and happy—among both rich and poor; there is an idle class—weak, wicked, and miserable—among both rich and poor. And the worst of the misunderstandings arising between the two orders come of the unlucky fact that the wise of one class habitually contemplate the foolish of the other. If the busy rich people watched and rebuked the idle rich people, all would be right; and if the busy poor people watched and rebuked the idle poor people, all would be right. But each class has a tendency to look for the faults of the other. A hard-working man of property is particularly offended by an idle beggar; and an orderly, but poor, workman is naturally intolerant of the licentious luxury of the rich. And what is severe judgment in the minds of the just men of either class, becomes fierce enmity in the unjust—but among the unjust *only*. None but the dissolute among the poor look upon the rich as their natural enemies, or desire to pilage their houses and divide their property. None but the dissolute among the rich speak in opprobrious terms of the vices and follies of the poor.

There is, then, no class distinction between idle and

industrious people ; and I am going to-night to speak only of the industrious. The idle people we will put out of our thoughts at once—they are mere nuisances—what ought to be done with *them*, we'll talk of at another time. But there are class distinctions among the industrious themselves ;—tremendous distinctions, which rise and fall to every degree in the infinite thermometer of human pain and of human power—distinctions of high and low, of lost and won, to the whole reach of man's soul and body.

These separations we will study, and the laws of them, among energetic men only, who, whether they work or whether they play, put their strength into the work, and their strength into the game ; being in the full sense of the word 'industrious,' one way or another—with a purpose, or without. And these distinctions are mainly four :

I. Between those who work, and those who play.

II. Between those who produce the means of life, and those who consume them.

III. Between those who work with the head, and those who work with the hand.

IV. Between those who work wisely, and who work foolishly.

For easier memory, let us say we are going to propose, in our examination,—

I. Work to play ;

II. Production to consumption ;

III. Head to hand ; and,

IV. Sense to nonsense.

I. First, then, of the distinction between the classes who work and the classes who play. Of course we must agree upon a definition of these terms,—work and play,—before going farther. Now, roughly, not with vain subtlety of definition, but for plain use of the words, 'play' is an exertion of body or mind, made to please ourselves, and with no determined end ; and work is a thing done because it ought to be done, and with a determined end. You play, as you call it, at cricket, for instance. That is as hard work as any-

thing else ; but it amuses you, and it has no result but the amusement. If it were done as an ordered form of exercise, for health's sake, it would become work directly. So, in like manner, whatever we do to please ourselves, and only for the sake of the pleasure, not for an ultimate object, is 'play,' the 'pleasing thing,' not the useful thing. Play may be useful in a secondary sense (nothing is indeed more useful or necessary) ; but the use of it depends on its being spontaneous.

Let us, then, inquire together what sort of games the playing class in England spend their lives in playing at.

The first of all English games is making money. That is an all-absorbing game ; and we knock each other down oftener in playing at that than at foot-ball, or any other roughest sport ; and it is absolutely without purpose ; no one who engages heartily in that game ever knows why. Ask a great money-maker what he wants to do with his money—he never knows. He doesn't make it to do anything with it. He gets it only that he *may* get it. 'What will you make of what you have got ?' you ask. 'Well, I'll get more,' he says. Just as, at cricket, you get more runs. There's no use in the runs, but to get more of them than other people is the game. And there's no use in the money, but to have more of it than other people is the game. So all that great foul city of London there,—rattling, growling, smoking, stinking,—a ghastly heap of fermenting brickwork, pouring out poison at every pore,—you fancy it is a city of work ? Not a street of it ! It is a great city of play ; very nasty play, and very hard play, but still play. It is only Lord's cricket ground without the turf,—a huge billiard table without the cloth, and with pockets as deep as the bottomless pit ; but mainly a billiard table, after all.

Well, the first great English game is this playing at counters. It differs from the rest in that it appears always to be producing money, while every other game is expensive. But it does not always produce money. There's a great difference between 'winning' money

and 'making' it; a great difference between getting it out of another man's pocket into ours, or filling both. Collecting money is by no means the same thing as making it; the tax-gatherer's house is not the Mint; and much of the apparent gain (so called), in commerce, is only a form of taxation on carriage or exchange.

Our next great English game, however, hunting and shooting, is costly altogether; and how much we are fined for it annually in land, horses, gamekeepers, and game laws, and all else that accompanies that beautiful and special English game, I will not endeavor to count now: but note only that, except for exercise, this is not merely a useless game, but a deadly one, to all connected with it. For through horse-racing, you get every form of what the higher classes everywhere call 'Play,' in distinction from all other plays; that is—gambling; by no means a beneficial or recreative game: and, through game-preserving, you get also some curious laying out of ground; that beautiful arrangement of dwelling-house for man and beast, by which we have grouse and blackcock—so many brace to the acre, and men and women—so many brace to the garret. I often wonder what the angelic builders and surveyors—the angelic builders who build the 'many mansions' up above there; and the angelic surveyors, who measured that four-square city with their measuring reeds—I wonder what they think, or are supposed to think, of the laying out of ground by this nation, which has set itself, as it seems, literally to accomplish, word for word, or rather fact for word, in the persons of those poor whom its Master left to represent him, what that Master said of himself—that foxes and birds had homes, but He none.

Then, next to the gentlemen's game of hunting, we must put the ladies' game of dressing. It is not the cheapest of games. I saw a brooch at a jeweller's in Bond Street a fortnight ago, not an inch wide, and without any singular jewel in it, yet worth 3000*l*. And I wish I could tell you what this 'play' costs, altogether, in England, France, and Russia annually.

But it is a pretty game, and on certain terms, I like it ; nay, I don't see it played quite as much as I would fain have it. You ladies like to lead the fashion :—by all means lead it—lead it thoroughly, lead it far enough. Dress yourselves nicely, and dress everybody else nicely. Lead the *fashions for the poor* first ; make *them* look well, and you yourselves will look, in ways of which you have now no conception, all the better. The fashions you have set for some time among your peasantry are not pretty ones ; their doublets are too irregularly slashed, and the wind blows too frankly through them.

Then there are other games, wild enough, as I could show you if I had time.

There's playing at literature, and playing at art—very different, both, from working at literature, or working at art, but I've no time to speak of these. I pass to the greatest of all—the play of plays, the great gentlemen's game, which ladies like them best to play at,—the game of War. It is entrancingly pleasant to the imagination ; the facts of it, not always so pleasant. We dress for it, however, more finely than for any other sport ; and go out to it, not merely in scarlet, as to hunt, but in scarlet and gold, and all manner of fine colors : of course we could fight better in gray, and without feathers ; but all nations have agreed that it is good to be well dressed at this play. Then the bats and balls are very costly ; our English and French bats, with the balls and wickets, even those which we don't make any use of, costing, I suppose, now about fifteen millions of money annually to each nation ; all of which you know is paid for by hard laborer's work in the furrow and furnace. A costly game !—not to speak of its consequences ; I will say at present nothing of these. The mere immediate cost of all these plays is what I want you to consider ; they all cost deadly work somewhere, as many of us know too well. The jewel-cutter, whose sight fails over the diamonds ; the weaver, whose arm fails over the web ; the iron-forging, whose breath fails before

the furnace—*they* know what work is—*they*, who have all the work, and none of the play, except a kind they have named for themselves down in the black north country, where 'play' means being laid up by sickness. It is a pretty example for philologists, of varying dialect, this change in the sense of the word 'play,' as used in the black country of Birmingham, and the red and black country of Baden Baden. Yes, gentlemen, and gentlewomen, of England, who think 'one moment unamused a misery, not made for feeble man,' this is what you have brought the word 'play' to mean, in the heart of merry England! You may have your fluting and piping; but there are sad children sitting in the market-place, who indeed cannot say to you, 'We have piped unto you, and ye have not danced:' but eternally shall say to you, 'We have mourned unto you, and ye have not lamented.'

This, then, is the first distinction between the 'upper and lower' classes. And this is one which is by no means necessary; which indeed must, in process of good time, be by all honest men's consent abolished. Men will be taught that an existence of play, sustained by the blood of other creatures, is a good existence for gnats and sucking fish; but not for men: that neither days, nor lives, can be made holy by doing nothing in them: that the best prayer at the beginning of a day is that we may not lose *its* moments; and the best grace before meat, the consciousness that we have justly earned our dinner. And when we have this much of plain Christianity preached to us again, and enough respect what we regard as inspiration, as not to think that 'Son, go work to-day in my vineyard,' means 'Fool, go play to-day in my vineyard,' we shall all be workers, in one way or another; and this much at least of the distinction between 'upper' and 'lower' forgotten.

II. I pass then to our second distinction; between the rich and poor, between Dives and Lazarus,—distinction which exists more sternly, I suppose, in this day, than ever in the world, Pagan or Christian, till

now. I will put it sharply before you, to begin with, merely by reading two paragraphs which I cut from two papers that lay on my breakfast table on the same morning, the 25th of November, 1864. The piece about the rich Russian at Paris is commonplace enough, and stupid besides (for fifteen francs,—12s. 6d.,—is nothing for a rich man to give for a couple of peaches, out of season). Still, the two paragraphs printed on the same day are worth putting side by side.

‘Such a man is now here. He is a Russian, and, with your permission, we will call him Count Teufelskine. In dress he is sublime; art is considered in that toilet, the harmony of color respected, the *chiar’ oscuro* evident in well-selected contrast. In manners he is dignified—nay, perhaps apathetic; nothing disturbs the placid serenity of that calm exterior. One day our friend breakfasted *chez* Bignon. When the bill came he read, “Two peaches, 15f.” He paid. “Peaches scarce, I presume?” was his sole remark. “No, sir,” replied the waiter, “but Teufelskines are.”’—*Telegraph*, November 15, 1864.

‘Yesterday morning, at eight o’clock, a woman, passing a dung heap in the stone yard near the recently-erected almshouses in Shadwell Gap, High Street, Shadwell, called the attention of a Thames police-constable to a man in a sitting position on the dung heap, and said she was afraid he was dead. Her fears proved to be true. The wretched creature appeared to have been dead several hours. He had perished of cold and wet, and the rain had been beating down on him all night. The deceased was a bone-picker. He was in the lowest stage of poverty, poorly clad, and half-starved. The police had frequently driven him away from the stone yard, between sunset and sunrise, and told him to go home. He selected a most desolate spot for his wretched death. A penny and some bones were found in his pockets. The deceased was between fifty and sixty years of age. Inspector Roberts, of the K division, has given directions for inquiries to be made at the lodging-houses respecting

the deceased, to ascertain his identity if possible: — *Morning Post*, November 25, 1864.

You have the separation thus in brief compass; and I want you to take notice of the 'a penny and some bones were found in his pockets,' and to compare it with this third statement, from the *Telegraph* of January 16th of this year:—

'Again, the dietary scale for adult and juvenile paupers was drawn up by the most conspicuous political economists in England. It is low in quantity, but it is sufficient to support nature; yet within ten years of the passing of the Poor Law Act, we heard of the paupers in the Andover Union gnawing the scraps of putrid flesh and sucking the marrow from the bones of horses which they were employed to crush.'

You see my reason for thinking that our Lazarus of Christianity has some advantage over the Jewish one. Jewish Lazarus expected, or at least prayed, to be fed with crumbs from the rich man's table; but *our* Lazarus is fed with crumbs from the dog's table.

Now this distinction between rich and poor rests on two bases. Within its proper limits, on a basis which is lawful and everlastingly necessary; beyond them, on a basis unlawful, and everlastingly corrupting the frame-work of society. The lawful basis of wealth is, that a man who works should be paid the fair value of his work; and if he does not choose to spend it to-day, he should have free leave to keep it, and spend it to-morrow. Thus, an industrious man working daily, and laying by daily, attains at last the possession of an accumulated sum of wealth, to which he has absolute right. The idle person who will not work, and the wasteful person who lays nothing by, at the end of the same time will be doubly poor—poor in possession, and dissolute in moral habit; and he will then naturally covet the money which the other has saved. And if he is then allowed to attack the other, and rob him of his well-earned wealth, there is no more any motive for saving, or any reward for good conduct; and all society is thereupon dissolved, or exists only

in systems of rapine. Therefore the first necessity of social life is the clearness of national conscience in enforcing the law—that he should keep who has JUSTLY EARNED.

That law, I say, is the proper basis of distinction between rich and poor. But there is also a false basis of distinction; namely, the power held over those who earn wealth by those who levy or exact it. There will be always a number of men who would fain set themselves to the accumulation of wealth as the sole object of their lives. Necessarily, that class of men is an uneducated class, inferior in intellect, and more or less cowardly. It is physically impossible for a well-educated, intellectual, or brave man to make money the chief object of his thoughts; as physically impossible as it is for him to make his dinner the principal object of them. All healthy people like their dinners, but their dinner is not the main object of their lives. So all healthily minded people like making money—ought to like it, and to enjoy the sensation of winning it; but the main object of their life is not money; it is something better than money. A good soldier, for instance, mainly wishes to do his fighting well. He is glad of his pay—very properly so, and justly grumbles when you keep him ten years without it—still, his main notion of life is to win battles, not to be paid for winning them. So of clergymen. They like pew-rents, and baptismal fees, of course; but yet, if they are brave and well educated, the pew-rent is not the sole object of their lives, and the baptismal fee is not the sole purpose of the baptism; the clergyman's object is essentially to baptize and preach, not to be paid for preaching. So of doctors. They like fees no doubt,—ought to like them; yet if they are brave and well educated, the entire object of their lives is not fees. They, on the whole, desire to cure the sick; and, —if they are good doctors, and the choice were fairly put to them,—would rather cure their patient, and lose their fee, than kill him, and get it. And so with all other brave and rightly trained men; their work is

first, their fee second—very important always, but still *second*. But in every nation, as I said, there are a vast class who are ill-educated, cowardly, and more or less stupid. And with these people, just as certainly the fee is first, and the work second, as with brave people the work is first and the fee second. And this is no small distinction. It is the whole distinction in a man; distinction between life and death *in* him, between heaven and hell *for* him. You cannot serve two masters;—you *must* serve one or other. If your work is first with you, and your fee second, work is your master, and the lord of work, who is God. But if your fee is first with you, and your work second, fee is your master, and the lord of fee, who is the Devil; and not only the Devil, but the lowest of devils—the ‘least erected fiend that fell.’ So there you have it in the briefest terms; Work first—you are God’s servants; Fee first—you are the Fiend’s. And it makes a difference, now and ever, believe me, whether you serve Him who has on His vesture and thigh written, ‘King of Kings,’ and whose service is perfect freedom; or him on whose vesture and thigh the name is written, ‘Slave of Slaves,’ and whose service is perfect slavery.

However, in every nation there are, and must always be a certain number of these Fiend’s servants, who have it principally for the object of their lives to make money. They are always, as I said, more or less stupid, and cannot conceive of anything else so nice as money. Stupidity is always the basis of the Judas bargain. We do great injustice to Iscariot, in thinking him wicked above all common wickedness. He was only a common money-lover, and, like all money-lovers, didn’t understand Christ;—couldn’t make out the worth of Him, or meaning of Him. He was horror-struck when he found that Christ would be killed; threw his money away instantly, and hanged himself. How many of our present money-seekers, think you, would have the grace to hang themselves, whoever was killed? But Judas was a common, selfish,

muddle-headed, pilfering fellow; his hand always in the bag of the poor, not caring for them. He didn't understand Christ;—yet believed in Him, much more than most of us do; had seen Him do miracles, thought He was quite strong enough to shift for Himself, and he, Judas, might as well make his own little by-perquisites out of the affair. Christ would come out of it well enough, and he have his thirty pieces. Now, that is the money-seeker's idea, all over the world. He doesn't hate Christ, but can't understand Him—doesn't care for Him—sees no good in that benevolent business; makes his own little job out of it at all events, come what will. And thus, out of every mass of men, you have a certain number of bag-men—your 'fee first' men, whose main object is to make money. And they do make it—make it in all sorts of unfair ways, chiefly by the weight and force of money itself, or what is called the power of capital; that is to say, the power which money, once obtained, has over the labor of the poor, so that the capitalist can take all its produce to himself, except the laborer's food. That is the modern Judas's way of 'carrying the bag,' and bearing what is put therein.

Nay, but (it is asked) how is that an unfair advantage? Has not the man who has worked for the money a right to use it as he best can? No; in this respect, money is now exactly what mountain promontories over public roads were in old times. The barons fought for them fairly:—the strongest and cunningest got them; then fortified them; and made every one who passed below pay toll. Well, capital now is exactly what crags were then. Men fight fairly (we will, at least, grant so much, though it is more than we ought) for their money; but, once having got it, the fortified millionaire can make everybody who passes below pay toll to his million, and build another tower of his money castle. And I can tell you, the poor vagrants by the roadside suffer now quite as much from the bag-baron, as ever they did from the crag-baron. Bags and crags have just the same result on rags. I

have not time, however, to-night to show you in how many ways the power of capital is unjust; but this one great principle I have to assert—you will find it quite indisputably true—that whenever money is the principal object of life with either man or nation, it is both got ill, and spent ill; and does harm both in the getting and spending; but when it is not the principal object, it and all other things will be well got, and well spent. And here is the test, with every man, of whether money is the principal object with him, or not. If in mid-life he could pause and say, "Now I have enough to live upon, I'll live upon it; and having well earned it, I will also well spend it, and go out of the world poor, as I came into it," then money is not principal with him; but if, having enough to live upon in the manner befitting his character and rank, he still wants to make more, and to *die* rich, then money is the principal object with him, and it becomes a curse to himself, and generally to those who spend it after him. For you know it *must* be spent some day; the only question is whether the man who makes it shall spend it, or some one else. And generally it is better for the maker to spend it, for he will know best its value and use. This is the true law of life. And if a man does not choose thus to spend his money, he must either hoard it or lend it, and the worst thing he can generally do is to lend it; for borrowers are nearly always ill-spenders, and it is with lent money that all evil is mainly done, and all unjust war protracted.

For observe what the real fact is, respecting loans to foreign military governments, and how strange it is. If your little boy came to you to ask for money to spend in squibs and crackers, you would think twice before you gave it him; and you would have some idea that it was wasted, when you saw it fly off in fireworks, even though he did no mischief with it. But the Russian children, and Austrian children, come to you, borrowing money, not to spend in innocent squibs, but in cartridges and bayonets to attack you in India with, and to keep down all noble life in Italy with, and to

murder Polish women and children with; and *that* you will give at once, because they pay you interest for it. Now, in order to pay you that interest, they must tax every working peasant in their dominions; and on that work you live. You therefore at once rob the Austrian peasant, assassinate or banish the Polish peasant, and you live on the produce of the theft, and the bribe for the assassination! That is the broad fact—that is the practical meaning of your foreign loans, and of most large interest of money; and then you quarrel with Bishop Colenso, forsooth, as if *he* denied the Bible, and you believed it! though, wretches as you are, every deliberate act of your lives is a new defiance of its primary orders; and as if, for most of the rich men of England at this moment, it were not indeed to be desired, as the best thing at least for *them*, that the Bible should *not* be true, since against them these words are written in it: ‘The rust of your gold and silver shall be a witness against you, and shall eat your flesh, as it were fire.’

III. I pass now to our third condition of separation, between the men who work with the hand, and those who work with the head.

And here we have at last an inevitable distinction. There *must* be work done by the arms, or none of us could live. There *must* be work done by the brains, or the life we get would not be worth having. And the same men cannot do both. There is rough work to be done, and rough men must do it; there is gentle work to be done, and gentlemen must do it: and it is physically impossible that one class should do, or divide, the work of the other. And it is of no use to try to conceal this sorrowful fact by fine words, and to talk to the workman about the honorableness of manual labor, and the dignity of humanity. That is a grand old proverb of Sancho Panza’s, ‘Fine words butter no parsnips;’ and I can tell you that, all over England just now, you workmen are buying a great deal too much butter at that dairy. Rough work, honorable or not, takes the life out of us; and the man who

has been heaving clay out of a ditch all day, or driving an express train against the north wind all night, or holding a collier's helm in a gale on a lee-shore, or whirling white-hot iron at a furnace mouth, that man is not the same at the end of his day, or night, as one who has been sitting in a quiet room, with everything comfortable about him, reading books, or classing butterflies, or painting pictures. If it is any comfort to you to be told that the rough work is the more honorable of the two, I should be sorry to take that much of consolation from you; and in some sense I need not. The rough work is at all events real, honest, and, generally, though not always, useful; while the fine work is, a great deal of it, foolish and false as well as fine, and therefore dishonorable: but when both kinds are equally well and worthily done, the head's is the noble work, and the hand's the ignoble; and of all hand work whatsoever, necessary for the maintenance of life, those old words, 'In the sweat of thy face thou shalt eat bread,' indicate that the inherent nature of it is one of calamity; and that the ground, cursed for our sake, casts also some shadow of degradation into our contest with its thorn and its thistle; so that all nations have held their days honorable, or 'holy,' and constituted them 'holydays' or 'holidays,' by making them days of rest; and the promise, which, among all our distant hopes, seems to cast the chief brightness over death, is that blessing of the dead who die in the Lord, that 'they rest from their labors, and their works do follow them.'

And thus the perpetual question and contest must arise, who is to do this rough work? and how is the worker of it to be comforted, redeemed, and rewarded? and what kind of play should he have, and what rest, in this world, sometimes, as well as in the next? Well, my good working friends, these questions will take a little time to answer yet. They must be answered: all good men are occupied with them, and all honest thinkers. There's grand head work doing about them; but much must be discovered, and much attempted in

vain, before anything decisive can be told you. Only note these few particulars, which are already sure.

As to the distribution of the hard work. None of us, or very few of us, do either hard or soft work because we think we ought; but because we have chanced to fall into the way of it, and cannot help ourselves. Now, nobody does anything well that they cannot help doing: work is only done well when it is done with a will; and no man has a thoroughly sound will unless he knows he is doing what he should, and is in his place. And, depend upon it, all work must be done at last, not in a disorderly, scrambling, doggish way, but in an ordered, soldierly, human way—a lawful way. Men are enlisted for the labor that kills—the labor of war: they are counted, trained, fed, dressed, and praised for that. Let them be enlisted also for the labor that feeds: let them be counted, trained, fed, dressed, praised for that. Teach the plough exercise as carefully as you do the sword exercise, and let the officers of troops of life be held as much gentlemen as the officers of troops of death; and all is done: but neither this, nor any other right thing, can be accomplished—you can't even see your way to it—unless, first of all, both servant and master are resolved that, come what will of it, they will do each other justice. People are perpetually squabbling about what will be best to do, or easiest to do, or adviseablest to do, or profitablest to do; but they never, so far as I hear them talk, ever ask what it is *just* to do. And it is the law of heaven that you shall not be able to judge what is wise or easy, unless you are first resolved to judge what is just, and to do it. This is the one thing constantly reiterated by our Master—the order of all others that is given oftenest—‘Do justice and judgment.’ That’s your Bible order; that’s the ‘Service of God,’ not praying nor psalm-singing. You are told, indeed, to sing psalms when you are merry, and to pray when you need anything; and, by the perversion of the Evil Spirit, we get to think that praying and psalm-singing are ‘service.’ If a child finds itself in want of anything,

it runs in and asks its father for it—does it call that, doing its father a service? If it begs for a toy or a piece of cake—does it call that serving its father? That, with God, is prayer, and he likes to hear it: He likes you to ask Him for cake when you want it; but He doesn't call that 'serving Him.' Begging is not serving: God likes mere beggars as little as you do—He likes honest servants, not beggars. So when a child loves its father very much, and is very happy, it may sing little songs about him; but it doesn't call that serving its father; neither is singing songs about God, serving God. It is enjoying ourselves, if it's anything; most probably it is nothing; but if it's anything, it is serving ourselves, not God. And yet we are impudent enough to call our beggings and chauntings 'Divine Service:' we say 'Divine service will be "performed"' (that's our word—the form of it gone through) 'at eleven o'clock.' Alas!—unless we perform Divine service in every willing act of our life, we never perform it at all. The one Divine work—the one ordered sacrifice—is to do justice; and it is the last we are ever inclined to do. Anything rather than that! As much charity as you choose, but no justice. 'Nay,' you will say, 'charity is greater than justice.' Yes, it is greater; it is the summit of justice—it is the temple of which justice is the foundation. But you can't have the top without the bottom; you cannot build upon charity. You must build upon justice, for this main reason, that you have not, at first, charity to build with. It is the last reward of good work. Do justice to your brother (you can do that, whether you love him or not), and you will come to love him. But do injustice to him, because you don't love him; and you will come to hate him. It is all very fine to think you can build upon charity to begin with; but you will find all you have got to begin with, begins at home, and is essentially love of yourself. You well-to-do people, for instance, who are here to-night, will go to 'Divine service' next Sunday, all nice and tidy, and your little children will have their tight little Sunday boots on,

and lovely little Sunday feathers in their hats ; and you'll think, complacently and piously, how lovely they look ! So they do : and you love them heartily, and you like sticking feathers in their hats. That's all right : that *is* charity ; but it is charity beginning at home. Then you will come to the poor little crossing-sweeper, got up also,—it, in its Sunday dress,—the dirtiest rags it has,—that it may beg the better : we shall give it a penny, and think how good we are. That's charity going abroad. But what does Justice say, walking and watching near us ? Christian Justice has been strangely mute, and seemingly blind ; and, if not blind, decrepit, this many a day : she keeps her accounts still, however—quite steadily—doing them at nights, carefully, with her bandage off, and through acutest spectacles (the only modern scientific invention she cares about). You must put your ear down ever so close to her lips to hear her speak ; and then you will start at what she first whispers, for it will certainly be, ' Why shouldn't that little crossing-sweeper have a feather on its head, as well as your own child ? ' Then you may ask Justice in an amazed manner, ' How she can possibly be so foolish as to think children could sweep crossings with feathers on their heads ? ' Then you stoop again, and Justice says—still in her dull, stupid way—' Then, why don't you, every other Sunday, leave your child to sweep the crossing, and take the little sweeper to church in a hat and feather ? ' Mercy on us (you think), what will she say next ? And you answer, of course, that ' you don't, because every body ought to remain content in the position in which Providence has placed them. ' Ah, my friends, that's the gist of the whole question. *Did* Providence put them in that position, or did *you* ? You knock a man into a ditch, and then you tell him to remain content in the ' position in which Providence has placed him. ' That's modern Christianity. You say—' *We* did not knock him into the ditch. ' How do you know what you have done, or are doing ? That's just what we have all got to know, and what we shall never know,

until the question with us every morning, is, not how to do the gainful thing, but how to do the just thing; nor until we are at least so far on the way to being Christian, as to have understood that maxim of the poor half-way Mahometan, 'One hour in the execution of justice is worth seventy years of prayer.'

Supposing, then, we have it determined with appropriate justice, *who* is to do the hand work, the next questions must be how the hand-workers are to be paid, and how they are to be refreshed, and what play they are to have. Now, the possible quantity of play depends on the possible quantity of pay; and the quantity of pay is not a matter for consideration to hand-workers only, but to all workers. Generally, good, useful work, whether of the hand or head, is either ill-paid, or not paid at all. I don't say it should be so, but it always is so. People, as a rule, only pay for being amused or being cheated, not for being served. Five thousand a year to your talker, and a shilling a day to your fighter, digger, and thinker, is the rule. None of the best head work in art, literature, or science, is ever paid for. How much do you think Homer got for his *Iliad*? or Dante for his *Paradise*? only bitter bread and salt, and going up and down other people's stairs. In science, the man who discovered the telescope, and first saw heaven, was paid with a dungeon; the man who invented the microscope, and first saw earth, died of starvation, driven from his home: it is indeed very clear that God means all thoroughly good work and talk to be done for nothing. Baruch, the scribe, did not get a penny a line for writing Jeremiah's second roll for him, I fancy; and St. Stephen did not get bishop's pay for that long sermon of his to the Pharisees; nothing but stones. For indeed that is the world-father's proper payment. So surely as any of the world's children work for the world's good, honestly, with head and heart; and come to it, saying, 'Give us a little bread, just to keep the life in us,' the world-father answers them, 'No, my children, not bread; a stone, if you like, or as many

as you need, to keep you quiet.' But the hand-workers are not so ill off as all this comes to. The worst that can happen to *you* is to break stones; not be broken by them. And for you there will come a time for better payment; some day, assuredly, more pence will be paid to Peter the Fisherman, and fewer to Peter the Pope; we shall pay people not quite so much for talking in Parliament and doing nothing, as for holding their tongues out of it and doing something; we shall pay our ploughman a little more and our lawyer a little less, and so on: but, at least, we may even now take care that whatever work is done shall be fully paid for; and the man who does it paid for it, not somebody else; and that it shall be done in an orderly, soldierly, well-guided, wholesome way, under good captains and lieutenants of labor; and that it shall have its appointed times of rest, and enough of them; and that in those times the play shall be wholesome play, not in theatrical gardens, with tin flowers and gas sunshine, and girls dancing because of their misery; but in true gardens, with real flowers, and real sunshine, and children dancing because of their gladness; so that truly the streets shall be full (the 'streets,' mind you, not the gutters) of children, playing in the midst thereof. We may take care that working-men shall have at least as good books to read as anybody else, when they've time to read them; and as comfortable firesides to sit at as anybody else, when they've time to sit at them. This, I think, can be managed for you, my working friends, in the good time.

IV. I must go on, however, to our last head, concerning ourselves all, as workers. What is wise work, and what is foolish work? What the difference between sense and nonsense, in daily occupation?

Well, wise work is, briefly, work *with* God. Foolish work is work *against* God. And work done with God, which He will help, may be briefly described as 'Putting in Order'—that is, enforcing God's law of order, spiritual and material, over men and things. The first thing you have to do, essentially; the real

'good work' is, with respect to men, to enforce justice, and with respect to things, to enforce tidiness, and fruitfulness. And against these two great human deeds, justice and order, there are perpetually two great demons contending,—the devil of iniquity, or inequity, and the devil of disorder, or of death; for death is only consummation of disorder. You have to fight these two fiends daily. So far as you don't fight against the fiend of iniquity, you work for him. You 'work iniquity,' and the judgment upon you, for all your 'Lord, Lord's,' will be 'Depart from me, ye that work iniquity.' And so far as you do not resist the fiend of disorder, you work disorder, and you yourself do the work of Death, which is sin, and has for its wages, Death himself.

Observe then, all wise work is mainly threefold in character. It is honest, useful, and cheerful.

1. It is HONEST. I hardly know anything more strange than that you recognize honesty in play, and you do not in work. In your lightest games, you have always some one to see what you call 'fair-play.' In boxing, you must hit fair; in racing, start fair. Your English watchword is fair-play, your English hatred, foul-play. Did it ever strike you that you wanted another watchword also, fair-work, and another hatred also, foul-work? Your prize-fighter has some honor in him yet; and so have the men in the ring round him: they will judge him to lose the match, by foul hitting. But your prize-merchant gains his match by foul selling, and no one cries out against that. You drive a gambler out of the gambling-room who loads dice, but you leave a tradesman in flourishing business, who loads scales! For observe, all dishonest dealing is loading scales. What does it matter whether I get short weight, adulterate substance, or dishonest fabric? The fault in the fabric is incomparably the worst of the two. Give me short measure of food, and I only lose by you; but give me adulterate food, and I die by you. Here, then, is your chief duty, you workmen and tradesmen—to be true to yourselves, and to us

who would help you. We can do nothing for you, nor you for yourselves, without honesty. Get that, you get all ; without that, your suffrages, your reforms, your free-trade measures, your institutions of science, are all in vain. It is useless to put your heads together, if you can't put your hearts together. Shoulder to shoulder, right hand to right hand, among yourselves, and no wrong hand to anybody else, and you'll win the world yet.

II. Then, secondly, wise work is USEFUL. No man minds, or ought to mind, its being hard, if only it comes to something ; but when it is hard, and comes to nothing ; when all our bees' business turns to spiders' ; and for honey-comb we have only resultant cobweb, blown away by the next breeze—that is the cruel thing for the worker. Yet do we ever ask ourselves, personally, or even nationally, whether our work is coming to anything or not ? We don't care to keep what has been nobly done ; still less do we care to do nobly what others would keep ; and, least of all, to make the work itself useful instead of deadly to the doer, so as to use his life indeed, but not to waste it. Of all wastes, the greatest waste that you can commit is the waste of labor. If you went down in the morning into your dairy, and you found that your youngest child had got down before you ; and that he and the cat were at play together, and that he had poured out all the cream on the floor for the cat to lap up, you would scold the child, and be sorry the milk was wasted. But if, instead of wooden bowls with milk in them, there are golden bowls with human life in them, and instead of the cat to play with—the devil to play with ; and you yourself the player ; and instead of leaving that golden bowl to be broken by God at the fountain, you break it in the dust yourself, and pour the human blood out on the ground for the fiend to lick up—that is no waste ! What ! you perhaps think, 'to waste the labor of men is not to kill them.' Is it not ? I should like to know how you could kill them more utterly—kill them with second

deaths? It is the slightest way of killing to stop a man's breath. Nay, the hunger, and the cold, and the little whistling bullets—our love-messengers between nation and nation—have brought pleasant messages from us to many a man before now; orders of sweet release, and leave at last to go where he will be most welcome and most happy. At the worst you do but shorten his life, you do not corrupt his life. But if you put him to base labor, if you bind his thoughts, if you blind his eyes, if you blunt his hopes, if you steal his joys, if you stunt his body, and blast his soul, and at last leave him not so much as to reap the poor fruit of his degradation, but gather that for yourself, and dismiss him to the grave, when you have done with him, having, so far as in you lay, made the walls of that grave everlasting (though, indeed, I fancy the goodly bricks of some of our family vaults will hold closer in the resurrection day than the sod over the laborer's head), this you think is no waste, and no sin!

III. Then, lastly, wise work is CHEERFUL, as a child's work is. And now I want you to take one thought home with you, and let it stay with you.

Everybody in this room has been taught to pray daily, 'Thy kingdom come.' Now, if we hear a man swear in the streets, we think it very wrong, and say he 'takes God's name in vain.' But there's a twenty times worse way of taking His name in vain than that. It is to *ask God for what we don't want*. He doesn't like that sort of prayer. If you don't want a thing, don't ask for it: such asking is the worst mockery of your King you can mock Him with; the soldiers striking Him on the head with the reed was nothing to that. If you do not wish for His kingdom, don't pray for it. But if you do, you must do more than pray for it; you must work for it. And, to work for it, you must know what it is: we have all prayed for it many a day without thinking. Observe, it is a kingdom that is to come to us; we are not to go to it. Also, it is not to be a kingdom of the dead, but of the living. Also, it is not to come all at once, but quietly; nobody knows how.

'The kingdom of God cometh not with observation.' Also, it is not to come outside of us, but in the hearts of us : 'the kingdom of God is within you.' And, being within us, it is not a thing to be seen, but to be felt ; and though it brings all substance of good with it, it does not consist in that : 'the kingdom of God is not meat and drink, but righteousness, peace, and joy in the Holy Ghost : ' joy, that is to say, in the holy, healthful, and helpful Spirit. Now, if we want to work for this kingdom, and to bring it, and enter into it, there's just one condition to be first accepted. You must enter it as children, or not at all ; 'Whosoever will not receive it as a little child shall not enter therein.' And again, 'Suffer little children to come unto me, and forbid them not, for of such is the kingdom of heaven.'

Of such, observe. Not of children themselves, but of such as children. I believe most mothers who read that text think that all heaven is to be full of babies. But that's not so. There will be children there, but the hoary head is the crown. 'Length of days, and long life and peace,' that is the blessing, not to die in babyhood. Children die but for their parents' sins ; God means them to live, but He can't let them always ; then they have their earlier place in heaven : and the little child of David, vainly prayed for ;—the little child of Jeroboam, killed by its mother's step on its own threshold,—they will be there. But weary old David, and weary old Barzillai, having learned children's lessons at last, will be there too : and the one question for us all, young or old, is, have we learned our child's lesson ? it is the *character* of children we want, and must gain at our peril ; let us see, briefly, in what it consists.

The first character of right childhood is that it is Modest. A well-bred child does not think it can teach its parents, or that it knows everything. It may think its father and mother know everything,—perhaps that all grown-up people know everything ; very certainly it is sure that *it* does not. And it is always

asking questions, and wanting to know more. Well, that is the first character of a good and wise man at his work. To know that he knows very little ;—to perceive that there are many above him wiser than he ; and to be always asking questions, wanting to learn, not to teach. No one ever teaches well who wants to teach, or governs well who wants to govern ; it is an old saying (Plato's, but I know not if his, first), and as wise as old.

Then, the second character of right childhood is to be Faithful. Perceiving that its father knows best what is good for it, and having found always, when it has tried its own way against his, that he was right and it was wrong, a noble child trusts him at last wholly, gives him its hand, and will walk blindfold with him, if he bids it. And that is the true character of all good men also, as obedient workers, or soldiers under captains. They must trust their captains ;—they are bound for their lives to choose none but those whom they *can* trust. Then, they are not always to be thinking that what seems strange to them, or wrong in what they are desired to do, *is* strange or wrong. They know their captain : where he leads they must follow, what he bids, they must do ; and without this trust and faith, without this captainship and soldiership, no great deed, no great salvation, is possible to man. Among all the nations it is only when this faith is attained by them that they become great : the Jew, the Greek, and the Mahometan, agree at least in testifying to this. It was a deed of this absolute trust which made Abraham the father of the faithful ; it was the declaration of the power of God as captain over all men, and the acceptance of a leader appointed by Him as commander of the faithful, which laid the foundation of whatever national power yet exists in the East ; and the deed of the Greeks, which has become the type of unselfish and noble soldiership to all lands, and to all times, was commemorated, on the tomb of those who gave their lives to do it, in the most pathetic, so far as I know,

or can feel, of all human utterances : ' Oh, stranger, go and tell our people that we are lying here, having *obeyed* their words.'

Then the third character of right childhood is to be Loving and Generous. Give a little love to a child, and you get a great deal back. It loves everything near it, when it is a right kind of child—would hurt nothing, would give the best it has away, always, if you need it—does not lay plans for getting everything in the house for itself, and delights in helping people ; you cannot please it so much as by giving it a chance of being useful, in ever so little a way.

And because of all these characters, lastly, it is Cheerful. Putting its trust in its father, it is careful for nothing—being full of love to every creature, it is happy always, whether in its play or in its duty. Well, that's the great worker's character also. Taking no thought for the morrow ; taking thought only for the duty of the day ; trusting somebody else to take care of to-morrow ; knowing indeed what labor is, but not what sorrow is ; and always ready for play,—beautiful play,—for lovely human play is like the play of the Sun. There's a worker for you. He, steady to his time, is set as a strong man to run his course, but also, he *rejoiceth* as a strong man to run his course. See how he plays in the morning, with the mists below, and the clouds above, with a ray here and a flash there, and a shower of jewels everywhere ; —that's the Sun's play ; and great human play is like his—all various—all full of light and life, and tender, as the dew of the morning.

So then, you have the child's character in these four things—Humility, Faith, Charity, and Cheerfulness. That's what you have got to be converted to. ' Except ye be converted and become as little children '—You hear much of conversion now-a-days ; but people always seem to think you have got to be made wretched by conversion,—to be converted to long faces. No, friends, you have got to be converted to short ones ; you have to repent into childhood, to re-

pent into delight, and delightsomeness. You can't go into a conventicle but you'll hear plenty of talk of backsliding. Backsliding, indeed! I can tell you, on the ways most of us go, the faster we slide back the better. Slide back into the cradle, if going on is into the grave—back, I tell you; back—out of your long faces, and into your long clothes. It is among children only, and as children only, that you will find medicine for your healing and true wisdom for your teaching. There is poison in the counsels of the *men* of this world; the words they speak are all bitterness, 'the poison of asps is under their lips,' but, 'the sucking child shall play by the hole of the asp.' There is death in the looks of men. 'Their eyes are privily set against the poor;' they are as the uncharming serpent, the cockatrice, which slew by seeing. But 'the weaned child shall lay his hand on the cockatrice den.' There is death in the steps of men: 'their feet are swift to shed blood; they have compassed us in our steps like the lion that is greedy of his prey, and the young lion lurking in secret places,' but, in that kingdom, the wolf shall lie down with the lamb, and the fatling with the lion, and 'a little child shall lead them.' There is death in the thoughts of men; the world is one wide riddle to them, darker and darker as it draws to a close; but the secret of it is known to the child and the Lord of heaven and earth is most to be thanked in that 'He has hidden these things from the wise and prudent, and has revealed them unto babes.' Yes, and there is death—infinity of death in the principalities and powers of men. As far as the east is from the west, so far our sins are—*not* set from us, but multiplied around us: the Sun himself, think you he *now* 'rejoices' to run his course, when he plunges westward to the horizon, so widely red, not with clouds, but blood? And it will be red more widely yet. Whatever drought of the early and latter rain may be, there will be none of that red rain. You fortify yourselves against it in vain; the enemy and avenger will be upon you also, unless you learn that it

is not out of the mouths of the knitted gun, or the smoothed rifle, but 'out of the mouths of babes and sucklings' that the strength is ordained, which shall 'still the enemy and avenger.'

LECTURE II.

TRAFFIC.

(Delivered in the Town Hall, Bradford.)

My good Yorkshire friends, you have asked me down here among your hills that I might talk to you about this Exchange you are going to build : but earnestly and seriously asking you to pardon me, I am going to do nothing of the kind. I cannot talk, or at least can say very little, about this same Exchange. I must talk of quite other things, though not unwillingly ;—I could not deserve your pardon, if when you invited me to speak on one subject, I wilfully spoke on another. But I cannot speak, to purpose, of anything about which I do not care ; and most simply and sorrowfully I have to tell you, in the outset, that I do *not* care about this Exchange of yours.

If, however, when you sent me your invitation, I had answered, ‘I won’t come, I don’t care about the Exchange of Bradford,’ you would have been justly offended with me, not knowing the season of so blunt a carelessness. So I have come down, hoping that you will patiently let me tell you why, on this, and many other such occasions, I now remain silent, when formerly I should have caught at the opportunity of speaking to a gracious audience.

In a word, then, I do not care about this Exchange, —because *you* don’t ; and because you know perfectly well I cannot make you. Look at the essential circumstances of the case, which you, as business men, know perfectly well, though perhaps you think I forget them.

You are going to spend 30,000*l.*, which to you, collectively, is nothing; the buying a new coat is, as to the cost of it, a much more important matter of consideration to me than building a new Exchange is to you. But you think you may as well have the right thing for your money. You know there are a great many odd styles of architecture about; you don't want to do anything ridiculous; you hear of me, among others, as a respectable architectural man-milliner: and you send for me, that I may tell you the leading fashion; and what is, in our shops, for the moment, the newest and sweetest thing in pinnacles.

Now, pardon me for telling you frankly, you cannot have good architecture merely by asking people's advice on occasion. All good architecture is the expression of national life and character; and it is produced by a prevalent and eager national taste, or desire for beauty. And I want you to think a little of the deep significance of this word 'taste;' for no statement of mine has been more earnestly or oftener controverted than that good taste is essentially a moral quality. 'No,' say many of my antagonists, 'taste is one thing, morality is another. Tell us what is pretty; we shall be glad to know that; but preach no sermons to us.'

Permit me, therefore, to fortify this old dogma of mine somewhat. Taste is not only a part and an index of morality—it is the *ONLY* morality. The first, and last, and closest trial question to any living creature is, 'What do you like?' Tell me what you like, and I'll tell you what you are. Go out into the street, and ask the first man or woman you meet, what their 'taste' is, and if they answer candidly, you know them, body and soul. 'You, my friend in the rags, with the unsteady gait, what do *you* like?' 'A pipe and a quartern of gin,' I know you. 'You, my good woman, with the quick step and tidy bonnet, what do you like?' 'A swept hearth and a clean tea-table, and my husband opposite me, and a baby at my breast.' Good, I know you also. 'You, little girl with the golden hair and soft eyes, what do you like?' 'My canary, and a

run among the wood hyacinths.' 'You, little boy with the dirty hands and the low forehead, what do you like?' 'A shy at the sparrows, and a game at pitch-farthing.' Good; we know them all now. What more need we ask?

'Nay,' perhaps you answer: 'we need rather to ask what these people and children do, than what they like. If they *do* right, it is no matter that they like what is wrong; and if they *do* wrong, it is no matter that they like what is right. Doing is the great thing; and it does not matter that the man likes drinking, so that he does not drink; nor that the little girl likes to be kind to her canary, if she will not learn her lessons; nor that the little boy likes throwing stones at the sparrows, if he goes to the Sunday school.' Indeed, for a short time, and in a provisional sense, this is true. For if, resolutely, people do what is right, in time they come to like doing it. But they only are in a right moral state when they *have* come to like doing it; and as long as they don't like it, they are still in a vicious state. The man is not in health of body who is always thirsting for the bottle in the cupboard, though he bravely bears his thirst; but the man who heartily enjoys water in the morning and wine in the evening, each in its proper quantity and time. And the entire object of true education is to make people not merely *do* the right things, but *enjoy* the right things—not merely industrious, but to love industry—not merely learned, but to love knowledge—not merely pure, but to love purity—not merely just, but to hunger and thirst after justice.

But you may answer or think, 'Is the liking for outside ornaments,—for pictures, for statues, or furniture, or architecture,—a moral quality?' Yes, most surely, if a rightly set liking. Taste for *any* pictures or statues is not a moral quality, but taste for good ones is. Only here again we have to define the word 'good.' I don't mean by 'good,' clever—or learned—or difficult in the doing. Take a picture by Teniers, of sots quarrelling over their dice: it is an entirely clever pict-

ure; so clever that nothing in its kind has ever been done equal to it; but it is also an entirely base and evil picture. It is an expression of delight in the prolonged contemplation of a vile thing, and delight in that is an 'unmannered,' or 'immoral,' quality. It is 'bad taste' in the profoundest sense—it is the taste of the devils. On the other hand, a picture of Titian's, or a Greek statue, or a Greek coin, or a Turner landscape, expresses delight in the perpetual contemplation of a good and perfect thing. That is an entirely moral quality—it is the taste of the angels. And all delight in art, and all love of it, resolve themselves into simple love of that which deserves love. That deserving is the quality which we call 'loveliness'—(we ought to have an opposite word, *hateliness*, to be said of the things which deserve to be hated); and it is not an indifferent nor optional thing whether we love this or that; but it is just the vital function of all our being. What we *like* determines what we *are*, and is the sign of what we are; and to teach taste is inevitably to form character. As I was thinking over this, in walking up Fleet Street the other day, my eye caught the title of a book standing open in a bookseller's window. It was—'On the necessity of the diffusion of taste among all classes.' 'Ah,' I thought to myself, 'my classifying friend, when you have diffused your taste, where will your classes be? The man who likes what you like, belongs to the same class with you, I think. Inevitably so. You may put him to other work if you choose; but, by the condition you have brought him into, he will dislike the other work as much as you would yourself. You get hold of a scavenger, or a costermonger, who enjoyed the Newgate Calendar for literature, and "Pop goes the Weasel" for music. You think you can make him like Dante Beethoven? I wish you joy of your lessons; but if you do, you have made a gentleman of him:—he won't like to go back to his costermongering.'

And as completely and unexceptionally is this so, that, if I had time to-night, I could show you that a nation

cannot be affected by any vice, or weakness, without expressing it, legibly, and forever, either in bad art, or by want of art; and that there is no national virtue, small or great, which is not manifestly expressed in all the art which circumstances enable the people possessing that virtue to produce. Take, for instance, your great English virtue of enduring and patient courage. You have at present in England only one art of any consequence—that is, iron-working. You know thoroughly well how to cast and hammer iron. Now, do you think in those masses of lava which you build volcanic cones to melt, and which you forge at the mouths of the Infernos you have created; do you think, on those iron plates, your courage and endurance are not written forever—not merely with an iron pen, but on iron parchment? And take also your great English vice—European vice—vice of all the world—vice of all other worlds that roll or shine in heaven, bearing with them yet the atmosphere of hell—the vice of jealousy, which brings competition into commerce, treachery into your councils, and dishonor into your wars—that vice which has rendered for you, and for your next neighboring nation, the daily occupations of existence no longer possible, but with the mail upon your breasts and the sword loose in its sheath; so that, at last, you have realized for all the multitudes of the two great peoples who lead the so-called civilization of the earth,—you have realized for them all, I say, in person and in policy, what was once true only of the rough Border riders of your Cheviot hills—

They carved at the meal
With gloves of steel,
And they drank the red wine through the helmet barr'd;—

do you think that this national shame and dastardliness of heart are not written as legibly on every rivet of your iron armor as the strength of the right hands that forged it? Friends, I know not whether this thing be the more ludicrous or the more melancholy. It is quite unspeakably both. Suppose, instead of

being now sent for by you, I had been sent for by some private gentleman, living in a suburban house, with his garden separated only by a fruit-wall from his next door neighbor's; and he had called me to consult with him on the furnishing of his drawing-room. I begin looking about me, and find the walls rather bare; I think such and such a paper might be desirable—perhaps a little fresco here and there on the ceiling—a damask curtain or so at the windows. 'Ah,' says my employer, 'damask curtains, indeed! That's all very fine, but you know I can't afford that kind of thing just now!' 'Yet the world credits you with a splendid income!' 'Ah, yes,' says my friend, 'but do you know, at present, I am obliged to spend it nearly all in steel-traps?' 'Steel-traps! for whom?' 'Why, for that fellow on the other side the wall, you know: we're very good friends, capital friends; but we are obliged to keep our traps set on both sides of the wall; we could not possibly keep on friendly terms without them, and our spring guns. The worst of it is, we are both clever fellows enough; and there's never a day passes that we don't find out a new trap, or a new gun-barrel, or something; we spend about fifteen millions a year each in our traps, take it all together; and I don't see how we're to do with less.' A highly comic state of life for two private gentlemen! but for two nations, it seems to me, not wholly comic? Bedlam would be comic, perhaps, if there were only one mad-man in it; and your Christmas pantomime is comic, when there is only one clown in it; but when the whole world turns clown; and paints itself red with its own heart's blood instead of vermillion, it is something else than comic, I think.

Mind, I know a great deal of this is play, and willingly allow for that. You don't know what to do with yourselves for a sensation: fox-hunting and cricketing will not carry you through the whole of this unendurably long mortal life; you liked pop-guns when you were schoolboys, and rifles and Armstrongs are only the same things better made: but then the

worst of it is, that what was play to you when boys, was not play to the sparrows; and what is play to you now, is not play to the small birds of State neither: and for the black eagles, you are somewhat shy of taking shots at them, if I mistake not.

I must get back to the matter in hand, however. Believe me, without farther instance, I could show you, in all time, that every nation's vice, or virtue, was written in its art: the soldiership of early Greece; the sensuality of late Italy; the visionary religion of Tuscany; the splendid human energy and beauty of Venice. I have no time to do this to-night (I have done it elsewhere before now); but I proceed to apply the principle to ourselves in a more searching manner.

I notice that among all the new buildings that cover your once wild hills, churches and schools are mixed in due, that is to say, in large proportion, with your mills and mansions; and I notice also that the churches and schools are almost always Gothic, and the mansions and mills are never Gothic. Will you allow me to ask precisely the meaning of this? For, remember, it is peculiarly a modern phenomenon. When Gothic was invented, houses were Gothic as well as churches; and when the Italian style superseded the Gothic, churches were Italian as well as houses. If there is a Gothic spire to the cathedral of Antwerp, there is a Gothic belfry to the Hôtel de Ville at Brussels; if Inigo Jones builds an Italian Whitehall, Sir Christopher Wren builds an Italian St. Paul's. But now you live under one school of architecture, and worship under another. What do you mean by doing this? Am I to understand that you are thinking of changing your architecture back to Gothic; and that you treat your churches experimentally, because it does not matter what mistakes you make in a church? Or am I to understand that you consider Gothic a pre-eminently sacred and beautiful mode of building, which you think, like the fine frankincense, should be mixed for the tabernacle only, and reserved for your religious services? For if this be the feeling, though it may seem at first as if it

were graceful and reverent, you will find that, at the root of the matter, it signifies neither more nor less than that you have separated your religion from your life.

For consider what a wide significance this fact has; and remember that it is not you only, but all the people of England, who are behaving thus just now.

You have all got into the habit of calling the church 'the house of God.' I have seen, over the doors of many churches, the legend actually carved, '*This* is the house of God, and this is the gate of heaven.' Now, note where that legend comes from, and of what place it was first spoken. A boy leaves his father's house to go on a long journey on foot, to visit his uncle; he has to cross a wild hill-desert, just as if one of your own boys had to cross the wolds of Westmoreland, to visit an uncle at Carlisle. The second or third day your boy finds himself somewhere between Hawes and Brough, in the midst of the moors, at sunset. It is stony ground, and boggy; he cannot go one foot farther that night. Down he lies, to sleep, on Wharnside, where best he may, gathering a few of the stones together to put under his head;—so wild the place is, he cannot get anything but stones. And there, lying under the broad night, he has a dream; and he sees a ladder set up on the earth, and the top of it reaches to heaven, and the angels of God are ascending and descending upon it. And when he wakes out of his sleep, he says, 'How dreadful is this place; surely, this is none other than the house of God, and this is the gate of heaven.' This *PLACE*, observe; not this church; not this city; not this stone, even, which he puts up for a memorial—the piece of flint on which his head has lain. But this *place*; this windy slope of Wharnside; this moorland hollow, torrent-bitten, snow-blighted; this *any* place where God lets down the ladder. And how are you to know where that will be? or how are you to determine where it may be, but by being ready for it always? Do you know where the lightning is to fall next? You *do* know that, partly; you can guide the lightning; but you cannot guide the

going forth of the Spirit, which is that lightning when it shines from the east to the west.

But the perpetual and insolent warping of that strong verse to serve a merely ecclesiastical purpose, is only one of the thousand instances in which we sink back into gross Judaism. We call our churches 'temples.' Now, you know, or ought to know, they are *not* temples. They have never had, never can have, anything whatever to do with temples. They are 'synagogues'—'gathering places'—where you gather yourselves together as an assembly; and by not calling them so, you again miss the force of another mighty text—'Thou, when thou prayest, shalt not be as the hypocrites are; for they love to pray standing in the *churches*' [we should translate it], 'that they may be seen of men. But thou, when thou prayest, enter into thy closet, and when thou hast shut thy door, pray to thy Father,'—which is, not in chancel nor in aisle, but 'in secret.'

Now, you feel, as I say this to you—I know you feel—as if I were trying to take away the honor of your churches. Not so; I am trying to prove to you the honor of your houses and your hills; I am trying to show you—not that the Church is not sacred—but that the whole Earth is. I would have you feel, what careless, what constant, what infectious sin there is in all modes of thought, whereby, in calling your churches only 'holy,' you call your hearths and homes profane; and have separated yourselves from the heathen by casting all your household gods to the ground, instead of recognizing, in the place of their many and feeble Lares, the presence of your One and Mighty Lord and Lar.

'But what has all this to do with our Exchange?' you ask me, impatiently. My dear friends, it has just everything to do with it; on these inner and great questions depend all the outer and little ones; and if you have asked me down here to speak to you, because you had before been interested in anything I have written, you must know that all I have yet said about

architecture was to show this. The book I called 'The Seven Lamps' was to show that certain right states of temper and moral feeling were the magic powers by which all good architecture, without exception, had been produced. 'The Stones of Venice' had, from beginning to end, no other aim than to show that the Gothic architecture of Venice had arisen out of, and indicated in all its features, a state of pure national faith, and of domestic virtue; and—that its Renaissance architecture had arisen out of, and in all its features indicated, a state of concealed national infidelity, and of domestic corruption. And now, you ask me what style is best to build in; and how can I answer, knowing the meaning of the two styles, but by another question—do you mean to build as Christians or as Infidels? And still more—do you mean to build as honest Christians or as honest Infidels? as thoroughly and confessedly either one or the other? You don't like to be asked such rude questions. I cannot help it; they are of much more importance than this Exchange business; and if they can be at once answered, the Exchange business settles itself in a moment. But, before I press them farther, I must ask leave to explain one point clearly. In all my past work, my endeavor has been to show that good architecture is essentially religious—the production of a faithful and virtuous, not of an infidel and corrupted people. But in the course of doing this, I have had also to show that good architecture is not *ecclesiastical*. People are so apt to look upon religion as the business of the clergy, not their own, that the moment they hear of anything depending on 'religion,' they think it must also have depended on the priesthood; and I have had to take what place was to be occupied between these two errors, and fight both, often with seeming contradiction. Good architecture is the work of good and believing men; therefore, you say, at least some people say, 'Good architecture must essentially have been the work of the clergy, not of the laity.' No—a thousand times no; good architect-

ure has always been the work of the commonalty, *not* of the clergy. What, you say, those glorious cathedrals—the pride of Europe—did their builders not form Gothic architecture? No; they corrupted Gothic architecture. Gothic was formed in the baron's castle, and the burgher's street. It was formed by the thoughts, and hands, and powers of free citizens and soldier kings. By the monk it was used as an instrument for the aid of his superstition; when that superstition became a beautiful madness, and the best hearts of Europe vainly dreamed and pined in the cloister, and vainly raged and perished in the crusade—through that fury of perverted faith and wasted war, the Gothic rose also to its loveliest, most fantastic, and, finally, most foolish dreams; and, in those dreams, was lost.

I hope, now, that there is no risk of your misunderstanding me when I come to the gist of what I want to say to-night—when I repeat, that every great national architecture has been the result and exponent of a great national religion. You can't have bits of it here, bits there—you must have it everywhere, or nowhere. It is not the monopoly of a clerical company—it is not the exponent of a theological dogma—it is not the hieroglyphic writing of an initiated priesthood; it is the manly language of a people inspired by resolute and common purpose, and rendering resolute and common fidelity to the legible laws of an undoubted God.

Now, there have as yet been three distinct schools of European architecture. I say, European, because Asiatic and African architectures belong so entirely to other races and climates, that there is no question of them here; only, in passing, I will simply assure you that whatever is good or great in Egypt, and Syria, and India, is just good or great for the same reasons as the buildings on our side of the Bosphorus. We Europeans, then, have had three great religions; the Greek, which was the worship of the God of Wisdom and Power; the Mediæval, which was the Worship of

the God of Judgment and Consolation; the Renaissance, which was the worship of the God of Pride and Beauty; these three we have had—they are past,—and now, at last, we English have got a fourth religion, and a God of our own, about which I want to ask you. But I must explain these three old ones first.

I repeat, first, the Greeks essentially worshipped the God of Wisdom; so that whatever contended against their religion,—to the Jews a stumbling block,—was, to the Greeks—*Foolishness*.

The first Greek idea of Deity was that expressed in the word, of which we keep the remnant in our words, '*Di*-urnal' and '*Di*-vine'—the god of *Day*, Jupiter the revealer. Athena is his daughter, but especially daughter of the Intellect, springing armed from the head. We are only with the help of recent investigation beginning to penetrate the depth of meaning couched under the Athenaic symbols: but I may note rapidly, that her ægis the mantle with the serpent fringes, in which she often, in the best statues, is represented as folding up her left hand for better guard, and the Gorgon on her shield, are both representative mainly of the chilling horror and sadness (turning men to stone, as it were), of the outmost and superficial spheres of knowledge—that knowledge which separates, in bitterness, hardness, and sorrow, the heart of the full-grown man from the heart of the child. For out of imperfect knowledge spring terror, dissension, danger, and disdain; but from perfect knowledge, given by the full-revealed Athena, strength and peace, in sign of which she is crowned with the olive spray, and bears the resistless spear.

This, then, was the Greek conception of purest Deity, and every habit of life, and every form of his art developed themselves from the seeking this bright, serene, resistless wisdom; and setting himself, as a man, to do things evermore rightly and strongly;*

* It is an error to suppose that the Greek worship, or seeking, was chiefly of Beauty. It was essentially of Rightness and Strength founded on Forethought; the principal character of Greek art is not Beauty, but design; and the Dorian Apollo-worship and Athen-

not with any ardent affection or ultimate hope; but with a resolute and contingent energy of will, as knowing that for failure there was no consolation, and for sin there was no remission. And the Greek architecture rose unerring, bright, clearly defined, and self-contained.

Next followed in Europe the great Christian faith, which was essentially the religion of Comfort. Its great doctrine is the remission of sins; for which cause it happens, too often, in certain phases of Christianity, that sin and sickness themselves are partly glorified, as if, the more you had to be healed of, the more divine was the healing. The practical result of this doctrine, in art, is a continual contemplation of sin and disease, and of imaginary states of purification from them; thus we have an architecture conceived in a mingled sentiment of melancholy and aspiration, partly severe, partly luxuriant, which will bend itself to every one of our needs, and every one of our fancies, and be strong or weak with us, as we are strong or weak ourselves. It is, of all architecture, the basest, when base people build it—of all, the noblest, when built by the noble.

And now note that both these religions—Greek and Mediæval—perished by falsehood in their own main purpose. The Greek religion of Wisdom perished in a false philosophy—‘Oppositions of science, falsely so called.’ The Mediæval religion of Consolation perished in false comfort; in remission of sins given lyingly. It was the selling of absolution that ended the Mediæval faith; and I can tell you more, it is the selling of absolution which, to the end of time, will mark false Christianity. Pure Christianity gives her remission of sins only by *ending* them; but false Christianity gets her remission of sins by *compounding* for

ian Virgin-worship are both expressions of adoration of divine Wisdom and Purity. Next to these great deities rank, in power over the national mind, Dionysus and Ceres, the givers of human strength and life; then, for heroic example, Hercules. There is no Venus-worship among the Greeks in the great times; and the Muses are essentially teachers of Truth, and of its harmonies.

them. And there are many ways of compounding for them. We English have beautiful little quiet ways of buying absolution, whether in low Church or high, far more cunning than any of Tetzels trading.

Then, thirdly, there followed the religion of Pleasure, in which all Europe gave itself to luxury, ending in death. First, *bals masqués* in every saloon, and then guillotines in every square. And all these three worships issue in vast temple building. Your Greek worshipped Wisdom, and built you the Parthenon—the Virgin's temple. The Mediæval worshipped Consolation, and built you Virgin temples also—but to our Lady of Salvation. Then the Revivalist worshipped beauty, of a sort, and built you Versailles, and the Vatican. Now, lastly, will you tell me what *we* worship, and what *we* build?

You know we are speaking always of the real, active, continual, national worship; that by which men act while they live; not that which they talk of when they die. Now, we have, indeed, a nominal religion, to which we pay tithes of property and sevenths of time; but we have also a practical and earnest religion, to which we devote nine-tenths of our property and sixth-sevenths of our time. And we dispute a great deal about the nominal religion; but we are all unanimous about this practical one, of which I think you will admit that the ruling goddess may be best generally described as the 'Goddess of Getting-on,' or 'Britannia of the Market.' The Athenians had an 'Athena Agoraia,' or Minerva of the Market; but she was a subordinate type of their goddess, while our Britannia Agoraia is the principal type of ours. And all your great architectural works, are, of course, built to her. It is long since you built a great cathedral; and how you would laugh at me, if I proposed building a cathedral on the top of one of these hills of yours, taking it for an Acropolis! But your railroad mounds, prolonged masses of Acropolis; your railroad stations, vaster than the Parthenon, and innumerable; your chimneys, how much more mighty and costly than

cathedral spires ! your harbor-piers ; your ware-houses ; your exchanges !—all these are built to your great Goddess of 'Getting-on;' and she has formed, and will continue to form, your architecture, as long as you worship her ; and it is quite vain to ask me to tell you how to build to *her* ; you know far better than I.

There might indeed, on some theories, be a conceivably good architecture for Exchanges—that is to say if there were any heroism in the fact or deed of exchange, which might be typically carved on the outside of your building. For, you know, all beautiful architecture must be adorned with sculpture or painting ; and for sculpture or painting, you must have a subject. And hitherto it has been a received opinion among the nations of the world that the only right subjects for either, were *heroisms* of some sort. Even on his pots and his flagons, the Greek put a Hercules slaying lions, or an Apollo slaying serpents, or Bacchus slaying melancholy giants, and earth-born despondencies. On his temples, the Greek put contests of great warriors in founding states, or of gods with evil spirits. On his houses and temples alike, the Christian put carvings of angels conquering devils ; or of hero-martyrs exchanging this world for another ; subject inappropriate, I think, to our manner of exchange here. And the Master of Christians not only left his followers without any orders as to the sculpture of affairs of exchange on the outside of buildings, but gave some strong evidence of his dislike of affairs of exchange within them. And yet there might surely be a heroism in such affairs ; and all commerce become a kind of selling of doves, not impious. The wonder has always been great to me, that heroism has never been supposed to be in anywise consistent with the practice of supplying people with food, or clothes ; but rather with that of quartering oneself upon them for food, and stripping them of their clothes. Spoiling of armor is an heroic deed in all ages ; but the selling of clothes, old or new, has never taken any color of mag-

nanimity. Yet one does not see why feeding the hungry and clothing the naked should ever become base businesses, even when engaged in on a large scale. If one could contrive to attach the notion of conquest to them anyhow? so that, supposing there were anywhere an obstinate race, who refused to be comforted, one might take some pride in giving them compulsory comfort; and as it were, 'occupying a country' with one's gifts, instead of one's armies? If one could only consider it as much a victory to get a barren field sown, as to get an eared field stripped; and contend who should build villages, instead of who should 'carry' them. Are not all forms of heroism conceivable in doing these serviceable deeds? You doubt who is strongest? It might be ascertained by push of spade, as well as push of sword. Who is wisest? There are witty things to be thought of in planning other business than campaigns. Who is bravest? There are always the elements to fight with, stronger than men; and nearly as merciless. The only absolutely and unapproachably heroic element in the soldier's work seems to be—that he is paid little for it—and regularly: while you traffickers, and exchangers, and others occupied in presumably benevolent business, like to be paid much for it—and by chance. I never can make out how it is that a knight-errant does not expect to be paid for his trouble, but a pedler-errant always does;—that people are willing to take hard knocks for nothing, but never to sell ribbons cheap;—that they are ready to go on fervent crusades to recover the tomb of a buried God, never on any travels to fulfil the orders of a living God;—that they will go anywhere barefoot to preach their faith, but must be well bribed to practise it, and are perfectly ready to give the Gospel gratis, but never the loaves and fishes. If you chose to take the matter up on any such soldierly principle, to do your commerce, and your feeding of nations, for fixed salaries; and to be as particular about giving people the best food, and the best cloth, as soldiers are about giving them the best gunpowder,

I could carve something for you on your exchange worth looking at. But I can only at present suggest decorating its frieze with pendant purses; and making its pillars broad at the base, for the sticking of bills. And in the innermost chambers of it there might be a statue of Britannia of the Market, who may have, perhaps advisably, a partridge for her crest, typical at once of her courage in fighting for noble ideas; and of her interest in game; and round its neck the inscription in golden letters, 'Perdix fovit quæ non perit.'* Then, for her spear, she might have a weaver's beam; and on her shield, instead of her Cross, the Milanese boar, semi-fleeced, with the town of Genesaret proper, in the field and the legend 'In the best market,' and her corslet, of leather, folded over her heart in the shape of a purse, with thirty slits in it for a piece of money to go in at, on each day of the month. And I doubt not but that people would come to see your exchange, and its goddess, with applause.

Nevertheless, I want to point out to you certain strange characters in this goddess of yours. She differs from the great Greek and Mediæval deities essentially in two things—first, as to the continuance of her presumed power; secondly, as to the extent of it.

1st, as to the Continuance.

The Greek Goddess of Wisdom gave continual increase of wisdom, as the Christian Spirit of Comfort (or Comforter) continual increase of comfort. There was no question, with these, of any limit or cessation of function. But with your Agora Goddess, that is just the most important question. Getting on—but where to? Gathering together—but how much? Do you mean to gather always—never to spend? If so, I wish you joy of your goddess, for I am just as well off as you, without the trouble of worshipping her at all. But if you do not spend, somebody else will—somebody else must. And it is because of this (among

* Jerem. xvii. 11 (best in Septuagint and Vulgate). 'As the partridge, fostering what she brought not forth, so he that getteth riches, not by right, shall leave them in the midst of his days, and at his end shall be a fool.'

many other such errors) that I have fearlessly declared your so-called science of Political Economy to be no science ; because, namely, it has omitted the study of exactly the most important branch of the business—the study of *spending*. For spend you must, and as much as you make, ultimately. You gather corn :—will you bury England under a heap of grain ; or will you, when you have gathered, finally eat ? You gather gold :—will you make your house-roofs of it, or pave your streets with it ? That is still one way of spending it. But if you keep it, you may get more, I'll give you more ; I'll give you all the gold you want—all you can imagine—if you can tell me what you'll do with it. You shall have thousands of gold pieces ;—thousands of thousands—millions—mountains, of gold : where will you keep them ? Will you put an Olympus of silver upon a golden Pelion—make Ossa like a wart ? Do you think the rain and dew would then come down to you, in the streams from such mountains, more blessedly than they will down the mountains which God has made for you, of moss and whinstone ? But it is not gold that you want to gather ! What is it ? greenbacks ? No ; not those neither. What is it then—is it ciphers after a capital I ? Cannot you practise writing ciphers, and write as many as you want ? Write ciphers for an hour every morning, in a big book, and say every evening, I am worth all those noughts more than I was yesterday. Won't that do ? Well, what in the name of Plutus is it you want ? Not gold, not greenbacks, not ciphers after a capital I ? You will have to answer, after all, 'No ; we want, somehow or other, money's *worth*.' Well, what is that ? Let your Goddess of Getting-on discover it, and let her learn to stay therein.

II. But there is another question to be asked respecting this Goddess of Getting-on. The first was of the continuance of her power ; the second is of its extent.

Pallas and the Madonna were supposed to be all the world's Pallas, and all the world's Madonna.

They could teach all men, and they could comfort all men. But, look strictly into the nature of the power of your Goddess of Getting-on; and you will find she is the Goddess—not of everybody's getting on—but only of somebody's getting on. This is a vital, or rather deathful, distinction. Examine it in your own ideal of the state of national life which this Goddess is to evoke and maintain. I asked you what it was, when I was last here; *—you have never told me. Now, shall I try to tell you?

Your ideal of human life then is, I think, that it should be passed in a pleasant undulating world, with iron and coal everywhere underneath it. On each pleasant bank of this world is to be a beautiful mansion, with two wings; and stables, and coach-houses; a moderately sized park; a large garden and hot-houses; and pleasant carriage drives through the shrubberies. In this mansion are to live the favored votaries of the Goddess; the English gentleman, with his gracious wife, and his beautiful family; always able to have the boudoir and the jewels for the wife, and the beautiful ball-dresses for the daughters, and hunters for the sons, and a shooting in the Highlands for himself. At the bottom of the bank, is to be the mill; not less than a quarter of a mile long, with a steam engine at each end, and two in the middle, and a chimney three hundred feet high. In this mill are to be in constant employment from eight hundred to a thousand workers, who never drink, never strike, always go to church on Sunday and always express themselves in respectful language.

Is not that, broadly, and in the main features, the kind of thing you propose to yourselves? It is very pretty indeed seen from above; not at all so pretty, seen from below. For, observe, while to one family this deity is indeed the Goddess of Getting-on, to a thousand families she is the Goddess of *not* Getting-on. 'Nay,' you say, 'they have all their chance.' Yes, so has every one in a lottery, but there must al-

* Two Paths, p. 98.

ways be the same number of blanks. 'Ah! but in a lottery it is not skill and intelligence which take the lead, but blind chance.' What then! do you think the old practice, that 'they should take who have the power, and they should keep who can,' is less iniquitous, when the power has become power of brains instead of fist? and that, though we may not take advantage of a child's or a woman's weakness, we may of a man's foolishness? 'Nay, but finally, work must be done, and some one must be at the top, some one at the bottom.' Granted, my friends. Work must always be; and captains of work must always be; and if you in the least remember the tone of any of my writings, you must know that they are thought unfit for this age, because they are insisting on need of government, and speaking with scorn of liberty. But I beg you to observe that there is a wide difference between being captains or governors of work, and taking the profits of it. It does not follow, because you are general of an army, that you are to take all the treasure, or land, it wins (if it fight for treasure or land); neither, because you are king of a nation, that you are to consume all the profits of the nation's work. Real kings, on the contrary, are known invariably by their doing quite the reverse of this,—by their taking the least possible quantity of the nation's work for themselves. There is no test of real knighthood so infallible as that. Does the crowned creature live simply, bravely, unostentatiously? probably he *is* a King. Does he cover his body with jewels, and his table with delicates? in all probability he is *not* a King. It is possible he may be, as Solomon was; but that is when the nation shares his splendor with him. Solomon made gold, not only to be in his own palace as stones, but to be in Jerusalem as stones. But even so, for the most part, these splendid kingdoms expire in ruin, and only the true kingdoms live, which are of royal laborers; who, both leading rough lives, establish the true dynasties. Conclusively you will find that because you are king of a nation, it does not fol-

low that you are to gather for yourself all the wealth of that nation; neither, because you are king of a small part of the nation, and lord over the means of its maintenance—over field, or mill, or mine, are you to take all the produce of that piece of the foundation of national existence for yourself.

You will tell me I need not preach against these things, for I cannot mend them. No, good friends, I cannot; but you can, and you will; or something else can and will. Do you think these phenomena are to stay always in their present power or aspect? All history shows, on the contrary, that to be the exact thing they never can do. Change *must* come; but it is ours to determine whether change of growth, or change of death. Shall the Parthenon be in ruins on its rock, and Bolton priory in its meadow, but these mills of yours be the consummation of the buildings of the earth, and their wheels be as the wheels of eternity? Think you that 'men may come, and men may go,' but—mills—go on forever? Not so; out of these, better or worse shall come; and it is for you to choose which.

I know that none of this wrong is done with deliberate purpose. I know, on the contrary, that you wish your workmen well; that you do much for them, and that you desire to do more for them, if you saw your way to it safely. I know that many of you have done, and are every day doing, whatever you feel to be in your power; and that even all this wrong and misery are brought about by a warped sense of duty, each of you striving to do his best, without noticing that this best is essentially and centrally the best for himself, not for others. And all this has come of the spreading of that thrice accursed, thrice impious doctrine of the modern economist, that 'To do the best for yourself, is finally to do the best for others.' Friends, our great Master said not so; and most absolutely we shall find this world is not made so. Indeed, to do the best for others, is finally to do the best for ourselves; but it will not do to have our eyes fixed on

that issue. The Pagans had got beyond that. Hear what a Pagan says of this matter; hear what were, perhaps, the last written words of Plato,—if not the last actually written (for this we cannot know), yet assuredly in fact and power his parting words—in which, endeavoring to give full crowning and harmonious close to all his thoughts, and to speak the sum of them by the imagined sentence of the Great Spirit, his strength and his heart fail him, and the words cease, broken off forever. It is the close of the dialogue called ‘Critias,’ in which he describes, partly from real tradition, partly in ideal dream, the early state of Athens; and the genesis, and order, and religion, of the fabled isle of Atlantis; in which genesis he conceives the same first perfection and final degeneracy of man, which in our own Scriptural tradition is expressed by saying that the Sons of God intermarried with the daughters of men, for he supposes the earliest race to have been indeed the children of God; and to have corrupted themselves, until ‘their spot was not the spot of his children.’ And this, he says, was the end; that indeed ‘through many generations, so long as the God’s nature in them yet was full, they were submissive to the sacred laws, and carried themselves lovingly to all that had kindred with them in divineness: for their uttermost spirit was faithful and true, and in every wise great; so that, in all meekness of wisdom, they dealt with each other, and took all the chances of life; and despising all things except virtue, they cared little what happened day by day, and *bore lightly the burden* of gold and of possessions; for they saw that, if only their common love and virtue increased, all these things would be increased together with them; but to set their esteem and ardent pursuit upon material possession would be to lose that first, and their virtue and affection together with it. And by such reasoning, and what of the divine nature remained in them, they gained all this greatness of which we have already told; but when the God’s part of them faded and became extinct, being mixed

again and again, and effaced by the prevalent mortality; and the human nature at last exceeded, they then became unable to endure the courses of fortune; and fell into shapelessness of life, and baseness in the sight of him who could see, having lost everything that was fairest of their honor; while to the blind hearts which could not discern the true life, tending to happiness, it seemed that they were then chiefly noble and happy, being filled with all iniquity of inordinate possession and power. Whereupon, the God of Gods, whose Kingdom is in laws, beholding a once just nation thus cast into misery, and desiring to lay such punishment upon them as might make them repent into restraining, gathered together all the gods into his dwelling-place, which from heaven's centre overlooks whatever has part in creation; and having assembled them, he said '—

The rest is silence. So ended are the last words of the chief wisdom of the heathen, spoken of this idol of riches; this idol of yours; this golden image high by measureless cubits, set up where your green fields of England are furnace-burnt into the likeness of the plain of Dura: this idol, forbidden to us, first of all idols, by your own Master and faith; forbidden to us also by every human lip that has ever, in any age or people, been accounted of as able to speak according to the purposes of God. Continue to make that forbidden deity your principal one, and soon no more art, no more science, no more pleasure will be possible. Catastrophe will come; or worse than catastrophe, slow mouldering and withering into Hades. But if you can fix some conception of a true human state of life to be striven for—life for all men as for yourselves—if you can determine some honest and simple order of existence; following those trodden ways of wisdom, which are pleasantness, and seeking her quiet and withdrawn paths, which are peace;—then, and so sanctifying wealth into 'commonwealth,' all your art, your literature, your daily labors, your domestic affection, and citizen's duty, will join and increase into one magnifi-

cent harmony. You will know then how to build, well enough ; you will build with stone well, but with flesh better ; temples not made with hands, but riveted of hearts ; and that kind of marble, crimson-veined, is indeed eternal.

LECTURE III.

WAR.

(Delivered at the Royal Military Academy, Woolwich.)

YOUNG SOLDIERS, I do not doubt but that many of you came unwillingly to-night, and many in merely contemptuous curiosity, to hear what a writer on painting could possibly say, or would venture to say, respecting your great art of war. You may well think within yourselves, that a painter might, perhaps without immodesty, lecture younger painters upon painting, but not young lawyers upon law, nor young physicians upon medicine—least of all, it may seem to you, young warriors upon war. And, indeed, when I was asked to address you, I declined at first, and declined long; for I felt that you would not be interested in my special business, and would certainly think there was small need for me to come to teach you yours. Nay, I knew that there ought to be *no* such need, for the great veteran soldiers of England are now men every way so thoughtful, so noble, and so good, that no other teaching than their knightly example, and their few words of grave and tried counsel should be either necessary for you, or even, without assurance of due modesty in the offerer, endured by you.

But being asked, not once nor twice, I have not ventured persistently to refuse; and I will try, in very few words, to lay before you some reason why you should accept my excuse and hear me patiently. You may imagine that your work is wholly foreign to, and separate from mine. So far from that, all the pure and noble

arts of peace are founded on war ; no great art ever yet rose on earth, but among a nation of soldiers. There is no art among a shepherd people, if it remains at peace. There is no art among an agricultural people, if it remains at peace. Commerce is barely consistent with fine art ; but cannot produce it. Manufacture not only is unable to produce it, but invariably destroys whatever seeds of it exist. There is no great art possible to a nation but that which is based on battle.

Now, though I hope you love fighting for its own sake, you must, I imagine, be surprised at my assertion that there is any such good fruit of fighting. You supposed, probably, that your office was to defend the works of peace, but certainly not to found them : nay, the common course of war, you may have thought, was only to destroy them. And truly, I who tell you this of the use of war, should have been the last of men to tell you so, had I trusted my own experience only. Hear why : I have given a considerable part of my life to the investigation of Venetian painting ; and the result of that inquiry was my fixing upon one man as the greatest of all Venetians, and therefore, as I believed, of all painters whatsoever. I formed this faith, (whether right or wrong matters at present nothing,) in the supremacy of the painter Tintoret, under a roof covered with his pictures ; and of those pictures, three of the noblest were then in the form of ragged canvas, mixed up with the laths of the roof, rent through by three Austrian shells. Now it is not every lecturer who *could* tell you that he had seen three of his favorite pictures torn to rags by bombshells. And after such a sight, it is not every lecturer who *would* tell you that, nevertheless, war was the foundation of all great art.

Yet the conclusion is inevitable, from any careful comparison of the states of great historic races at different periods. Merely to show you what I mean, I will sketch for you, very briefly, the broad steps of the advance of the best art of the world. The first dawn

of it is in Egypt; and the power of it is founded on the perpetual contemplation of death, and of future judgment, by the mind of a nation of which the ruling caste were priests, and the second, soldiers. The greatest works produced by them are sculptures of their kings going out to battle, or receiving the homage of conquered armies. And you must remember also, as one of the great keys to the splendor of the Egyptian nation, that the priests were not occupied in theology only. Their theology was the basis of practical government and law; so that they were not so much priests as religious judges: the office of Samuel, among the Jews, being as nearly as possible correspondent to theirs.

All the rudiments of art then, and much more than the rudiments of all science, are laid first by this great warrior-nation, which held in contempt all mechanical trades, and in absolute hatred the peaceful life of shepherds. From Egypt art passes directly into Greece; where all poetry, and all painting, are nothing else than the description, praise, or dramatic representation of war, or of the exercises which prepare for it, in their connection with offices of religion. All Greek institutions had first respect to war; and their conception of it, as one necessary office of all human and divine life, is expressed simply by the images of their guiding gods. Apollo is the god of all wisdom of the intellect; he bears the arrow and the bow, before he bears the lyre. Again, Athena is the goddess of all wisdom in conduct. It is by the helmet and the shield, oftener than by the shuttle, that she is distinguished from other deities.

There were, however, two great differences in principle between the Greek and the Egyptian theories of policy. In Greece there was no soldier caste; every citizen was necessarily a soldier. And, again, while the Greeks rightly despised mechanical arts as much as the Egyptians, they did not make the fatal mistake of despising agricultural and pastoral life; but perfectly honored both. These two conditions of truer thought raise them quite into the highest rank of wise

manhood that has yet been reached ; for all our great arts, and nearly all our great thoughts, have been borrowed or derived from them. Take away from us what they have given ; and I hardly can imagine how low the modern European would stand.

Now, you are to remember, in passing to the next phase of history, that though you *must* have war to produce art—you must also have much more than war ; namely, an art-instinct or genius in the people ; and that, though all the talent for painting in the world won't make painters of you, unless you have a gift for fighting, and none for painting. Now, in the next great dynasty of soldiers, the art-instinct is wholly wanting. I have not yet investigated the Roman character enough to tell you the causes of this ; but I believe, paradoxical as it may seem to you, that, however truly the Roman might say of himself that he was born of Mars, and suckled by the wolf, he was nevertheless, at heart, more of a farmer than a soldier. The exercises of war were with him practical, not poetical ; his poetry was in domestic life only, and the object of battle, 'paci imponere morem.' And the arts are extinguished in his hands, and do not rise again, until, with Gothic chivalry, there comes back into the mind of Europe a passionate delight in war itself, for the sake of war. And then, with the romantic knighthood which can imagine no other noble employment,—under the fighting kings of France, England, and Spain ; and under the fighting dukeships and citizenships of Italy, art is born again, and rises to her height in the great valleys of Lombardy and Tuscany, through which there flows not a single stream, from all their Alps or Apennines, that did not once run dark red from battle : and it reaches its culminating glory in the city which gave to history the most intense type of soldiership yet seen among men ;—the city whose armies were led in their assault by their king, led through it to victory by their king, and so led, though that king of theirs was blind, and in the extremity of his age.

And from this time forward, as peace is established

or extended in Europe, the arts decline. They reach an unparalleled pitch of costliness, but lose their life, enlist themselves at last on the side of luxury and various corruption, and, among wholly tranquil nations, wither utterly away; remaining only in partial practice among races who, like the French and us, have still the minds, though we cannot all live the lives, of soldiers.

‘It may be so,’ I can suppose that a philanthropist might exclaim. ‘Perish then the arts, if they can flourish only at such a cost. What worth is there in toys of canvas and stone, if compared to the joy and peace of artless domestic life?’ And the answer is—truly, in themselves, none. But as expressions of the highest state of the human spirit, their worth is infinite. As results they may be worthless, but, as signs, they are above price. For it is an assured truth that, whenever the faculties of men are at their fulness, they *must* express themselves by art; and to say that a state is without such expression, is to say that it is sunk from its proper level of manly nature. So that, when I tell you that war is the foundation of all the arts, I mean also that it is the foundation of all the high virtues and faculties of men.

It was very strange to me to discover this; and very dreadful—but I saw it to be quite an undeniable fact. The common notion that peace and the virtues of civil life flourished together, I found to be wholly untenable. Peace and the *vices* of civil life only flourish together. We talk of peace and learning, and of peace and plenty, and of peace and civilization; but I found that those were not the words which the Muse of History coupled together: that on her lips, the words were—peace and sensuality, peace and selfishness, peace and corruption, peace and death. I found, in brief, that all great nations learned their truth of word, and strength of thought, in war; that they were nourished in war, and wasted by peace; taught by war, and deceived by peace; trained by war, and betrayed by peace;—in a word, that they were born in war, and expired in peace.

Yet now note carefully, in the second place, it is not *all* war of which this can be said—nor all dragon's teeth, which, sown, will start up into men. It is not the ravage of a barbarian wolf-flock, as under Genseric or Suvarrow ; nor the habitual restlessness and rapine of mountaineers, as on the old borders of Scotland ; nor the occasional struggle of a strong peaceful nation for its life, as in the wars of the Swiss with Austria ; nor the contest of merely ambitious nations for extent of power, as in the wars of France under Napoleon, or the just terminated war in America. None of these forms of war build anything but tombs. But the creative or foundational war is that in which the natural restlessness and love of contest among men are disciplined, by consent, into modes of beautiful—though it may be fatal—play : in which the natural ambition and love of power of men are disciplined into the aggressive conquest of surrounding evil : and in which the natural instincts of self-defence are sanctified by the nobleness of the institutions, and purity of the households, which they are appointed to defend. To such war as this all men are born ; in such war as this any man may happily die ; and forth from such war as this have arisen throughout the extent of past ages, all the highest sanctities and virtues of humanity.

I shall therefore divide the war of which I would speak to you into three heads. War for exercise or play ; war for dominion ; and, war for defence.

I. And first, of war for exercise or play. I speak of it primarily in this light, because, through all past history, manly war has been more an exercise than anything else, among the classes who cause, and proclaim it. It is not a game to the conscript, or the pressed sailor ; but neither of these are the causers of it. To the governor who determines that war shall be, and to the youths who voluntarily adopt it as their profession, it has always been a grand pastime ; and chiefly pursued because they had nothing else to do. And this is true without any exception. No king whose mind was fully occupied with the development

of the inner resources of his kingdom, or with any other sufficing subject of thought, ever entered into war but on compulsion. No youth who was earnestly busy with any peaceful subject of study, or set on any serviceable course of action, ever voluntarily became a soldier. Occupy him early, and wisely, in agriculture or business, in science or in literature, and he will never think of war otherwise than as a calamity. But leave him idle ; and, the more brave and active and capable he is by nature, the more he will thirst for some appointed field for action ; and find, in the passion and peril of battle, the only satisfying fulfilment of his unoccupied being. And from the earliest incipient civilization until now, the population of the earth divides itself, when you look at it widely, into two races ; one of workers, and the other of players—one tilling the ground, manufacturing, building, and otherwise providing for the necessities of life ;—the other part proudly idle, and continually therefore needing recreation, in which they use the productive and laborious orders partly as their cattle, and partly as their puppets or pieces in the game of death.

Now, remember, whatever virtue or goodliness there may be in this game of war, rightly played, there is none when you thus play it with a multitude of small human pawns.

If you, the gentlemen of this or any other kingdom, choose to make your pastime of contest, do so, and welcome ; but set not up these unhappy peasant-pieces upon the green fielded board. If the wager is to be of death, lay it on your own heads, not theirs. A goodly struggle in the Olympic dust, though it be the dust of the grave, the gods will look upon, and be with you in ; but they will not be with you, if you sit on the sides of the amphitheatre, whose steps are the mountains of earth, whose arena its valleys, to urge your peasant millions into gladiatorial war. You also, you tender and delicate women, for whom, and by whose command, all true battle has been, and must ever be ; you would perhaps shrink now, though you

need not, from the thought of sitting as queens above set lists where the jousting game might be mortal. How much more, then, ought you to shrink from the thought of sitting above a theatre pit in which even a few condemned slaves were slaying each other only for your delight. And do you *not* shrink from the *fact* of sitting above a theatre pit, where,—not condemned slaves,—but the best and bravest of the poor sons of your people, slay each other,—not man to man,—as the coupled gladiators ; but race to race, in duel of generations ? You would tell me, perhaps, that you do not sit to see this ; and it is indeed true, that the women of Europe—those who have no heart-interest of their own at peril in the contest—draw the curtains of their boxes, and muffle the openings ; so that from the pit of the circus of slaughter there may reach them only at intervals a half-heard cry and a murmur as of the wind's sighing, when myriads of souls expire. They shut out the death-cries ; and are happy, and talk wittily among themselves. That is the utter literal fact of what our ladies do in their pleasant lives.

Nay, you might answer, speaking for them—' We do not let these wars come to pass for our play, nor by our carelessness ; we cannot help them. How can any final quarrel of nations be settled otherwise than by war ? ' I cannot now delay, to tell you how political quarrels might be otherwise settled. But grant that they cannot. Grant that no law of reason can be understood by nations ; no law of justice submitted to by them : and that, while questions of a few acres, and of petty cash, can be determined by truth and equity, the questions which are to issue in the perishing or saving of kingdoms can be determined only by the truth of the sword, and the equity of the rifle. Grant this, and even then, judge if it will always be necessary for you to put your quarrel into the hearts of your poor, and sign your treaties with peasants' blood. You would be ashamed to do this in your own private position and power. Why should you not be ashamed also to do it in public place and power ? If

you quarrel with your neighbor, and the quarrel be indeterminable by law, and mortal, you and he do not send your footmen to Battersea fields to fight it out ; nor do you set fire to his tenants' cottages, nor spoil their goods. You fight out your quarrel yourselves, and at your own danger, if at all. And you do not think it materially affects the arbitrement that one of you has a larger household than the other ; so that, if the servants or tenants were brought into the field with their masters, the issue of the contest could not be doubtful ? You either refuse the private duel, or you practise it under laws of honor, not of physical force ; that so it may be, in a manner, justly concluded. Now the just or unjust conclusion of the private feud is of little moment, while the just or unjust conclusion of the public feud is of eternal moment : and yet, in this public quarrel, you take your servants' sons from their arms to fight for it, and your servants' food from their lips to support it ; and the black seals on the parchment of your treaties of peace are the deserted hearth and the fruitless field. There is a ghastly ludicrousness in this, as there is mostly in these wide and universal crimes. Hear the statement of the very fact of it in the most literal words of the greatest of our English thinkers :—

‘ What, speaking in quite unofficial language, is the net-purport and upshot of war ? To my own knowledge, for example, there dwell and toil, in the British village of Dumdrudge, usually some five hundred souls. From these, by certain “ natural enemies ” of the French, there are successively selected, during the French war, say thirty able-bodied men. Dumdrudge, at her own expense, has suckled and nursed them ; she has, not without difficulty and sorrow, fed them up to manhood, and ever trained them to crafts, so that one can weave, another build, another hammer, and the weakest can stand under thirty stone *avoirdupois*. Nevertheless, amid much weeping and swearing, they are selected ; all dressed in red ; and shipped away, at the public charges, some two thousand miles, or say only to the south of Spain ; and fed there till wanted.

‘ And now to that same spot in the south of Spain are thirty similar French artisans, from a French Dumdrudge, in like manner wending ; till at length, after infinite effort, the two parties come into actual juxtaposition ; and Thirty stands fronting Thirty, each with a gun in his hand.

‘ Straightway the word “ Fire ! ” is given, and they blow the

souls out of one another, and in place of sixty brisk useful craftsmen, the world has sixty dead carcases, which it must bury, and anon shed tears for. Had these men any quarrel? Busy as the devil is, not the smallest! They lived far enough apart; were the entirest strangers; nay, in so wide a universe, there was even, unconsciously, by commerce, some mutual helpfulness between them. How then? Simpleton! their governors had fallen out; and instead of shooting one another, had the cunning to make these poor blockheads shoot.' (Sartor Resartus.)

Positively, then, gentlemen, the game of battle must not, and shall not, ultimately be played this way. But should it be played any way? Should it, if not by your servants, be practised by yourselves? I think, yes. Both history and human instinct seem alike to say, yes. All healthy men like fighting, and like the sense of danger; all brave women like to hear of their fighting, and of their facing danger. This is a fixed instinct in the fine race of them; and I cannot help fancying that fair fight is the best play for them; and that a tournament was a better game than a steeplechase. The time may perhaps come in France as well as here, for universal hurdle-races and cricketing: but I do not think universal 'crickets' will bring out the best qualities of the nobles of either country. I use, in such question, the test which I have adopted, of the connection of war with other arts; and I reflect how, as a sculptor, I should feel, if I were asked to design a monument for a dead knight, in Westminster Abbey, with a carving of a bat at one end, and a ball at the other. It may be the remains in me only of savage Gothic prejudice; but I had rather carve it with a shield at one end, and a sword at the other. And this, observe, with no reference whatever to any story of duty done, or cause defended. Assume the knight merely to have ridden out occasionally to fight his neighbor for exercise; assume him even a soldier of fortune, and to have gained his bread, and filled his purse, at the sword's point. Still, I feel as if it were, somehow, grander and worthier in him to have made his bread by sword play than any other play; I had rather he had made it by thrusting than batting;—much more, than by betting. Much rather that he

should ride war horses, than back race horses ; and—I say it sternly and deliberately—much rather would I have him slay his neighbor, than cheat him.

But remember, so far as this may be true, the game of war is only that in which the *full personal power of the human creature* is brought out in management of its weapons. And this for three reasons :—

First, the great justification of this game is that it truly when well played, determines *who is the best man* ;—who is the highest bred, the most self-denying, the most fearless, the coolest of nerve, the swiftest of eye and hand. You cannot test these qualities wholly, unless there is a clear possibility of the struggle's ending in death. It is only in the fronting of that condition that the full trial of the man, soul and body, comes out. You may go to your game of wickets, or of hurdles, or of cards, and any knavery that is in you may stay unchallenged all the while. But if the play may be ended at any moment by a lance-thrust, a man will probably make up his accounts a little before he enters it. Whatever is rotten and evil in him will weaken his hand more in holding a sword hilt, than in balancing a billiard cue ; and on the whole, the habit of living lightly hearted, in daily presence of death, always has had, and must have, a tendency both to the making and testing of honest men. But for the final testing, observe, you must make the issue of battle strictly dependent on fineness of frame, and firmness of hand. You must not make it the question, which of the combatants has the longest gun, or which has got behind the biggest tree, or which has the wind in his face, or which has gunpowder made by best chemists, or iron smelted with the best coal, or the angriest mob at his back. Decide your battle, whether of nations, or individuals, on *those* terms ;—and you have only multiplied confusion, and added slaughter to iniquity. But decide your battle by pure trial which has the strongest arm, and steadiest heart,—and you have gone far to decide a great many matters besides, and to decide them rightly.

And the other reasons for this mode of decision of cause, are the diminution both of the material destructiveness, or cost, and of the physical distress of war. For you must not think that in speaking to you in this (as you may imagine), fantastic praise of battle, I have overlooked the conditions weighing against me. I pray all of you, who have not read, to read with the most earnest attention, Mr. Helps's two essays on War and Government, in the first volume of the last series of 'Friends in Council.' Everything that can be urged against war is there simply, exhaustively, and most graphically stated. And all, there urged, is true. But the two great counts of evil alleged against war by that most thoughtful writer, hold only against modern war. If you have to take away masses of men from all industrial employment,—to feed them by the labor of others,—to move them and provide them with destructive machines, varied daily in national rivalry of inventive cost; if you have to ravage the country which you attack,—to destroy for a score of future years, its roads, its woods, its cities, and its harbors;—and if, finally, having brought masses of men, counted by hundreds of thousands, face to face, you tear those masses to pieces with jagged shot, and leave the fragments of living creatures, countless beyond all help of surgery, to starve and parch, through days of torture, down into clots of clay—what book of accounts shall record the cost of your work;—What book of judgment sentence the guilt of it?

That, I say, is *modern* war,—scientific war,—chemical and mechanic war, worse even than the savage's poisoned arrow. And yet you will tell me, perhaps, that any other war than this is impossible now. It may be so; the progress of science cannot, perhaps, be otherwise registered than by new facilities of destruction; and the brotherly love of our enlarging Christianity be only proved by multiplication of murder. Yet hear, for a moment, what war was, in Pagan and ignorant days;—what war might yet be, if we could extinguish our science in darkness, and join the heathen's

practice to the Christian's theory. I read you this from a book which probably most of you know well, and all ought to know—Muller's 'Dorians';—but I have put the points I wish you to remember in closer connection than in his text.

'The chief characteristic of the warriors of Sparta was great composure and subdued strength; the violence (*λῦσσα*) of Aristodemus and Isadas being considered as deserving rather of blame than praise; and these qualities in general distinguished the Greeks from the northern Barbarians, whose boldness always consisted in noise and tumult. For the same reason the Spartans *sacrificed to the Muses* before an action; these goddesses being expected to produce regularity and order in battle; as they *sacrificed on the same occasion in Crete to the god of love*, as the confirmer of mutual esteem and shame. Every man put on a crown, when the band of flute-players gave the signal for attack; all the shields of the line glittered with their high polish, and mingled their splendor with the dark red of the purple mantles, which were meant both to adorn the combatant, and to conceal the blood of the wounded; to fall well and decorously being an incentive the more to the most heroic valor. The conduct of the Spartans in battle denotes a high and noble disposition, which rejected all the extremes of brutal rage. The pursuit of the enemy ceased when the victory was completed; and after the signal for retreat had been given, all hostilities ceased. The spoiling of arms, at least during the battle, was also interdicted; and the consecration of the spoils of slain enemies to the gods, as, in general, all rejoicings for victory, were considered as ill-omened.'

Such was the war of the greatest soldiers who prayed to heathen gods. What Christian war is, preached by Christian ministers, let any one tell you, who saw the sacred crowning, and heard the sacred flute-playing, and was inspired and sanctified by the divinely-measured and musical language, of any North American regiment preparing for its charge. And

what is the relative cost of life in pagan and Christian wars, let this one fact tell you :—the Spartans won the decisive battle of Corinth with the loss of eight men; the victors at indecisive Gettysburg confess to the loss of 30,000.

II. I pass now to our second order of war, the commonest among men, that undertaken in desire of dominion. And let me ask you to think for a few moments what the real meaning of this desire of dominion is—first in the minds of kings—then in that of nations.

Now, mind you this first,—that I speak either about kings, or masses of men, with a fixed conviction that human nature is a noble and beautiful thing; not a foul nor a base thing. All the sin of men I esteem as their disease, not their nature; as a folly which may be prevented, not a necessity which must be accepted. And my wonder, even when things are at their worst, is always at the height which this human nature can attain. Thinking it high, I find it always a higher thing than I thought it; while those who think it low, find it, and will find it, always lower than they thought it: the fact being, that it is infinite, and capable of infinite height and infinite fall; but the nature of it—and here is the faith which I would have you hold with me—the *nature* of it is in the nobleness, not in the catastrophe.

Take the faith in its utmost terms. When the captain of the 'London' shook hands with his mate, saying 'God speed you! I will go down with my passengers,' *that* I believe to be 'human nature.' He does not do it from any religious motive—from any hope of reward, or any fear of punishment; he does it because he is a man. But when a mother, living among the fair fields of merry England, gives her two-year-old child to be suffocated under a mattress in her inner room, while the said mother waits and talks outside; *that* I believe to be *not* human nature. You have the two extremes there, shortly. And you, men, and mothers, who are here face to face with me to-

night, I call upon you to say which of these is human, and which inhuman—which ‘natural’ and which ‘unnatural?’ Choose your creed at once, I beseech you:—choose it with unshaken choice—choose it forever. Will you take, for foundation of act and hope, the faith that this man was such as God made him, or that this woman was such as God made her? Which of them has failed from their nature—from their present, possible, actual nature;—not their nature of long ago, but their nature of now? Which has betrayed it—falsified it? Did the guardian who died in his trust, die inhumanly, and as a fool; and did the murderess of her child fulfil the law of her being? Choose, I say; infinitude of choices hang upon this. You have had false prophets among you—for centuries you have had them—solemnly warned against them though you were; false prophets, who have told you that all men are nothing but fiends or wolves, half beast, half devil. Believe that, and indeed you may sink to that. But refuse that, and have faith that God ‘made you upright,’ though *you* have sought out many inventions; so, you will strive daily to become more what your Maker meant and means you to be, and daily gives you also the power to be—and you will cling more and more to the nobleness and virtue that is in you, saying, ‘My righteousness I hold fast, and will not let it go.’

I have put this to you as a choice, as if you might hold either of these creeds you liked best. But there is in reality no choice for you; the facts being quite easily ascertainable. You have no business to *think* about this matter, or to choose in it. The broad fact is, that a human creature of the highest race, and most perfect as a human thing, is invariably both kind and true; and that as you lower the race, you get cruelty and falseness, as you get deformity; and this so steadily and assuredly, that the two great words which, in their first use, meant only perfection of race, have come, by consequence of the invariable connection of virtue with the fine human nature, both to signify benevolence of disposition. The word generous, and

the word gentle, both, in their origin, meant only 'of pure race,' but because charity and tenderness are inseparable from this purity of blood, the words which once stood only for pride, now stand as synonyms for virtue.

Now, this being the true power of our inherent humanity, and seeing that all the aim of education should be to develop this ;—and seeing also what magnificent self sacrifice the higher classes of men are capable of, for any cause that they understand or feel, —it is wholly inconceivable to me how well-educated princes, who ought to be of all gentlemen the gentlest, and of all nobles the most generous, and whose title of royalty means only their function of doing every man '*right*'—how these, I say, throughout history, should so rarely pronounce themselves on the side of the poor and of justice, but continually maintain themselves and their own interests by oppression of the poor, and by wresting of justice ; and how this should be accepted as so natural, that the word loyalty, which means faithfulness to law, is used as if it were only the duty of a people to be loyal to their king, and not the duty of a king to be infinitely more loyal to his people. How comes it to pass that a captain will die with his passengers, and lean over the gunwale to give the parting boat its course ; but that a king will not usually die with, much less *for*, his passengers,—thinks it rather incumbent on his passengers, in any number, to die for *him* ? Think, I beseech you, of the wonder of this. The sea captain, not captain by divine right, but only by company's appointment ;—not a man of royal descent, but only a plebeian who can steer ;—not with the eyes of the world upon him, but with feeble chance, depending on one poor boat, of his name being ever heard above the wash of the fatal waves ;—not with the cause of a nation resting on his act, but helpless to save so much as a child from among the lost crowd with whom he resolves to be lost,—yet goes down quietly to his grave, rather than break his faith to these few emigrants. But your captain by divine right,—

your captain with the hues of a hundred shields of kings upon his breast,—your captain whose every deed, brave or base, will be illuminated or branded forever before unescapable eyes of men,—your captain whose every thought and act are beneficent, or fatal, from sunrising to setting, blessing as the sunshine, or shadowing as the night,—this captain, as you find him in history, for the most part thinks only how he may tax his passengers, and sit at most ease in his state cabin!

For observe, if there had been indeed in the hearts of the rulers of great multitudes of men any such conception of work for the good of those under their command, as there is in the good and thoughtful masters of any small company of men, not only wars for the sake of mere increase of power could never take place, but our idea of power itself would be entirely altered. Do you suppose that to think and act even for a million of men, to hear their complaint, watch their weaknesses, restrain their vices, make laws for them, lead them, day by day, to purer life, is not enough for one man's work? If any of us were absolute lord only of a district of a hundred miles square, and were resolved on doing our utmost for it; making it feed as large a number of people as possible; making every clod productive, and every rock defensive, and every human being happy; should we not have enough on our hands think you? But if the ruler has any other aim than this; if, careless of the result of his interference, he desire only the authority to interfere; and, regardless of what is ill-done or well-done, cares only that it shall be done at his bidding;—if he would rather do two hundred miles' space of mischief, than one hundred miles' space of good, of course he will try to add to his territory; and to add illimitably. But does he add to his power? Do you call it power in a child, if he is allowed to play with the wheels and bands of some vast engine, pleased with their murmur and whirl, till his unwise touch, wandering where it ought not, scatters beam and wheel into ruin? Yet what machine is so vast, so incognizable, as the working of the mind of a

nation ; what child's touch so wanton, as the word of a selfish king ? And yet, how long have we allowed the historian to speak of the extent of the calamity a man causes, as a just ground for his pride ; and to extol him as the greatest prince, who is only the centre of the widest error. Follow out this thought by yourselves ; and you will find that all power, properly so called, is wise and benevolent. There may be capacity in a drifting fire-ship to destroy a fleet ; there may be venom enough in a dead body to infect a nation :—but which of you, the most ambitious, would desire a drifting kingdom, robed in consuming fire, or a poisoned sceptre whose touch was mortal ? There is no true potency, remember, but that of help ; nor true ambition, but ambition to save.

And then, observe farther, this true power, the power of saving, depends neither on multitude of men, nor on extent of territory. We are continually assuming that nations become strong according to their numbers. They indeed become so, if those numbers can be made of one mind ; but how are you sure you can stay them in one mind, and keep them from having north and south minds ? Grant them unanimous, how know you they will be unanimous in right ? If they are unanimous in wrong, the more they are, essentially the weaker they are. Or, suppose that they can neither be of one mind, nor of two minds, but can only be of *no* mind ? Suppose they are a mere helpless mob : tottering into precipitant catastrophe, like a wagon load of stones when the wheel comes off. Dangerous enough for their neighbors, certainly, but not ' powerful.'

Neither does strength depend on extent of territory, any more than upon number of population. Take up your maps when you go home this evening,—put the cluster of British Isles beside the mass of South America ; and then consider whether any race of men need care how much ground they stand upon. The strength is in the men, and in their unity and virtue, not in their standing room : a little group of wise hearts is better

than a wilderness full of fools ; and only that nation gains true territory, which gains itself.

And now for the brief practical outcome of all this. Remember, no government is ultimately strong, but in proportion to its kindness and justice ; and that a nation does not strengthen, by merely multiplying and diffusing itself. We have not strengthened as yet, by multiplying into America. Nay, even when it has not to encounter the separating conditions of emigration, a nation need not boast itself of multiplying on its own ground, if it multiplies only as flies or locusts do, with the god of flies for its god. It multiplies its strength only by increasing as one great family, in perfect fellowship and brotherhood. And lastly, it does not strengthen itself by seizing dominion over races whom it cannot benefit. Austria is not strengthened, but weakened, by her grasp of Lombardy ; and whatever apparent increase of majesty and of wealth may have accrued to us from the possession of India, whether these prove to us ultimately power or weakness, depends wholly on the degree in which our influence on the native race shall be benevolent and exalting. But, as it is at their own peril that any race extends their dominion in mere desire of power, so it is at their own still greater peril that they refuse to undertake aggressive war, according to their force, whenever they are assured that their authority would be helpful and protective. Nor need you listen to any sophistical objection of the impossibility of knowing when a people's help is needed, or when not. Make your national conscience clean, and your national eyes will soon be clear. No man who is truly ready to take part in a noble quarrel will ever stand long in doubt by whom, or in what cause, his aid is needed. I hold it my duty to make no political statement of any special bearing in this presence ; but I tell you broadly and boldly, that, within these last ten years, we English have, as a knightly nation, lost our spurs : we have fought where we should not have fought, for gain ; and we have been passive where we should not have been passive,

for fear. I tell you that the principle of non-intervention, as now preached among us, is as selfish and cruel as the worst frenzy of conquest, and differs from it only by being not only malignant, but dastardly.

I know, however, that my opinions on this subject differ too widely from those ordinarily held, to be any farther intruded upon you; and therefore I pass lastly to examine the conditions of the third kind of noble war;—war waged simply for the defence of the country in which we were born, and for the maintenance and execution of her laws, by whomsoever threatened or defied. It is to this duty that I suppose most men entering the army consider themselves in reality to be bound, and I want you now to reflect what the laws of mere defence are; and what the soldier's duty, as now understood, or supposed to be understood. You have solemnly devoted yourselves to be English soldiers, for the guardianship of England. I want you to feel what this vow of yours indeed means, or is gradually coming to mean. You take it upon you, first, while you are sentimental schoolboys; you go into your military convent, or barracks, just as a girl goes into her convent while she is a sentimental schoolgirl; neither of you then know what you are about, though both the good soldiers and good nuns make the best of it afterwards. You don't understand perhaps why I call you 'sentimental' schoolboys, when you go into the army? Because, on the whole, it is love of adventure, of excitement, of fine dress and of the pride of fame, all which are sentimental motives, which chiefly make a boy like going into the Guards better than into a counting-house. You fancy, perhaps, that there is a severe sense of duty mixed with these peacocky motives? And in the best of you, there is; but do not think that it is principal. If you cared to do your duty to your country in a prosaic and unsentimental way, depend upon it, there is now truer duty to be done in raising harvests, than in burning them; more in building houses, than in selling them—more in winning money by your own work, wherewith to help men, than

in taxing other people's work, for money wherewith to slay men ; more duty finally, in honest and unselfish living than in honest and unselfish dying, though that seems to your boys' eyes the bravest. So far then, as for your own honor and the honor of your families, you choose brave death in a red coat before brave life in a black one, you are sentimental ; and now see what this passionate vow of yours comes to. For a little while you ride, and you hunt tigers or savages, you shoot, and are shot ; you are happy, and proud, always, and honored and wept if you die ; and you are satisfied with your life, and with the end of it ; believing, on the whole, that good rather than harm of it comes to others, and much pleasure to you. But as the sense of duty enters into your forming minds, the vow takes another aspect. You find that you have put yourselves into the hand of your country as a weapon. You have vowed to strike, when she bids you, and to stay scabbarded when she bids you ; all that you need answer for is, that you fail not in her grasp. And there is goodness in this, and greatness, if you can trust the hand and heart of the Britomart who has braced you to her side, and are assured that when she leaves you sheathed in darkness, there is no need for your flash to the sun. But remember, good and noble as this state may be, it is a state of slavery. There are different kinds of slaves and different masters. Some slaves are scourged to their work by whips, others are scourged to it by restlessness or ambition. It does not matter what the whip is ; it is none the less a whip, because you have cut thongs for it out of your own souls : the fact, so far, of slavery, is in being driven to your work without thought, at another's bidding. Again, some slaves are bought with money, and others with praise. It matters not what the purchase-money is. The distinguishing sign of slavery is to have a price, and be bought for it. Again, it matters not what kind of work you are set on ; some slaves are set to forced diggings, others to forced marches ; some dig furrows, others field-work, and

others graves. Some press the juice of reeds, and some the juice of vines, and some the blood of men. The fact of the captivity is the same whatever work we are set upon, though the fruits of the toil may be different. But, remember, in thus vowing ourselves to be the slaves of any master, it ought to be some subject of forethought with us, what work he is likely to put us upon. You may think that the whole duty of a soldier is to be passive, that it is the country you have left behind who is to command, and you have only to obey. But are you sure that you have left *all* your country behind, or that the part of it you have so left is indeed the best part of it? Suppose—and, remember, it is quite conceivable—that you yourselves are indeed the best part of England; that you, who have become the slaves, ought to have been the masters; and that those who are the masters, ought to have been the slaves! If it is a noble and whole-hearted England, whose bidding you are bound to do, it is well; but if you are yourselves the best of her heart, and the England you have left be but a half-hearted England, how say you of your obedience? You were too proud to become shopkeepers: are you satisfied then to become servants of shopkeepers? You were too proud to become merchants or farmers yourselves: will you have merchants or farmers then for your field marshals? You had no gifts of special grace for Exeter Hall: will you have some gifted person thereat for your commander-in-chief, to judge of your work, and reward? You imagine yourselves to be the army of England: how if you should find yourselves, at last, only the police of her manufacturing towns, and the beadles of her little Bethels?

It is not so yet, nor will be so, I trust, forever; but what I want you to see, and to be assured of, is, that the ideal of soldiership is not mere passive obedience and bravery; that, so far from this, no country is in a healthy state which has separated, even in a small degree, her civil from her military power. All states of the world, however great, fall at once when

they use mercenary armies; and although it is a less instant form of error (because involving no national taint of cowardice), it is yet an error no less ultimately fatal—it is the error especially of modern times, of which we cannot yet know all the calamitous consequences—to take away the best blood and strength of the nation, all the soul-substance of it that is brave, and careless of reward, and scornful of pain, and faithful in trust; and to cast that into steel, and make a mere sword of it; taking away its voice, and will; but to keep the worst part of the nation—whatever is cowardly, avaricious, sensual, and faithless—and to give to this the voice, to this the authority, to this the chief privilege, where there is least capacity, of thought. The fulfilment of your vow for the defence of England will by no means consist in carrying out such a system. You are not true soldiers, if you only mean to stand at a shop door, to protect shop-boys who are cheating inside. A soldier's vow to his country is that he will die for the guardianship of her domestic virtue, of her righteous laws, and of her anyway challenged or endangered honor. A state without virtue, without laws, and without honor, he is bound *not* to defend; nay, bound to redress by his own right hand that which he sees to be base in her. So sternly is this law of Nature and life, that a nation once utterly corrupt can only be redeemed by a military despotism—never by talking, nor by its free effort. And the health of any state consists simply in this: that in it, those who are wisest shall also be strongest; its rulers should be also its soldiers; or, rather, by force of intellect more than of sword, its soldiers its rulers. Whatever the hold which the aristocracy of England has on the heart of England, in that they are still always in front of her battles, this hold will not be enough, unless they are also in front of her thoughts. And truly her thoughts need good captain's reading now, if ever! Do you know what, by this beautiful division of labor (her brave men fighting, and her cowards thinking), she has come at last to think? Here

is a bit of paper in my hand,* a good one too, and an honest one; quite representative of the best common public thought of England at this moment; and it is holding forth in one of its leaders upon our 'social welfare,'—upon our 'vivid life'—upon the 'political supremacy of Great Britain.' And what do you think all these are owing to? To what our English sires have done for us, and taught us, age after age? No: not to that. To our honesty of heart, or coolness of head, or steadiness of will? No: not to these. To our thinkers, or our statesmen, or our poets, or our captains, or our martyrs, or the patient labor of our poor? No: not to these; or at least not to these in any chief measure. Nay, says the journal, 'more than any agency, it is the cheapness and abundance of our coal which have made us what we are.' If it be so, then 'ashes to ashes' be our epitaph! and the sooner the better. I tell you, gentlemen of England, if ever you would have your country breathe the pure breath of heaven again, and receive again a soul into her body, instead of rotting into a carcase, blown up in the belly with carbonic acid (and great *that* way), you must think, and feel, for your England, as well as fight for her: you must teach her that all the true greatness she ever had, or ever can have, she won while her fields were green and her faces ruddy;—that greatness is still possible for Englishmen, even though the ground be not hollow under their feet, nor the sky black over their heads;—and that, when the day comes for their country to lay her

* I do not care to refer to the journal quoted, because the article was unworthy of its general tone, though in order to enable the audience to verify the quoted sentence, I left the number containing it on the table, when I delivered this lecture. But a saying of Baron Liebig's, quoted at the head of a leader on the same subject in the *Daily Telegraph* of January 11, 1866, summarily digests and presents the maximum folly of modern thought in this respect. 'Civilization,' says the Baron, 'is the economy of power, and English power is coal.' Not altogether so, my chemical friend. Civilization is the making of civil persons, which is a kind of distillation of which alembics are incapable, and does not at all imply the turning of a small company of gentlemen into a large company of ironmongers. And English power (what little of it may be left), is by no means coal, but, indeed, of that which, 'when the whole world turns to coal, then chiefly lives.'

honors in the dust, her crest will not rise from it more loftily because it is dust of coal. Gentlemen, I tell you, solemnly, that the day is coming when the soldiers of England must be her tutors; and the captains of her army, captains also of her mind.

And now, remember, you soldier youths, who are thus in all ways the hope of your country; or must be, if she have any hope: remember that your fitness for all future trust depends upon what you are now. No good soldier in his old age was ever careless or indolent in his youth. Many a giddy and thoughtless boy has become a good bishop, or a good lawyer, or a good merchant; but no such an one ever became a good general. I challenge you, in all history, to find a record of a good soldier who was not grave and earnest in his youth. And, in general, I have no patience with people who talk about 'the thoughtlessness of youth' indulgently. I had infinitely rather hear of thoughtless old age, and the indulgence due to *that*. When a man has done his work, and nothing can any way be materially altered in his fate, let him forget his toil, and jest with his fate, if he will; but what excuse can you find for wilfulness of thought, at the very time when every crisis of future fortune hangs on your decisions? A youth thoughtless!—when all the happiness of his home forever depends on the chances, or the passions, of an hour! A youth thoughtless! when the career of all his days depends on the opportunity of a moment! A youth thoughtless! when his every act is a foundation-stone of future conduct, and every imagination a fountain of life or death! Be thoughtless in *any* after years, rather than now—though, indeed, there is only one place where a man may be nobly thoughtless,—his death-bed. No thinking should ever be left to be done there.

Having, then, resolved that you will not waste recklessly, but earnestly use, these early days of yours, remember that all the duties of her children to England may be summed in two words—industry, and

honor. I say first, industry, for it is in ~~arms~~ that soldier youth are especially tempted to fail. Yet, surely, there is no reason, because your life may possibly or probably be shorter than other men's, that you should therefore waste more recklessly the portion of it that is granted you; neither do the duties of your profession, which require you to keep your bodies strong, in any wise involve the keeping of your minds weak. So far from that, the experience, the hardship, and the activity of a soldier's life render his powers of thought more accurate than those of other men; and while, for others, all knowledge is often little more than a means of amusement, there is no form of science which a soldier may not at some time or other find bearing on business of life and death. A young mathematician may be excused for languor in studying curves to be described only with a pencil; but not in tracing those which are to be described with a rocket. Your knowledge of a wholesome herb may involve the feeding of an army; and acquaintance with an obscure point of geography, the success of a campaign. Never waste an instant's time, therefore; the sin of idleness is a thousand-fold greater in you than in other youths; for the fates of those who will one day be under your command hang upon your knowledge; lost moments now will be lost lives then, and every instant which you carelessly take for play, you buy with blood. But there is one way of wasting time, of all the vilest, because it wastes, not time only, but the interest and energy of your minds. Of all the ungentlemanly habits into which you can fall, the vilest is betting, or interesting yourselves in the issues of betting. It unites nearly every condition of folly and vice; you concentrate your interest upon a matter of chance, instead of upon a subject of true knowledge; and you back opinions which you have no grounds for forming, merely because they are your own. All the insolence of egotism is in this; and so far as the love of excitement is complicated with the hope of winning money, you turn yourselves into the basest sort

of tradesmen—those who live by speculation. Were there no other ground for industry, this would be a sufficient one ; that it protected you from the temptation to so scandalous a vice. Work faithfully, and you will put yourselves in possession of a glorious and enlarging happiness ; not such as can be won by the speed of a horse, or marred by the obliquity of a ball.

First, then, by industry you must fulfil your vow to your country ; but all industry and earnestness will be useless unless they are consecrated by your resolution to be in all things men of honor ; not honor in the common sense only, but in the highest. Rest on the force of the two main words in the great verse, *integer vitæ, scelerisque purus*. You have vowed your life to England ; give it her wholly—a bright, stainless, perfect life—a knightly life. Because you have to fight with machines instead of lances, there may be a necessity for more ghastly danger, but there is none for less worthiness of character, than in olden time. You may be true knights yet, though perhaps not *equites* ; you may have to call yourselves ‘cannonry’ instead of ‘chivalry,’ but that is no reason why you should not call yourselves true men. So the first thing you have to see to in becoming soldiers is that you make yourselves wholly true. Courage is a mere matter of course among any ordinarily well-born youths ; but neither truth nor gentleness is matter of course. You must bind them like shields about your necks ; you must write them on the tables of your hearts. Though it be not exacted of you, yet exact it of yourselves, this vow of stainless truth. Your hearts are, if you leave them unstirred, as tombs in which a god lies buried. Vow yourselves crusaders to redeem that sacred sepulchre. And remember, before all things—for no other memory will be so protective of you—that the highest law of this knightly truth is that under which it is vowed to women. Whomsoever else you deceive, whomsoever you injure, whomsoever you leave unaided, you must not deceive, nor injure, nor leave unaided, according to your power, any wom-

an of whatever rank. Believe me, every virtue of the higher phases of manly character begins in this ;—in truth and modesty before the face of all maidens ; in truth and pity, or truth and reverence, to all womanhood.

And now let me turn for a moment to you,—wives and maidens, who are the souls of soldiers ; to you,—mothers, who have devoted your children to the great hierarchy of war. Let me ask you to consider what part you have to take for the aid of those who love you ; for if you fail in your part they cannot fulfil theirs ; such absolute helpmates you are that no man can stand without that help, nor labor in his own strength.

I know your hearts, and that the truth of them never fails when an hour of trial comes which you recognize for such. But you know not when the hour of trial first finds you, nor when it verily finds you. You imagine that you are only called upon to wait and suffer ; to surrender and to mourn. You know that you must not weaken the hearts of your husbands and lovers, even by the one fear of which those hearts are capable,—the fear of parting from you, or of causing you grief. Through weary years of separation ; through fearful expectancies of unknown fate ; through the tenfold bitterness of the sorrow which might so easily have been joy, and the tenfold yearning for glorious life struck down in its prime—through all these agonies you fail not, and never will fail. But your trial is not in these. To be heroic in danger is little ;—you are Englishwomen. To be heroic in change and sway of fortune is little ;—for do you not love ? To be patient through the great chasm and pause of loss is little ; for do you not still love in heaven ? But to be heroic in happiness ; to bear yourselves gravely and righteously in the dazzling of the sunshine of morning ; not to forget the God in whom you trust, when He gives you most ; not to fail those who trust you, when they seem to need you least ; this is the difficult fortitude. It is not in the pining of absence, not in

the peril of battle, not in the wasting of sickness, that your prayer should be most passionate, or your guardianship most tender. Pray, mothers and maidens, for your young soldiers in the bloom of their pride; pray for them, while the only dangers round them are in their own wayward wills; watch you, and pray, when they have to face, not death, but temptation. But it is this fortitude also for which there is the crowning reward. Believe me, the whole course and character of your lovers' lives is in your hands; what you would have them be, they shall be, if you not only desire to have them so, but deserve to have them so; for they are but mirrors in which you will see yourselves imaged. If you are frivolous, they will be so also; if you have no understanding of the scope of their duty, they also will forget it; they will listen,—they *can* listen,—to no other interpretation of it than that uttered from your lips. Bid them be brave;—they will be brave for you; bid them be cowards; and how noble soever they be; they will quail for you. Bid them be wise, and they will be wise for you; mock at their counsel, and they will be fools for you: such and so absolute is your rule over them. You fancy, perhaps, as you have been told so often, that a wife's rule should only be over her husband's house, not over his mind. Ah, no! the true rule is just the reverse of that; a true wife, in her husband's house, is his servant; it is in his heart that she is queen. Whatever of the best he can conceive, it is her part to be; whatever of highest he can hope, it is hers to promise; all that is dark in him she must purge into purity; all that is failing in him she must strengthen into truth: from her, through all the world's clamor, he must win his praise; in her, through all the world's warfare, he must find his peace.

And, now, but one word more. You may wonder, perhaps, that I have spoken all this night in praise of war. Yet, truly, if it might be, I, for one, would fain join in the cadence of hammer-strokes that should beat swords into ploughshares: and that this cannot

be, is not the fault of us men. It is *your* fault. Wholly yours. Only by your command, or by your permission, can any contest take place among us. And the real, final, reason for all the poverty, misery, and rage of battle, throughout Europe, is simply that you women, however good, however religious, however self-sacrificing for those whom you love, are too selfish and too thoughtless to take pains for any creature out of your own immediate circles. You fancy that you are sorry for the pain of others. Now I just tell you this, that if the usual course of war, instead of unroofing peasants' houses, and ravaging peasants' fields, merely broke the china upon your own drawing-room tables, no war in civilized countries would last a week. I tell you more, that at whatever moment you chose to put a period to war, you could do it with less trouble than you take any day to go out to dinner. You know, or at least you might know if you would think, that every battle you hear of has made many widows and orphans. We have, none of us, heart enough truly to mourn with these. But at least we might put on the outer symbols of mourning with them. Let but every Christian lady who has conscience towards God, vow that she will mourn, at least outwardly, for His killed creatures. Your praying is useless, and your church-going mere mockery of God, if you have not plain obedience in you enough for this. Let every lady in the upper classes of civilized Europe simply vow that, while any cruel war proceeds, she will wear *black*;—a mute's black,—with no jewel, no ornament, no excuse for, or evasion into, prettiness.—I tell you again, no war would last a week.

And lastly. You women of England are all now shrieking with one voice,—you and your clergymen together,—because you hear of your Bibles being attacked. If you choose to obey your Bibles, you will never care who attacks them. It is just because you never fulfil a single downright precept of the Book, that you are so careful for its credit: and just because

you don't care to obey its whole words, that you are so particular about the letters of them. The Bible tells you to dress plainly,—and you are mad for finery ; the Bible tells you to have pity on the poor,—and you crush them under your carriage-wheels ; the Bible tells you to do judgment and justice,—and you do not know, nor care to know, so much as what the Bible word 'justice' means. Do but learn so much of God's truth as that comes to ; know what He means when He tells you to be just : and teach your sons, that their bravery is but a fool's boast, and their deeds but a firebrand's tossing, unless they are indeed Just men, and Perfect in the fear of God ; and you will soon have no more war, unless it be indeed such as is willed by Him, of whom, though Prince of Peace, it is also written, 'In Righteousness He doth judge, and make war.'

THE END.

PREFACE.

THE following lectures were really given, in substance, at a girl's school (far in the country); which, in the course of various experiments on the possibility of introducing some better practice of drawing into the modern scheme of female education, I visited frequently enough to enable the children to regard me as a friend. The Lectures always fell more or less into the form of fragmentary answers to questions; and they are allowed to retain that form, as, on the whole, likely to be more interesting than the symmetries of a continuous treatise. Many children (for the school was large) took part, at different times, in the conversations; but I have endeavored, without confusedly multiplying the number of imaginary* speakers, to represent, as far as I could, the general tone of comment and inquiry among young people.

It will be at once seen that these Lectures were not intended for an introduction to mineralogy. Their purpose was merely to awaken in the minds of young girls, who were ready to work earnestly and systematically, a vital interest in the subject of their study. No science can be learned in play; but it is often possible, in play, to bring good fruit out of past labor, or show sufficient reasons for the labor of the future.

The narrowness of this aim does not, indeed, justify

* I do not mean, in saying 'imaginary,' that I have not permitted to myself, in several instances, the affectionate discourtesy of some reminiscence of personal character; for which I must hope to be forgiven by my old pupils and their friends, as I could not otherwise have written the book at all. But only two sentences in all the dialogues, and the anecdote of 'Dotty,' are literally 'historical.'

the absence of all reference to many important principles of structure, and many of the most interesting orders of minerals; but I felt it impossible to go far into detail without illustrations; and if readers find this book useful, I may, perhaps, endeavor to supplement it by illustrated notes of the more interesting phenomena in separate groups of familiar minerals;—flints of the chalk;—agates of the basalts;—and the fantastic and exquisitely beautiful varieties of the vein-ores of the two commonest metals, lead and iron. But I have always found that the less we speak of our intentions, the more chance there is of our realizing them; and this poor little book will sufficiently have done its work, for the present, if it engages any of its young readers in study which may enable them to despise it for its shortcomings.

DENMARK HILL,
Christmas, 1865.

LECTURE I.

THE VALLEY OF DIAMONDS.

A very idle talk, by the dining-room fire, after raisin-and-almond time.

OLD LECTURER; FLORRIE, ISABEL, MAY, LILY, and SIBYL.

OLD LECTURER (L.). Come here, Isabel, and tell me what the make-believe was, this afternoon.

ISABEL (*arranging herself very primly on the foot-stool*). Such a dreadful one! Florrie and I were lost in the Valley of Diamonds.

L. What! Sindbad's, which nobody could get out of?

ISABEL. Yes; but Florrie and I got out of it.

L. So I see. At least, I see you did; but are you sure Florrie did?

ISABEL. Quite sure.

FLORRIE (*putting her head round from behind L.'s sofa-cushion*). Quite sure. (*Disappears again.*)

L. I think I could be made to feel surer about it.

(FLORRIE *reappears, gives L. a kiss, and again exits.*)

L. I suppose it's all right; but how did you manage it?

ISABEL. Well, you know, the eagle that took up Sindbad was very large—very, very large—the largest of all the eagles.

L. How large were the others?

ISABEL. I don't know—they were so far off. But this one was, oh, so big! and it had great wings, as

wide as—twice over the ceiling. So, when it was picking up Sindbad, Florrie and I thought it wouldn't know if we got on its back too : so I got up first, and then I pulled up Florrie, and we put our arms round its neck, and away it flew.

L. But why did you want to get out of the valley? and why haven't you brought me some diamonds?

ISABEL. It was because of the serpents. I couldn't pick up even the least bit of a diamond, I was so frightened.

L. You should not have minded the serpents.

ISABEL. Oh, but suppose that they had minded me?

L. We all of us mind you a little too much, Isabel, I'm afraid.

ISABEL. No—no—no, indeed.

L. I tell you what, Isabel—I don't believe either Sindbad, or Florrie, or you, ever were in the Valley of Diamonds.

ISABEL. You naughty! when I tell you we were!

L. Because you say you were frightened at the serpents.

ISABEL. And wouldn't you have been?

L. Not at those serpents. Nobody who really goes into the valley is ever frightened at them—they are so beautiful.

ISABEL (*suddenly serious*). But there's no real Valley of Diamonds, is there?

L. Yes, Isabel; very real indeed.

FLORRIE (*reappearing*). Oh, where? Tell me about it.

L. I cannot tell you a great deal about it; only I know it is very different from Sindbad's. In his valley, there was only a diamond lying here and there; but, in the real valley, there are diamonds covering the grass in showers every morning, instead of dew: and there are clusters of trees, which look like lilac trees; but, in spring, all their blossoms are of amethyst.

FLORRIE. But there can't be any serpents there, then?

L. Why not?

FLORRIE. Because they don't come into such beautiful places.

L. I never said it was a beautiful place.

FLORRIE. What! not with diamonds strewed about it like dew?

L. That's according to your fancy, Florrie. For myself, I like dew better.

ISABEL. Oh, but the dew won't stay; it all dries!

L. Yes; and it would be much nicer if the diamonds dried too, for the people in the valley have to sweep them off the grass, in heaps, whenever they want to walk on it; and then the heaps glitter so, they hurt one's eyes.

FLORRIE. Now you're just playing, you know.

L. So are you, you know.

FLORRIE. Yes, but you mustn't play.

L. That's very hard, Florrie; why mustn't I, if you may?

FLORRIE. Oh, I may, because I'm little, but you mustn't, because you're—(*hesitates for a delicate expression of magnitude*).

L. (*rudely taking the first that comes*). Because I'm big? No; that's not the way of it at all, Florrie. Because you're little, you should have very little play; and because I'm big I should have a great deal.

ISABEL and FLORRIE (*both*). No—no—no—no. That isn't it at all. (ISABEL *sola*, *quoting Miss Ingelow*). 'The lambs play always—they know no better.' (*Putting her head very much on one side*.) Ah, now—please—please—tell us true; we want to know.

L. But why do you want me to tell you true, any more than the man who wrote the 'Arabian Nights?'

ISABEL. Because—because we like to know about real things; and you can tell us, and we can't ask the man who wrote the stories.

L. What do you call real things?

ISABEL. Now, you know! Things that really are.

L. Whether you can see them or not?

ISABEL. Yes, if somebody else saw them.

L. But if nobody has ever seen them?

ISABEL (*evading the point*). Well, but, you know, if there were a real Valley of Diamonds, somebody *must* have seen it.

L. You cannot be so sure of that, Isabel. Many people go to real places, and never see them; and many people pass through this valley, and never see it.

FLORRIE. What stupid people they must be!

L. No, Florrie. They are much wiser than the people who do see it.

MAY. I think I know where it is.

ISABEL. Tell us more about it, and then we'll guess.

L. Well. There's a great broad road, by a river-side, leading up into it.

MAY (*gravely cunning, with emphasis on the last word*). Does the road really go *up*?

L. You think it should go down into a valley? No, it goes up; this is a valley among the hills, and it is as high as the clouds, and is often full of them; so that even the people who most want to see it, cannot, always.

ISABEL. And what is the river beside the road like?

L. It ought to be very beautiful, because it flows over diamond sand—only the water is thick and red.

ISABEL. Red water?

L. It isn't all water.

MAY. Oh, please never mind that, Isabel, just now? I want to hear about the valley.

L. So the entrance to it is very wide, under a steep rock; only such numbers of people are always trying to get in, that they keep jostling each other, and manage it but slowly. Some weak ones are pushed back, and never get in at all; and make great moaning as they go away: but perhaps they are none the worse in the end.

MAY. And when one gets in, what is it like?

L. It is up and down, broken kind of ground: the road stops directly; and there are great dark rocks, covered all over with wild gourds and wild vines; the gourds, if you cut them, are red, with black seeds, like water-melons, and look ever so nice; and the people

of the place make a red pottage of them : but you must take care not to eat any if you ever want to leave the valley (though I believe putting plenty of meal in it makes it wholesome). Then the wild vines have clusters of the color of amber ; and the people of the country say they are the grape of Eshcol ; and sweeter than honey : but, indeed, if anybody else tastes them, they are like gall. Then there are thickets of bramble, so thorny that they would be cut away directly, anywhere else ; but here they are covered with little cinque-foiled blossoms of pure silver ; and, for berries, they have clusters of rubies. Dark rubies, which you only see are red after gathering them. But you may fancy what blackberry parties the children have ! Only they get their frocks and hands sadly torn.

LILY. But rubies can't spot one's frocks, as blackberries do ?

L. No ; but I'll tell you what spots them—the mulberries. There are great forests of them, all up the hills, covered with silkworms, some munching the leaves so loud that it is like mills at work ; and some spinning. But the berries are the blackest you ever saw ; and, wherever they fall, they stain a deep red ; and nothing ever washes it out again. And it is their juice, soaking through the grass, which makes the river so red, because all its springs are in this wood. And the boughs of the trees are twisted, as if in pain, like old olive branches ; and their leaves are dark. And it is in these forests that the serpents are ; but nobody is afraid of them. They have fine crimson crests, and they are wreathed about the wild branches, one in every tree, nearly ; and they are singing serpents, for the serpents are, in this forest, what birds are in ours.

FLORRIE. Oh, I don't want to go there at all, now.

L. You would like it very much indeed, Florrie, if you were there. The serpents would not bite you ; the only fear would be of your turning into one !

FLORRIE. Oh, dear, but that's worse.

L. You wouldn't think so if you really were turned into one, Florrie ; you would be very proud of your

crest. And as long as you were yourself (not that you could get there if you remained quite the little Florrie you are now), you would like to hear the serpents sing. They hiss a little through it, like the cicadas in Italy; but they keep good time, and sing delightful melodies; and most of them have seven heads, with throats which each take a note of the octave; so that they can sing chords—it is very fine indeed. And the fireflies fly round the edge of the forests all the night long; you wade in fireflies, they make the fields look like a lake trembling with reflection of stars; but you must take care not to touch them, for they are not like Italian fireflies, but burn, like real sparks.

FLORRIE. I don't like it at all; I'll never go there.

L. I hope not, Florrie; or at least that you will get out again if you do. And it is very difficult to get out, for beyond these serpent forests there are great cliffs of dead gold, which form a labyrinth, winding always higher and higher, till the gold is all split asunder by wedges of ice; and glaciers, welded, half of ice seven times frozen, and half of gold seven times frozen, hang down from them, and fall in thunder, cleaving into deadly splinters, like the Cretan arrowheads; and into a mixed dust of snow and gold, ponderous, yet which the mountain whirlwinds are able to lift and drive in wreaths and pillars, hiding the paths with a burial cloud, fatal at once with wintry chill, and weight of golden ashes. So the wanderers in the labyrinth fall, one by one, and are buried there:—yet, over the drifted graves, those who are spared climb to the last, through coil on coil of the path;—for at the end of it they see the king of the valley, sitting on his throne: and beside him (but it is only a false vision), spectra of creatures like themselves, set on thrones, from which they seem to look down on all the kingdoms of the world, and the glory of them. And on the canopy of his throne there is an inscription in fiery letters, which they strive to read, but cannot; for it is written in words which are like the words of all languages, and yet are of none. Men say it is more like their own tongue to the Eng-

lish than it is to any other nation ; but the only record of it is by an Italian, who heard the king himself cry it as a war cry, ' Pape Satan, Pape Satan Aleppo.' *

SIBYL. But do they all perish there ? You said there was a way through the valley, and out of it.

L. Yes ; but few find it. If any of them keep to the grass paths, where the diamonds are swept aside ; and hold their hands over their eyes so as not to be dazzled, the grass paths lead forward gradually to a place where one sees a little opening in the golden rocks. You were at Chamouni last year, Sibyl ; did your guide chance to show you the pierced rock of the Aiguille du Midi ?

SIBYL. No, indeed, we only got up from Geneva on Monday night ; and it rained all Tuesday ; and we had to be back at Geneva again, early on Wednesday morning.

L. Of course. That is the way to see a country in a Sibylline manner, by inner consciousness : but you might have seen the pierced rock in your drive up, or down, if the clouds broke : not that there is much to see in it ; one of the crags of the aiguille-edge, on the southern slope of it, is struck sharply through, as by an awl, into a little eyelet hole ; which you may see, seven thousand feet above the valley (as the clouds flit past behind it, or leave the sky), first white, and then dark blue. Well, there's just such an eyelet hole in one of the upper crags of the Diamond Valley ; and, from a distance, you think that it is no bigger than the eye of a needle. But if you get up to it, they say you may drive a loaded camel through it, and that there are fine things on the other side, but I have never spoken with anybody who had been through.

SIBYL. I think we understand it now. We will try to write it down, and think of it.

L. Meantime, Florrie, though all that I have been telling you is very true, yet you must not think the sort of diamonds that people wear in rings and neck-

* Dante, *Inf.* 7. 1.

laces are found lying about on the grass. Would you like to see how they really are found?

FLORRIE. Oh, yes—yes.

L. Isabel—or Lily—run up to my room and fetch me the little box with a glass lid, out of the top drawer of the chest of drawers. (*Race between LILY and ISABEL.*)

(*Re-enter ISABEL with the box, very much out of breath. LILY behind.*)

L. Why, you never can beat Lily in a race on the stairs, can you, Isabel?

ISABEL (*panting*). Lily—beat me—ever so far—but she gave me—the box—to carry in.

L. Take off the lid, then; gently.

FLORRIE (*after peeping in, disappointed*). There's only a great ugly brown stone!

L. Not much more than that, certainly, Florrie, if people were wise. But look, it is not a single stone; but a knot of pebbles fastened together by gravel: and in the gravel, or compressed sand, if you look close, you will see grains of gold glittering everywhere, all through; and then, do you see these two white beads, which shine, as if they had been covered with grease?

FLORRIE. May I touch them?

L. Yes; you will find they are not greasy, only very smooth. Well, those are the fatal jewels; native here in their dust with gold, so that you may see, cradled here together, the two great enemies of mankind,—the strongest of all malignant physical powers that have tormented our race.

SIBYL. Is that really so? I know they do great harm; but do they not also do great good?

L. My dear child, what good? Was any woman, do you suppose, ever the better for possessing diamonds? but how many have been made base, frivolous, and miserable by desiring them? Was ever man the better for having coffers full of gold? But who shall measure the guilt that is incurred to fill them? Look into the history of any civilized nations; analyze, with reference to this one cause of crime and

misery, the lives and thoughts of their nobles, priests, merchants, and men of luxurious life. Every other temptation is at last concentrated into this; pride, and lust, and envy, and anger all give up their strength to avarice. The sin of the whole world is essentially the sin of Judas. Men do not disbelieve their Christ; but they sell Him.

SIBYL. But surely that is the fault of human nature? it is not caused by the accident, as it were, of there being a pretty metal, like gold, to be found by digging. If people could not find that, would they not find something else, and quarrel for it instead?

L. No. Wherever legislators have succeeded in excluding, for a time, jewels and precious metals from among national possessions, the national spirit has remained healthy. Covetousness is not natural to man—generosity is; but covetousness must be excited by a special cause, as a given disease by a given miasma; and the essential nature of a material for the excitement of covetousness is, that it shall be a beautiful thing which can be retained *without a use*. The moment we can use our possessions to any good purpose ourselves, the instinct of communicating that use to others rises side by side with our power. If you can read a book rightly, you will want others to hear it; if you can enjoy a picture rightly, you will want others to see it; learn how to manage a horse, a plough, or a ship, and you will desire to make your subordinates good horsemen, ploughmen, or sailors; you will never be able to see the fine instrument you are master of, abused; but, once fix your desire on anything useless, and all the purest pride and folly in your heart will mix with the desire, and make you at last wholly inhuman, a mere ugly lump of stomach and suckers, like a cuttle-fish.

SIBYL. But surely, these two beautiful things, gold and diamonds, must have been appointed to some good purpose?

L. Quite conceivably so, my dear: as also earthquakes and pestilences; but of such ultimate purposes

we can have no sight. The practical, immediate office of the earthquake and pestilence is to slay us, like moths; and, as moths, we shall be wise to live out of their way. So, the practical, immediate office of gold and diamonds is the multiplied destruction of souls (in whatever sense you have been taught to understand that phrase); and the paralysis of wholesome human effort and thought on the face of God's earth: and a wise nation will live out of the way of them. The money which the English habitually spend in cutting diamonds would, in ten years, if it were applied to cutting rocks instead, leave no dangerous reef nor difficult harbor round the whole island coast. Great Britain would be a diamond worth cutting, indeed, a true piece of regalia. (*Leaves this to their thoughts for a little while.*) Then, also, we poor mineralogists might sometimes have the chance of seeing a fine crystal of diamond unhacked by the jeweller.

SIBYL. Would it be more beautiful uncut?

L. No; but of infinite interest. We might even come to know something about the making of diamonds.

SIBYL. I thought the chemists could make them already?

L. In very small black crystals, yes; but no one knows how they are formed where they are found; or if indeed they are formed there at all. These, in my hand, look as if they had been swept down with the gravel and gold; only we can trace the gravel and gold to their native rocks, but not the diamonds. Read the account given of the diamond in any good work on mineralogy;—you will find nothing but lists of localities of gravel, or conglomerate rock (which is only an old indurated gravel). Some say it was once a vegetable gum; but it may have been charred wood; but what one would like to know is, mainly, why charcoal should make itself into diamonds in India, and only into blacklead in Borrowdale.

SIBYL. Are they wholly the same, then?

L. There is a little iron mixed with our blacklead;

but nothing to hinder its crystallization. Your pencils in fact are all pointed with formless diamond, though they would be H H H pencils to purpose, if it crystallized.

SIBYL. But what *is* crystallization?

L. A pleasant question, when one's half asleep, and it has been tea time these two hours. What thoughtless things girls are!

SIBYL. Yes, we are; but we want to know, for all that.

L. My dear, it would take a week to tell you.

SIBYL. Well, take it, and tell us.

L. But nobody knows anything about it.

SIBYL. Then tell us something that somebody knows.

L. Get along with you, and tell Dora to make tea.

(The house rises; but of course the LECTURER wanted to be forced to lecture again, and was.)

LECTURE II.

THE PYRAMID BUILDERS.

In the large Schoolroom, to which everybody has been summoned by ringing of the great bell.

L. So you have all actually come to hear about crystallization! I cannot conceive why, unless the little ones think that the discussion may involve some reference to sugar-candy.

(Symptoms of high displeasure among the younger members of council. ISABEL frowns severely at L., and shakes her head violently.)

My dear children, if you knew it, you are yourselves, at this moment, as you sit in your ranks, nothing, in the eye of a mineralogist, but a lovely group of rosy sugar-candy, arranged by atomic forces. And even admitting you to be something more, you have certainly been crystallizing without knowing it. Did not I hear a great hurrying and whispering, ten minutes ago, when you were late in from the playground; and thought you would not all be quietly seated by the time I was ready:—besides some discussion about places—something about ‘it’s not being fair that the little ones should always be nearest?’ Well, you were then all being crystallized. When you ran in from the garden, and against one another in the passages, you were in what mineralogists would call a state of solution, and gradual confluence; when you got seated in those orderly rows, each in her proper place, you became crystalline. That is just what the atoms of a mineral do, if they can, whenever they get disordered: they get into order again as soon as may be.

I hope you feel inclined to interrupt me, and say, 'But we know our places; how do the atoms know theirs? And sometimes we dispute about our places; do the atoms—(and, besides; we don't like being compared to atoms at all)—never dispute about theirs?' Two wise questions these, if you had a mind to put them? it was long before I asked them myself, of myself. And I will not call you atoms any more. May I call you—let me see—'primary molecules?' (*General dissent indicated in subdued but decisive murmurs.*) No! not even, in familiar Saxon, 'dust?'

(*Pause, with expression on faces of sorrowful doubt; LILY gives voice to the general sentiment in a timid 'Please don't.'*)

No, children, I won't call you that; and mind, as you grow up, that you do not get into an idle and wicked habit of calling yourselves that. You are something better than dust, and have other duties to do than ever dust can do; and the bonds of affection you will enter into are better than merely 'getting into order.' But see to it, on the other hand, that you always behave at least as well as 'dust;' remember, it is only on compulsion, and while it has no free permission to do as it likes, that *it* ever gets out of order: but sometimes, with some of us, the compulsion has to be the other way—hasn't it? (*Remonstratory whispers, expressive of opinion that the LECTURER is becoming too personal.*) I'm not looking at anybody in particular—indeed I am not. Nay, if you blush so, Kathleen, how can one help looking? We'll go back to the atoms.

'How do they know their places?' you asked, or should have asked. Yes, and they have to do much more than know them: they have to find their way to them, and that quietly and at once, without running against each other.

We may, indeed, state it briefly thus:—Suppose you have to build a castle, with towers and roofs and buttresses, out of bricks of a given shape, and that these bricks are all lying in a huge heap at the bottom, in

tutter confusion, upset out of carts at random. You would have to draw a great many plans, and count all your bricks, and be sure you had enough for this and that tower, before you began, and then you would have to lay your foundation, and add layer by layer, in order, slowly.

But how would you be astonished, in these melancholy days, when children don't read children's books, nor believe any more in fairies, if suddenly a real benevolent fairy, in a bright brick-red gown, were to rise in the midst of the red bricks, and to tap the heap of them with her wand, and say: 'Bricks, bricks, to your places!' and then you saw in an instant the whole heap rise in the air, like a swarm of red bees, and—you have been used to see bees make a honey-comb, and to think that strange enough, but now you would see the honeycomb make itself!—You want to ask something, Florrie, by the look of your eyes.

FLORRIE. Are they turned into real bees, with stings?

L. No, Florrie; you are only to fancy flying bricks, as you saw the slates flying from the roof the other day in the storm; only those slates didn't seem to know where they were going, and, besides, were going where they had no business: but my spell-bound bricks, though they have no wings, and what is worse, no heads and no eyes, yet find their way in the air just where they should settle, into towers and roofs, each flying to his place and fastening there at the right moment, so that every other one shall fit to him in his turn.

LILY. But who are the fairies, then, who build the crystals?

L. There is one great fairy, Lily, who builds much more than crystals; but she builds these also. I dreamed that I saw her building a pyramid, the other day, as she used to do, for the Pharaohs.

ISABEL. But that was only a dream?

L. Some dreams are truer than some wakings, Isabel; but I won't tell it you unless you like.

ISABEL. Oh, please, please.

L. You are all such wise children, there's no talking to you; you won't believe anything.

LILY. No, we are not wise, and we will believe anything, when you say we ought.

L. Well, it came about this way. Sibyl, do you recollect that evening when we had been looking at your old cave by Cumæ, and wondering why you didn't live there still: and then we wondered how old you were; and Egypt said you wouldn't tell, and nobody else could tell but she; and you laughed—I thought very gayly for a Sibyl—and said you would harness a flock of cranes for us, and we might fly over to Egypt if we liked, and see.

SIBYL. Yes, and you went, and couldn't find out after all!

L. Why, you know, Egypt had been just doubling that third pyramid of hers;* and making a new entrance into it; and a fine entrance it was! First, we had to go through an ante-room, which had both its doors blocked up with stones; and then we had three granite portcullises to pull up, one after another; and the moment we had got under them, Egypt signed to somebody above; and down they came again behind us, with a roar like thunder, only louder; then we got into a passage fit for nobody but rats, and Egypt wouldn't go any further herself, but said we might go on if we liked; and so we came to a hole in the pavement, and then to a granite trap-door—and then we thought we had gone quite far enough, and came back, and Egypt laughed at us.

EGYPT. You would not have had me take my crown off, and stoop all the way down a passage fit only for rats?

L. It was not the crown, Egypt—you know that very well. It was the flounces that would not let you go any farther. I suppose, however, you wear them as typical of the inundation of the Nile, so it is all right.

* Note i.

ISABEL. Why didn't you take me with you? Where rats can go, mice can. I wouldn't have come back.

L. No, mouse; you would have gone on by yourself, and you might have waked one of Pasht's cats, * and it would have eaten you. I was very glad you were not there. But after all this, I suppose the imagination of the heavy granite blocks and the underground ways had troubled me, and dreams are often shaped in a strange opposition to the impressions that have caused them; and from all that we had been reading in Bunsen about stones that couldn't be lifted with levers, I began to dream about stones that lifted themselves with wings.

SIBYL. Now you must just tell us all about it.

L. I dreamed that I was standing beside the lake, out of whose clay the bricks were made for the great pyramid of Asychis.† They had just been all finished, and were lying by the lake margin, in long ridges, like waves. It was near evening; and as I looked towards the sunset, I saw a thing like a dark pillar standing where the rock of the desert stoops to the Nile valley. I did not know there was a pillar there, and wondered at it; and it grew larger, and glided nearer, becoming like the form of a man, but vast, and it did not move its feet, but glided, like a pillar of sand. And as it drew nearer, I looked by chance past it, towards the sun; and saw a silver cloud, which was of all the clouds closest to the sun (and in one place crossed it), draw itself back from the sun, suddenly. And it turned, and shot towards the dark pillar; leaping in an arch, like an arrow out of a bow. And I thought it was lightning; but when it came near the shadowy pillar, it sank slowly down beside it, and changed into the shape of a woman, very beautiful, and with a strength of deep calm in her blue eyes. She was robed to the feet with a white robe; and above that, to her knees, by the cloud which I had seen across the sun; but all the golden ripples of it had become plumes, so that it had changed into two

* Note iii.

† Note ii.

bright wings like those of a vulture, which wrapped round her to her knees. She had a weaver's shuttle hanging over her shoulder, by the thread of it, and in her left hand, arrows, tipped with fire.

ISABEL (*clapping her hands*). Oh! it was Neith, it was Neith! I know now.

L. Yes; it was Neith herself; and as the two great spirits came nearer to me, I saw they were the Brother and Sister—the pillared shadow was the Greater Pthah.* And I heard them speak, and the sound of their words was like a distant singing. I could not understand the words one by one; yet their sense came to me; and so I knew that Neith had come down to see her brother's work, and the work that he had put into the mind of the king to make his servants do. And she was displeased at it; because she saw only pieces of dark clay; and no porphyry, nor marble, nor any fair stone that men might engrave the figures of the gods upon. And she blamed her brother, and said, 'Oh, Lord of truth! is this then thy will, that men should mould only four-square pieces of clay: and the forms of the gods no more?' Then the Lord of truth sighed, and said, 'Oh! sister, in truth they do not love us; why should they set up our images? Let them do what they may, and not lie—let them make their clay four-square; and labor; and perish.'

Then Neith's dark blue eyes grew darker, and she said, 'Oh, Lord of truth! why should they love us? their love is vain; or fear us? for their fear is base. Yet let them testify of us, that they knew we lived forever.'

But the Lord of truth answered, 'They know, and yet they know not. Let them keep silence; for their silence only is truth.'

But Neith answered, 'Brother, wilt thou also make league with Death, because Death is true? Oh! thou potter, who hast cast these human things from thy wheel, many to dishonor, and few to honor; wilt thou

* Note iii.

not let them so much as see my face ; but slay them in slavery ?'

But Pthah only answered, ' Let them build, sister, let them build.'

And Neith answered, ' What shall they build, if I build not with them ?'

And Pthah drew with his measuring rod upon the sand. And I saw suddenly, drawn on the sand, the outlines of great cities, and of vaults, and domes, and aqueducts, and bastions, and towers, greater than obelisks, covered with black clouds. And the wind blew ripples of sand amidst the lines that Pthah drew, and the moving sand was like the marching of men. But I saw that wherever Neith looked at the lines, they faded, and were effaced.

' Oh, Brother !' she said at last, ' what is this vanity ? If I, who am Lady of wisdom, do not mock the children of men, why shouldst thou mock them, who art Lord of truth ?' But Pthah answered, ' They thought to bind me ; and they shall be bound. They shall labor in the fire of vanity.'

And Neith said, looking at the sand, ' Brother, there is no true labor here—there is only weary life and wasteful death.'

And Pthah answered, ' Is it not truer labor, sister, than thy sculpture of dreams ?'

Then Neith smiled ; and stopped suddenly.

She looked to the sun ; its edge touched the horizon-edge of the desert. Then she looked to the long heaps of pieces of clay, that lay, each with its blue shadow, by the lake shore.

' Brother,' she said, ' how long will this pyramid of thine be in building ?'

' Thoth will have sealed the scroll of the years ten times, before the summit is laid.'

' Brother, thou knowest not how to teach thy children to labor,' answered Neith. ' Look ! I must follow Phre beyond Atlas ; shall I build your pyramid for you before he goes down ?' And Pthah answered, ' Yea, sister, if thou canst put thy winged shoulders

to such work.' And Neith drew herself to her height; and I heard a clashing pass through the plumes of her wings, and the asp stood up on her helmet, and fire gathered in her eyes. And she took one of the flaming arrows out of the sheaf in her left hand, and stretched it out over the heaps of clay. And they rose up like flights of locusts, and spread themselves in the air, so that it grew dark in a moment. Then Neith designed them places with her arrow point; and they drew into ranks, like dark clouds laid level at morning. Then Neith pointed with her arrow to the north, and to the south, and to the east, and to the west, and the flying motes of earth drew asunder into four great ranked crowds; and stood, one in the north, and one in the south, and one in the east, and one in the west—one against another. Then Neith spread her wings wide for an instant, and closed them with a sound like the sound of a rushing sea; and waved her hand towards the foundation of the pyramid, where it was laid on the brow of the desert. And the four flocks drew together and sank down, like sea-birds settling to a level rock; and when they met, there was a sudden flame, as broad as the pyramid, and as high as the clouds; and it dazzled me; and I closed my eyes for an instant; and when I looked again, the pyramid stood on its rock, perfect; and purple with the light from the edge of the sinking sun.

THE YOUNGER CHILDREN (*variously pleased*). I'm so glad! How nice! But what did Pthah say?

L. Neith did not wait to hear what he would say. When I turned back to look at her, she was gone; and I only saw the level white cloud form itself again, close to the arch of the sun as it sank. And as the last edge of the sun disappeared, the form of Pthah faded into a mighty shadow, and so passed away.

EGYPT. And was Neith's pyramid left?

L. Yes; but you could not think, Egypt, what a strange feeling of utter loneliness came over me when the presence of the two gods passed away. It seemed

as if I had never known what it was to be alone before; and the unbroken line of the desert was terrible.

EGYPT. I used to feel that, when I was queen: sometimes I had to carve gods, for company, all over my palace. I would fain have seen real ones, if I could.

L. But listen a moment yet, for that was not quite all my dream. The twilight drew swiftly to the dark; and I could hardly see the great pyramid; when there came a heavy murmuring sound in the air; and a horned beetle, with terrible claws, fell on the sand at my feet, with a blow like the beat of a hammer. Then it stood up on its hind claws, and waved its pincers at me: and its fore claws became strong arms, and hands; one grasping real iron pincers, and the other a huge hammer; and it had a helmet on its head, without any eyelet holes, that I could see. And its two hind claws became strong crooked legs, with feet bent inwards. And so there stood by me a dwarf, in glossy black armor, ribbed and embossed like a beetle's back, leaning on his hammer. And I could not speak for wonder; but he spoke with a murmur like the dying away of a beat upon a bell. He said, 'I will make Neith's great pyramid small. I am the lower Pthah; and have power over fire. I can wither strong things, and strengthen the weak; and everything that is great I can make small, and everything that is little I can make great.' Then he turned to the angle of the pyramid and limped towards it. And the pyramid grew deep purple; and then red like blood, and then pale rose-color, like fire. And I saw that it glowed with fire from within. And the lower Pthah touched it with the hand that held the pincers; and it sank down like the sand in an hour-glass,—then drew itself together, and sank, still, and became nothing, it seemed to me; but the armed dwarf stooped down, and took it into his hand, and brought it to me, saying, 'Everything that is great I can make like this pyramid; and give into men's hands to destroy.' And I saw that he had a little pyramid in his hand, with as many courses in it as the large one; and built like that,—only so small.

And because it glowed still, I was afraid to touch it ; but Pthah said, ' Touch it—for I have bound the fire within it, so that it cannot burn.' So I touched it, and took it into my own hand ; and it was cold ; only red, like a ruby. And Pthah laughed, and became like a beetle again, and buried himself in the sand, fiercely ; throwing it back over his shoulders. And it seemed to me as if he would draw me down with him into the sand ; and I started back, and woke, holding the little pyramid so fast in my hand that it hurt me.

EGYPT. Holding WHAT in your hand ?

L. The little pyramid.

EGYPT. Neith's pyramid ?

L. Neith's, I believe ; though not built for Asychis. I know only that it is a little rosy transparent pyramid, built of more courses of bricks than I can count, it being made so small. You don't believe me, of course, Egyptian infidel ; but there it is. (*Giving crystal of rose Fluor.*)

(*Confused examination by crowded audience, over each other's shoulders and under each other's arms. Disappointment begins to manifest itself.*)

SYBIL (*not quite knowing why she and others are disappointed*). But you showed us this the other day !

L. Yes ; but you would not look at it the other day.

SYBIL. But was all that fine dream only about this ?

L. What finer thing could a dream be about than this ? It is small, if you will ; but when you begin to think of things rightly, the ideas of smallness and largeness pass away. The making of this pyramid was in reality just as wonderful as the dream I have been telling you, and just as incomprehensible. It was not, I suppose, as swift, but quite as grand things are done as swiftly. When Neith makes crystals of snow, it needs a great deal more marshalling of the atoms, by her flaming arrows, than it does to make crystals like this one ; and that is done in a moment.

EGYPT. But how you *do* puzzle us ! Why do you say Neith does it ? You don't mean that she is a real spirit, do you

L. What *I* mean, is of little consequence. What the Egyptians meant, who called her 'Neith,'—or Homer, who called her 'Athena,'—or Solomon, who called her by a word which the Greeks render as 'Sophia,' you must judge for yourselves. But her testimony is always the same, and all nations have received it: 'I was by Him as the one brought up with Him, and I was daily His delight; rejoicing in the habitable parts of the earth, and my delights were with the sons of men.'

MARY. But is not that only a personification?

L. If it be, what will you gain by unpersonifying it, or what right have you to do so? Cannot you accept the image given you, in its life; and listen, like children, to the words which chiefly belong to you as children: 'I love them that love me, and those that seek me early shall find me?'

(They are all quiet for a minute or two; questions begin to appear in their eyes.)

I cannot talk to you any more to-day. Take that rose-crystal away with you, and think.

LECTURE III.

THE CRYSTAL LIFE.

A very dull Lecture, wilfully brought upon themselves by the elder children. Some of the young ones have, however, managed to get in by mistake. SCENE, the Schoolroom.

L. So I am to stand up here merely to be asked questions, to-day, Miss Mary, am I?

MARY. Yes; and you must answer them plainly; without telling us any more stories. You are quite spoiling the children: the poor little things' heads are turning round like kaleidoscopes; and they don't know in the least what you mean. Nor do we old ones, either, for that matter: to-day you must really tell us nothing but facts.

L. I am sworn; but you won't like it, a bit.

MARY. Now, first of all, what do you mean by 'bricks?'—Are the smallest particles of minerals all of some accurate shape, like bricks?

L. I do not know, Miss Mary; I do not even know if anybody knows. The smallest atoms which are visibly and practically put together to make large crystals, may better be described as 'limited in fixed directions' than as 'of fixed forms.' But I can tell you nothing clear about ultimate atoms: you will find the idea of little bricks, or, perhaps, of little spheres, available for all the uses you will have to put it to.

MARY. Well, it's very provoking; one seems always to be stopped just when one is coming to the very thing one wants to know.

L. No, Mary, for we should not wish to know anything but what is easily and assuredly knowable. There's no end to it. If I could show you, or myself, a group of ultimate atoms, quite clearly, in this magnifying glass, we should both be presently vexed because we could not break them in two pieces, and see their insides.

MARY. Well then, next, what do you mean by the flying of the bricks? What is it the atoms do, that is like flying?

L. When they are dissolved, or uncrystallized, they are really separated from each other, like a swarm of gnats in the air, or like a shoal of fish in the sea;—generally at about equal distances. In currents of solutions, or at different depths of them, one part may be more full of the dissolved atoms than another, but on the whole, you may think of them as equidistant, like the spots in the print of your gown. If they are separated by force of heat only, the substance is said to be melted; if they are separated by any other substance, as particles of sugar by water, they are said to be 'dissolved.' Note this distinction carefully, all of you.

DORA. I will be very particular. When next you tell me there isn't sugar enough in your tea, I will say, 'It is not yet dissolved, sir.'

L. I tell you what shall be dissolved, Miss Dora; and that's the present parliament, if the members get too saucy.

(DORA folds her hands and casts down her eyes.)

L. (*proceeds in state*). Now, Miss Mary, you know already, I believe, that nearly everything will melt, under a sufficient heat, like wax. Limestone melts (under pressure); sand melts; granite melts; the lava of a volcano is a mixed mass of many kinds of rocks, melted; and any melted substance nearly always, if not always, crystallizes as it cools; the more slowly the more perfectly. Water melts at what we call the freezing, but might just as wisely, though not as conveniently, call the melting, point; and radiates as it

cools into the most beautiful of all known crystals. Glass melts at a greater heat, and will crystallize, if you let it cool slowly enough, in stars, much like snow. Gold needs more heat to melt it, but crystallizes also exquisitely, as I will presently show you. Arsenic and sulphur crystallize from their vapors. Now in any of these cases, either of melted, dissolved, or vaporous bodies, the particles are usually separated from each other, either by heat, or by an intermediate substance; and in crystallizing they are both brought nearer to each other, and packed, so as to fit as closely as possible: the essential part of the business being not the bringing together, but the packing. Who packed your trunk for you, last holidays, Isabel?

ISABEL. Lily does, always.

L. And how much can you allow for Lily's good packing, in guessing what will go into the trunk?

ISABEL. Oh! I bring twice as much as the trunk holds. Lily always gets everything in.

LILY. Ah! but, I say, if you only knew what a time it takes! and since you've had those great hard buttons on your frocks, I can't do anything with them. Buttons won't go anywhere, you know.

L. Yes, Lily, it would be well if she only knew what a time it takes; and I wish any of us knew what a time crystallization takes, for that is consummately fine packing. The particles of the rock are thrown down, just as Isabel brings her things—in a heap; and innumerable Lilies, not of the valley, but of the rock, come to pack them. But it takes such a time!

However, the best—out and out the best—way of understanding the thing, is to crystallize yourselves.

THE AUDIENCE. Ourselves!

L. Yes; not merely as you did the other day, carelessly, on the schoolroom forms; but carefully and finely, out in the playground. You can play at crystallization there as much as you please.

KATHLEEN and JESSIE. Oh! how?—how?

L. First, you must put yourselves together, as close

as you can, in the middle of the grass, and form, for first practice, any figure you like.

JESSIE. Any dancing figure, do you mean?

L. No; I mean a square, or a cross, or a diamond. Any figure you like, standing close together. You had better outline it first on the turf, with sticks, or pebbles, so as to see that it is rightly drawn; then get into it and enlarge or diminish it at one side, till you are all quite in it, and no empty space left.

DORA. Crinoline and all?

L. The crinoline may stand eventually for rough crystalline surface, unless you pin it in; and then you may make a polished crystal of yourselves.

LILY. Oh, we'll pin it in—we'll pin it in!

L. Then, when you are all in the figure, let every one note her place, and who is next her on each side; and let the outsiders count how many places they stand from the corners.

KATHLEEN. Yes, yes,—and then?

L. Then you must scatter all over the playground—right over it from side to side, and end to end; and put yourselves all at equal distances from each other, everywhere. You needn't mind doing it very accurately, but so as to be nearly equidistant; not less than about three yards apart from each other, on every side.

JESSIE. We can easily cut pieces of string of equal length, to hold. And then?

L. Then, at a given signal, let everybody walk, at the same rate, towards the outlined figure in the middle. You had better sing as you walk; that will keep you in good time. And as you close in towards it, let each take her place, and the next comers fit themselves in beside the first ones, till you are all in the figure again.

KATHLEEN. Oh! how we shall run against each other! What fun it will be!

L. No, no, Miss Katie; I can't allow any running against each other. The atoms never do that, what-

ever human creatures do. You must all know your places, and find your way to them without jostling.

LILY. But how ever shall we do that?

ISABEL. Mustn't the ones in the middle be the nearest, and the outside ones farther off—when we go away to scatter, I mean?

L. Yes; you must be very careful to keep your order; you will soon find out how to do it; it is only like soldiers forming square, except that each must stand still in her place as she reaches it, and the others come round her; and you will have much more complicated figures, afterwards, to form, than squares.

ISABEL. I'll put a stone at my place: then I shall know it.

L. You might each nail a bit of paper to the turf, at your place, with your name upon it: but it would be of no use, for if you don't know your places, you will make a fine piece of business of it, while you are looking for your names. And, Isabel, if with a little head, and eyes, and a brain (all of them very good and serviceable of their kind, as such things go), you think you cannot know your place without a stone at it, after examining it well,—how do you think each atom knows its place, when it never was there before, and there's no stone at it?

ISABEL. But does every atom know its place?

L. How else could it get there?

MARY. Are they not attracted into their places?

L. Cover a piece of paper with spots, at equal intervals; and then imagine any kind of attraction you choose, or any law of attraction, to exist between the spots, and try how, on that permitted supposition, you can attract them into the figure of a Maltese cross, in the middle of the paper.

MARY (*having tried it*). Yes; I see that I cannot:—one would need all kinds of attractions, in different ways, at different places. But you do not mean that the atoms are alive?

L. What is it to be alive?

DORA. There now ; you're going to be provoking, I know.

L. I do not see why it should be provoking to be asked what it is to be alive. Do you think you don't know whether you are alive or not ?

(ISABEL *skips to the end of the room and back.*)

L. Yes, Isabel, that's all very fine ; and you and I may call that being alive : but a modern philosopher calls it being in a 'mode of motion.' It requires a certain quantity of heat to take you to the sideboard ; and exactly the same quantity to bring you back again. That's all.

ISABEL. No, it isn't. And besides, I'm not hot.

L. I am, sometimes, at the way they talk. However, you know, Isabel, you might have been a particle of a mineral, and yet have been carried round the room, or anywhere else, by chemical forces, in the liveliest way.

ISABEL. Yes ; but I wasn't carried : I carried myself.

L. The fact is, mousie, the difficulty is not so much to say what makes a thing alive, as what makes it a Self. As soon as you are shut off from the rest of the universe into a Self, you begin to be alive.

VIOLET (*indignant*). Oh, surely—surely that cannot be so. Is not all the life of the soul in communion, not separation ?

L. There can be no communion where there is no distinction. But we shall be in an abyss of metaphysics presently, if we don't look out ; and besides, we must not be too grand, to-day, for the younger children. We'll be grand, some day, by ourselves, if we must. (*The younger children are not pleased, and prepare to remonstrate ; but, knowing by experience, that all conversations in which the word 'communion' occurs, are unintelligible, think better of it.*) Meantime, for broad answer about the atoms. I do not think we should use the word 'life,' of any energy which does not belong to a given form. A seed, or an egg, or a young animal, are properly called 'alive'

with respect to the force belonging to those forms, which consistently develops that form, and no other. But the force which crystallizes a mineral appears to be chiefly external, and it does not produce an entirely determinate and individual form, limited in size, but only an aggregation, in which some limiting laws must be observed.

MARY. But I do not see much difference, that way, between a crystal and a tree.

L. Add, then, that the mode of the energy in a living thing implies a continual change in its elements ; and a period for its end. So you may define life by its attached negative, death ; and still more by its attached positive, birth. But I won't be plagued any more about this, just now ; if you choose to think the crystals alive, do, and welcome. Rocks have always been called ' living ' in their native place.

MARY. There's one question more ; then I've done.

L. Only one ?

MARY. Only one.

L. But if it is answered, won't it turn into two ?

MARY. No ; I think it will remain single, and be comfortable.

L. Let me hear it.

MARY. You know, we are to crystallize ourselves out of the whole playground. Now, what playground have the minerals ? Where are they scattered before they are crystallized ; and where are the crystals generally made ?

L. That sounds to me more like three questions than one, Mary. If it is only one, it is a wide one.

MARY. I did not say anything about the width of it.

L. Well, I must keep it within the best compass I can. When rocks either dry from a moist state, or cool from a heated state, they necessarily alter in bulk ; and cracks, or open spaces, form in them in all directions. These cracks must be filled up with solid matter, or the rock would eventually become a ruinous heap. So, sometimes by water, sometimes by vapor, sometimes nobody knows how, crystallizable mat-

ter is brought from somewhere, and fastens itself in these open spaces, so as to bind the rock together again, with crystal cement. A vast quantity of hollows are formed in lavas by bubbles of gas, just as the holes are left in bread well baked. In process of time these cavities are generally filled with various crystals.

MARY. But where does the crystallizing substance come from?

L. Sometimes out of the rock itself; sometimes from below or above, through the veins. The entire substance of the contracting rock may be filled with liquid, pressed into it so as to fill every pore;—or with mineral vapor;—or it may be so charged at one place, and empty at another. There's no end to the 'may be's.' But all that you need fancy, for our present purpose, is that hollows in the rocks, like the caves in Derbyshire, are traversed by liquids or vapor containing certain elements in a more or less free or separate state, which crystallize on the cave walls.

SIBYL. There now; Mary has had all her questions answered: it's my turn to have mine.

L. Ah, there's a conspiracy among you, I see. I might have guessed as much.

DORA. I'm sure you ask us questions enough! How can you have the heart, when you dislike so to be asked them yourself?

L. My dear child, if people do not answer questions, it does not matter how many they are asked, because they've no trouble with them. Now, when I ask you questions, I never expect to be answered; but when you ask me, you always do; and it's not fair.

DORA. Very well, we shall understand, next time.

SIBYL. No, but seriously, we all want to ask one thing more, quite dreadfully.

L. And I don't want to be asked it, quite dreadfully; but you'll have your own way, of course.

SIBYL. We none of us understand about the lower Pthah. It was not merely yesterday; but in all we have read about him in Wilkinson, or in any book, we

cannot understand what the Egyptians put their god into that ugly little deformed shape for.

L. Well, I'm glad it's that sort of question; because I can answer anything I like, to that.

EGYPT. Anything you like will do quite well for us; we shall be pleased with the answer, if you are.

L. I am not so sure of that, most gracious queen; for I must begin by the statement that queens seem to have disliked all sorts of work, in those days, as much as some queens dislike sewing to-day.

EGYPT. Now, it's too bad! and just when I was trying to say the civillest thing I could!

L. But, Egypt, why did you tell me you disliked sewing so?

EGYPT. Did not I show you how the thread cuts my fingers? and I always get cramp, somehow, in my neck, if I sew long.

L. Well, I suppose the Egyptian queens thought everybody got cramp in their neck, if they sewed long; and that thread always cut people's fingers. At all events, every kind of manual labor was despised both by them, and the Greeks; and, while they owned the real good and fruit of it, they yet held it a degradation to all who practised it. Also, knowing the laws of life thoroughly, they perceived that the special practice necessary to bring any manual art to perfection strengthened the body distortedly; one energy or member gaining at the expense of the rest. They especially dreaded and despised any kind of work that had to be done near fire: yet, feeling what they owed to it in metal-work, as the basis of all other work, they expressed this mixed reverence and scorn in the varied types of the lame Hephæstus, and the lower Pthah.

SIBYL. But what did you mean by making him say 'Everything great I can make small, and everything small great'?

L. I had my own separate meaning in that. We have seen in modern times the power of the lower Pthah developed in a separate way, which no Greek

nor Egyptian could have conceived. It is the character of pure and eyeless manual labor to conceive everything as subjected to it : and, in reality, to disgrace and diminish all that is so subjected ; aggrandizing itself, and the thought of itself, at the expense of all noble things. I heard an orator, and a good one too, at the Working Men's College, the other day, make a great point in a description of our railroads ; saying, with grandly conducted emphasis, ' They have made man greater, and the world less.' His working audience were mightily pleased ; they thought it so very fine a thing to be made bigger themselves ; and all the rest of the world less. I should have enjoyed asking them (but it would have been a pity—they were so pleased), how much less they would like to have the world made ;—and whether, at present, those of them really felt the biggest men, who lived in the least houses.

SIBYL. But then, why did you make Pthah say that he could make weak things strong, and small things great ?

L. My dear, he is a boaster and self-assertor, by nature ; but it is so far true. For instance, we used to have a fair in our neighborhood—a very fine fair we thought it. You never saw such an one ; but if you look at the engraving of Turner's ' St. Catherine's Hill,' you will see what it was like. There were curious booths, carried on poles ; and peep-shows ; and music, with plenty of drums and cymbals ; and much barley-sugar and gingerbread, and the like : and in the alleys of this fair the London populace would enjoy themselves, after their fashion, very thoroughly. Well, the little Pthah set to work upon it one day ; he made the wooden poles into iron ones, and put them across, like his own crooked legs, so that you always fall over them if you don't look where you are going ; and he turned all the canvas into panes of glass, and put it up on his iron cross-poles ; and made all the little booths into one great booth ;—and people said it was very fine, and a new style of architecture : and

Mr. Dickens said nothing was ever like it in Fairyland, which was very true. And then the little Pthah set to work to put fine fairings in it; and he painted the Nineveh bulls afresh, with the blackest eyes he could paint (because he had none himself), and he got the angels down from Lincoln choir, and gilded their wings like his gingerbread of old times; and he sent for everything else he could think of, and put it in his booth. There are the casts of Niobe and her children; and the Chimpanzee; and the wooden Caffres and New-Zealanders; and the Shakespeare House; and Le Grand Blondin, and Le Petit Blondin; and Handel; and Mozart; and no end of shops, and buns, and beer; and all the little-Pthah-worshippers say, never was anything so sublime!

SIBYL. Now, do you mean to say you never go to these Crystal Palace concerts? They're as good as good can be.

L. I don't go to the thundering things with a million of bad voices in them. When I want a song, I get Julia Mannering and Lucy Bertram and Counsellor Pleydell to sing 'We be three poor Mariners' to me; then I've no headache next morning. But I do go to the smaller concerts, when I can; for they are very good, as you say, Sibyl: and I always get a reserved seat somewhere near the orchestra, where I am sure I can see the kettle-drummer drum.

SIBYL. Now *do* be serious, for one minute.

L. I am serious—never was more so. You know one can't see the modulation of violinists' fingers, but one can see the vibration of the drummer's hand; and it's lovely.

SIBYL. But fancy going to a concert, not to hear, but to see!

L. Yes, it is very absurd. The quite right thing, I believe, is to go there to talk. I confess, however, that in most music, when very well done, the doing of it is to me the chiefly interesting part of the business. I'm always thinking how good it would be for the fat, supercilious people, who care so little for their half-

crown's worth, to be set to try and do a half-crown's worth of anything like it.

MARY. But surely that Crystal Palace is a great good and help to the people of London ?

L. The fresh air of the Norwood hills is, or was, my dear ; but they are spoiling that with smoke as fast as they can. And the palace (as they call it) is a better place for them, by much, than the old fair ; and it is always there, instead of for three days only ; and it shuts up at proper hours of night. And good use may be made of the things in it, if you know how : but as for its teaching the people, it will teach them nothing but the lowest of the lower Pthah's work—nothing but hammer and tongs. I saw a wonderful piece, of his doing, in the place, only the other day. Some unhappy metal-worker—I am not sure if it was not a metal-working firm—had taken three years to make a Golden eagle.

SIBYL. Of real gold ?

L. No ; of bronze, or copper, or some of their foul patent metals—it is no matter what. I meant a model of our chief British eagle. Every feather was made separately ; and every filament of every feather separately, and so joined on ; and all the quills modelled of the right length and right section, and at last the whole cluster of them fastened together. You know, children, I don't think much of my own drawing ; but take my proud word for once, that when I go to the Zoological Gardens, and happen to have a bit of chalk in my pocket, and the Gray Harpy will sit, without screwing his head round, for thirty seconds,—I can do a better thing of him in that time than the three years' work of this industrious firm. For, during the thirty seconds, the eagle is my object,—not myself ; and during the three years, the firm's object, in every fibre of bronze it made, was itself, and not the eagle. That is the true meaning of the little Pthah's having no eyes—he can see only himself. The Egyptian beetle was not quite the full type of him ; our northern ground beetle is a truer one. It is beautiful to see it at work,

gathering its treasures (such as they are) into little round balls ; and pushing them home with the strong wrong end of it,—head downmost all the way,—like a modern political economist with his ball of capital, declaring that a nation can stand on its vices better than on its virtues. But away with you, children, now, for I'm getting cross.

DORA. I'm going down stairs ; I shall take care, at any rate, that there are no little Pthahs in the kitchen cupboards.

LECTURE IV.

THE CRYSTAL ORDERS.

A working Lecture, in the large Schoolroom ; with experimental Interludes. The great bell has rung unexpectedly.

KATHLEEN (*entering disconsolate, though first at the summons*). Oh dear, oh dear, what a day ! Was ever anything so provoking ! just when we wanted to crystallize ourselves ;—and I'm sure it's going to rain all day long.

L. So am I, Kate. The sky has quite an Irish way with it. But I don't see why Irish girls should also look so dismal. Fancy that you don't want to crystallize yourselves : you didn't the day before yesterday, and you were not unhappy when it rained then.

FLORRIE. Ah ! but we do want to to-day ; and the rain's so tiresome.

L. That is to say, children, that because you are all the richer by the expectation of playing at a new game, you choose to make yourselves unhappier than when you had nothing to look forward to, but the old ones.

ISABEL. But then, to have to wait—wait—wait ; and before we've tried it ;—and perhaps it will rain to-morrow ; too !

L. It may also rain the day after to-morrow. We can make ourselves uncomfortable to any extent with perhappes, Isabel. You may stick perhappes into your little minds, like pins, till you are as uncomfortable as the Lilliputians made Gulliver with their arrows, when he would not lie quiet.

ISABEL. But what *are* we to do to-day ?

L. To be quiet, for one thing, like Gulliver when he saw there was nothing better to be done. And to practise patience. I can tell you children, *that* requires nearly as much practising as music ; and we are continually losing our lessons when the master comes. Now, to-day, here's a nice little adagio lesson for us, if we play it properly.

ISABEL. But I don't like that sort of lesson. I can't play it properly.

L. Can you play a Mozart sonata yet, Isabel ? The more need to practise. All one's life is a music, if one touches the notes rightly, and in time. But there must be no hurry.

KATHLEEN. I'm sure there's no music in stopping in on a rainy day.

L. There's no music in a 'rest,' Katie, that I know of : but there's the making of music in it. And people are always missing that part of the life-melody ; and scrambling on without counting—not that it's easy to count ; but nothing on which so much depends ever *is* easy. People are always talking of perseverance, and courage, and fortitude ; but patience is the finest and worthiest part of fortitude,—and the rarest, too. I know twenty persevering girls for one patient one : but it is only that twenty-first who can do her work, out and out, or enjoy it. For patience lies at the root of all pleasure, as well as of all powers. Hope herself ceases to be happiness, when Impatience companions her.

(ISABEL and LILY sit down on the floor, and fold their hands. The others follow their example.)

Good children ! but that's not quite the way of it, neither. Folded hands are not necessarily resigned ones. The Patience who really smiles at grief usually stands, or walks, or even runs : she seldom sits ; though she may sometimes have to do it, for many a day, poor thing, by monuments ; or like Chaucer's, 'with facē pale, upon a hill of sand.' But we are not reduced to that to-day. Suppose we use this calami-

stout forenoon to choose the shapes we are to crystallize into? we know nothing about them yet.

(The pictures of resignation rise from the floor, not in the patientest manner. General applause.)

MARY (*with one or two others*). The very thing we wanted to ask you about!

LILY. We looked at the books about crystals, but they are so dreadful.

L. Well, Lily, we must go through a little dreadfulness, that's a fact: no road to any good knowledge is wholly among the lilies and the grass; there is rough climbing to be done always. But the crystal-books are a little *too* dreadful, most of them, I admit; and we shall have to be content with very little of their help. You know, as you cannot stand on each other's heads, you can only make yourselves into the sections of crystals,—the figures they show when they are cut through; and we will choose some that will be quite easy. You shall make diamonds of yourselves——

ISABEL. Oh, no, no! we won't be diamonds, please.

L. Yes, you shall, Isabel; they are very pretty things, if the jewellers, and the kings and queens, would only let them alone. You shall make diamonds of yourselves, and rubies of yourselves, and emeralds; and Irish diamonds; two of those—with Lily in the middle of one, which will be very orderly, of course; and Kathleen in the middle of the other, for which we will hope the best;—and you shall make Derbyshire spar of yourselves, and Iceland spar, and gold, and silver, and—Quicksilver there's enough of in you, without any making.

MARY. Now, you know, the children will be getting quite wild: we must really get pencils and paper, and begin properly.

L. Wait a minute, Miss Mary; I think as we've the schoolroom clear to-day, I'll try to give you some notion of the three great orders or ranks of crystals, into which all the others seem more or less to fall. We shall only want one figure a day, in the playground; and that can be drawn in a minute: but the general

ideas had better be fastened first. I must show you a great many minerals ; so let me have three tables wheeled into the three windows, that we may keep our specimens separate ;—we will keep the three orders of crystals on separate tables.

(First Interlude, of pushing and pulling, and spreading of baise covers. Violet, not particularly minding what she is about, gets herself jammed into a corner, and bid to stand out of the way; on which she devotes herself to meditation.)

VIOLET *(after interval of meditation)*. How strange it is that everything seems to divide into threes !

L. Everything doesn't divide into threes. Ivy won't, though shamrock will ; and daisies won't, though lilies will.

VIOLET. But all the nicest things seem to divide into threes.

L. Violets won't.

VIOLET. No ; I should think not, indeed ! But I mean the great things.

L. I've always heard the globe had four quarters.

ISABEL. Well ; but you know you said it hadn't any quarters at all. So mayn't it really be divided into three ?

L. If it were divided into no more than three, on the outside of it, Isabel, it would be a fine world to live in ; and if it were divided into three in the inside of it, it would soon be no world to live in at all.

DORA. We shall never get to the crystals, at this rate. *(Aside to MARY.)* He will get off into political economy before we know where we are. *(Aloud.)* But the crystals are divided into three, then ?

L. No ; but there are three general notions by which we may best get hold of them. Then between these notions there are other notions.

LILY *(alarmed)*. A great many ? And shall we have to learn them all ?

L. More than a great many—a quite infinite many. So you cannot learn them all.

LILY (*greatly relieved*). Then may we only learn the three?

L. Certainly; unless, when you have got those three notions, you want to have some more notions;—which would not surprise me. But we'll try for the three, first. Katie, you broke your coral necklace this morning?

KATHLEEN. Oh! who told you? It was in jumping. I'm so sorry!

L. I'm very glad. Can you fetch me the beads of it?

KATHLEEN. I've lost some; here are the rest in my pocket, if I can only get them out.

L. You mean to get them out some day, I suppose; so try now. I want them.

(KATHLEEN *empties her pocket on the floor. The beads disperse. The School disperses also. Second Interlude—hunting piece.*)

L. (*after waiting patiently for a quarter of an hour, to ISABEL, who comes up from under the table with her hair all about her ears, and the last findable beads in her hand*). Mice are useful little things sometimes. Now, mousie, I want all those beads crystallized. How many ways are there of putting them in order?

ISABEL. Well, first one would string them, I suppose?

L. Yes, that's the first way. You cannot string ultimate atoms; but you can put them in a row, and then they fasten themselves together, somehow, into a long rod or needle. We will call these 'Needle-crystals.' What would be the next way?

ISABEL. I suppose, as we are to get together in the playground, when it stops raining, in different shapes?

L. Yes; put the beads together, then, in the simplest form you can, to begin with. Put them into a square, and pack them close.

ISABEL (*after careful endeavor*). I can't get them closer.

L. That will do. Now you may see, beforehand, that if you try to throw yourselves into a square in this

confused way, you will never know your places ; so you had better consider every square as made of rods, put side by side. Take four beads of equal size, first, Isabel ; put them into a little square. That, you may consider as made up of two rods of two beads each. Then you can make a square a size larger, out of three rods of three. Then the next square may be a size larger. How many rods, Lily ?

LILY. Four rods of four beads each, I suppose.

L. Yes, and then five rods of five, and so on. But now, look here ; make another square of four beads again. You see they leave a little opening in the centre.

ISABEL (*pushing two opposite ones closer together*). Now they don't.

L. No ; but now it isn't a square ; and by pushing the two together you have pushed the two others farther apart.

ISABEL. And yet, somehow, they all seem closer than they were !

L. Yes : for before, each of them only touched two of the others, but now each of the two in the middle touches the other three. Take away one of the outsiders, Isabel : now you have three in a triangle—the smallest triangle you can make out of the beads. Now put a rod of three beads on at one side. So, you have a triangle of six beads ; but just the shape of the first one. Next a rod of four on the side of that ; and you have a triangle of ten beads : then a rod of five on the side of that ; and you have a triangle of fifteen. Thus you have a square with five beads on the side, and a triangle with five beads on the side ; equal-sided, therefore, like the square. So, however few or many you may be, you may soon learn how to crystallize quickly into these two figures, which are the foundation of form in the commonest, and therefore actually the most important, as well as in the rarest, and therefore, by our esteem, the most important, minerals of the world. Look at this in my hand.

VIOLET. Why, it is leaf gold !

L. Yes ; but beaten by no man's hammer ; or rather,

not beaten at all, but woven. Besides, feel the weight of it. There is gold enough there to gild the walls and ceiling, if it were beaten thin.

VIOLET. How beautiful! And it glitters like a leaf covered with frost.

L. You only think it so beautiful because you know it is gold. It is not prettier, in reality, than a bit of brass: for it is Transylvanian gold; and they say there is a foolish gnome in the mines there, who is always wanting to live in the moon, and so alloys all the gold with a little silver. I don't know how that may be: but the silver always *is* in the gold; and if he does it, it's very provoking of him, for no gold is woven so fine anywhere else.

MARY (*who has been looking through her magnifying glass*). But this is not woven. This is all made of little triangles.

L. Say 'patched,' then, if you must be so particular. But if you fancy all those triangles, small as they are (and many of them are infinitely small), made up again of rods, and those of grains, as we built our great triangle of the beads, what word will you take for the manufacture?

MAY. There's no word—it is beyond words.

L. Yes; and that would matter little, were it not beyond thoughts too. But, at all events, this yellow leaf of dead gold, shed, not from the ruined woodlands, but the ruined rocks, will help you to remember the second kind of crystals, *Leaf*-crystals, or *Foliated* crystals; though I show you the form in gold first only to make a strong impression on you, for gold is not generally, or characteristically, crystallized in leaves; the real type of foliated crystals is this thing, Mica; which if you once feel well, and break well, you will always know again; and you will often have occasion to know it, for you will find it everywhere, nearly, in hill countries.

KATHLEEN. If we break it well! May we break it?

L. To powder, if you like.

(Surrenders plate of brown mica to public investigation. Third Interlude. It sustains severely philosophical treatment at all hands.)

FLORRIE *(to whom the last fragments have descended)*. Always leaves, and leaves, and nothing but leaves, or white dust !

L. That dust itself is nothing but finer leaves.

(Shows them to FLORRIE through magnifying glass.)

ISABEL *(peeping over FLORRIE'S shoulder)*. But then this bit under the glass looks like that bit out of the glass ! If we could break this bit under the glass, what would it be like ?

L. It would be all leaves still.

ISABEL. And then if we broke those again ?

L. All less leaves still.

ISABEL *(impatient)*. And if we broke them again, and again, and again, and again, and again ?

L. Well, I suppose you would come to a limit, if you could only see it. Notice that the little flakes already differ somewhat from the large ones : because I can bend them up and down, and they stay bent ; while the large flake, though it bent easily a little way, sprang back when you let it go, and broke, when you tried to bend it far. And a large mass would not bend at all.

MARY. Would that leaf gold separate into finer leaves, in the same way ?

L. No ; and therefore, as I told you, it is not a characteristic specimen of a foliated crystallization. The little triangles are portions of solid crystals, and so they are in this, which looks like a black mica ; but you see it is made up of triangles like the gold, and stands, almost accurately, as an intermediate link, in crystals, between mica and gold. Yet this is the commonest, as gold the rarest, of metals.

MARY. Is it iron ? I never saw iron so bright.

L. It is rust of iron, finely crystallized : from its resemblance to mica, it is often called micaceous iron.

KATHLEEN. May we break this, too ?

L. No, for I could not easily get such another crys-

tal; besides, it would not break like the mica; it is much harder. But take the glass again, and look at the fineness of the jagged edges of the triangles where they lap over each other. The gold has the same: but you see them better here, terrace above terrace, countless, and in successive angles, like superb fortified bastions.

MAY. But all foliated crystals are not made of triangles?

L. Far from it; mica is occasionally so, but usually of hexagons; and here is a foliated crystal made of squares, which will show you that the leaves of the rock-land have their summer green, as well as their autumnal gold.

FLORRIE. Oh! oh! oh! (*jumps for joy*).

L. Did you never see a bit of green leaf before, Florrie?

FLORRIE. Yes, but never so bright as that, and not in a stone.

L. If you will look at the leaves of the trees in sunshine after a shower, you will find they are much brighter than that; and surely they are none the worse for being on stalks instead of in stones?

FLORRIE. Yes, but then there are so many of them, one never looks, I suppose.

L. Now you have it, Florrie.

VIOLET (*sighing*). There are so many beautiful things we never see!

L. You need not sigh for that, Violet; but I will tell you what we should all sigh for,—that there are so many ugly things we never see.

VIOLET. But we don't want to see ugly things!

L. You had better say, 'We don't want to suffer them.' You ought to be glad in thinking how much more beauty God has made, than human eyes can ever see; but not glad in thinking how much more evil man has made, than his own soul can ever conceive, much more than his hands can ever heal.

VIOLET. I don't understand;—how is that like the leaves?

L. The same law holds in our neglect of multiplied pain, as in our neglect of multiplied beauty. Florrie jumps for joy at sight of half an inch of a green leaf in a brown stone ; and takes more notice of it than of all the green in the wood : and you, or I, or any of us, would be unhappy if any single human creature beside us were in sharp pain ; but we can read, at breakfast, day after day, of men being killed, and of women and children dying of hunger, faster than the leaves strew the brooks in Vallombrosa ;—and then go out to play croquet, as if nothing had happened.

MAY. But we do not see the people being killed or dying.

L. You did not see your brother, when you got the telegram the other day, saying he was ill, May ; but you cried for him ; and played no croquet. But we cannot talk of these things now ; and what is more, you must let me talk straight on, for a little while ; and ask no questions till I've done : for we branch ('exfoliate,' I should say, mineralogically) always into something else,—though that's my fault more than yours ; but I must go straight on now. You have got a distinct notion, I hope, of leaf-crystals ; and you see the sort of look they have : you can easily remember that 'folium' is Latin for a leaf, and that the separate flakes of mica, or any other such stones, are called 'folia ;' but, because mica is the most characteristic of these stones, other things that are like it in structure are called 'micas ;' thus we have Uran-mica, which is the green leaf I showed you ; and Copper-mica, which is another like it, made chiefly of copper ; and this foliated iron is called 'micaceous iron.' You have then these two great orders, Needle-crystals, made (probably) of grains in rows ; and Leaf-crystals, made (probably) of needles interwoven ; now, lastly, there are crystals of a third order, in heaps, or knots, or masses, which may be made, either of leaves laid one upon another, or of needles bound like Roman fasces ; and mica itself, when it is well crystallized, puts itself into such masses, as if to show us how

others are made. Here is a brown six-sided crystal, quite as beautifully chiselled at the sides as any castle tower ; but you see it is entirely built of folia of mica, one laid above another, which break away the moment I touch the edge with my knife. Now, here is another hexagonal tower, of just the same size and color, which I want you to compare with the mica carefully ; but as I cannot wait for you to do it just now, I must tell you quickly what main differences to look for. First, you will feel it is far heavier than the mica. Then, though its surface looks quite micaceous in the fold of it, when you try them with the knife, you will find you cannot break them away——

KATHLEEN. May I try ?

L. Yes, you mistrusting Katie. Here's my strong knife for you. (*Experimental pause. KATHLEEN doing her best.*) You'll have that knife shutting on your finger presently, Kate ; and I don't know a girl who would like less to have her hand tied up for a week.

KATHLEEN (*who also does not like to be beaten—giving up the knife despondently*). What can the nasty hard thing be ?

L. It is nothing but indurated clay, Kate : very hard set certainly, yet not so hard as it might be. If it were thoroughly well crystallized, you would see none of those micaceous fractures ; and the stone would be quite red and clear, all through.

KATHLEEN. Oh, cannot you show us one ?

L. Egypt can, if you ask her ; she has a beautiful one in the clasp of her favorite bracelet.

KATHLEEN. Why, that's a ruby !

L. Well, so is that thing you've been scratching at.

KATHLEEN. My goodness !

(*Takes up the stone again, very delicately ; and drops it. General consternation.*)

L. Never mind, Katie ; you might drop it from the top of the house, and do it no harm. But though you really are a very good girl, and as good-natured as anybody can possibly be, remember, you have your

faults, like other people ; and, if I were you, the next time I wanted to assert anything energetically, I would assert it by ' my badness,' not ' my goodness.'

KATHLEEN. Ah, now, it's too bad of you !

L. Well, then, I'll invoke, on occasion, my ' too-badness.' But you may as well pick up the ruby, now you have dropped it ; and look carefully at the beautiful hexagonal lines which gleam on its surface ; and here is a pretty white sapphire (essentially the same stone as the ruby), in which you will see the same lovely structure, like the threads of the finest white cobweb. I do not know what is the exact method of a ruby's construction ; but you see by these lines, what fine construction there *is*, even in this hardest of stones (after the diamond), which usually appears as a massive lump or knot. There is therefore no real mineralogical distinction between needle crystals, and knotted crystals, but, practically, crystallized masses throw themselves into one of the three groups we have been examining to-day ; and appear either as Needles, as Folia, or as Knots ; when they are in needles (or fibres), they make the stones or rocks formed out of them '*fibrous* ;' when they are in folia, they make them '*foliated* ;' when they are in knots (or grains), '*granular*.' Fibrous rocks are comparatively rare, in mass ; but fibrous minerals are innumerable ; and it is often a question which really no one but a young lady could possibly settle, whether one should call the fibres composing them ' threads ' or ' needles.' Here is amianthus, for instance, which is quite as fine and soft as any cotton thread you ever sewed with ; and here is sulphide of bismuth, with sharper points and brighter lustre than your finest needles have ; and fastened in white webs of quartz more delicate than your finest lace ; and here is sulphide of antimony, which looks like mere purple wool, but it is all of purple needle crystals ; and here is red oxide of copper (you must not breathe on it as you look, or you may blow some of the films of it off the stone), which is simply a woven tissue of scarlet

silk. However, these finer thread forms are comparatively rare, while the bolder and needle-like crystals occur constantly; so that, I believe, 'Needle-crystal,' is the best word (the grand one is, 'Acicular crystal,' but Sibyl will tell you it is all the same, only less easily understood; and therefore more scientific). Then the Leaf-crystals, as I said, form an immense mass of foliated rocks; and the Granular crystals, which are of many kinds, form essentially granular, or granitic and porphyritic rocks; and it is always a point of more interest to me (and I think will ultimately be to you), to consider the causes which force a given mineral to take any one of these three general forms, than what the peculiar geometrical limitations are, belonging to its own crystals.* It is more interesting to me, for instance, to try and find out why the red oxide of copper, usually crystallizing in cubes or octahedrons, makes itself exquisitely, out of its cubes, into this red silk in one particular Cornish mine, than what are the absolutely necessary angles of the octahedron, which is its common form. At all events, that mathematical part of crystallography is quite beyond girls' strength; but these questions of the various tempers and manners of crystals are not only comprehensible by you, but full of the most curious teaching for you. For in the fulfilment, to the best of their power, of their adopted form under given circumstances, there are conditions entirely resembling those of human virtue; and indeed expressible under no term so proper as that of the Virtue, or Courage of crystals:—which, if you are not afraid of the crystals making you ashamed of yourselves, we will try to get some notion of, to-morrow. But it will be a by-lecture, and more about yourselves than the minerals. Don't come unless you like.

MARY. I'm sure the crystals will make us ashamed of ourselves; but we'll come, for all that.

L. Meantime, look well and quietly over these needle, or thread crystals, and those on the other two

* Note iv.

tables, with magnifying glasses; and see what thoughts will come into your little heads about them. For the best thoughts are generally those which come without being forced, one does not know how. And so I hope you will get through your wet day patiently.

LECTURE V.

CRYSTAL VIRTUES.

A quiet talk, in the afternoon, by the sunniest window of the Drawing-room. Present, FLORRIE, ISABEL, MAY, LUCILLA, KATHLEEN, DORA, MARY, and some others, who have saved time for the by-Lecture.

L. So you have really come, like good girls, to be made ashamed of yourselves?

DORA (*very meekly*). No, we needn't be made so ; we always are.

L. Well, I believe that's truer than most pretty speeches : but you know, you saucy girl, some people have more reason to be so than others. Are you sure everybody is, as well as you?

THE GENERAL VOICE. Yes, yes ; everybody.

L. What ! Florrie ashamed of herself?

(FLORRIE *hides behind the curtain.*)

L. And Isabel?

(ISABEL *hides under the table.*)

L. And May?

(MAY *runs into the corner behind the piano.*)

L. And Lucilla?

(LUCILLA *hides her face in her hands.*)

L. Dear, dear ; but this will never do. I shall have to tell you of the faults of the crystals, instead of virtues, to put you in heart again.

MAY (*coming out of her corner*). Oh ! have the crystals faults, like us?

L. Certainly, May. Their best virtues are shown

in fighting their faults. And some have a great many faults ; and some are very naughty crystals indeed.

FLORRIE (*from behind her curtain*). As naughty as me ?

ISABEL (*peeping from under the tablecloth*). Or me ?

L. Well, I don't know. They never forget their syntax, children, when once they've been taught it. But I think some of them are, on the whole, worse than any of you. Not that it's amiable of you to look so radiant, all in a minute, on that account.

DORA. Oh ! but it's so much more comfortable.

(*Everybody seems to recover their spirits. Eclipse of FLORRIE and ISABEL terminates.*)

L. What kindly creatures girls are, after all, to their neighbors' failings ! I think you may be ashamed of yourselves indeed, now, children ! I can tell you, you shall hear of the highest crystalline merits that I can think of, to-day : and I wish there were more of them : but crystals have a limited, though a stern, code of morals ; and their essential virtues are but two ;—the first is to be pure, and the second to be well shaped.

MARY. Pure ! Does that mean clear—transparent ?

L. No ; unless in the case of a transparent substance. You cannot have a transparent crystal of gold ; but you may have a perfectly pure one.

ISABEL. But you said it was the shape that made things be crystals ; therefore, oughtn't their shape to be their first virtue, not their second ?

L. Right, you troublesome mousie. But I call their shape only their second virtue, because it depends on time and accident, and things which the crystal cannot help. If it is cooled too quickly, or shaken, it must take what shape it can ; but it seems as if, even then, it had in itself the power of rejecting impurity, if it has crystalline life enough. Here is a crystal of quartz, well enough shaped in its way ; but it seems to have been languid and sick at heart ; and some white milky substance has got into it, and mixed itself up with it, all through. It makes the quartz quite yellow, if you

hold it up to the light, and a milky blue on the surface. Here is another, broken into a thousand separate facets, and out of all traceable shape ; but as pure as a mountain spring. I like this one best.

THE AUDIENCE. So do I—and I—and I.

MARY. Would a crystallographer?

L. I think so. He would find many more laws curiously exemplified in the irregularly grouped but pure crystal. But it is a futile question, this of first or second. Purity is in most cases a prior, if not a nobler, virtue ; at all events it is most convenient to think about it first.

MARY. But what ought we to think about it ? Is there much to be thought--I mean, much to puzzle one ?

L. I don't know what you call 'much.' It is a long time since I met with anything in which there was little. There's not much in this, perhaps. The crystal must be either dirty or clean,—and there's an end. So it is with one's hands, and with one's heart—only you can wash your hands without changing them, but not hearts, nor crystals. On the whole, while you are young, it will be as well to take care that your hearts don't want much washing ; for they may perhaps need wringing also, when they do.

(Audience doubtful and uncomfortable. LUCILLA at last takes courage.)

LUCILLA. Oh ! but surely, sir, we cannot make our hearts clean ?

L. Not easily, Lucilla, so you had better keep them so, when they are.

LUCILLA. When they are ! But, sir—

L. Well ?

LUCILLA. Sir—surely—are we not told that they are all evil ?

L. Wait a little, Lucilla ; that is difficult ground you are getting upon ; and we must keep to our crystals, till at least we understand what *their* good and evil consist in ; they may help us afterwards to some useful hints about our own. I said that their goodness

consisted chiefly in purity of substance, and perfectness of form : but those are rather the *effects* of their goodness, than the goodness itself. The inherent virtues of the crystals, resulting in these outer conditions, might really seem to be best described in the words we should use respecting living creatures—‘force of heart’ and ‘steadiness of purpose.’ There seem to be in some crystals, from the beginning, an unconquerable purity of vital power, and strength of crystal spirit. Whatever dead substance, unacceptant of this energy, comes in their way, is either rejected, or forced to take some beautiful subordinate form ; the purity of the crystal remains unsullied, and every atom of it bright with coherent energy. Then the second condition is, that from the beginning of its whole structure, a fine crystal seems to have determined that it will be of a certain size and of a certain shape ; it persists in this plan, and completes it. Here is a perfect crystal of quartz for you. It is of an unusual form, and one which it might seem very difficult to build—a pyramid with convex sides, composed of other minor pyramids. But there is not a flaw in its contour throughout ; not one of its myriads of component sides but is as bright as a jeweller’s faceted work (and far finer, if you saw it close). The crystal points are as sharp as javelins ; their edge will cut glass with a touch. Anything more resolute, consummate, determinate in form, cannot be conceived. Here, on the other hand, is a crystal of the same substance, in a perfectly simple type of form—a plain six-sided prism ; but from its base to its point,—and it is nine inches long,—it has never for one instant made up its mind what thickness it will have. It seems to have begun by making itself as thick as it thought possible with the quantity of material at command. Still not being as thick as it would like to be, it has clumsily glued on more substance at one of its sides. Then it has thinned itself, in a panic of economy ; then puffed itself out again ; then starved one side to enlarge another ; then warped itself quite out of its

first line. Opaque, rough-surfaced, jagged on the edge, distorted in the spine, it exhibits a quite human image of decrepitude and dishonor; but the worst of all the signs of its decay and helplessness, is that half-way up, a parasite crystal, smaller, but just as sickly, has rooted itself in the side of the larger one, eating out a cavity round its root, and then growing backwards, or downwards, contrary to the direction of the main crystal. Yet I cannot trace the least difference in purity of substance between the first most noble stone, and this ignoble and dissolute one. The impurity of the last is in its will, or want of will.

MARY. Oh, if we could but understand the meaning of it all!

L. We can understand all that is good for us. It is just as true for us, as for the crystal, that the nobleness of life depends on its consistency,—clearness of purpose,—quiet and ceaseless energy. All doubt, and repenting, and botching, and retouching, and wondering what it will be best to do next, are vice, as well as misery.

MARY (*much wondering*). But must not one repent when one does wrong, and hesitate when one can't see one's way?

L. You have no business at all to do wrong; nor to get into any way that you cannot see. Your intelligence should always be far in advance of your act. Whenever you do not know what you are about, you are sure to be doing wrong.

KATHLEEN. Oh, dear, but I never know what I am about!

L. Very true, Katie, but it is a great deal to know, if you know that. And you find that you have done wrong afterwards; and perhaps some day you may begin to know, or at least, think, what you are about.

ISABEL. But surely people can't do very wrong if they don't know, can they? I mean, they can't be very naughty. They can be wrong, like Kathleen or me, when we make mistakes: but not wrong in the dread-

ful way. I can't express what I mean; but there are two sorts of wrong, are there not?

L. Yes, Isabel; but you will find that the great difference is between kind and unkind wrongs, not between meant and unmeant wrong. Very few people really mean to do wrong,—in a deep sense, none. They only don't know what they are about. Cain did not mean to do wrong when he killed Abel.

(ISABEL *draws a deep breath, and opens her eyes very wide.*)

L. No, Isabel; and there are countless Cains among us now, who kill their brothers by the score a day, not only for less provocation than Cain had, but for *no* provocation,—and merely for what they can make of their bones,—yet do not think they are doing wrong in the least. Then sometimes you have the business reversed, as over in America these last years, where you have seen Abel resolutely killing Cain, and not thinking he is doing wrong. The great difficulty is always to open people's eyes: to touch their feelings, and break their hearts, is easy; the difficult thing is to break their heads. What does it matter, as long as they remain stupid, whether you change their feelings or not? You cannot be always at their elbow to tell them what is right: and they may just do as wrong as before, or worse; and their best intentions merely make the road smooth for them,—you know where, children. For it is not the place itself that is paved with them, as people say so often. You can't pave the bottomless pit; but you may the road to it.

MAY. Well, but if people do as well as they can see how, surely that is the right for them, isn't it?

L. No, May, not a bit of it; right is right, and wrong is wrong. It is only the fool who does wrong, and says he 'did it for the best.' And if there's one sort of person in the world that the Bible speaks harder of than another, it is fools. Their particular and chief way of saying 'There is no God' is this, of declaring that whatever their 'public opinion' may be, is right: and that God's opinion is of no consequence.

MAY. But surely nobody can always know what is right?

L. Yes, you always can, for to-day; and if you do what you see of it to-day, you will see more of it, and more clearly, to-morrow. Here, for instance, you children are at school, and have to learn French, and arithmetic, and music, and several other such things. That is your 'right' for the present; the 'right' for us, your teachers, is to see that you learn as much as you can, without spoiling your dinner, your sleep, or your play; and that what you do learn, you learn well. You all know when you learn with a will, and when you dawdle. There's no doubt of conscience about that, I suppose?

VIOLET. No; but if one wants to read an amusing book, instead of learning one's lesson?

L. You don't call that a 'question,' seriously, Violet? You are then merely deciding whether you will resolutely do wrong or not.

MARY. But, in after life, how many fearful difficulties may arise, however one tries to know or to do what is right!

L. You are much too sensible a girl, Mary, to have felt that, whatever you may have seen. A great many of young ladies' difficulties arise from their falling in love with a wrong person: but they have no business to let themselves fall in love, till they know he is the right one.

DORA. How many thousands ought he to have a year?

L. (*disdaining reply*). There are, of course, certain crises of fortune when one has to take care of oneself, and mind shrewdly what one is about. There is never any real doubt about the path, but you may have to walk very slowly.

MARY. And if one is forced to do a wrong thing by some one who has authority over you?

L. My dear, no one can be forced to do a wrong thing, for the guilt is in the will: but you may any day be forced to do a fatal thing, as you might be forced

to take poison ; the remarkable law of nature in such cases being, that it is always unfortunate *you* who are poisoned, and not the person who gives you the dose. It is a very strange law, but it *is* a law. Nature merely sees to the carrying out of the normal operation of arsenic. She never troubles herself to ask who gave it you. So also you may be starved to death, morally as well as physically, by other people's faults. You are, on the whole, very good children sitting here to-day ;—do you think that your goodness comes all by your own contriving ? or that you are gentle and kind because your dispositions are naturally more angelic than those of the poor girls who are playing, with wild eyes, on the dustheaps in the alleys of our great towns ; and who will one day fill their prisons,—or, better, their graves ? Heaven only knows where they, and we who have cast them there, shall stand at last. But the main judgment question will be, I suppose, for all of us, ' Did you keep a good heart through it ? ' What you were, others may answer for ;—what you tried to be, you must answer for, yourself. Was the heart pure and true—tell us that ?

And so we come back to your sorrowful question, Lucilla, which I put aside a little ago. You would be afraid to answer that your heart *was* pure and true, would not you ?

LUCILLA. Yes, indeed, sir.

L. Because you have been taught that it is all evil—' only evil continually.' Somehow, often as people say that, they never seem, to me, to believe it ? Do you really believe it ?

LUCILLA. Yes, sir ; I hope so.

L. That you have an entirely bad heart ?

LUCILLA (*a little uncomfortable at the substitution of the monosyllable for the dissyllable, nevertheless persisting in her orthodoxy*). Yes, sir.

L. Florrie, I am sure you are tired ; I never like you to stay when you are tired ; but, you know, you must not play with the kitten while we're talking.

FLORRIE. Oh! but I'm not tired; and I'm only nursing her. She'll be asleep in my lap, directly.

L. Stop! that puts me in mind of something I had to show you, about minerals that are like hair. I want a hair out of Tittie's tail.

FLORIE (*quite rude, in her surprise, even to the point of repeating expressions.*) Out of Tittie's tail!

L. Yes; a brown one: Lucilla, you can get at the tip of it nicely, under Florrie's arm; just pull one out for me.

LUCILLA. Oh! but, sir, it will hurt her so!

L. Never mind; she can't scratch you while Florrie is holding her. Now that I think of it, you had better pull out two.

LUCILLA. But then she may scratch Florrie! and it will hurt her so, sir! if you only want brown hairs, wouldn't two of mine do?

L. Would you really rather pull out your own than Tittie's?

LUCILLA. Oh, of course, if mine will do.

L. But that's very wicked, Lucilla!

LUCILLA. Wicked, sir?

L. Yes; if your heart was not so bad, you would much rather pull all the cat's hairs out, than one of your own.

LUCILLA. Oh! but, sir, I didn't mean bad, like that.

L. I believe, if the truth were told, Lucilla, you would like to tie a kettle to Tittie's tail, and hunt her round the playground.

LUCILLA. Indeed, I should not, sir.

L. That's not true, Lucilla; you know it cannot be.

LUCILLA. Sir?

L. Certainly it is not;—how can you possibly speak any truth out of such a heart as you have? It is wholly deceitful.

LUCILLA. Oh! no, no; I don't mean that way; I don't mean that it makes me tell lies, quite out.

L. Only that it tells lies within you?

LUCILLA. Yes.

L. Then, outside of it, you know what is true, and say so; and I may trust the outside of your heart; but within, it is all foul and false. Is that the way?

LUCILLA. I suppose so: I don't understand it, quite.

L. There is no occasion for understanding it; but do you feel it? Are you sure that your heart is deceitful above all things, and desperately wicked?

LUCILLA (*much relieved by finding herself among phrases with which she is acquainted*). Yes, sir. I'm sure of that.

L. (*pensively*). I'm sorry for it, Lucilla?

LUCILLA. So am I, indeed.

L. What are you sorry with, Lucilla?

LUCILLA. Sorry with, sir?

L. Yes; I mean, where do you feel sorry? in your feet?

LUCILLA (*laughing a little*). No, sir, of course.

L. In your shoulders, then?

LUCILLA. No, sir.

L. You are sure of that? Because, I fear, sorrow in the shoulders would not be worth much.

LUCILLA. I suppose I feel it in my heart, if I really am sorry.

L. If you really are! Do you mean to say that you are sure you are utterly wicked, and yet do not care?

LUCILLA. No, indeed; I have cried about it often.

L. Well, then, you are sorry in your heart?

LUCILLA. Yes, when the sorrow is worth anything.

L. Even if it be not, it cannot be anywhere else but there. It is not the crystalline lens of your eyes which is sorry, when you cry?

LUCILLA. No, sir, of course.

L. Then, have you two hearts; one of which is wicked, and the other grieved? or is one side of it sorry for the other side?

LUCILLA (*weary of cross-examination and a little vexed*). Indeed, sir, you know I can't understand it; but you know how it is written—'another law in my members, warring against the law of my mind.'

L. Yes, Lucilla, I know how it is written ; but I do not see that it will help us to know that, if we neither understand what is written, nor feel it. And you will not get nearer to the meaning of one verse, if, as soon as you are puzzled by it, you escape to another, introducing three new words—'law,' 'members,' and 'mind' ; not one of which you at present know the meaning of ; and respecting which, you probably never will be much wiser ; since men like Montesquieu and Locke have spent great part of their lives in endeavoring to explain two of them.

LUCILLA. Oh ! please, sir, ask somebody else.

L. If I thought anyone else could answer better than you, Lucilla, I would : but suppose I try, instead, myself, to explain your feelings to you ?

LUCILLA. Oh, yes ; please do.

L. Mind, I say your 'feelings,' not your 'belief.' For I cannot undertake to explain anybody's beliefs. Still I must try a little, first, to explain the belief also, because I want to draw it to some issue. As far as I understand what you say, or any one else, taught as you have been taught, says, on this matter,—you think that there is an external goodness, a whited-sepulchre kind of goodness, which appears beautiful outwardly, but it is within full of uncleanness : a deep secret guilt, of which we ourselves are not sensible ; and which can only be seen by the Maker of us all. (*Approving murmurs from audience.*)

L. Is it not so with the body as well as the soul ?

(*Looked notes of interrogation.*)

L. A skull, for instance, is not a beautiful thing ?

(*Grave faces, signifying 'Certainly not,' and 'What next ?'*)

L. And if you all could see in each other, with clear eyes, whatever God sees beneath those fair faces of yours, you would not like it ?

(*Murmured 'No's.'*)

L. Nor would it be good for you ?

(*Silence.*)

L. The probability being that what God does not

allow you to see, He does not wish you to see ; nor even to think of ?

(Silence prolonged.)

L. It would not at all be good for you, for instance, whenever you were washing your faces, and braiding your hair, to be thinking of the shapes of the jaw-bones, and of the cartilage of the nose, and of the jagged sutures of the scalp ?

(Resolutely whispered No's.)

L. Still less, to see through a clear glass the daily processes of nourishment and decay ?

(No.)

L. Still less if instead of merely inferior and preparatory conditions of structure, as in the skeleton,—or inferior offices of structure, as in operations of life and death,—there were actual disease in the body ; ghastly and dreadful. You would try to cure it ; but having taken such measures as were necessary, you would not think the cure likely to be promoted by perpetually watching the wounds, or thinking of them. On the contrary, you would be thankful for every moment of forgetfulness : as, in daily health, you must be thankful that your Maker has veiled whatever is fearful in your frame under a sweet and manifest beauty ; and has made it your duty, and your only safety, to rejoice in that, both in yourself and in others :—not indeed concealing, or refusing to believe in sickness, if it come ; but never dwelling on it.

Now, your wisdom and duty touching soul-sickness are just the same. Ascertain clearly what is wrong with you ; and so far as you know any means of mending it, take those means, and have done : when you are examining yourself, never call yourself merely a ‘ sinner,’ that is very cheap abuse ; and utterly useless. You may even get to like it, and be proud of it. But call yourself a liar, a coward, a sluggard, a glutton, or an evil-eyed, jealous wretch, if you indeed find yourself to be in any wise any of these. Take steady means to check yourself in whatever fault you have ascertained, and justly accused yourself of. And as

soon as you are in active way of mending, you will be no more inclined to moan over an undefined corruption. For the rest, you will find it less easy to uproot faults, than to choke them by gaining virtues. Do not think of your faults; still less of others' faults: in every person who comes near you, look for what is good and strong: honor that; rejoice in it, and, as you can, try to imitate it: and your faults will drop off, like dead leaves, when their time comes. If, on looking back, your whole life should seem rugged as a palm tree stem: still, never mind, so long as it has been growing; and has its grand green shade of leaves, and weight of honied fruit, at top. And even if you cannot find much good in yourself at last, think that it does not much matter to the universe either what you were, or are; think how many people are noble, if you cannot be; and rejoice in *their* nobleness. An immense quantity of modern confession of sin, even when honest, is merely a sickly egotism; which will rather gloat over its own evil, than lose the centralization of its interest in itself.

MARY. But then, if we ought to forget ourselves so much, how did the old Greek proverb 'Know thyself' come to be so highly esteemed?

L. My dear, it is the proverb of proverbs; Apollo's proverb, and the sun's;—but do you think you can know yourself by looking *into* yourself? Never. You can know what you are, only by looking *out* of yourself. Measure your own powers with those of others; compare your own interests with those of others; try to understand what you appear to them, as well as what they appear to you; and judge of yourselves, in all things, relatively and subordinately; not positively: starting always with a wholesome conviction of the probability that there is nothing particular about you. For instance, some of you perhaps think you can write poetry. Dwell on your own feelings and doings:—and you will soon think yourselves Tenth Muses; but forget your own feelings; and try, instead, to understand a line or two of Chaucer or

Dante : and you will soon begin to feel yourselves very foolish girls—which is much like the fact.

So, something which befalls you may seem a great misfortune;—you meditate over its effects on you personally ; and begin to think that it is a chastisement, or a warning, or a this or that or the other of profound significance ; and that all the angels in heaven have left their business for a little while, that they may watch its effects on your mind. But give up this ego-tistic indulgence of your fancy ; examine a little what misfortunes, greater a thousandfold, are happening, every second, to twenty times worthier persons : and your self-consciousness will change into pity and humility ; and you will know yourself, so far as to understand that ‘there hath nothing taken thee but what is common to man.’

Now, Lucilla, these are the practical conclusions which any person of sense would arrive at, supposing the texts which relate to the inner evil of the heart were as many, and as prominent, as they are often supposed to be by careless readers. But the way in which common people read their Bibles is just like the way that the old monks thought hedgehogs ate grapes. They rolled themselves (it was said), over and over, where the grapes lay on the ground. What fruit stuck to their spines, they carried off, and ate. So your hedgehoggy readers roll themselves over and over their Bibles, and declare that whatever sticks to their own spines is Scripture ; and that nothing else is. But you can only get the skins of the texts that way. If you want their juice, you must press them in cluster. Now, the clustered texts about the human heart, insist, as a body, not on any inherent corruption in all hearts, but on the terrific distinction between the bad and the good ones. ‘A good man, out of the good treasure of his heart, bringeth forth that which is good ; and an evil man, out of the evil treasure, bringeth forth that which is evil.’ ‘They on the rock are they which, in an honest and good heart, having heard the word, keep it.’ ‘Delight thyself in the Lord, and

He shall give thee the desires of thine heart.' 'The wicked have bent their bow, that they may privily shoot at him that is upright in heart.' And so on; they are countless, to the same effect. And, for all of us, the question is not at all to ascertain how much or how little corruption there is in human nature; but to ascertain whether, out of all the mass of that nature, we are of the sheep or the goat breed; whether we are people of upright heart, being shot at, or people of crooked heart, shooting. And, of all the texts bearing on the subject, this, which is a quite simple and practical order, is the one you have chiefly to hold in mind. 'Keep thy heart with all diligence, for out of it are the issues of life.'

LUCILLA. And yet, how inconsistent the texts seem!

L. Nonsense, Lucilla! do you think the universe is bound to look consistent to a girl of fifteen? Look up at your own room window;—you can just see it from where you sit. I'm glad that it is left open, as it ought to be, in so fine a day. But do you see what a black spot it looks, in the sun-lighted wall?

LUCILLA. Yes, it looks as black as ink.

L. Yet you know it is a very bright room when you are inside of it; quite as bright as there is any occasion for it to be, that its little lady may see to keep it tidy. Well, it is very probable, also, that if you look into your heart from the sun's point of view, it might appear a very black hole indeed: nay, the sun may sometimes think good to tell you that it looks so to Him; but He will come into it, and make it very cheerful for you, for all that, if you don't put the shutters up. And the one question for *you*, remember, is not 'dark or light?' but 'tidy or untidy?' Look well to your sweeping and garnishing; and be sure it is only the banished spirit, or some of the seven wickeder ones at his back, who will still whisper to you that it is all black.

LECTURE VI.

CRYSTAL QUARRELS.

Full conclave, in Schoolroom. There has been a game at crystallization in the morning, of which various account has to be rendered. In particular, everybody has to explain why they were always where they were not intended to be.

L. (*having received and considered the report*). You have got on pretty well, children: but you know these were easy figures you have been trying. Wait till I have drawn you out the plans of some crystals of snow!

MARY. I don't think those will be the most difficult:—they are so beautiful that we shall remember our places better; and then they are all regular, and in stars: it is those twisty oblique ones we are afraid of.

L. Read Carlyle's account of the battle of Leuthen, and learn Friedrich's 'oblique order.' You will 'get it done for once, I think, provided you *can* march as a pair of compasses would.' But remember, when you can construct the most difficult single figures, you have only learned half the game—nothing so much as the half, indeed, as the crystals themselves play it.

MARY. Indeed; what else is there?

L. It is seldom that any mineral crystallizes alone. Usually two or three, under quite different crystalline laws, form together. They do this absolutely without flaw or fault, when they are in fine temper: and observe what this signifies. It signifies that the two, or more, minerals of different natures agree, somehow

between themselves, how much space each will want ; —agree which of them shall give way to the other at their junction ; or in what measure each will accommodate itself to the other's shape ! And then each takes its permitted shape, and allotted share of space ; yielding, or being yielded to, as it builds, till each crystal has fitted itself perfectly and gracefully to its differently-natured neighbor. So that, in order to practise this, in even the simplest terms, you must divide into two parties, wearing different colors ; each must choose a different figure to construct ; and you must form one of these figures through the other, both going on at the same time.

MARY. I thing *we* may, perhaps, manage it ; but I cannot at all understand how the crystals do. It seems to imply so much preconcerting of plan, and so much giving way to each other, as if they really were living.

L. Yes, it implies both concurrence and compromise, regulating all wilfulness of design : and, more curious still, the crystals do *not* always give way to each other. They show exactly the same varieties of temper that human creatures might. Sometimes they yield the required place with perfect grace and courtesy ; forming fantastic, but exquisitely finished groups : and sometimes they will not yield at all ; but fight furiously for their places, losing all shape and honor, and even their own likeness, in the contest.

MARY. But is not that wholly wonderful ? How is it that one never sees it spoken of in books ?

L. The scientific men are all busy in determining the constant laws under which the struggle takes place ; these indefinite humors of the elements are of no interest to them. And unscientific people rarely give themselves the trouble of thinking at all, when they look at stones. Not that it is of much use to think ; the more one thinks, the more one is puzzled.

MARY. Surely it is more wonderful than anything in botany ?

L. Everything has its own wonders ; but, given the

nature of the plant, it is easier to understand what a flower will do, and why it does it, than, given anything we as yet know of stone-nature, to understand what a crystal will do, and why it does it. You at once admit a kind of volition and choice, in the flower; but we are not accustomed to attribute anything of the kind to the crystal. Yet there is, in reality, more likeness to some conditions of human feeling among stones than among plants. There is a far greater difference between kindly-tempered and ill-tempered crystals of the same mineral, than between any two specimens of the same flower: and the friendships and wars of crystals depend more definitely and curiously on their varieties of disposition, than any associations of flowers. Here, for instance, is a good garnet, living with good mica; one rich red, and the other silver white: the mica leaves exactly room enough for the garnet to crystallize comfortably in; and the garnet lies happily in its little white house; fitted to it, like a pholas in its cell. But here are wicked garnets living with wicked mica. See what ruin they make of each other! You cannot tell which is which; the garnets look like dull red stains on the crumbling stone. By the way, I never could understand, if St. Gothard is a real saint, why he can't keep his garnets in better order. These are all under his care; but I suppose there are too many of them for him to look after. The streets of Airolo are paved with them.

MAY. Paved with garnets?

L. With mica-slate and garnets; I broke this bit out of a paving stone. Now garnets and mica are natural friends, and generally fond of each other; but you see how they quarrel when they are ill brought up. So it is always. Good crystals are friendly with almost all other good crystals, however little they chance to see of each other, or however opposite their habits may be; while wicked crystals quarrel with one another, though they may be exactly alike in habits, and see each other continually. And of course the wicked crystals quarrel with the good ones.

ISABEL. Then do the good ones get angry?

L. No, never: they attend to their own work and life; and live it as well as they can, though they are always the sufferers. Here, for instance, is a rock-crystal of the purest race and finest temper, who was born, unhappily for him, in a bad neighborhood, near Beaufort in Savoy; and he has had to fight with vile calcareous mud all his life. See here, when he was but a child, it came down on him, and nearly buried him; a weaker crystal would have died in despair; but he only gathered himself together, like Hercules against the serpents, and threw a layer of crystal over the clay; conquered it,—imprisoned it,—and lived on. Then, when he was a little older, came more clay; and poured itself upon him here, at the side; and he has laid crystal over that, and lived on, in his purity. Then the clay came on at his angles, and tried to cover them, and round them away; but upon that he threw out buttress-crystals at his angles, all as true to his own central line as chapels round a cathedral apse; and clustered them round the clay; and conquered it again. At last the clay came on at his summit, and tried to blunt his summit; but he could not endure that for an instant; and left his flanks all rough, but pure; and fought the clay at his crest, and built crest over crest, and peak over peak, till the clay surrendered at last: and here is his summit, smooth and pure, terminating a pyramid of alternate clay and crystal, half a foot high!

LILY. Oh, how nice of him! What a dear, brave crystal! But I can't bear to see his flanks all broken, and the clay within them.

L. Yes; it was an evil chance for him, the being born to such contention; there are some enemies so base that even to hold them captive is a kind of dishonor. But look, here has been quite a different kind of struggle: the adverse power has been more orderly, and has fought the pure crystal in ranks as firm as its own. This is not mere rage and impediment of crowded evil: here is a disciplined hostility; army against army.

LILY. Oh, but this is much more beautiful!

L. Yes, for both the elements have true virtue in them; it is a pity they are at war, but they war grandly.

MARY. But is this the same clay as in the other crystal?

L. I used the word clay for shortness. In both, the enemy is really limestone, but in the first, disordered, and mixed with true clay; while, here, it is nearly pure, and crystallizes into its own primitive form, the oblique six-sided one, which you know: and out of these it makes regiments; and then squares of the regiments, and so charges the rock crystal, literally in square against column.

ISABEL. Please, please, let me see. And what does the rock crystal do?

L. The rock crystal seems able to do nothing. The calcite cuts it through at every charge. Look here,—and here! The loveliest crystal in the whole group is hewn fairly into two pieces.

ISABEL. Oh, dear; but is the calcite harder than the crystal then?

L. No, softer. Very much softer.

MARY. But then, how can it possibly cut the crystal?

L. It did not really cut it, though it passes through it. The two were formed together, as I told you; but no one knows how. Still, it is strange that this hard quartz has in all cases a good-natured way with it, of yielding to everything else. All sorts of soft things make nests for themselves in it; and it never makes a nest for itself in anything. It has all the rough outside work; and every sort of cowardly and weak mineral can shelter itself within it. Look; these are hexagonal plates of mica; if they were outside of this crystal they would break, like burnt paper; but they are inside of it,—nothing can hurt them,—the crystal has taken them into its very heart, keeping all their delicate edges as sharp as if they were under water, instead of bathed in rock. Here is a piece of branched silver: you can bend it with a touch of your finger, but the stamp of its every fibre is on the rock in which it lay, as if the quartz had been as soft as wool.

LILY. Oh, the good, good quartz ! But does it never get inside of anything ?

L. As it is a little Irish girl who asks, I may perhaps answer, without being laughed at, that it gets inside of itself sometimes. But I don't remember seeing quartz make a nest for itself in anything else.

ISABEL. Please, there was something I heard you talking about, last term, with Miss Mary. I was at my lessons, but I heard something about nests ; and I thought it was birds' nests ; and I couldn't help listening ; and then, I remember, it was about 'nests of quartz in granite.' I remember, because I was so disappointed !

L. Yes, mousie, you remember quite rightly ; but I can't tell you about those nests to-day, nor perhaps to-morrow : but there's no contradiction between my saying then, and now ; I will show you that there is not, some day. Will you trust me meanwhile ?

ISABEL. Won't I !

L. Well, then, look, lastly, at this piece of courtesy in quartz ; it is on a small scale, but wonderfully pretty. Here is nobly born quartz living with a green mineral, called epidote ; and they are immense friends. Now, you see, a comparatively large and strong quartz-crystal, and a very weak and slender little one of epidote, have begun to grow, close by each other, and sloping unluckily towards each other, so that at last they meet. They cannot go on growing together ; the quartz crystal is five times as thick, and more than twenty times as strong,* as the epidote ; but he stops at once, just in the very crowning moment of his life, when he is building his own summit ! He lets the pale little film of epidote grow right past him ; stopping his own summit for it ; and he never himself grows any more.

LILY (*after some silence of wonder*). But is the quartz *never* wicked then ?

L. Yes, but the wickedest quartz seems good-na-

* Quartz is not much harder than epidote ; the strength is only supposed to be in some proportion to the squares of the diameters.

tured, compared to other things. Here are two very characteristic examples; one is good quartz, living with good pearlspar, and the other, wicked quartz, living with wicked pearlspar. In both, the quartz yields to the soft carbonate of iron: but, in the first place, the iron takes only what it needs of room; and is inserted into the planes of the rock crystal with such precision, that you must break it away before you can tell whether it really penetrates the quartz or not; while the crystals of iron are perfectly formed, and have a lovely bloom on their surface besides. But here, when the two minerals quarrel, the unhappy quartz has all its surfaces jagged and torn to pieces; and there is not a single iron crystal whose shape you can completely trace. But the quartz has the worst of it, in both instances.

VIOLET. Might we look at that piece of broken quartz again, with the weak little film across it? it seems such a strange lovely thing, like the self-sacrifice of a human being.

L. The self-sacrifice of a human being is not a lovely thing, Violet. It is often a necessary and noble thing; but no form nor degree of suicide can be ever lovely.

VIOLET. But self-sacrifice is not suicide!

L. What is it then?

VIOLET. Giving up one's self for another.

L. Well; and what do you mean by 'giving up one's self'?

VIOLET. Giving up one's tastes, one's feelings, one's time, one's happiness, and so on, to make others happy.

L. I hope you will never marry anybody, Violet, who expects you to make him happy in that way.

VIOLET (*hesitating*). In what way?

L. By giving up your tastes, and sacrificing your feelings, and happiness.

VIOLET. No, no, I don't mean that; but you know, for other people, one must.

L. For people who don't love you, and whom you

know nothing about? Be it so; but how does this 'giving up' differ from suicide then?

VIOLET. Why, giving up one's pleasures is not killing one's self?

L. Giving up wrong pleasure is not; neither is it self-sacrifice, but self-culture. But 'giving up right pleasure is. If you surrender the pleasure of walking, your foot will wither; you may as well cut it off: if you surrender the pleasure of seeing, your eyes will soon be unable to bear the light; you may as well pluck them out. And to maim yourself is partly to kill yourself. Do but go on maiming, and you will soon slay.

VIOLET. But why do you make me think of that verse then, about the foot and the eye?

L. You are indeed commanded to cut off and to pluck out, if foot or eye offend you; but why *should* they offend you?

VIOLET. I don't know; I never quite understood that.

L. Yet it is a sharp order; one needing to be well understood if it is 'to be well obeyed! When Helen sprained her ankle the other day, you saw how strongly it had to be bandaged; that is to say, prevented from all work, to recover it. But the bandage was not 'lovely.'

VIOLET. No, indeed.

L. And if her foot had been crushed, or diseased, or snake-bitten, instead of sprained, it might have been needful to cut it off. But the amputation would not have been 'lovely.'

VIOLET. No.

L. Well, if eye and foot are dead already, and betray you;—if the light that is in you be darkness, and your feet run into mischief, or are taken in the snare,—it is indeed time to pluck out, and cut off, I think: but, so crippled, you can never be what you might have been otherwise. You enter into life, at best, halt or maimed; and the sacrifice is not beautiful, though necessary.

VIOLET (*after a pause*). But when one sacrifices one's self for others?

L. Why not rather others for you?

VIOLET. Oh! but I couldn't bear that.

L. Then why should they bear it?

DORA (*bursting in, indignant*). And Thermopylæ; and Protesilaus, and Marcus Curtius, and Arnold de Winkelried, and Iphigenia, and Jephthah's daughter?

L. (*sustaining the indignation unmoved*). And the Samaritan woman's son?

DORA. Which Samaritan woman's?

L. Read 2 Kings vi. 29.

DORA (*obeys*). How horrid. As if we meant anything like that!

L. You don't seem to me to know in the least what you do mean, children. What practical difference is there between 'that,' and what you are talking about? The Samaritan children had no voice of their own in the business, it is true; but neither had Iphigenia: the Greek girl was certainly neither boiled, nor eaten; but that only makes a difference in the dramatic effect; not in the principle.

DORA (*biting her lip*). Well, then, tell us what we ought to mean. As if you didn't teach it all to us, and mean it yourself, at this moment, more than we do, if you wouldn't be tiresome!

L. I mean, and always have meant, simply this, Dora;—that the will of God respecting us is that we shall live by each other's happiness, and life; not by each other's misery, or death. I made you read that verse which so shocked you just now, because the relations of parent and child are typical of all beautiful human help. A child may have to die for its parents; but the purpose of Heaven is that it shall rather live for them;—that, not by its sacrifice, but by its strength, its joy, its force of being, it shall be to them renewal of strength; and as the arrow in the hand of the giant. So it is in all other right relations. Men help each other by their joy, not by their sorrow. They are not

intended to slay themselves for each other, but to strengthen themselves for each other. And among the many apparently beautiful things which turn, through mistaken use, to utter evil, I am not sure but that the thoughtlessly meek and self-sacrificing spirit of good men must be named as one of the fatallest. They have so often been taught that there is a virtue in mere suffering, as such; and foolishly to hope that good may be brought by Heaven out of all on which Heaven itself has set the stamp of evil, that we may avoid it,—that they accept pain and defeat as if these were their appointed portion; never understanding that their defeat is not the less to be mourned because it is more fatal to their enemies than to them. The one thing that a good man has to do, and to see done, is justice; he is neither to slay himself nor others causelessly: so far from denying himself, since he is pleased by good, he is to do his utmost to get his pleasure accomplished. And I only wish there were strength, fidelity, and sense enough, among the good Englishmen of this day, to render it possible for them to band together in a vowed brotherhood, to enforce, by strength of heart and hand, the doing of human justice among all who came within their sphere. And finally, for your own teaching, observe, although there may be need for much self-sacrifice and self-denial in the correction of faults of character, the moment the character is formed, the self-denial ceases. Nothing is really well done, which it costs you pain to do.

VIOLET. But surely, sir, you are always pleased with us when we try to please others, and not ourselves?

L. My dear child, in the daily course and discipline of right life, we must continually and reciprocally submit and surrender in all kind and courteous and affectionate ways: and these submissions and ministries to each other, of which you all know (none better) the practice and the preciousness, are as good for the yielder as the receiver: they strengthen and perfect as much as they soften and refine. But the real sacri-

fice of all our strength, or life, or happiness to others (though it may be needed, and though all brave creatures hold their lives in their hand, to be given, when such need comes, as frankly as a soldier gives his life in battle), is yet always a mournful and momentary necessity ; not the fulfilment of the continuous law of being. Self-sacrifice which is sought after, and triumphed in, is usually foolish ; and calamitous in its issue : and by the sentimental proclamation and pursuit of it, good people have not only made most of their own lives useless, but the whole framework of their religion so hollow, that at this moment, while the English nation, with its lips, pretends to teach every man to 'love his neighbor as himself,' with its hands and feet it clutches and tramples like a wild beast ; and practically lives, every soul of it that can, on other people's labor. Briefly, the constant duty of every man to his fellows is to ascertain his own powers and special gifts ; and to strengthen them for the help of others. Do you think Titian would have helped the world better by denying himself, and not painting ; or Casella by denying himself, and not singing ? The real virtue is to be ready to sing the moment people ask us ; as he was, even in purgatory. The very word 'virtue' means not 'conduct' but 'strength,' vital energy in the heart. Were not you reading about that group of words beginning with V,—vital, virtuous, vigorous, and so on,—in Max Muller, the other day, Sibyl ? Can't you tell the others about it ?

SIBYL. No, I can't ; will you tell us, please ?

L. Not now, it is too late. Come to me some idle time to-morrow, and I'll tell you about it, if all's well. But the gist of it is, children, that you should at least know two Latin words ; recollect that 'mors' means death and delaying ; and 'vita' means life and growing ; and try always, not to mortify yourselves, but to vivify yourselves.

VIOLET. But, then, are we not to mortify our earthly affections ? and surely we are to sacrifice ourselves, at least in God's service, if not in man's ?

L. Really, Violet, we are getting too serious. I've given you enough ethics for one talk, I think! Do let us have a little play. Lily, what were you so busy about, at the ant-hill in the wood, this morning?

LILY. Oh, it was the ants who were busy, not I; I was only trying to help them a little.

L. And they wouldn't be helped, I suppose?

LILY. No, indeed. I can't think why ants are always so tiresome, when one tries to help them! They were carrying bits of stick, as fast as they could, through a piece of grass; and pulling and pushing, *so* hard; and tumbling over and over,—it made one quite pity them; so I took some of the bits of stick, and carried them forward a little, where I thought they wanted to put them; but instead of being pleased, they left them directly, and ran about looking quite angry and frightened; and at last ever so many of them got up my sleeves, and bit me all over, and I had to come away.

L. I couldn't think what you were about. I saw your French grammar lying on the grass behind you, and thought perhaps you had gone to ask the ants to hear you a French verb.

ISABEL. Ah! but you didn't, though!

L. Why not, Isabel? I knew, well enough, Lily couldn't learn that verb by herself.

ISABEL. No; but the ants couldn't help her.

L. Are you sure the ants could not have helped you, Lily?

LILY (*thinking*). I ought to have learned something from them, perhaps.

L. But none of them left their sticks to help you through the irregular verb?

LILY. No, indeed. (*Laughing, with some others.*)

L. What are you laughing at, children? I cannot see why the ants should not have left their tasks to help Lily in her's,—since here is Violet thinking she ought to leave *her* tasks, to help God in His. Perhaps, however, she takes Lily's more modest view, and

thinks only that 'He ought to learn something from her.'

(*Tears in VIOLET'S eyes.*)

DORA (*scarlet*). It's too bad—it's a shame :—poor Violet !

L. My dear children, there's no reason why one should be so red, and the other so pale, merely because you are made for a moment to feel the absurdity of a phrase which you have been taught to use, in common with half the religious world. There is but one way in which man can ever help God—that is, by letting God help him : and there is no way in which his name is more guiltily taken in vain, than by calling the abandonment of our own work, the performance of His.

God is a kind Father. He sets us all in the places where He wishes us to be employed ; and that employment is truly 'our Father's business.' He chooses work for every creature which will be delightful to them, if they do it simply and humbly. He gives us always strength enough, and sense enough, for what He wants us to do ; if we either tire ourselves or puzzle ourselves, it is our own fault. And we may always be sure, whatever we are doing, that we cannot be pleasing Him, if we are not happy ourselves. Now, away with you, children ; and be as happy as you can. And when you cannot, at least don't plume yourselves upon pouting.

LECTURE VII.

HOME VIRTUES.

By the fireside, in the Drawing-room. Evening.

DORA. Now, the curtains are drawn, and the fire's bright, and here's your armchair—and you're to tell us all about what you promised.

L. All about what?

DORA. All about virtue.

KATHLEEN. Yes, and about the words that begin with V.

L. I heard you singing about a word that begins with V, in the playground, this morning, Miss Katie.

KATHLEEN. Me singing!

MAY. Oh tell us—tell us.

L. 'Vilikens and his——'

KATHLEEN (*stopping his mouth*). Oh! please don't. Where were you?

ISABEL. I'm sure I wish I had known where he was! We lost him among the rhododendrons, and I don't know where he got to; oh, you naughty—naughty—(*climbs on his knee*).

DORA. Now, Isabel, we really want to talk.

L. I don't.

DORA. Oh, but you must. You promised, you know.

L. Yes, if all was well: but all's ill. I'm tired, and cross; and I won't.

DORA. You're not a bit tired, and you're not crosser than two sticks; and we'll make you talk, if you were crosser than six. Come here, Egypt; and get on the other side of him.

(EGYPT *takes up a commanding position near the hearth brush.*)

DORA (*reviewing her forces*). Now, Lily, come and sit on the rug in front.

(*LILY does as she is bid.*)

L. (*seeing he has no chance against the odds*). Well, well; but I'm really tired. Go and dance a little, first; and let me think.

DORA. No; you mustn't think. You will be wanting to make us think next; that will be tiresome.

L. Well, go and dance first, to get quit of thinking; and then I'll talk as long as you like.

DORA. Oh, but we can't dance to-night. There isn't time; and we want to hear about virtue.

L. Let me see a little of it first. Dancing is the first of girl's virtues.

EGYPT. Indeed! And the second?

L. Dressing.

EGYPT. Now, you needn't say that! I mended that tear the first thing before breakfast this morning.

L. I cannot otherwise express the ethical principle, Egypt; whether you have mended your gown or not.

DORA. Now don't be tiresome. We really must hear about virtue, please; seriously.

L. Well. I'm telling you about it, as fast as I can.

DORA. What! the first of girls' virtues is dancing?

L. More accurately, it is wishing to dance, and not wishing to tease, nor hear about virtue.

DORA (*to EGYPT*). Isn't he cross?

EGYPT. How many balls must we go to in the season, to be perfectly virtuous?

L. As many as you can without losing your color. But I did not say you should wish to go to balls. I said you should be always wanting to dance.

EGYPT. So we do; but everybody says it is very wrong.

L. Why, Egypt, I thought—

¹ There was a lady once,
That would not be a queen,—that would she not,
For all the mud in Egypt.²

You were complaining the other day of having to go out a great deal oftener than you liked.

EGYPT. Yes, so I was ; but then, it isn't to dance. There's no room to dance : it's—(*Pausing to consider what it is for*).

L. It is only to be seen, I suppose. Well, there's no harm in that. Girls ought to like to be seen.

DORA (*her eyes flashing*). Now, you don't mean that ; and you're too provoking ; and we won't dance again, for a month.

L. It will answer every purpose of revenge, Dora, if you only banish me to the library ; and dance by yourselves ; but I don't think Jessie and Lily will agree to that. You like me to see you dancing, don't you, Lily ?

LILY. Yes, certainly,—when we do it rightly.

L. And besides, Miss Dora, if young ladies really do not want to be seen, they should take care not to let their eyes flash when they dislike what people say : and, more than that, it is all nonsense from beginning to end, about not wanting to be seen. I don't know any more tiresome flower in the borders than your especially 'modest' snowdrop ; which one always has to stoop down and take all sorts of tiresome trouble with, and nearly break its poor little head off, before you can see it ; and then, half of it is not worth seeing. Girls should be like daisies ; nice and white, with an edge of red, if you look close ; making the ground bright wherever they are ; knowing simply and quietly that they do it, and are meant to do it, and that it would be very wrong if they didn't do it. Not want to be seen, indeed ! How long were you in doing your back hair, this afternoon, Jessie ?

(JESSIE *not immediately answering*, DORA *comes to her assistance*.)

JESSIE (*putting her finger up*). Now, Dorothy, you needn't talk, you know !

L. I know she needn't, Jessie ; I shall ask her about those dark plaits presently. (DORA *looks round to see if there is any way open for retreat*.) But never mind ; it was worth the time, whatever it was ; and nobody will ever mistake that golden wreath for a

chignon : but if you don't want it to be seen, you had better wear a cap.

JESSIE. Ah, now, are you really going to do nothing but play? And we all have been thinking, and thinking, all day ; and hoping you would tell us things ; and now—!

L. And now I am telling you things, and true things, and things good for you ; and you won't believe me. You might as well have let me go to sleep at once, as I wanted to. (*Endeavors again to make himself comfortable.*)

ISABEL. Oh, no, no, you sha'n't go to sleep, you naughty !—Kathleen, come here.

L. (*knowing what he has to expect if KATHLEEN comes*). Get away, Isabel, you're too heavy. (*Sitting up.*) What have I been saying?

DORA. I do believe he has been asleep all the time ! You never heard anything like the things you've been saying.

L. Perhaps not. If you have heard them, and anything like them, it is all I want.

EGYPT. Yes, but we don't understand, and you know we don't ; and we want to.

L. What did I say first?

DORA. That the first virtue of girls was wanting to go to balls.

L. I said nothing of the kind.

JESSIE. 'Always wanting to dance,' you said.

L. Yes, and that's true. Their first virtue is to be intensely happy ;—so happy that they don't know what to do with themselves for happiness,—and dance, instead of walking. Don't you recollect 'Louisa,'

'No fountain from a rocky cave
E'er tripped with foot so free ;
She seemed as happy as a wave
That dances on the sea.'

A girl is always like that, when everything's right with her.

VIOLET. But, surely, one must be sad sometimes?

L. Yes, Violet ; and dull sometimes, and stupid

sometimes, and cross sometimes. What must be, must ; but it is always either our own fault, or somebody else's. The last and worst thing that can be said of a nation is, that it has made its young girls sad, and weary.

MAY. But I am sure I have heard a great many good people speak against dancing?

L. Yes, May ; but it does not follow they were wise as well as good. I suppose they think Jeremiah liked better to have to write Lamentations for his people, than to have to write that promise for them, which everybody seems to hurry past, that they may get on quickly to the verse about Rachel weeping for her children ; though the verse they pass is the counter blessing to that one : ' Then shall the virgin rejoice in the dance ; and both young men and old together ; and I will turn their mourning into joy.'

(The children get very serious, but look at each other, as if pleased.)

MARY. They understand now : but, do you know what you said next?

L. Yes ; I was not more than half asleep. I said their second virtue was dressing.

MARY. Well ! what did you mean by that ?

L. What do *you* mean by dressing ?

MARY. Wearing fine clothes.

L. Ah ! there's the mistake. I mean wearing plain ones.

MARY. Yes, I daresay ! but that's not what girls understand by dressing, you know.

L. I can't help that. If they understand by dressing buying dresses, perhaps they understand by drawing, buying pictures. But when I hear them say they can draw, I understand that they can make a drawing ; and when I hear them say they can dress, I understand that they can make a dress : and—which is quite as difficult—wear one.

DORA. I'm not sure about the making ; for the wearing, we can all wear them—out, before anybody expects it.

EGYPT (*aside to L. piteously*). Indeed I have mended that torn flounce quite neatly; look if I haven't!

L. (*aside, to EGYPT*). All right; don't be afraid. (*Aloud, to DORA*.) Yes, doubtless; but you know that is only a slow way of *undressing*.

DORA. Then, we are all to learn dress-making, are we?

L. Yes; and always to dress yourselves beautifully—not finely, unless on occasion; but then very finely and beautifully too. Also, you are to dress as many other people as you can; and to teach them how to dress, if they don't know; and to consider every ill-dressed woman or child whom you see anywhere, as a personal disgrace; and to get at them, somehow, until everybody is as beautifully dressed as birds.

(*Silence; the children drawing their breaths hard, as if they had come from under a shower bath.*)

L. (*seeing objections begin to express themselves in the eyes*). Now you needn't say you can't; for you can: and it's what you were meant to do, always; and to dress your houses, and your gardens, too; and to do very little else, I believe, except singing; and dancing, as we said, of course: and—one thing more.

DORA. Our third and last virtue, I suppose?

L. Yes; on Violet's system of triplicities.

DORA. Well, we are prepared for anything now. What is it?

L. Cooking.

DORA. Cardinal, indeed! If only Beatrice were here with her seven handmaids, that she might see what a fine eighth we had found for her!

MARY. And the interpretation? What does 'cooking' mean?

L. It means the knowledge of Medea, and of Circe, and of Calypso, and of Helen, and of Rebekah, and of the Queen of Sheba. It means the knowledge of all herbs, and fruits, and balms, and spices; and of all that is healing and sweet in fields and groves, and savory in meats; it means carefulness, and inventive-

ness, and watchfulness, and willingness, and readiness of appliance; it means the economy of your great-grandmothers, and the science of modern chemists; it means much tasting, and no wasting; it means English thoroughness, and French art, and Arabian hospitality; and it means, in fine, that you are to be perfectly and always, 'ladies'—'loaf-givers'; and, as you are to see, imperatively, that everybody has something pretty to put on,—so you are to see, yet more imperatively, that everybody has something nice to eat.

(Another pause, and long drawn breath.)

DORA *(slowly recovering herself)* to EGYPT. We had better have let him go to sleep, I think, after all!

L. You had better let the younger ones go to sleep now: for I haven't half done.

ISABEL *(panic struck)*. Oh! please, please! just one quarter of an hour.

L. No, Isabel; I cannot say what I've got to say in a quarter of an hour; and it is too hard for you besides:—you would be lying awake, and trying to make it out, half the night. That will never do.

ISABEL. Oh, please!

L. It would please me exceedingly, mousie: but there are times when we must both be displeased; more's the pity. Lily may stay for half an hour, if she likes.

LILY. I can't; because Isey never goes to sleep, if she is waiting for me to come.

ISABEL. Oh, yes, Lily, I'll go to sleep to-night, I will, indeed.

LILY. Yes, it's very likely, Isey, with those fine round eyes! *(To L.)* You'll tell me something of what you've been saying, to-morrow, won't you?

L. No, I won't, Lily. You must choose. It's only in Miss Edgeworth's novels that one can do right, and have one's cake and sugar afterwards, as well (not that I consider the dilemma, to-night, so grave).

(LILY, sighing, takes Isabel's hand.)

Yes, Lily dear, it will be better, in the outcome of it, so, than if you were to hear all the talks that ever

were talked, and all the stories that ever were told.
Good-night.

*(The door leading to the condemned cells of the
Dormitory closes on LILY, ISABEL, FLORIE,
and other diminutive and submissive victims.)*

JESSIE *(after a pause)*. Why, I thought you were so fond of Miss Edgeworth!

L. So I am; and so you all ought to be. I can read her over and over again, without ever tiring; there's no one whose every page is so full, and so delightful; no one who brings you into the company of pleasanter or wiser people; no one who tells you more truly how to do right. And it is very nice, in the midst of a wild world, to have the very ideal of poetical justice done always to one's hand:—to have everybody found out, who tells lies; and everybody decorated with a red ribbon who doesn't; and to see the good Laura, who gave away her half sovereign, receiving a grand ovation from an entire dinner party disturbed for the purpose; and poor, dear, little Rosamond, who chooses purple jars instead of new shoes, left at last without either her shoes or her bottle. But it isn't life: and, in the way children might easily understand it, it isn't morals.

JESSIE. How do you mean we might understand it?

L. You might think Miss Edgeworth meant that the right was to be done mainly because one was always rewarded for doing it. It is an injustice to her to say that: her heroines always do right simply for its own sake, as they should; and her examples of conduct and motive are wholly admirable. But her representation of events is false and misleading. Her good characters never are brought into the deadly trial of goodness,—the doing right, and suffering for it, quite finally. And that is life, as God arranges it. 'Taking up one's cross' does not at all mean having ovations at dinner parties, and being put over everybody else's head.

DORA. But what *does* it mean then? That is just

what we couldn't understand, when you were telling us about not sacrificing ourselves, yesterday.

L. My dear, it means simply that you are to go the road which you see to be the straight one; carrying whatever you find is given you to carry, as well and stoutly as you can; without making faces, or calling people to come and look at you. Above all, you are neither to load, nor unload, yourself; nor cut your cross to your own liking. Some people think it would be better for them to have it large; and many, that they could carry it much faster if it were small; and even those who like it largest are usually very particular about its being ornamental, and made of the best ebony. But all that you have really to do is to keep your back as straight as you can; and not think about what is upon it—above all, not to boast of what is upon it. The real and essential meaning of 'virtue' is in that straightness of back. Yes; you may laugh, children, but it is. You know I was to tell you about the words that began with V. Sibyl, what does 'virtue' mean, literally?

SIBYL. Does it mean courage?

L. Yes; but a particular kind of courage. It means courage of the nerve; vital courage. That first syllable of it, if you look in Max Müller, you will find really means 'nerve,' and from it come 'vis,' and 'vir,' and 'virgin' (through vireo), and the connected word 'virga'—'a rod;'—the green rod, or springing bough of a tree, being the type of perfect human strength, both in the use of it in the Mosaic story, when it becomes a serpent, or strikes the rock; or when Aaron bears its almonds; and in the metaphorical expressions, the 'Rod out of the stem of Jesse,' and the 'Man whose name is the Branch,' and so on. And the essential idea of real virtue is that of a vital human strength, which instinctively, constantly, and without motive, does what is right. You must train men to this by habit, as you would the branch of a tree; and give them instincts and manners (or morals) of purity, justice, kindness, and courage. Once rightly trained,

they act as they should, irrespectively of all motive, of fear, or of reward. It is the blackest sign of putrescence in a national religion, when men speak as if it were the only safeguard of conduct, and assume that, but for the fear of being burned, or for the hope of being rewarded, everybody would pass their lives in lying, stealing, and murdering. I think quite one of the notablest historical events of this century (perhaps the very notablest), was that council of clergymen, horror-struck at the idea of any diminution in our dread of hell, at which the last of English clergymen whom one would have expected to see in such a function, rose as the devil's advocate; to tell us how impossible it was we could get on without him.

VIOLET (*after a pause*). But, surely, if people weren't afraid—(*hesitates again*).

L. They should be afraid of doing wrong, and of that only, my dear. Otherwise, if they only don't do wrong for fear of being punished, they *have* done wrong in their hearts, already.

VIOLET. Well, but surely, at least one ought to be afraid of displeasing God; and one's desire to please Him should be one's first motive?

L. He never would be pleased with us, if it were, my dear. When a father sends his son out into the world—suppose as an apprentice—fancy the boy's coming home at night, and saying, 'Father, I could have robbed the till to-day; but I didn't, because I thought you wouldn't like it.' Do you think the father would be particularly pleased?

(VIOLET *is silent*.)

He would answer, would he not, if he were wise and good, 'My boy, though you had no father, you must not rob tills'? And nothing is ever done so as really to please our Great Father, unless we would also have done it, though we had had no Father to know of it.

VIOLET (*after long pause*). But, then, what continual threatenings, and promises of reward there are!

L. And how vain both! with the Jews, and with all of us. But the fact is, that the threat and promise

are simply statements of the Divine law, and of its consequences. The fact is truly told you,—make what use you may of it : and as collateral warning, or encouragement, or comfort, the knowledge of future consequences may often be helpful to us ; but helpful chiefly to the better state when we can act without reference to them. And there's no measuring the poisoned influence of that notion of future reward on the mind of Christian Europe, in the early ages. Half the monastic system rose out of that, acting on the occult pride and ambition of good people (as the other half of it came of their follies and misfortunes). There is always a considerable quantity of pride, to begin with, in what is called 'giving one's self to God.' As if one had ever belonged to anybody else !

DORA. But, surely, great good has come out of the monastic system—our books,—our sciences—all saved by the monks ?

L. Saved from what, my dear ? From the abyss of misery and ruin which the false Christianity allowed the whole active world to live in. When it had become the principal amusement, and the most admired art, of Christian men, to cut one another's throats, and burn one another's towns ; of course the few feeble or reasonable persons left, who desired quiet, safety, and kind fellowship, got into cloisters ; and the gentlest, thoughtfullest, noblest men and women shut themselves up, precisely where they could be of least use. They are very fine things, for us painters, now, —the towers and white arches upon the tops of the rocks ; always in places where it takes a day's climbing to get at them ; but the intense tragi-comedy of the thing, when one thinks of it, is unspeakable. All the good people of the world getting themselves hung up out of the way of mischief, like Bailie Nicol Jarvie ; —poor little lambs, as it were, dangling there for the sign of the Golden Fleece ; or like Socrates in his basket in the 'Clouds' ! (I must read you that bit of Aristophanes again, by the way.) And believe me, children, I am no warped witness, as far as regards

monasteries; or if I am, it is in their favor. I have always had a strong leaning that way; and have pensively shivered with Augustines at St. Bernard; and happily made hay with Franciscans at Fesolé; and sat silent with Carthusians in their little gardens, south of Florence; and mourned through many a day-dream, at Melrose and Bolton. But the wonder is always to me, not how much, but how little, the monks have, on the whole, done, with all that leisure, and all that good-will! What nonsense monks characteristically wrote;—what little progress they made in the sciences to which they devoted themselves as a duty,—medicine especially; and, last and worst, what depths of degradation they can sometimes see one another, and the population round them, sink into; without either doubting their system, or reforming it!

(*Seeing questions rising to lips.*) Hold your little tongues, children; it's very late, and you'll make me forget what I've to say. Fancy yourselves in pews, for five minutes. There's one point of possible good in the conventual system, which is always attractive to young girls; and the idea is a very dangerous one;—the notion of a merit, or exalting virtue, consisting in a habit of meditation on the 'things above,' or things of the next world. Now it is quite true, that a person of beautiful mind, dwelling on whatever appears to them most desirable and lovely in a possible future, will not only pass their time pleasantly, but will even acquire, at last, a vague and wildly gentle charm of manner and feature, which will give them an air of peculiar sanctity in the eyes of others. Whatever real or apparent good there may be in this result, I want you to observe, children, that we have no real authority for the reveries to which it is owing. We are told nothing distinctly of the heavenly world; except that it will be free from sorrow, and pure from sin. What is said of pearl gates, golden floors, and the like, is accepted as merely figurative by religious enthusiasts themselves; and whatever they pass their time in conceiving, whether of the happiness of risen souls,

of their intercourse, or of the appearance and employment of the heavenly powers, is entirely the product of their own imagination ; and as completely and distinctly a work of fiction, or romantic invention, as any novel of Sir Walter Scott's. That the romance is founded on religious theory or doctrine ;—that no disagreeable or wicked persons are admitted into the story ;—and that the inventor fervently hopes that some portion of it may hereafter come true, does not in the least alter the real nature of the effort or enjoyment.

Now, whatever indulgence may be granted to amiable people for pleasing themselves in this innocent way, it is beyond question, that to seclude themselves from the rough duties of life, merely to write religious romances, or, as in most cases, merely to dream them, without taking so much trouble as is implied in writing, ought not to be received as an act of heroic virtue. But, observe, even in admitting thus much, I have assumed that the fancies are just and beautiful, though fictitious. Now what right have any of us to assume that our own fancies will assuredly be either the one or the other ? That they delight us, and appear lovely to us, is no real proof of its not being wasted time to form them : and we may surely be led somewhat to distrust our judgment of them by observing what ignoble imaginations have sometimes sufficiently, or even enthusiastically, occupied the hearts of others. The principal source of the spirit of religious contemplation is the East ; now I have here in my hand a Byzantine image of Christ, which, if you will look at it seriously, may, I think, at once and forever render you cautious in the indulgence of a merely contemplative habit of mind. Observe, it is the fashion to look at such a thing only as a piece of barbarous art ; that is the smallest part of its interest. What I want you to see, is the baseness and falseness of a religious state of enthusiasm, in which such a work could be dwelt upon with pious pleasure. That a figure, with two small round black beads for eyes ; a gilded face,

deep cut into horrible wrinkles; an open gash for a mouth, and a distorted skeleton for a body, wrapped about, to make it fine, with striped enamel of blue and gold;—that such a figure, I say, should ever have been thought helpful towards the conception of a Redeeming Deity, may make you, I think, very doubtful, even of the Divine approval,—much more of the Divine inspiration,—of religious reverie in general. You feel, doubtless, that your own idea of Christ would be something very different from this; but in what does the difference consist? Not in any more divine authority in your imagination; but in the intellectual work of six intervening centuries; which, simply, by artistic discipline, has refined this crude conception for you, and filled you, partly with an innate sensation, partly with an acquired knowledge, of higher forms,—which render this Byzantine crucifix as horrible to you, as it was pleasing to its maker. More is required to excite your fancy; but your fancy is of no more authority than his was: and a point of national art-skill is quite conceivable, in which the best we can do now will be as offensive to the religious dreamers of the more highly cultivated time, as this Byzantine crucifix is to you.

MARY. But surely, Angelico will always retain his power over everybody?

L. Yes, I should think, always; as the gentle words of a child will: but you would be much surprised, Mary, if you thoroughly took the pains to analyze, and had the perfect means of analyzing, that power of Angelico,—to discover its real sources. Of course it is natural, at first, to attribute it to the pure religious fervor by which he was inspired; but do you suppose Angelico was really the only monk, in all the Christian world of the middle ages, who labored, in art, with a sincere religious enthusiasm?

MARY. No, certainly not.

L. Anything more frightful, more destructive of all religious faith whatever, than such a supposition, could not be. And yet, what other monk ever pro-

duced such work? I have myself examined carefully upwards of two thousand illuminated missals, with especial view to the discovery of any evidence of a similar result upon the art, from the monkish devotion; and utterly in vain.

MARY. But then, was not Fra Angelico a man of entirely separate and exalted genius?

L. Unquestionably; and granting him to be that, the peculiar phenomenon in his art is, to me, not its loveliness, but its weakness. The effect of 'inspiration,' had it been real, on a man of consummate genius, should have been, one would have thought, to make everything that he did faultless and strong, no less than lovely. But of all men, deserving to be called 'great,' Fra Angelico permits to himself the least pardonable faults, and the most palpable follies. There is evidently within him a sense of grace, and power of invention, as great as Ghiberti's:—we are in the habit of attributing those high qualities to his religious enthusiasm; but, if they were produced by that enthusiasm in him, they ought to be produced by the same feelings in others; and we see they are not. Whereas, comparing him with contemporary great artists, of equal grace and invention, one peculiar character remains notable in him—which, logically, we ought therefore to attribute to the religious fervor;—and that distinctive character is, the contented indulgence of his own weaknesses, and perseverance in his own ignorances.

MARY. But that's dreadful! And what *is* the source of the peculiar charm which we all feel in his work?

L. There are many sources of it, Mary; united and seeming like one. You would never feel that charm but in the work of an entirely good man; be sure of that; but the goodness is only the recipient and modifying element, not the creative one. Consider carefully what delights you in any original picture of Angelico's. You will find, for one minor thing, an exquisite variety and brightness of ornamental work. That is not An-

gelico's inspiration. It is the final result of the labor and thought of millions of artists, of all nations ; from the earliest Egyptian potters downwards—Greeks, Byzantines, Hindoos, Arabs, Gauls, and Northmen—all joining in the toil ; and consummating it in Florence, in that century, with such embroidery of robe and inlaying of armor as had never been seen till then ; nor, probably, ever will be seen more. Angelico merely takes his share of this inheritance, and applies it in the tenderest way to subjects which are peculiarly acceptant of it. But the inspiration, if it exist anywhere, flashes on the knight's shield quite as radiantly as on the monk's picture. Examining farther into the sources of your emotion in the Angelico work, you will find much of the impression of sanctity dependent on a singular repose and grace of gesture, consummating itself in the floating, flying, and above all, in the dancing groups. That is not Angelico's inspiration. It is only a peculiarly tender use of systems of grouping which had been long before developed by Giotto, Memmi, and Orcagna ; and the real root of it all is simply—What do you think, children ? The beautiful dancing of the Florentine maidens !

DORA (*indignant again*). Now, I wonder what next ! Why not say it all depended on Herodias' daughter, at once ?

L. Yes ; it is certainly a great argument against singing, that there were once sirens.

DORA. Well, it may be all very fine and philosophical ; but shouldn't I just like to read you the end of the second volume of ' Modern Painters ' !

L. My dear, do you think any teacher could be worth your listening to, or anybody else's listening to, who had learned nothing, and altered his mind in nothing, from seven and twenty to seven and forty ? But that second volume is very good for you as far as it goes. It is a great advance, and a thoroughly straight and swift one, to be led, as it is the main business of that second volume to lead you, from Dutch cattle-pieces, and ruffian-pieces, to Fra Angelico. And it is right

for you also, as you grow older, to be strengthened in the general sense and judgment which may enable you to distinguish the weaknesses from the virtues of what you love : else you might come to love both alike ; or even the weaknesses without the virtues. You might end by liking Overbeck and Cornelius as well as Angelico. However, I have perhaps been leaning a little too much to the merely practical side of things, in to-night's talk ; and you are always to remember, children, that I do not deny, though I cannot affirm, the spiritual advantages resulting, in certain cases, from enthusiastic religious reverie, and from the other practices of saints and anchorites. The evidence respecting them has never yet been honestly collected, much less dispassionately examined : but assuredly, there is in that direction a probability, and more than a probability, of dangerous error, while there is none whatever in the practice of an active, cheerful, and benevolent life. The hope of attaining a higher religious position, which induces us to encounter, for its exalted alternative, the risk of unhealthy error, is often, as I said, founded more on pride than piety ; and those who, in modest usefulness, have accepted what seemed to them here the lowliest place in the kingdom of their Father, are not, I believe, the least likely to receive hereafter the command, then unmistakable, ' Friend, go up higher.'

LECTURE VIII.

CRYSTAL CAPRICE.

Formal Lecture in Schoolroom, after some practical examination of minerals.

L. WE have seen enough, children, though very little of what might be seen if we had more time, of mineral structures produced by visible opposition, or contest among elements; structures of which the variety, however great, need not surprise us: for we quarrel, ourselves, for many and slight causes;—much more, one should think, may crystals, who can only feel the antagonism, not argue about it. But there is a yet more singular mimicry of our human ways in the varieties of form which appear owing to no antagonistic force; but merely to the variable humor and caprice of the crystals themselves: and I have asked you all to come into the schoolroom to-day, because, of course, this is a part of the crystal mind which must be peculiarly interesting to a feminine audience. (*Great symptoms of disapproval on the part of said audience.*) Now, you need not pretend that it will not interest you; why should it not? It is true that we men are never capricious; but that only makes us the more dull and disagreeable. You, who are crystalline in brightness, as well as in caprice, charm infinitely, by infinitude of change. (*Audible murmurs of 'Worse and worse!' 'As if we could be got over that way!' etc. The LECTURER, however, observing the expression of the features to be more complacent, proceeds.*) And the most curious mimicry, if not of your changes

of fashion, at least of your various modes (in healthy periods) of national costume, takes place among the crystals of different countries. With a little experience, it is quite possible to say at a glance, in what districts certain crystals have been found; and although, if we had knowledge extended and accurate enough, we might of course ascertain the laws and circumstances which have necessarily produced the form peculiar to each locality, this would be just as true of the fancies of the human mind. If we could know the exact circumstances which affect it, we could foretell what now seems to us only caprice of thought, as well as what now seems to us only caprice of crystal: nay, so far as our knowledge reaches, it is on the whole easier to find some reason why the peasant girls of Berne should wear their caps in the shape of butterflies; and the peasant girls of Munich their's in the shape of shells, than to say why the rock-crystals of Dauphiné should all have their summits of the shape of lip-pieces of flageolets, while those of St. Gothard are symmetrical; or why the fluor of Chamouni is rose-colored, and in octahedrons, while the fluor of Weardale is green, and in cubes. Still farther removed is the hope, at present, of accounting for minor differences in modes of grouping and construction. Take, for instance, the caprices of this single mineral, quartz;—variations upon a single theme. It has many forms; but see what it will make out of this *one*, the six-sided prism. For shortness' sake, I shall call the body of the prism its 'column,' and the pyramid at the extremities its 'cap.' Now, here, first you have a straight column as long and thin as a stalk of asparagus, with two little caps at the ends; and here you have a short thick column, as solid as a haystack, with two fat caps at the ends; and here you have two caps fastened together, and no column at all between them! Then here is a crystal with its column fat in the middle, and tapering to a little cap; and here is one stalked like a mushroom, with a huge cap put on the top of a slender column! Then here is a column built wholly out of little

caps, with a large smooth cap at the top. And here is a column built of columns and caps; the caps all truncated about half way to their points. And in both these last, the little crystals are set anyhow, and build the large one in a disorderly way; but here is a crystal made of columns and truncated caps, set in regular terraces all the way up.

MARY. But are not these, groups of crystals, rather than one crystal?

L. What do you mean by a group, and what by one crystal?

DORA (*audibly aside, to MARY, who is brought to pause*). You know you are never expected to answer, Mary.

L. I'm sure this is easy enough. What do you mean by a group of people?

MARY. Three or four together, or a good many together, like the caps in these crystals.

L. But when a great many persons get together, they don't take the shape of one person?

(MARY *still at pause*.)

ISABEL. No, because they can't; but, you know the crystals can; so why shouldn't they?

L. Well, they don't; that is to say, they don't always, nor even often. Look here, Isabel.

ISABEL. What a nasty ugly thing!

L. I'm glad you think it so ugly. Yet it is made of beautiful crystals; they are a little gray and cold in color, but most of them are clear.

ISABEL. But they're in such horrid, horrid disorder!

L. Yes; all disorder is horrid, when it is among things that are naturally orderly. Some little girls' rooms are naturally *disorderly*, I suppose; or I don't know how they could live in them, if they cry out so when they only see quartz crystals in confusion.

ISABEL. Oh! but how come they to be like that?

L. You may well ask. And yet you will always hear people talking as if they thought order more wonderful than disorder! It *is* wonderful—as we have seen; but to me, as to you, child, the supremely won-

derful thing is that nature should ever be ruinous or wasteful, or deathful! I look at this wild piece of crystallization with endless astonishment.

MARY. Where does it come from?

L. The Tête Noire of Chamonix. What makes it more strange is that it should be in a vein of fine quartz rock. If it were in a mouldering rock, it would be natural enough; but in the midst of so fine substance, here are the crystals tossed in a heap; some large, myriads small (almost as small as dust), tumbling over each other like a terrified crowd, and glued together by the sides, and edges, and backs, and heads; some warped, and some pushed out and in, and all spoiled, and each spoiling the rest.

MARY. And how flat they all are!

L. Yes; that's the fashion at the Tête Noire.

MARY. But surely this is ruin, not caprice?

L. I believe it is in great part misfortune; and we will examine these crystal troubles in next lecture. But if you want to see the gracefulest and happiest caprices of which dust is capable, you must go to the Hartz; not that I ever mean to go there myself, for I want to retain the romantic feeling about the name; and I have done myself some harm already by seeing the monotonous and heavy form of the Brocken from the suburbs of Brunswick. But whether the mountains be picturesque or not, the tricks which the goblins (as I am told) teach the crystals in them, are incomparably pretty. They work chiefly on the mind of a docile, bluish-colored, carbonate of lime; which comes out of a gray limestone. The goblins take the greatest possible care of its education, and see that nothing happens to it to hurt its temper; and when it may be supposed to have arrived at the crisis which is, to a well brought up mineral, what presentation at court is to a young lady—after which it is expected to set fashions—there's no end to its pretty ways of behaving. First it will make itself into pointed darts as fine as hoar-frost; here, it is changed into a white fur as fine as silk; here into little crowns and circlets, as

bright as silver; as if for the gnome princesses to wear; here it is in beautiful little plates, for them to eat off; presently it is in towers which they might be imprisoned in; presently in caves and cells, where they may make nun-gnomes of themselves, and no gnome ever hear of them more; here is some of it in sheaves, like corn; here, some in drifts, like snow; here, some in rays, like stars: and, though these are, all of them, necessarily, shapes that the mineral takes in other places, they are all taken here with such a grace that you recognize the high caste and breeding of the crystals wherever you meet them; and know at once they are Hartz-born.

Of course, such fine things as these are only done by crystals which are perfectly good, and good-humored; and of course, also, there are ill-humored crystals who torment each other, and annoy quieter crystals, yet without coming to anything like serious war. Here (for once) is some ill-disposed quartz, tormenting a peaceable octahedron of fluor, in mere caprice. I looked at it the other night so long, and so wonderingly, just before putting my candle out, that I fell into another strange dream. But you don't care about dreams.

DORA. No; we didn't, yesterday; but you know we are made up of caprice; so we do, to-day: and you must tell it us directly.

L. Well, you see, Neith and her work were still much in my mind; and then, I had been looking over these Hartz things for you, and thinking of the sort of grotesque sympathy there seemed to be in them with the beautiful fringe and pinnacle work of Northern architecture. So, when I fell asleep, I thought I saw Neith and St. Barbara talking together.

DORA. But what had St. Barbara to do with it?*

L. My dear, I am quite sure St. Barbara is the patroness of good architects: not St. Thomas, whatever the old builders thought. It might be very fine, according to the monks' notions, in St. Thomas, to give all his employer's money away to the poor: but breaches

* Note v.

of contract are bad foundations ; and I believe, it was not he, but St. Barbara, who overlooked the work in all the buildings you and I care about. However that may be, it was certainly she whom I saw in my dream with Neith. Neith was sitting weaving, and I thought she looked sad, and threw her shuttle slowly ; and St. Barbara was standing at her side, in a stiff little gown, all ins and outs, and angles ; but so bright with embroidery that it dazzled me whenever she moved ; the train of it was just like a heap of broken jewels, it was so stiff, and full of corners, and so many-colored, and bright. Her hair fell over her shoulders in long, delicate waves, from under a little three pinnacled crown, like a tower. She was asking Neith about the laws of architecture in Egypt and Greece ; and when Neith told her the measures of the pyramids, St. Barbara said she thought they would have been better three-cornered : and when Neith told her the measures of the Parthenon, St. Barbara said she thought it ought to have had two transepts. But she was pleased when Neith told her of the temple of the dew, and of the Caryan maidens bearing its frieze : and then she thought that perhaps Neith would like to hear what sort of temples she was building herself, in the French valleys, and on the crags of the Rhine. So she began gossiping, just as one of you might to an old lady : and certainly she talked in the sweetest way in the world to Neith ; and explained to her all about crockets and pinnacles : and Neith sat, looking very grave ; and always graver as St. Barbara went on ; till at last, I'm sorry to say, St. Barbara lost her temper a little.

MAY (*very grave herself*). ' St. Barbara ? '

L. Yes, May. Why shouldn't she ? It was very tiresome of Neith to sit looking like that.

MAY. But, then, St. Barbara was a saint !

L. What's that, May ?

MAY. A saint ! A saint is—I am sure you know !

L. If I did, it would not make me sure that you knew too, May : but I don't.

VIOLET (*expressing the incredulity of the audience*). Oh,—sir!

L. That is to say, I know that people are called saints who are supposed to be better than others: but I don't know how much better they must be, in order to be saints; not how nearly anybody may be a saint, and yet not be quite one; nor whether everybody who is called a saint was one; nor whether everybody who isn't called a saint, isn't one.

(*General silence; the audience feeling themselves on the verge of the Infinities, and a little shocked, and much puzzled by so many questions at once.*)

L. Besides, did you never hear that verse about being 'called to be saints'?

MAY (*repeats Rom. i. 7*).

L. Quite right, May. Well, then, who are called to be that? People in Rome only?

MAY. Everbody, I suppose, whom God loves.

L. What! little girls as well as other people?

MAY. All grown-up people, I mean.

L. Why not little girls? Are they wickeder when they are little?

MAY. Oh, I hope not.

L. Why not little girls, then?

(*Pause.*)

LILY. Because, you know, we can't be worth anything if we're ever so good;—I mean, if we try to be ever so good; and we can't do difficult things—like saints.

L. I am afraid, my dear, that old people are not more able or willing for their difficulties than you children are for yours. All I can say is, that if ever I see any of you, when you are seven or eight and twenty, knitting your brows over any work you want to do or to understand, as I saw you, Lily, knitting your brows over your slate this morning, I should think you very noble women. But—to come back to my dream—St. Barbara *did* lose her temper a little; and I was not surprised. For you can't think how provoking Neith looked, sitting there just like a statue of sandstone;

only going on weaving, like a machine; and never quickening the cast of her shuttle; while St. Barbara was telling her so eagerly all about the most beautiful things, and chattering away, as fast as bells ring on Christmas Eve, till she saw that Neith didn't care; and then St. Barbara got as red as a rose, and stopped, just in time;—or I think she would really have said something naughty.

ISABEL. Oh, please, but didn't Neith say anything then?

L. Yes. She said, quite quietly, 'It may be very pretty, my love; but it is all nonsense.'

ISABEL. Oh dear, oh dear; and then?

L. Well; then I was a little angry myself, and hoped St. Barbara would be quite angry; but she wasn't. She bit her lips first; and then gave a great sigh—such a wild, sweet sigh—and then she knelt down and hid her face on Neith's knees. Then Neith smiled a little, and was moved.

ISABEL. Oh, I am so glad!

L. And she touched St. Barbara's forehead with a flower of white lotus; and St. Barbara sobbed once or twice, and then said: 'If you only could see how beautiful it is, and how much it makes people feel what is good and lovely; and if you could only hear the children singing in the Lady chapels!' And Neith smiled,—but still sadly,—and said, 'How do you know what I have seen, or heard, my love? Do you think all those vaults and towers of yours have been built without me? There was not a pillar in your Giotto's Santa Maria del Fiore which I did not set true by my spearshaft as it rose. But this pinnacle and flame work which has set your little heart on fire, is all vanity; and you will soon see what it will come to, and none will grieve for it more than I. And then every one will disbelieve your pretty symbols and types. Men must be spoken simply to, my dear, if you would guide them kindly, and long.' But St. Barbara answered, that, 'Indeed she thought every one liked her work,' and that 'the people of different towns were as eager about their cathedral towers as about

their privileges or their markets;' and then she asked Neith to come and build something with her, wall against tower; and 'see whether the people will be as much pleased with your building as with mine.' But Neith answered, 'I will not contend with you, my dear. I strive not with those who love me, and for those who hate me, it is not well to strive with me, as weaver Arachne knows. And remember, child, that nothing is ever done beautifully, which is done in rivalry; nor nobly, which is done in pride.'

Then St. Barbara hung her head quite down, and said she was very sorry she had been so foolish; and kissed Neith; and stood thinking a minute: and then her eyes got bright again, and she said, she would go directly and build a chapel with five windows in it; four for the four cardinal virtues, and one for humility, in the middle, bigger than the rest. And Neith very nearly laughed quite out, I thought; certainly her beautiful lips lost all their sternness for an instant; then she said, 'Well, love, build it, but do not put so many colors into your windows as you usually do; else no one will be able to see to read, inside: and when it is built, let a poor village priest consecrate it, and not an archbishop.' St. Barbara started a little, I thought, and turned as if to say something; but changed her mind, and gathered up her train, and went out. And Neith bent herself again to her loom, in which she was weaving a web of strange dark colors, I thought; but perhaps it was only after the glittering of St. Barbara's embroidered train: and I tried to make out the figures in Neith's web, and confused myself among them, as one always does in dreams; and then the dream changed altogether, and I found myself, all at once, among a crowd of little Gothic and Egyptian spirits, who were quarrelling; at least the Gothic ones were trying to quarrel; for the Egyptian ones only sat with their hands on their knees, and their aprons sticking out very stiffly; and stared. And after awhile I began to understand what the matter was. It seemed that some of the troublesome

building imps, who meddle and make continually, even in the best Gothic work, had been listening to St. Barbara's talk with Neith; and had made up their minds that Neith had no workpeople who could build against them. They were but dull imps, as you may fancy, by their thinking that; and never had done much, except disturbing the great Gothic building angels at their work, and playing tricks to each other; indeed, of late they had been living years and years, like bats, up under the cornices of Strasbourg and Cologne cathedrals, with nothing to do but to make mouths at the people below. However, they thought they knew everything about tower building; and those who had heard what Neith said, told the rest; and they all flew down directly, chattering in German, like jackdaws, to show Neith's people what they could do. And they had found some of Neith's old workpeople somewhere near Sais, sitting in the sun, with their hands on their knees; and abused them heartily: and Neith's people did not mind at first, but, after awhile, they seemed to get tired of the noise; and one or two rose up slowly, and laid hold of their measuring rods, and said, 'If St. Barbara's people liked to build with them, tower against pyramid, they would show them how to lay stones.' Then the Gothic little spirits threw a great many double somersaults for joy; and put the tips of their tongues out slyly to each other, on one side; and I heard the Egyptians say, 'they must be some new kind of frog—they didn't think there was much building in *them*.' However, the stiff old workers took their rods, as I said, and measured out a square space of sand; but as soon as the German spirits saw that, they declared they wanted exactly that bit of ground to build on themselves. Then the Egyptian builders offered to go farther off, and the German ones said, 'Ja wohl.' But as soon as the Egyptians had measured out another square, the little Germans said they must have some of that too. Then Neith's people laughed; and said, 'they might take as much as they liked, but they would not move the plan

of their pyramid again.' Then the little Germans took three pieces, and began to build three spires directly; one large, and two little. And when the Egyptians saw they had fairly begun, they laid their foundation all round, of large square stones: and began to build, so steadily that they had like to have swallowed up the three little German spires. So when the Gothic spirits saw that, they built their spires leaning, like the tower of Pisa, that they might stick out at the side of the pyramid. And Neith's people stared at them; and thought it very clever, but very wrong; and on they went, in their own way, and said nothing. Then the little Gothic spirits were terribly provoked because they could not spoil the shape of the pyramid; and they sat down all along the ledges of it to make faces; but that did no good. Then they ran to the corners, and put their elbows on their knees, and stuck themselves out as far as they could, and made more faces; but that did no good, neither. Then they looked up to the sky, and opened their mouths wide, and gobbled, and said it was too hot for work, and wondered when it would rain; but that did no good, neither. And all the while the Egyptian spirits were laying step above step, patiently. But when the Gothic ones looked, and saw how high they had got, they said, 'Ach, Himmel!' and flew down in a great black cluster to the bottom; and swept out a level spot in the sand with their wings, in no time, and began building a tower straight up, as fast as they could. And the Egyptians stood still again to stare at them; for the Gothic spirits had got quite into a passion, and were really working very wonderfully. They cut the sandstone into strips as fine as reeds; and put one reed on the top of another, so that you could not see where they fitted: and they twisted them in and out like basket work, and knotted them into likenesses of ugly faces, and of strange beasts biting each other; and up they went, and up still, and they made spiral staircases at the corners, for the loaded workers to come up by (for I saw they were

but weak imps, and could not fly with stones on their backs), and then they made traceried galleries for them to run round by; and so up again; with finer and finer work, till the Egyptians wondered whether they meant the thing for a tower or a pillar: and I heard them saying to one another, 'It was nearly as pretty as lotos stalks; and if it were not for the ugly faces, there would be a fine temple, if they were going to build it all with pillars as big as that!' But in a minute afterwards,—just as the Gothic spirits had carried their work as high as the upper course, but three or four, of the pyramid—the Egyptians called out to them to 'mind what they were about, for the sand was running away from under one of their tower corners.' But it was too late to mind what they were about; for, in another instant, the whole tower sloped aside; and the Gothic imps rose out of it like a flight of puffs, in a single cloud; but screaming worse than any puffs you ever heard: and down came the tower, all in a piece, like a falling poplar, with its head right on the flank of the pyramid; against which it snapped short off. And of course that waked me!

MARY. What a shame of you to have such a dream, after all you have told us about Gothic architecture!

L. If you have understood anything I ever told you about it, you know that no architecture was ever corrupted more miserably; or abolished more justly by the accomplishment of its own follies. Besides, even in its days of power, it was subject to catastrophes of this kind. I have stood too often, mourning, by the grand fragment of the apse of Beauvais, not to have that fact well burnt into me. Still, you must have seen, surely, that these imps were of the Flamboyant school; or, at least, of the German schools correspondent with it in extravagance.

MARY. But, then, where is the crystal about which you dreamed all this?

L. Here; but I suppose little Pthah has touched it again, for it is very small. But, you see, here is the

pyramid, built of great square stones of fluor spar, straight up ; and here are the three little pinnacles of mischievous quartz, which have set themselves, at the same time, on the same foundation ; only they lean like the tower of Pisa, and come out obliquely at the side : and here is one great spire of quartz which seems as if it had been meant to stand straight up, a little way off ; and then had fallen down against the pyramid base, breaking its pinnacle away. In reality, it has crystallized horizontally, and terminated imperfectly : but, then, by what caprice does one crystal form horizontally, when all the rest stand upright ? But this is nothing to the phantasies of fluor, and quartz, and some other such companions, when they get leave to do anything they like. I could show you fifty specimens, about every one of which you might fancy a new fairy tale. Not that, in truth, any crystals get leave to do quite what they like ; and many of them are sadly tried, and have little time for caprices—poor things !

MARY. I thought they always looked as if they were either in play or in mischief ! What trials have they ?

L. Trials much like our own. Sickness, and starvation ; fevers, and agues, and palsy ; oppression ; and old age, and the necessity of passing away in their time, like all else. If there's any pity in you, you must come to-morrow, and take some part in these crystal griefs.

DORA. I am sure we shall cry till our eyes are red.

L. Ah, you may laugh, Dora : but I've been made grave, not once, nor twice, to see that even crystals ' cannot choose but be old ' at last. It may be but a shallow proverb of the Justice's ; but it is a shrewdly wide one.

DORA (*pensive, for once*). I suppose it *is* very dreadful to be old ! But then (*brightening again*), what should we do without our dear old friends, and our nice old lecturers ?

L. If all nice old lecturers were minded as little as one I know of——

DORA. And if they all meant as little what they say, would they not deserve it? But we'll come—we'll come, and cry.

LECTURE IX.

CRYSTAL SORROWS.

Working Lecture in Schoolroom.

L. WE have been hitherto talking, children, as if crystals might live, and play, and quarrel, and behave ill or well, according to their characters, without interruption from anything else. But so far from this being so, nearly all crystals, whatever their characters, have to live a hard life of it, and meet with many misfortunes. If we could see far enough, we should find, indeed, that, at the root, all their vices were misfortunes: but to-day I want you to see what sort of troubles the best crystals have to go through, occasionally, by no fault of their own.

This black thing, which is one of the prettiest of the very few pretty black things in the world, is called 'Tourmaline.' It may be transparent, and green, or red, as well as black; and then no stone can be prettier (only, all the light that gets into it, I believe, comes out a good deal the worse; and is not itself again for a long while). But this is the commonest state of it,—opaque, and as black as jet.

MARY. What does 'Tourmaline' mean?

L. They say it is Ceylanese, and I don't know Ceylanese; but we may always be thankful for a graceful word, whatever it means.

MARY. And what is it made of?

L. A little of everything; there's always flint, and clay, and magnesia in it; and the black is iron, according to its fancy; and there's boracic acid, if you know

what that is ; and if you don't, I cannot tell you to-day ; and it doesn't signify : and there's potash, and soda ; and, on the whole, the chemistry of it is more like a mediæval doctor's prescription, than the making of a respectable mineral : but it may, perhaps, be owing to the strange complexity of its make, that it has a notable habit which makes it, to me, one of the most interesting of minerals. You see these two crystals are broken right across, in many places, just as if they had been shafts of black marble fallen from a ruinous temple ; and here they lie, imbedded in white quartz, fragment succeeding fragment, keeping the line of the original crystal, while the quartz fills up the intervening spaces. Now tourmaline has a trick of doing this, more than any other mineral I know : here is another bit which I picked up on the glacier of Macugnaga ; it is broken, like a pillar built of very flat broad stones, into about thirty joints, and all these are heaved and warped away from each other sideways, almost into a line of steps ; and then all is filled up with quartz paste. And here, lastly, is a green Indian piece, in which the pillar is first disjointed, and then wrung round into the shape of an S.

MARY. How *can* this have been done ?

L. There are a thousand ways in which it may have been done ; the difficulty is not to account for the doing of it ; but for the showing of it in some crystals, and not in others. You never by any chance get a quartz crystal broken or twisted in this way. If it break or twist at all, which it does sometimes, like the spire of Dijon, it is by its own will or fault ; it never seems to have been passively crushed. But, for the forces which cause this passive ruin of the tourmaline,—here is a stone which will show you multitudes of them in operation at once. It is known as 'brecciated agate,' beautiful, as you see ; and highly valued as a pebble : yet, so far as I can read or hear, no one has ever looked at it with the least attention. At the first glance, you see it is made of very fine red striped agates, which have been broken into small pieces, and fastened to-

gether again by paste, also of agate. There would be nothing wonderful in this, if this were all. It is well known that by the movements of strata, portions of rock are often shattered to pieces :—well known also that agate is a deposit of flint by water under certain conditions of heat and pressure : there is, therefore, nothing wonderful in an agate's being broken ; and nothing wonderful in its being mended with the solution out of which it was itself originally congealed. And with this explanation, most people, looking at a brecciated agate, or brecciated anything, seem to be satisfied. I was so myself, for twenty years ; but, lately happening to stay for some time at the Swiss Baden, where the beach of the Limmat is almost wholly composed of brecciated limestones, I began to examine them thoughtfully ; and perceived, in the end, that they were, one and all, knots of as rich mystery as any poor little human brain was ever lost in. That piece of agate in your hand, Mary, will show you many of the common phenomena of breccias ; but you need not knit your brows over it in that way ; depend upon it, neither you nor I shall ever know anything about the way it was made, as long as we live.

DORA. That does not seem much to depend upon.

L. Pardon me, puss. . When once we gain some real notion of the extent and the unconquerableness of our ignorance, it is a very broad and restful thing to depend upon : you can throw yourself upon it at ease, as on a cloud, to feast with the gods. You do not thenceforward trouble yourself,—nor any one else,—with theories, or the contradiction of theories ; you neither get headache nor heartburning ; and you never more waste your poor little store of strength, or allowance of time.

However, there are certain facts, about this agate-making, which I can tell you ; and then you may look at it in a pleasant wonder as long as you like ; pleasant wonder is no loss of time.

First, then, it is not broken freely by a blow ; it is slowly wrung, or ground, to pieces. You can only

with extreme dimness conceive the force exerted on mountains in transitional states of movement. You have all read a little geology ; and you know how coolly geologists talk of mountains being raised or depressed. They talk coolly of it, because they are accustomed to the fact ; but the very universality of the fact prevents us from ever conceiving distinctly the conditions of force involved. You know I was living last year in Savoy ; my house was on the back of a sloping mountain, which rose gradually for two miles, behind it ; and then fell at once in a great precipice towards Geneva, going down three thousand feet in four or five cliffs, or steps. Now that whole group of cliffs had simply been torn away by sheer strength from the rocks below, as if the whole mass had been as soft as biscuit. Put four or five captains' biscuits on the floor, on the top of one another ; and try to break them all in half, not by bending, but by holding one half down, and tearing the other halves straight up ;—of course you will not be able to do it, but you will feel and comprehend the sort of force needed. Then, fancy each captains' biscuit a bed of rock, six or seven hundred feet thick ; and the whole mass torn straight through ; and one half heaved up three thousand feet, grinding against the other as it rose,—and you will have some idea of the making of the Mont Salève.

MAY. But it must crush the rocks all to dust !

L. No ; for there is no room for dust. The pressure is too great ; probably the heat developed also so great that the rock is made partly ductile ; but the worst of it is, that we never can see these parts of mountains in the state they were left in at the time of their elevation ; for it is precisely in these rents and dislocations that the crystalline power principally exerts itself. It is essentially a styptic power, and wherever the earth is torn, it heals and binds ; nay, the torture and grieving of the earth seem necessary to bring out its full energy ; for you only find the crystalline living power fully in action, where the rents and faults are deep and many.

DORA. If you please, sir,—would you tell us—what are ‘faults’?

L. You never heard of such things?

DORA. Never in all our lives.

L. When a vein of rock which is going on smoothly, is interrupted by another troublesome little vein, which stops it, and puts it out, so that it has to begin again in another place—that is called a fault. *I* always think it ought to be called the fault of the vein that interrupts it; but the miners always call it the fault of the vein that is interrupted.

DORA. So it is, if it does not begin again where it left off.

L. Well, that is certainly the gist of the business: but, whatever good-natured old lecturers may do, the rocks have a bad habit, when they are once interrupted, of never asking ‘Where was I?’

DORA. When the two halves of the dining-table came separate, yesterday, was that a ‘fault’?

L. Yes; but not the table’s. However, it is not a bad illustration, Dora. When beds of rock are only interrupted by a fissure, but remain at the same level, like the two halves of the table, it is not called a fault, but only a fissure; but if one half of the table be either tilted higher than the other, or pushed to the side, so that the two parts will not fit, it is a fault. You had better read the chapter on faults in Jukes’s *Geology*; then you will know all about it. And this rent that I am telling you of in the Salève, is one only of myriads, to which are owing the forms of the Alps, as, I believe, of all great mountain chains. Wherever you see a precipice on any scale of real magnificence, you will nearly always find it owing to some dislocation of this kind; but the point of chief wonder to me, is the delicacy of the touch by which these gigantic rents have been apparently accomplished. Note, however, that we have no clear evidence, hitherto, of the time taken to produce any of them. We know that a change of temperature alters the position and the angles of the atoms of crystals, and also the entire bulk

of rocks. We know that in all volcanic, and the greater part of all subterranean, action, temperature are continually changing, and therefore masses of rock must be expanding or contracting, with infinite slowness, but with infinite force. This pressure must result in mechanical strain somewhere, both in their own substance, and in that of the rocks surrounding them; and we can form no conception of the result of irresistible pressure, applied so as to rend and raise, with imperceptible slowness of gradation, masses thousands of feet in thickness. We want some experiments tried on masses of iron and stone; and we can't get them tried, because Christian creatures never will seriously and sufficiently spend money, except to find out the shortest ways of killing each other. But, besides this slow kind of pressure, there is evidence of more or less sudden violence, on the same terrific scale; and, through it all, the wonder, as I said, is always to me the delicacy of touch. I cut a block of the Salève limestone from the edge of one of the principal faults which have formed the precipice; it is a lovely compact limestone, and the fault itself is filled up with a red breccia, formed of the crushed fragments of the torn rock, cemented by a rich red crystalline paste. I have had the piece I cut from it smoothed, and polished across the the junction; here it is; and you may now pass your soft little fingers over the surface, without so much as feeling the place where a rock which all the hills of England might have been sunk in the body of, and not a summit seen, was torn asunder through that whole thickness, as a thin dress is torn when you tread upon it.

(The audience examine the stone, and touch it timidly; but the matter remains inconceivable to them.)

MARY (*struck by the beauty of the stone*). But this is almost marble?

L. It is quite marble. And another singular point in the business, to my mind, is that these stones, which men have been cutting into slabs, for thousands of

years, to ornament their principal buildings with,—and which, under the general name of ‘marble,’ have been the delight of the eyes, and the wealth of architecture, among all civilized nations,—are precisely those on which the signs and brands of these earth-agonies have been chiefly struck; and there is not a purple vein nor flaming zone in them, which is not the record of their ancient torture. What a boundless capacity for sleep, and for serene stupidity, there is in the human mind! Fancy reflective beings, who cut and polish stones for three thousand years, for the sake of the pretty stains upon them; and educate themselves to an art at last (such as it is), of imitating these veins by dexterous painting; and never a curious soul of them, all that while, asks, ‘What painted the rocks?’

(The audience look dejected, and ashamed of themselves.)

The fact is, we are all, and always, asleep, through our lives; and it is only by pinching ourselves very hard that we ever come to see, or understand, anything. At least, it is not always we who pinch ourselves; sometimes other people pinch us; which I suppose is very good of them,—or other things, which I suppose is very proper of them. But it is a sad life: made up chiefly of naps and pinches.

(Some of the audience, on this, appearing to think that the others require pinching, the LECTURER changes the subject.)

Now, however, for once, look at a piece of marble carefully, and think about it. You see this is one side of the fault; the other side is down or up, nobody knows where; but, on this side, you can trace the evidence of the dragging and tearing action. All along the edge of this marble, the ends of the fibres of the rock are torn, here an inch, and there half an inch, away from each other; and you see the exact places where they fitted, before they were torn separate; and you see the rents are now all filled up with the sanguine paste, full of the broken pieces of the rock; the paste itself seems to have been half melted, and partly

to have also melted the edge of the fragments it contains, and then to have crystallized with them, and round them. And the brecciated agate I first showed you contains exactly the same phenomena; a zoned crystallization going on amidst the cemented fragments, partly altering the structure of those fragments themselves, and subject to continual change, either in the intensity of its own power, or in the nature of the materials submitted to it;—so that, at one time, gravity acts upon them, and disposes them in horizontal layers, or causes them to droop in stalactites; and at another, gravity is entirely defied, and the substances in solution are crystallized in bands of equal thickness on every side of the cell. It would require a course of lectures longer than these (I have a great mind,—you have behaved so saucily—to stay and give them) to describe to you the phenomena of this kind, in agates and chalcedonies only;—nay, there is a single sarcophagus in the British Museum, covered with grand sculpture of the 18th dynasty, which contains in the magnificent breccia (agate and jaspers imbedded in porphyry), out of which it is hewn, material for the thought of years; and record of the earth-sorrow of ages in comparison with the duration of which, the Egyptian letters tell us but the history of the evening and morning of a day.

Agates, I think, of all stones, confess most of their past history; but all crystallization goes on under, and partly records, circumstances of this kind—circumstances of infinite variety, but always involving difficulty, interruption, and change of condition at different times. Observe, first, you have the whole mass of the rock in motion, either contracting itself, and so gradually widening the cracks; or being compressed, and thereby closing them, and crushing their edges;—and, if one part of its substance be softer, at the given temperature, than another, probably squeezing that softer substance out into the veins. Then the veins themselves, when the rock leaves them open by its contraction, act with various power of suction upon its sub-

stance ;—by capillary attraction when they are fine,—by that of pure vacuity when they are larger, or by changes in the constitution and condensation of the mixed gases with which they have been originally filled. Those gases themselves may be supplied in all variation of volume and power from below ; or, slowly, by the decomposition of the rocks themselves ; and, at changing temperatures, must exert relatively changing forces of decomposition and combination on the walls of the veins they fill ; while water, at every degree of heat and pressure (from beds of everlasting ice, alternate with cliffs of native rock, to volumes of red hot, or white hot, steam), congeals, and drips, and throbs, and thrills, from crag to crag ; and breathes from pulse to pulse of foaming or fiery arteries, whose beating is felt through chains of the great islands of the Indian seas, as your own pulses lift your bracelets, and makes whole kingdoms of the world quiver in deadly earthquake, as if they were light as aspen leaves. And, remember, the poor little crystals have to live their lives, and mind their own affairs, in the midst of all this, as best they may. They are wonderfully like human creatures,—forget all that is going on if they don't see it, however dreadful ; and never think what is to happen to-morrow. They are spiteful or loving, and indolent or painstaking, and orderly or licentious, with no thought whatever of the lava or the flood which may break over them any day ; and evaporate them into air bubbles, or wash them into a solution of salts. And you may look at them, once understanding the surrounding conditions of their fate, with an endless interest. You will see crowds of unfortunate little crystals, who have been forced to constitute themselves in a hurry, their dissolving element being fiercely scorched away ; you will see them doing their best, bright and numberless, but tiny. Then you will find indulged crystals, who have had centuries to form themselves in, and have changed their mind and ways continually ; and have been tired, and taken heart again ; and have been sick, and got well again ; and

thought they would try a different diet, and then thought better of it ; and made but a poor use of their advantages, after all. And others you will see, who have begun life as wicked crystals ; and then have been impressed by alarming circumstances, and have become converted crystals, and behaved amazingly for a little while, and fallen away again, and ended, but discredibly, perhaps even in decomposition ; so that one doesn't know what will become of them. And sometimes you will see deceitful crystals, that look as soft as velvet, and are deadly to all near them ; and sometimes you will see deceitful crystals, that seem flint-edged, like our little quartz-crystal of a housekeeper here, (hush ! Dora,) and are endlessly gentle and true wherever gentleness and truth are needed. And sometimes you will see little child-crystals put to school like school-girls, and made to stand in rows ; and taken the greatest care of, and taught how to hold themselves up, and behave : and sometimes you will see unhappy little child-crystals left to lie about in the dirt, and pick up their living, and learn manners, where they can. And sometimes you will see fat crystals eating up thin ones, like great capitalists and little laborers ; and politico-economic crystals teaching the stupid ones how to eat each other, and cheat each other ; and foolish crystals getting in the way of wise ones ; and impatient crystals spoiling the plans of patient ones, irreparably ; just as things go on in the world. And sometimes you may see hypocritical crystals taking the shape of others, though they are nothing like in their minds ; and vampire crystals eating out the hearts of others ; and hermit-crab crystals living in the shells of others ; and parasite crystals living on the means of others ; and courtier crystals glittering in attendance upon others ; and all these, besides the two great companies of war and peace, who ally themselves, resolutely to attack, or resolutely to defend. And for the close, you see the broad shadow and deadly force of inevitable fate, above all. this : you see the multitudes of

crystals whose time has come ; not a set time, as with us, but yet a time, sooner or later, when they all must give up their crystal ghosts :—when the strength by which they grew, and the breath given them to breathe, pass away from them ; and they fail, and are consumed, and vanish away ; and another generation is brought to life, framed out of their ashes.

MARY. It is very terrible. Is it not the complete fulfilment, down into the very dust of that verse : ‘ The whole creation groaneth and travaileth in pain ’ ?

L. I do not know that it is in pain, Mary : at least, the evidence tends to show that there is much more pleasure than pain, as soon as sensation becomes possible.

LUCILLA. But then, surely, if we are told that it is pain, it must be pain ?

L. Yes ; if we are told ; and told in the way you mean, Lucilla ; but nothing is said of the proportion to pleasure. Unmitigated pain would kill any of us in a few hours ; pain equal to our pleasures would make us loathe life ; the word itself cannot be applied to the lower conditions of matter, in its ordinary sense. But wait till to-morrow to ask me about this. To-morrow is to be kept for questions and difficulties ; let us keep to the plain facts to-day. There is yet one group of facts connected with this rending of the rocks, which I especially want you to notice. You know, when you have mended a very old dress, quite meritoriously, till it won’t mend any more——

EGYPT (*interrupting*). Could not you sometimes take gentlemen’s work to illustrate by ?

L. Gentlemen’s work is rarely so useful as yours, Egypt ; and when it is useful, girls cannot easily understand it.

DORA. I am sure we should understand it better than gentlemen understand about sewing.

L. My dear, I hope I always speak modestly, and under correction, when I touch upon matters of the kind too high for me ; and besides, I never intend to speak otherwise than respectfully of sewing ;—though

you always seem to think I am laughing at you. In all seriousness, illustrations from sewing are those which Neith likes me best to use ; and which young ladies ought to like everybody to use. What do you think the beautiful word ' wife ' comes from ?

DORA (*tossing her head*). I don't think it is a particularly beautiful word.

L. Perhaps not. At your ages you may think ' bride ' sounds better ; but wife's the word for wear, depend upon it. It is the great word in which the English and Latin languages conquer the French and the Greek. I hope the French will some day get a word for it, yet, instead of their dreadful ' femme.' But what do you think it comes from ?

DORA. I never *did* think about it !

L. Nor you, Sibyl ?

SIBYL. No ; I thought it was Saxon, and stopped there.

L. Yes ; but the great good of Saxon words is, that they usually do mean something. Wife means ' weaver.' You have all the right to call yourselves little ' housewives,' when you sew neatly.

DORA. But I don't think we want to call ourselves ' little housewives.'

L. You must either be house-Wives, or house-Moths ; remember that. In the deep sense, you must either weave men's fortunes, and embroider them ; or feed upon, and bring them to decay. You had better let me keep my sewing illustration, and help me out with it.

DORA. Well, we'll hear it, under protest.

L. You have heard it before ; but with reference to other matters. When it said, ' no man putteth a piece of new cloth on an old garment, else it taketh from the old,' does it not mean that the new piece tears the old one away at the sewn edge ?

DORA. Yes ; certainly.

L. And when you mend a decayed stuff with strong thread, does not the whole edge come away sometimes, when it tears again ?

DORA. Yes ; and then it is of no use to mend it any more.

L. Well, the rocks don't seem to think that : but the same thing happens to them continually. I told you they were full of rents, or veins. Large masses of mountain are sometimes as full of veins as your hand is ; and of veins nearly as fine (only you know a rock vein does not mean a tube, but a crack or cleft). Now these clefts are mended, usually, with the strongest material the rock can find ; and often literally with threads ; for the gradually opening rent seems to draw the substance it is filled with into fibres, which cross from one side of it to the other, and are partly crystalline ; so that, when the crystals become distinct, the fissure has often exactly the look of a tear, brought together with strong cross stitches. Now when this is completely done, and all has been fastened and made firm, perhaps some new change of temperature may occur, and the rock begin to contract again. Then the old vein must open wider ; or else another open elsewhere. If the old vein widen, it *may* do so at its centre ; but it constantly happens, with well filled veins, that the cross stitches are too strong to break ; the walls of the vein, instead, are torn away by them ; and another little supplementary vein—often three or four successively—will be thus formed at the side of the first.

MARY. That is really very much like our work. But what do the mountains use to sew with ?

L. Quartz, whenever they can get it : pure limestones are obliged to be content with carbonate of lime ; but most mixed rocks can find some quartz for themselves. Here is a piece of black slate from the Buet : it looks merely like dry dark mud ;—you could not think there was any quartz in it ; but, you see, its rents are all stitched together with beautiful white thread, which is the purest quartz, so close drawn that you can break it like flint, in the mass ; but, where it has been exposed to the weather, the fine fibrous structure is shown : and, more than that, you see the

threads have been all twisted and pulled aside, this way and the other, by the warpings and shiftings of the sides of the vein as it widened.

MARY. It is wonderful! But is that going on still? Are the mountains being torn and sewn together again at this moment?

L. Yes, certainly, my dear: but I think, just as certainly (though geologists differ on this matter), not with the violence, or on the scale, of their ancient ruin and renewal. All things seem to be tending towards a condition of at least temporary rest; and that groaning and travailing of the creation, as, assuredly, not wholly in pain, is not, in the full sense, 'until now.'

MARY. I want so much to ask you about that!

SIBYL. Yes; and we all want to ask you about a great many other things besides.

L. It seems to me that you have got quite as many new ideas as are good for any of you at present: and I should not like to burden you with more; but I must see that those you have are clear, if I can make them so; so we will have one more talk, for answer of questions, mainly. Think over all the ground, and make your difficulties thoroughly presentable. Then we'll see what we can make of them.

DORA. They shall all be dressed in their very best; and courtesy as they come in.

L. No, no, Dora; no courtesies, if you please. I had enough of them the day you all took a fit of reverence, and courtesied me out of the room.

DORA. But, you know, we cured ourselves of the fault, at once, by that fit. We have never been the least respectful since. And the difficulties will only courtesy themselves out of the room, I hope;—come in at one door—vanish at the other.

L. What a pleasant world it would be, if all its difficulties were taught to behave so! However, one can generally make something, or (better still) nothing, or at least less, of them, if they thoroughly know their own minds; and your difficulties—I must say

that for you, children,—generally do know their own minds, as you do yourselves.

DORA. That is very kindly said for us. Some people would not allow so much as that girls had any minds to know.

L. They will at least admit that you have minds to change, Dora.

MARY. You might have left us the last speech, without a retouch. But we'll put our little minds, such as they are, in the best trim we can for to-morrow.

LECTURE X.

THE CRYSTAL REST.

Evening. The fireside. L.'s arm-chair in the comfortablest corner.

L. (*perceiving various arrangements being made of footstool, cushion, screen, and the like*). Yes, yes, it's all very fine! and I am to sit here to be asked questions till supper-time, am I?

DORA. I don't think you can have any supper to-night:—we've got so much to ask.

LILY. Oh, Miss Dora! We can fetch it him here, you know, so nicely!

L. Yes, Lily, that will be pleasant, with competitive examination going on over one's plate; the competition being among the examiners. Really, now that I know what teasing things girls are, I don't so much wonder that people used to put up patiently with the dragons who took *them* for supper. But I can't help myself, I suppose;—no thanks to St. George. Ask away, children, and I'll answer as civilly as may be.

DORA. We don't so much care about being answered civilly, as about not being asked things back again.

L. 'Ayez seulement la patience que je le parle.' There shall be no requitals.

DORA. Well, then, first of all—What shall we ask first, Mary?

MARY. It does not matter. I think all the questions come into one, at last, nearly.

DORA. You know, you always talk as if the crystals were alive; and we never understand how much you

are in play, and how much in earnest. That's the first thing.

L. Neither do I understand, myself, my dear, how much I am in earnest. The stones puzzle me as much as I puzzle you. They look as if they were alive, and make me speak as if they were; and I do not in the least know how much truth there is in the appearance. I'm not to ask things back again to-night, but all questions of this sort lead necessarily to the one main question, which we asked before, in vain, 'What is it to be alive?'

DORA. Yes; but we want to come back to that: for we've been reading scientific books about the 'conservation of forces,' and it seems all so grand, and wonderful; and the experiments are so pretty; and I suppose it must be all right: but then the books never speak as if there were any such thing as 'life.'

L. They mostly omit that part of the subject, certainly, Dora; but they are beautifully right as far as they go; and life is not a convenient element to deal with. They seem to have been getting some of it into and out of bottles, in their 'ozone' and 'antizone' lately; but they still know little of it: and, certainly, I know less.

DORA. You promised not to be provoking, to-night.

L. Wait a minute. Though, quite truly, I know less of the secrets of life than the philosophers do; I yet know one corner of ground on which we artists can stand, literally as 'Life Guards' at bay, as steadily as the Guards at Inkermann; however hard the philosophers push. And you may stand with us, if once you learn to draw nicely.

DORA. I'm sure we are all trying! but tell us where we may stand.

L. You may always stand by Form, against Force. To a painter, the essential character of anything is the form of it; and the philosophers cannot touch that. They come and tell you, for instance, that there is as much heat, or motion, or calorific energy (or whatever

else they like to call it), in a teakettle as in a Gier-eagle. Very good ; that is so ; and it is very interesting. It requires just as much heat as will boil the kettle, to take the Gier-eagle up to his nest ; and as much more to bring him down again on a hare or a partridge. But we painters, acknowledging the equality and similarity of the kettle and the bird in all scientific respects, attach, for our part, our principal interest to the difference in their forms. For us, the primarily cognizable facts, in the two things, are, that the kettle has a spout, and the eagle a beak ; the one a lid on its back, the other a pair of wings ;—not to speak of the distinction also of volition, which the philosophers may properly call merely a form or mode of force ;—but then, to an artist, the form, or mode, is the gist of the business. The kettle chooses to sit still on the hob ; the eagle to recline on the air. It is the fact of the choice, not the equal degree of temperature in the fulfilment of it, which appears to us the more interesting circumstance ;—though the other is very interesting too. Exceedingly so ! Don't laugh, children ; the philosophers have been doing quite splendid work lately, in their own way : especially, the transformation of force into light is a great piece of systematized discovery ; and this notion about the sun's being supplied with his flame by ceaseless meteoric hail is grand, and looks very likely to be true. Of course, it is only the old gun-lock,—flint and steel,—on a large scale : but the order and majesty of it are sublime. Still, we sculptors and painters care little about it. ' It is very fine,' we say, ' and very useful, this knocking the light out of the sun, or into it, by an eternal cataract of planets. But you may hail away, so, forever, and you will not knock out what we can. Here is a bit of silver, not the size of half-a-crown, on which, with a single hammer stroke, one of us, two thousand and odd years ago, hit out the head of the Apollo of Clazomenæ. It is merely a matter of form ; but if any of you philosophers, with your whole planetary system to hammer with, can hit out such another bit of silver as this,—

we take off our hats to you. For the present, we keep them on.'

MARY. Yes, I understand; and that is nice; but I don't think we shall any of us like having only form to depend upon.

L. It was not neglected in the making of Eve, my dear.

MARY. It does not seem to separate us from the dust of the ground. It is that breathing of the life which we want to understand.

L. So you should: but hold fast to the form, and defend that first, as distinguished from the mere transition of forces. Discern the moulding hand of the potter commanding the clay, from his merely beating foot, as it turns the wheel. If you find incense, in the vase, afterwards,—well; but it is curious how far mere form will carry you ahead of the philosophers. For instance, with regard to the most interesting of all their modes of force—light; they never consider how far the existence of it depends on the putting of certain vitreous and nervous substances into the formal arrangement which we call an eye. The German philosophers began the attack, long ago, on the other side, by telling us, there was no such thing as light at all, unless we chose to see it: now, German and English, both, have reversed their engines, and insist that light would be exactly the same light that it is, though nobody could ever see it. The fact being that the force must be there, and the eyes there; and 'light' means the effect of the one on the other;—and perhaps, also—(Plato saw farther into that mystery than any one has since, that I know of),—on something a little way within the eyes; but we may stand quite safe, close behind the retina, and defy the philosophers.

SIBYL. But I don't care so much about defying the philosophers, if only one could get a clear idea of life, or soul, for one's self.

L. Well, Sibyl, you used to know more about it, in that cave of yours, than any of us. I was just going to ask you about inspiration, and the golden bough,

and the like; only I remembered I was not to ask anything. But, will not you, at least, tell us whether the ideas of Life, as the power of putting things together, or 'making' them; and of Death, as the power of pushing things separate, or 'unmaking' them, may not be very simply held in balance against each other?

SIBYL. No, I am not in my cave to-night; and cannot tell you anything.

L. I think they may. Modern Philosophy is a great separator; it is little more than the expansion of Molière's great sentence, 'Il s'ensuit de là, que tout ce qu'il y a de beau est dans les dictionnaires; il n'y a que les mots qui sont transposés.' But when you used to be in your cave, Sibyl, and to be inspired, there was (and there remains still in some small measure), beyond the merely formative and sustaining power, another, which we painters call 'passion'—I don't know what the philosophers call it; we know it makes people red or white; and therefore it must be something, itself; and perhaps it is the most truly 'poetic' or 'making' force of all, creating a world of its own out of a glance, or a sigh: and the want of passion is perhaps the truest death, or 'unmaking' of everything;—even of stones. By the way, you were all reading about that ascent of the Aiguille Verte, the other day?

SIBYL. Because you had told us it was so difficult, you thought it could not be ascended.

L. Yes; I believed the Aiguille Verte would have held its own. But do you recollect what one of the climbers exclaimed, when he first felt sure of reaching the summit.

SIBYL. Yes, it was, 'Oh, Aiguille Verte, vous êtes morte, vous êtes morte!'

L. That was true instinct. Real philosophic joy. Now can you at all fancy the difference between that feeling of triumph in a mountain's death; and the exaltation of your beloved poet, in its life—

'Quantus Athos, aut quantus Eryx, aut ipse coruscis
Quum fremit ilicibus quantus, gaudetque nivali
Vertice, se attollens pater Apenninus ad auras.'

DORA. You must translate for us mere house-keepers, please,—whatever the cave-keepers may know about it.

MARY. Will Dryden do?

L. No. Dryden is a far way worse than nothing, and nobody will 'do.' You can't translate it. But this is all you need know, that the lines are full of a passionate sense of the Apennines' fatherhood, or protecting power over Italy; and of sympathy with their joy in their snowy strength in heaven; and with the same joy, shuddering through all the leaves of their forests.

MARY. Yes, that is a difference indeed! but then, you know, one can't help feeling that it is fanciful. It is very delightful to imagine the mountains to be alive; but then,—*are* they alive?

L. It seems to me, on the whole, Mary, that the feelings of the purest and most mightily passioned human souls are likely to be the truest. Not, indeed, if they do not desire to know the truth, or blind themselves to it that they may please themselves with passion; for then they are no longer pure: but if, continually seeking and accepting the truth as far as it is discernible, they trust their Maker for the integrity of the instincts He has gifted them with, and rest in the sense of a higher truth which they cannot demonstrate, I think they will be most in the right, so.

DORA and JESSIE (*clapping their hands*). Then we really may believe that the mountains are living?

L. You may at least earnestly believe, that the presence of the spirit which culminates in your own life, shows itself in dawning, wherever the dust of the earth begins to assume any orderly and lovely state. You will find it impossible to separate this idea of graded manifestation from that of the vital power. Things are not either wholly alive, or wholly dead. They are less or more alive. Take the nearest, most easily examined instance—the life of a flower. Notice what a different degree and kind of life there is in the calyx and the corolla. The calyx is nothing but the swad-

dling clothes of the flower ; the child-blossom is bound up in it, hand and foot ; guarded in it, restrained by it, till the time of birth. The shell is hardly more subordinate to the germ in the egg, than the calyx to the blossom. It bursts at last ; but it never lives as the corolla does. It may fall at the moment its task is fulfilled, as in the poppy ; or wither gradually, as in the buttercup ; or persist in a ligneous apathy, after the flower is dead, as in the rose ; or harmonize itself so as to share in the aspect of the real flower, as in the lily ; but it never shares in the corolla's bright passion of life. And the gradations which thus exist between the different members of organic creatures, exist no less between the different ranges of organism. We know no higher or more energetic life than our own ; but there seems to me this great good in the idea of gradation of life—it admits the idea of a life above us, in other creatures, as much nobler than ours, as ours is nobler than that of the dust.

MARY. I am glad you have said that ; for I know Violet and Lucilla and May want to ask you something ; indeed, we all do ; only you frightened Violet so about the ant-hill, that she can't say a word ; and May is afraid of your teasing her, too : but I know they are wondering why you are always telling them about heathen gods and goddesses, as if you half believed in them ; and you represent them as good ; and then we see there is really a kind of truth in the stories about them ; and we are all puzzled : and, in this, we cannot even make our difficulty quite clear to ourselves ;—it would be such a long confused question, if we could ask you all we should like to know.

L. Nor is it any wonder, Mary ; for this is indeed the longest, and the most wildly confused question that reason can deal with ; but I will try to give you, quickly, a few clear ideas about the heathen gods, which you may follow out afterwards, as your knowledge increases.

Every heathen conception of deity in which you are likely to be interested, has three distinct characters :—

I. It has a physical character. It represents some of the great powers or objects of nature—sun or moon, or heaven, or the winds, or the sea. And the fables first related about each deity represent, figuratively, the action of the natural power which it represents; such as the rising and setting of the sun, the tides of the sea, and so on.

II. It has an ethical character, and represents, in its history, the moral dealings of God with man. Thus Apollo is first, physically, the sun contending with darkness; but morally, the power of divine life contending with corruption. Athena is, physically, the air; morally, the breathing of the divine spirit of wisdom. Neptune is, physically, the sea; morally, the supreme power of agitating passion; and so on.

III. It has, at last, a personal character; and is realized in the minds of its worshippers as a living spirit, with whom men may speak face to face, as a man speaks to his friend.

Now it is impossible to define exactly, how far, at any period of a national religion, these three ideas are mingled; or how far one prevails over the other. Each enquirer usually takes up one of these ideas, and pursues it, to the exclusion of the others: no impartial effort seems to have been made to discern the real state of the heathen imagination in its successive phases. For the question is not at all what a mythological figure meant in its origin; but what it became in each subsequent mental development of the nation inheriting the thought. Exactly in proportion to the mental and moral insight of any race, its mythological figures mean more to it, and become more real. An early and savage race means nothing more (because it has nothing more to mean) by its Apollo, than the sun; while a cultivated Greek means every operation of divine intellect and justice. The Neith, of Egypt, meant, physically, little more than the blue of the air; but the Greek, in a climate of alternate storm and calm, represented the wild fringes of the storm-cloud by the serpents of her ægis; and the lightning and cold of the

highest thunder-clouds, by the Gorgon on her shield: while morally, the same types represented to him the mystery and changeful terror of knowledge, as her spear and helm its ruling and defensive power. And no study can be more interesting, or more useful to you, than that of the different meanings which have been created by great nations, and great poets, out of mythological figures given them, at first, in utter simplicity. But when we approach them in their third, or personal, character (and, for its power over the whole national mind, this is far the leading one), we are met at once by questions which may well put all of you at pause. Were they idly imagined to be real beings? and did they so usurp the place of the true God? Or were they actually real beings,—evil spirits,—leading men away from the true God? Or is it conceivable that they might have been real beings,—good spirits,—entrusted with some message from the true God? These were the questions you wanted to ask; were they not, Lucilla?

LUCILLA. Yes, indeed.

L. Well, Lucilla, the answer will much depend upon the clearness of your faith in the personality of the spirits which are described in the book of your own religion;—their personality, observe, as distinguished from merely symbolical visions. For instance, when Jeremiah has the vision of the seething pot with its mouth to the north; you know that this which he sees is not a real thing; but merely a significant dream. Also when Zechariah sees the speckled horses among the myrtle trees in the bottom, you still may suppose the vision symbolical;—you do not think of them as real spirits, like Pegasus, seen in the form of horses. But when you are told of the four riders in the Apocalypse, a distinct sense of personality begins to force itself upon you. And though you might, in a dull temper, think that (for one instance of all) the fourth rider on the pale horse was merely a symbol of the power of death,—in your stronger and more earnest moods you will rather conceive of him as a real and

living angel. And when you look back from the vision of the Apocalypse to the account of the destruction of the Egyptian first-born, and of the army of Sennacherib, and again to David's vision at the threshing floor of Araunah, the idea of personality in this death-angel becomes entirely defined, just as in the appearance of the angels to Abraham, Manoah, or Mary.

Now, when you have once consented to this idea of a personal spirit, must not the question instantly follow: 'Does this spirit exercise its functions towards one race of men only, or towards all men? Was it an angel of death to the Jew only, or to the Gentile also?' You find a certain Divine agency made visible to a King of Israel, as an armed angel, executing vengeance, of which one special purpose was to lower his kingly pride. You find another (or perhaps the same) agency, made visible to a Christian prophet as an angel standing in the sun, calling to the birds that fly under heaven to come, that they may eat the flesh of kings. Is there anything impious in the thought that the same agency might have been expressed to a Greek king, or Greek seer, by similar visions?—that this figure, standing in the sun, and armed with the sword, or the bow (whose arrows were drunk with blood), and exercising especially its power in the humiliation of the proud, might, at first, have been called only 'Destroyer,' and afterwards, as the light, or sun, of justice was recognized in the chastisement, called also 'Physician' or 'Healer?' If you feel hesitation in admitting the possibility of such a manifestation, I believe you will find it is caused, partly indeed by such trivial things as the difference to your ear between Greek and English terms; but, far more, by uncertainty in your own mind respecting the nature and truth of the visions spoken of in the Bible. Have any of you intently examined the nature of your belief in them? You, for instance, Lucilla, who think often, and seriously, of such things?

LUCILLA. No; I never could tell what to believe

about them. I know they must be true in some way or other; and I like reading about them.

L. Yes; and I like reading about them too, Lucilla; as I like reading other grand poetry. But, surely, we ought both to do more than like it? Will God be satisfied with us, think you, if we read His words, merely for the sake of an entirely meaningless poetical sensation?

LUCILLA. But do not the people who give themselves to seek out the meaning of these things, often get very strange, and extravagant?

L. More than that, Lucilla. They often go mad. That abandonment of the mind to religious theory, or contemplation, is the very thing I have been pleading with you against. I never said you should set yourself to discover the meanings; but you should take careful pains to understand them, so far as they *are* clear; and you should always accurately ascertain the state of your mind about them. I want you never to read merely for the pleasure of fancy; still less as a formal religious duty (else you might as well take to repeating Paters at once; for it is surely wiser to repeat one thing we understand, than read a thousand which we cannot). Either, therefore, acknowledge the passages to be, for the present, unintelligible to you; or else determine the sense in which you at present receive them; or, at all events, the different senses between which you clearly see that you must choose. Make either your belief, or your difficulty, definite; but do not go on, all through your life, believing nothing intelligently, and yet supposing that your having read the words of a divine book must give you the right to despise every religion but your own. I assure you, strange as it may seem, our scorn of Greek tradition depends, not on our belief, but our disbelief, of our own traditions. We have, as yet, no sufficient clue to the meaning of either; but you will always find that, in proportion to the earnestness of our own faith, its tendency to accept a spiritual personality increases: and that the most vital and beautiful

Christian temper rests joyfully in its conviction of the multitudinous ministry of living angels, infinitely varied in rank and power. You all know one expression of the purest and happiest form of such faith, as it exists in modern times, in Richter's lovely illustrations of the Lord's Prayer. The real and living death-angel, girt as a pilgrim for journey, and softly crowned with flowers, beckons at the dying mother's door; child-angels sit talking face to face with mortal children, among the flowers;—hold them by their little coats, lest they fall on the stairs;—whisper dreams of heaven to them, leaning over their pillows; carry the sound of the church bells for them far through the air; and even descending lower in service, fill little cups with honey, to hold out to the weary bee. By the way, Lily, did you tell the other children that story about your little sister, and Alice, and the sea?

LILY. I told it to Alice, and to Miss Dora. I don't think I did to anybody else. I thought it wasn't worth.

L. We shall think it worth a great deal now, Lily, if you will tell it us. How old is Dotty, again? I forget.

LILY. She is not quite three; but she has such odd little old ways, sometimes.

L. And she was very fond of Alice?

LILY. Yes; Alice was so good to her always!

L. And so when Alice went away?

LILY. Oh, it was nothing, you know, to tell about; only it was strange at the time.

L. Well; but I want you to tell it.

LILY. The morning after Alice had gone, Dotty was very sad and restless when she got up; and went about, looking into all the corners, as if she could find Alice in them, and at last she came to me, and said, 'Is Alice gone over the great sea?' And I said, 'Yes, she is gone over the great, deep sea, but she will come back again some day.' Then Dotty looked round the room; and I had just poured some water out into the basin; and Dotty ran to it, and got up on a chair, and dashed her hands through the water, again and again;

and cried, 'Oh, deep, deep sea ! send little Alie back to me.'

L. Isn't that pretty, children ? There's a dear little heathen for you ! The whole heart of Greek mythology is in that ; the idea of a personal being in the elemental power ;—of its being moved by prayer ;—and of its presence everywhere, making the broken diffusion of the element sacred.

Now, remember, the measure in which we may permit ourselves to think of this trusted and adored personality, in Greek, or in any other, mythology, as conceivably a shadow of truth, will depend on the degree in which we hold the Greeks, or other great nations, equal, or inferior, in privilege and character, to the Jews, or to ourselves. If we believe that the great Father would use the imagination of the Jew as an instrument by which to exalt and lead him ; but the imagination of the Greek only to degrade and mislead him : if we can suppose that real angels were sent to minister to the Jews and to punish them ; but no angels, or only mocking spectra of angels, or even devils in the shapes of angels, to lead Lycurgus and Leonidas from desolate cradle to hopeless grave :—and if we can think that it was only the influence of spectres, or the teaching of demons, which issued in the making of mothers like Cornelia, and of sons like Cleobis and Bito, we may, of course, reject the heathen Mythology in our privileged scorn : but, at least, we are bound to examine strictly by what faults of our own it has come to pass, that the ministry of real angels among ourselves is occasionally so ineffectual, as to end in the production of Cornelias who entrust their child-jewels to Charlotte Winsors for the better keeping of them ; and of sons like that one who, the other day, in France, beat his mother to death with a stick ; and was brought in by the jury, 'guilty, with extenuating circumstances.'

MAY. Was that really possible ?

L. Yes, my dear. I am not sure that I can lay my hand on the reference to it (and I should not have said 'the other day'—it was a year or two ago), but

you may depend on the fact; and I could give you many like it, if I chose. There was a murder done in Russia, very lately, on a traveller. The murderer's little daughter was in the way, and found it out, somehow. Her mother killed her, too, and put her into the oven. There is a peculiar horror about the relations between parent and child, which are being now brought about by our variously degraded forms of European white slavery. Here *is* one reference, I see, in my notes on that story of Cleobis and Bito; though I suppose I marked this chiefly for its quaintness, and the beautifully Christian names of the sons; but it is a good instance of the power of the King of the Valley of Diamonds* among us.

In 'Galigani' of July 21-22, 1862, is reported a trial of a farmer's son in the department of the Yonne. The father, two years ago, at Malay le Grand, gave up his property to his two sons, on condition of being maintained by them. Simon fulfilled his agreement but Pierre would not. The tribunal of Sens condemns Pierre to pay eighty-four francs a year to his father. Pierre replies, 'he would rather die than pay it.' Actually, returning home, he throws himself into the river, and the body is not found till next day.

MARY. But—but—I can't tell what you would have us think. Do you seriously mean that the Greeks were better than we are; and that their gods were real angels?

L. No, my dear. I mean only that we know, in reality, less than nothing of the dealings of our Maker with our fellow-men; and can only reason or conjecture safely about them, when we have sincerely humble thoughts of ourselves and our creeds.

We owe to the Greeks every noble discipline in literature; every radical principle of art; and every form of convenient beauty in our household furniture and daily occupations of life. We are unable, ourselves, to make rational use of half that we have received from them: and, of our own, we have nothing but discover-

* Note vi.

ies in science, and fine mechanical adaptations of the discovered physical powers. On the other hand, the vice existing among certain classes, both of the rich and poor, in London, Paris, and Vienna could have been conceived by a Spartan or Roman of the heroic ages only as possible in a Tartarus, where fiends were employed to teach, but not to punish, crime. It little becomes us to speak contemptuously of the religion of races to whom we stand in such relations; nor do I think any man of modesty or thoughtfulness will ever speak so of any religion, in which God has allowed one good man to die, trusting.

The more readily we admit the possibility of our own cherished convictions being mixed with error, the more vital and helpful whatever is right in them will become: and no error is so conclusively fatal as the idea that God will not allow *us* to err, though He has allowed all other men to do so. There may be doubt of the meaning of other visions, but there is none respecting that of the dream of St. Peter; and you may trust the Rock of the Church's Foundation for true interpreting, when he learned from it that, 'in every nation, he that feareth God and worketh righteousness, is accepted with Him.' See that you understand what that righteousness means; and set hand to it stoutly: you will always measure your neighbors' creed kindly, in proportion to the substantial fruits of your own. Do not think you will ever get harm by striving to enter into the faith of others, and to sympathize, in imagination, with the guiding principles of their lives. So only can you justly love them, or pity them, or praise. By the gracious effort you will double, treble—nay, indefinitely multiply at once the pleasure, the reverence, and the intelligence with which you read: and, believe me, it is wiser and holier, by the fire of your own faith to kindle the ashes of expired religions, than to let your soul shiver and stumble among their graves, through the gathering darkness, and communicable cold.

MARY (*after some pause*). We shall all like reading

Greek history so much better after this ! but it has put everything else out of our heads that we wanted to ask.

L. I can tell you one of the things ; and I might take credit for generosity in telling you ; but I have a personal reason—Lucilla's verse about the creation.

DORA. Oh, yes—yes ; and its ' pain together, until now.'

L. I call you back to that, because I must warn you against an old error of my own. Somewhere in the fourth volume of 'Modern Painters,' I said that the earth seemed to have passed through its highest state : and that, after ascending by a series of phases, culminating in its habitation by man, it seems to be now gradually becoming less fit for that habitation.

MARY. Yes, I remember.

L. I wrote those passages under a very bitter impression of the gradual perishing of beauty from the loveliest scenes which I knew in the physical world ;—not in any doubtful way, such as I might have attributed to loss of sensation in myself—but by violent and definite physical action ; such as the filling up of the Lac de Chêde by landslips from the Rochers des Fiz ;—the narrowing of the Lake Lucerne by the gaining delta of the stream of the Muotta-Thal, which, in the course of years, will cut the lake into two, as that of Brientz has been divided from that of Thun ;—the steady diminishing of the glaciers north of the Alps, and still more, of the sheets of snow on their southern slopes, which supply the refreshing streams of Lombardy :—the equally steady increase of deadly maremma round Pisa and Venice ; and other such phenomena, quite measurably traceable within the limits even of short life, and unaccompanied, as it seemed, by redeeming or compensatory agencies. I am still under the same impression respecting the existing phenomena ; but I feel more strongly, every day, that no evidence to be collected within historical periods can be accepted as any clue to the great tendencies of geological change : but that the great laws

which never fail, and to which all change is subordinate, appear such as to accomplish a gradual advance to lovelier order, and more calmly, yet more deeply, animated Rest. Nor has this conviction ever fastened itself upon me more distinctly, than during my endeavor to trace the laws which govern the lowly framework of the dust. For, through all the phases of its transition and dissolution, there seems to be a continual effort to raise itself into a higher state; and a measured gain, through the fierce revulsion and slow renewal of the earth's frame, in beauty, and order, and permanence. The soft white sediments of the sea draw themselves, in process of time, into smooth knots of sphered symmetry; burdened and strained under increase of pressure, they pass into a nascent marble; scorched by fervent heat, they brighten and blanch into the snowy rock of Paros and Carrara. The dark drift of the inland river, or stagnant slime of inland pool and lake, divides, or resolves itself as it dries, into layers of its several elements; slowly purifying each by the patient withdrawal of it from the anarchy of the mass in which it was mingled. Contracted by increasing drought, till it must shatter into fragments, it infuses continually a finer ichor into the opening veins, and finds in its weakness the first rudiments of a perfect strength. Rent at last, rock from rock, nay, atom from atom, and tormented in lambent fire, it knits, through the fusion, the fibres of a perennial endurance; and, during countless subsequent centuries, declining, or, rather let me say, rising, to repose, finishes the infallible lustre of its crystalline beauty, under harmonies of law which are wholly beneficent, because wholly inexorable.

(The children seem pleased, but more inclined to think over these matters than to talk.)

L. *(after giving them a little time)*. Mary, I seldom ask you to read anything out of books of mine; but there is a passage about the Law of Help, which I want you to read to the children now, because it is of no use merely to put it in other words

for them. You know the place I mean, do not you?

MARY. Yes (*presently finding it*); where shall I begin?

L. Here; but the elder ones had better look afterwards at the piece which comes just before this.

MARY (*reads*):

'A pure or holy state of anything is that in which all its parts are helpful or consistent. The highest and first law of the universe, and the other name of life, is therefore, "help." The other name of death is "separation." Government and co-operation are in all things, and eternally, the laws of life. Anarchy and competition, eternally, and in all things, the laws of death.

'Perhaps the best, though the most familiar, example we could take of the nature and power of consistence, will be that of the possible changes in the dust we tread on.

'Exclusive of animal decay, we can hardly arrive at a more absolute type of impurity, than the mud or slime of a damp, over-trodden path, in the outskirts of a manufacturing town. I do not say mud of the road, because that is mixed with animal refuse; but take merely an ounce or two of the blackest slime of a beaten footpath, on a rainy day, near a manufacturing town. That slime we shall find in most cases composed of clay (or brickdust, which is burnt clay), mixed with soot, a little sand and water. All these elements are at helpless war with each other, and destroy reciprocally each other's nature and power: competing and fighting for place, at every tread of your foot; sand squeezing out clay, and clay squeezing out water, and soot meddling everywhere, and defiling the whole. Let us suppose that this ounce of mud is left in perfect rest, and that its elements gather together, like to like, so that their atoms may get into the closest relations possible.

Let the clay begin. Ridding itself of all foreign substance, it gradually becomes a white earth, already very beautiful, and fit, with help of congealing fire, to be made into finest porcelain, and painted on, and be kept in kings' palaces. But such artificial consistence is not its best. Leave it still quiet, to follow its own instinct of unity, and it becomes, not only white but clear; not only clear, but hard; nor only clear and hard, but so set that it can deal with light in a wonderful way, and gather out of it the loveliest blue rays only, refusing the rest. We call it then a sapphire.

'Such being the consummation of the clay, we give similar permission of quiet to the sand. It also becomes, first, a white earth; then proceeds to grow clear and hard, and at last arranges itself in mysterious, infinitely fine parallel lines, which have the power of reflecting, not merely the blue rays, but the blue, green, purple, and red rays, in the greatest beauty in which they can be seen through any hard material whatsoever. We call it then an opal.

'In next order the soot sets to work. It cannot make itself white at first; but, instead of being discouraged, tries harder and harder; and comes out clear at last; and the hardest thing in the world; and for the blackness that it had, obtains in exchange the power of reflecting all the rays of the sun at once, in the vividest blaze that any solid thing can shoot. We call it then a diamond.

⁴ Last of all, the water purifies, or unites itself ; contented enough if it only reach the form of a dewdrop ; but, if we insist on its proceeding to a more perfect consistence, it crystallizes into the shape of a star. And, for the ounce of slime which we had by political economy of competition, we have, by political economy of co-operation, a sapphire, an opal, and a diamond, set in the midst of a star of snow.'

L. I have asked you to hear that, children, because, from all that we have seen in the work and play of these past days, I would have you gain at least one grave and enduring thought. The seeming trouble,—the unquestionable degradation,—of the elements of the physical earth, must passively wait the appointed time of their repose, or their restoration. It can only be brought about for them by the agency of external law. But if, indeed, there be a nobler life in us than in these strangely moving atoms ;—if, indeed, there is an external difference between the fire which inhabits them, and that which animates us,—it must be shown, by each of us in his appointed place, not merely in the patience, but in the activity of our hope ; not merely by our desire, but our labor, for the time when the Dust of the generations of men shall be confirmed for foundations of the gates of the city of God. The human clay, now trampled and despised, will not be,—cannot be,—knit into strength and light by accident or ordinances of unassisted fate. By human cruelty and iniquity it has been afflicted ;—by human mercy and justice it must raised ; and, in all fear or questioning of what is or is not, the real message of creation, or of revelation, you may assuredly find perfect peace, if you are resolved to do that which your Lord has plainly required,—and content that He should indeed require no more of you,—than to do Justice, to love Mercy, and to walk humbly with Him.

NOTES.

NOTE I., page 23.—‘*That third pyramid of hers.*’

THROUGHOUT the dialogues, it must be observed that ‘Sibyl’ is addressed (when in play), as having once been the Cumæan Sibyl; and ‘Egypt’ as having been queen Nitocris,—the Cinderella, and ‘the greatest heroine and beauty’ of Egyptian story. The Egyptians called her ‘Neith the Victorious’ (Nitocris) and the Greeks ‘Face of the Rose’ (Rhodope). Chaucer’s beautiful conception of Cleopatra in the ‘Legend of Good Women,’ is much more founded on the traditions of her than on those of Cleopatra; and, especially in its close, modified by Herodotus’s terrible story of the death of Nitocris, which, however, is mythologically nothing more than a part of the deep monotonous ancient dirge for the fulfilment of the earthly destiny of Beauty; ‘She cast herself into a chamber full of ashes.’

I believe this Queen is now sufficiently ascertained to have either built, or increased to double its former size, the third pyramid of Gizeh: and the passage following in the text refers to an imaginary endeavor, by the Old Lecturer and the children together, to make out the description of that pyramid in the 167th page of the second volume of Bunsen’s ‘Egypt’s Place in Universal History’—ideal endeavor,—which ideally terminates as the Old Lecturer’s real endeavors to the same end always have terminated. There are, however, valuable notes respecting Nitocris at page 210 of the same volume: but the ‘Early Egyptian History for the Young,’ by the author of Sidney Gray, contains, in a pleasant form, as much information as young readers will usually need.

NOTE II., page 24.—‘*Pyramid of Asychis.*’

THIS pyramid, in mythology, divides with the Tower of Babel the shame, or vain glory, of being presumptuously,

and first among great edifices, built with 'brick for stone.' This was the inscription on it, according to Herodotus:—

'Despise me not, in comparing me with the pyramids of stone; for I have the pre-eminence over them, as far as Jupiter has pre-eminence over the gods. For, striking with staves into the pool, men gathered the clay which fastened itself to the staff, and kneaded bricks out of it, and so made me.'

The word I have translated 'kneaded' is literally 'drew;' in the sense of drawing, for which the Latins used, 'duco;' and thus gave us our 'ductile' in speaking of dead clay, and Duke, Doge, or leader, in speaking of living clay. As the asserted pre-eminence of the edifice is made, in this inscription, to rest merely on the quantity of labor consumed in it, this pyramid is considered, in the text, as the type, at once, of the base building, and of the lost labor, of future ages; so far at least as the spirits of measured and mechanical effort deal with it: but Neith, exercising her power upon it, makes it a type of the work of wise and inspired builders.

NOTE III., page 25.—'The Greater Pthah.'

It is impossible, as yet, to define with distinctness the personal agencies of the Egyptian deities. They are continually associated in function, or hold derivative powers, or are related to each other in mysterious triads; uniting always symbolism of physical phenomena with real spiritual power. I have endeavored partly to explain this in the text of the tenth Lecture; here, it is only necessary for the reader to know that the Greater Pthah more or less represents the formative power of order and measurement: he always stands on a four-square pedestal, 'the Egyptian cubit, metaphorically used as the hieroglyphic for truth;' his limbs are bound together, to signify fixed stability, as of a pillar; he has a measuring-rod in his hand; and at Philæ, is represented as holding an egg on a potter's wheel; but I do not know if this symbol occurs in older sculptures. His usual title is the 'Lord of Truth.' Others very beautiful: 'King of the Two Worlds of Gracious Countenance,' 'Superintendent of the Great Abode,' etc., are given by Mr. Birch in Arundale's 'Gallery of Antiquities,'

which I suppose is the book of best authority easily accessible. For the full titles and utterances of the gods, Rosellini is as yet the only—and I believe, still a very questionable—authority; and Arundale's little book, excellent in the text, has this great defect, that its drawings give the statues invariably a ludicrous or ignoble character. Readers who have not access to the originals must be warned against this frequent fault in modern illustration (especially existing also in some of the painted casts of Gothic and Norman work at the Crystal Palace). It is not owing to any wilful want of veracity: the plates in Arundale's book are laboriously faithful: but the expressions of both face and body in a figure depend merely on emphasis of touch; and, in barbaric art, most draughtsmen emphasize what they plainly see—the barbarism; and miss conditions of nobleness, which they must approach the monument in a different temper before they will discover and draw with great subtlety before they can express.

The character of the Lower Pthah, or perhaps I ought rather to say, of Pthah in his lower office, is sufficiently explained in the text of the third Lecture; only the reader must be warned that the Egyptian symbolism of him by the beetle was not a scornful one; it expressed only the idea of his presence in the first elements of life. But it may not unjustly be used, in another sense, by us, who have seen his power in new development; and, even as it was, I cannot conceive that the Egyptians should have regarded their beetle-headed image of him (Champollion, 'Pantheon,' pl. 12), without some occult scorn. It is the most painful of all their types of any beneficent power; and even among those of evil influences, none can be compared with it, except its opposite, the tortoise-headed demon of indolence.

Pasht (p. 24, line 4) is connected with the Greek Artemis, especially in her offices of judgment and vengeance. She is usually lioness-headed; sometimes cat-headed; her attributes seeming often trivial or ludicrous unless their full meaning is known; but the inquiry is much too wide to be followed here. The cat was sacred to her; or rather to the sun, and secondarily to her. She is alluded to in the text because she is always the companion of Pthah (called the 'beloved of Pthah,' it may be as Judgment, demanded and longed for by Truth); and it may be well for young readers to have this fixed in their minds, even by chance association. There are more statues of Pasht in

the British Museum than of any other Egyptian deity; several of them fine in workmanship; nearly all in dark stone, which may be, presumably, to connect her, as the moon, with the night; and in her office of avenger, with grief.

Thoth (p. 26, line 34), is the Recording Angel of Judgment; and the Greek Hermes. Phre (line 21), is the Sun.

Neith is the Egyptian spirit of divine wisdom; and the Athena of the Greeks. No sufficient statement of her many attributes, still less of their meanings, can be shortly given; but this should be noted respecting the veiling of the Egyptian image of her by vulture wings—that as she is, physically, the goddess of the air, this bird, the most powerful creature of the air known to the Egyptians, naturally became her symbol. It had other significations; but certainly this, when in connection with Neith. As representing her, it was the most important sign, next to the winged sphere, in Egyptian sculpture; and, just as in Homer, Athena herself guides her heroes into battle, this symbol of wisdom, giving victory, floats over the heads of the Egyptian kings. The Greeks, representing the goddess herself in human form, yet would not lose the power of the Egyptian symbol, and changed it into an angel of victory. First seen in loveliness on the early coins of Syracuse and Leontium, it gradually became the received sign of all conquest, and the so-called 'Victory' of later times; which, little by little, loses its truth, and is accepted by the moderns only as a personification of victory itself,—not as an actual picture of the living Angel who led to victory. There is a wide difference between these two conceptions,—all the difference between insincere poetry, and sincere religion. This I have also endeavored farther to illustrate in the tenth Lecture; there is however one part of Athena's character which it would have been irrelevant to dwell upon there; yet which I must not wholly leave unnoticed.

As the goddess of the air, she physically represents both its beneficent calm, and necessary tempest: other storm-deities (as Chrysaor and Æolus) being invested with a subordinate and more or less malignant function, which is exclusively their own, and is related to that of Athena as the power of Mars is related to hers in war. So also Virgil makes her able to wield the lightning herself, while Juno cannot, but must pray for the intervention of Æolus. She has precisely the correspondent moral authority over calmness of mind, and just anger. She soothes Achilles, as she incites Tydides; her physical power over the air being

always hinted correlatively. She grasps Achilles by his hair—as the wind would lift it—softly,

It fanned his cheek, it raised his hair,
Like a meadow gale in spring.

She does not merely turn the lance of Mars from Diomed; but seizes it in both her hands, and casts it aside, with a sense of making it vain, like chaff in the wind;—to the shout of Achilles, she adds her own voice of storm in heaven—but in all cases the moral power is still the principal one—most beautifully in that seizing of Achilles by the hair, which was the talisman of his life (because he had vowed it to the Sperchius if he returned in safety), and which, in giving at Patroclus' tomb, he, knowingly, yields up the hope of return to his country, and signifies that he will die with his friend. Achilles and Tydides are, above all other heroes, aided by her in war, because their prevailing characters are the desire of justice, united in both, with deep affections; and, in Achilles, with a passionate tenderness, which is the real root of his passionate anger. Ulysses is her favorite chiefly in her office as the goddess of conduct and des'

NOTE IV., page 56.—'Geometrical limitations.'

It is difficult, without a tedious accuracy, or without full illustration, to express the complete relations of crystalline structure, which dispose minerals to take, at different times, fibrous, massive, or foliated forms; and I am afraid this chapter will be generally skipped by the reader: yet the arrangement itself will be found useful, if kept broadly in mind; and the transitions of state are of the highest interest, if the subject is entered upon with any earnestness. It would have been vain to add to the scheme of this little volume any account of the geometrical forms of crystals—an available one, though still far too difficult and too copious, has been arranged by the Rev. Mr. Mitchell, for Orr's 'Circle of the Sciences'; and, I believe, the 'nets' of crystals, which are herein given to be cut out with scissors and put prettily together, will be found more conquerable by young ladies than by other students. They should also, when an opportunity occurs, be shown, at any public library, the diagram of the crystallization of quartz re-

ferred to poles, at p. 8 of Cloizaux's 'Manuel de Minéralogie': that they may know what work is; and what the subject is.

With a view to more careful examination of the nascent states of silica, I have made no allusion in this volume to the influence of mere segregation, as connected with the crystalline power. It has only been recently, during the study of the breccias alluded to in page 119, that I have fully seen the extent to which this singular force often modifies rocks in which at first its influence might hardly have been suspected; many apparent conglomerates being in reality formed chiefly by segregation, combined with mysterious brokenly-zoned structures, like those of some malachites. I hope some day to know more of these and several other mineral phenomena (especially of those connected with the relative sizes of crystals), which otherwise I should have endeavored to describe in this volume.

NOTE V., page 107.—'St. Barbara.'

I WOULD have given the legends of St. Barbara, and St. Thomas, if I had thought it always well for young readers to have everything at once told them which they may wish to know. They will remember the stories better after taking some trouble to find them; and the text is intelligible enough as it stands. The idea of St. Barbara, as there given, is founded partly on her legend in Peter de Natalibus, partly on the beautiful photograph of Van Eyck's picture of her at Antwerp: which was some time since published at Lille.

NOTE VI., page 145.—'King of the Valley of Diamonds.'

ISABEL interrupted the Lecturer here, and was briefly bid to hold her tongue; which gave rise to some talk, apart, afterwards, between L. and Sibyl, of which a word or two may be perhaps advisedly set down.

SIBYL. We shall spoil Isabel, certainly, if we don't mind: I was glad you stopped her, and yet sorry; for she wanted so much to ask about the Valley of Diamonds again, and she has worked so hard at it, and made it nearly all out by herself. She recollected Elisha's throwing in the meal, which nobody else did.

L. But what did she want to ask?

SIBYL. About the mulberry trees and the serpents; we are all stopped by that. Won't you tell us what it means?

L. Now, Sibyl, I am sure you, who never explained yourself, should be the last to expect others to do so. I hate explaining myself.

SIBYL. And yet how often you complain of other people for not saying what they meant. How I have heard you growl over the three stone steps to purgatory; for instance!

L. Yes; because Dante's meaning is worth getting at; but mine matters nothing: at least, if ever I think it is of any consequence, I speak it as clearly as may be. But you may make anything you like of the serpent forests. I could have helped you to find out what they were, by giving a little more detail, but it would have been tiresome.

SIBYL. It is much more tiresome not to find out. Tell us, please, as Isabel says, because we feel so stupid.

L. There is no stupidity; you could not possibly do more than guess at anything so vague. But I think, you, Sibyl, at least, might have recollected what first dyed the mulberry?

SIBYL. So I did; but that helped little; I thought of Dante's forest of suicides, too, but you would not simply have borrowed that?

L. No. If I had had strength to use it, I should have stolen it, to beat into another shape; not borrowed it. But that idea of souls in trees is as old as the world; or at least, as the world of man. And I *did* mean that there were souls in those dark branches;—the souls of all those who had perished in misery through the pursuit of riches; and that the river was of their blood, gathering gradually, and flowing out of the valley. Then I meant the serpents for the souls of those who had lived carelessly and wantonly in their riches; and who have all their sins forgiven by the world, because they are rich: and therefore they have seven crimson-crested heads, for the seven mortal sins; of which they are proud: and these, and the memory and report of them, are the chief causes of temptation to others, as showing the pleasantness and absolving power of riches; so that thus they are singing serpents. And the worms are the souls of the common money-getters and traffickers, who do nothing but eat and spin: and who gain habitually by the distress or foolishness of others (as you see the butchers have been gaining out of the panic at

the cattle plague, among the poor),—so they are made to eat the dark leaves, and spin, and perish.

SIBYL. And the souls of the great, cruel, rich people who oppress the poor, and lend money to government to make unjust war, where are they?

L. They change into the ice, I believe, and are knit with the gold; and make the grave-dust of the valley. I believe so, at least, for no one ever sees those souls anywhere.

(SIBYL ceases questioning.)

ISABEL (*who has crept up to her side without any one's seeing*). Oh, Sibyl, please ask him about the fireflies!

L. What, you there, mousie! No; I won't tell either Sibyl or you about the fireflies; nor a word more about anything else. You ought to be little fireflies yourselves, and find your way in twilight by your own wits.

ISABEL. But you said they burned, you know?

L. Yes; and you may be fireflies that way too, some of you, before long, though I did not mean that. Away with you, children. You have thought enough for to-day.

THE END.

1. The first step in the process is to identify the problem or issue that needs to be addressed. This involves gathering information and understanding the context of the problem.

2. Once the problem is identified, the next step is to define the objectives and goals of the project. This helps to clarify what needs to be achieved and provides a clear direction for the work.

3. The third step is to develop a plan or strategy to address the problem. This involves breaking down the problem into smaller, manageable tasks and determining the resources needed to complete them.

4. The fourth step is to implement the plan. This involves putting the strategy into action and monitoring progress to ensure that the objectives are being met.

5. The final step is to evaluate the results of the project. This involves assessing the effectiveness of the plan and identifying any areas for improvement or further action.

6. The sixth step is to communicate the results of the project to the relevant stakeholders. This helps to ensure that everyone is aware of the progress and outcomes of the work.

7. The seventh step is to reflect on the project and learn from the experience. This involves identifying what worked well and what could be improved for future projects.

8. The eighth step is to document the project and its results. This helps to create a record of the work and provides a reference for future projects.

9. The ninth step is to celebrate the success of the project. This helps to boost morale and encourages team members to continue to work hard.

10. The tenth step is to review the project and its results. This helps to ensure that the project was completed successfully and that the objectives were met.

11. The eleventh step is to identify any lessons learned from the project. This helps to improve the process and ensure that similar issues do not arise in the future.

12. The twelfth step is to share the results of the project with the wider organization. This helps to ensure that everyone is aware of the progress and outcomes of the work.

13. The thirteenth step is to evaluate the overall impact of the project. This helps to determine the value of the work and the effectiveness of the plan.

14. The fourteenth step is to identify any areas for further action. This helps to ensure that the project is completed successfully and that the objectives are met.

15. The fifteenth step is to review the project and its results. This helps to ensure that the project was completed successfully and that the objectives were met.

16. The sixteenth step is to identify any lessons learned from the project. This helps to improve the process and ensure that similar issues do not arise in the future.

17. The seventeenth step is to share the results of the project with the wider organization. This helps to ensure that everyone is aware of the progress and outcomes of the work.

18. The eighteenth step is to evaluate the overall impact of the project. This helps to determine the value of the work and the effectiveness of the plan.

19. The nineteenth step is to identify any areas for further action. This helps to ensure that the project is completed successfully and that the objectives are met.

20. The twentieth step is to review the project and its results. This helps to ensure that the project was completed successfully and that the objectives were met.
